# FOREWORD

Title VIII of the Congressional Budget Act of 1974 (P.L. 93-344) assigned the Comptroller General the responsibility to identify congressional information needs as expressed in legislative requirements; to monitor the reporting requirements of the Congress; to furnish program evaluations conducted or commissioned by any Executive agency; to identify congressional needs for fiscal, budgetary and program-related information; and to maintain a central file or files of fiscal and budgetary information.

As part of its efforts to fulfill these responsibilities, the General Accounting Office (GAO) has established and maintains the Congressional Information Sources Inventories and Directories (CISID) data base. It consists of inventories of requirements for reports to the Congress, evaluation studies, and fiscal, budgetary, and program-related information sources and systems. This data base is maintained on central computer files and is transferable to other organizations, including the Library of Congress' SCORPIO information retrieval system, thus facilitating the use of the inventories by the Congress and others.

For those who may not have immediate access to SCORPIO, or other systems providing access to CISID, GAO regularly publishes the Congressional Sourcebook Series. This series of directories reflects the updating of the inventories' contents. It consists of three separate volumes. Each volume is an indexed directory and guide, addressing the following areas:

(1) *Federal Evaluations*—describes program and management evaluation reports produced by and for the departments and agencies of the Federal Government. Published annually.

(2) *Requirements for Recurring Reports to the Congress*—describes the requirements for statutory and nonstatutory recurring reports to the Congress from the executive, legislative and judicial branches of the Federal Government and from independent agencies and federally chartered corporations. Published every 2 years.

(3) *Federal Information Sources and Systems*—describes major documents, facilities, and systems maintained by Federal agencies, which support agencies' missions and contain fiscal, budgetary, and program-related information. Published every 4 years.

The Congressional Sourcebook Series volumes, together with the CISID computer tapes, are designed to facilitate identification, acquisition, and utilization of relevant and reliable information which is needed by the Congress in carrying out its oversight and budget control responsibilities.

The Congressional Sourcebook Series will be distributed to each member of the Congress, each congressional committee and subcommittee, congressional staffs, the President and Vice President of the United States, the head of each Federal department and agency, the Chief Justice of the United States and other officials of the Judicial Branch, State government officials, and libraries.

I invite your comments and suggestions on how these directories can be made more useful in future editions.

CHARLES A. BOWSHER
Comptroller General of the United States

# INTRODUCTION

As part of a continuing effort to provide the Congress with improved access to program and management evaluation information in the Federal government, the General Accounting Office is publishing the fifth volume of the Federal Evaluations Sourcebook. The Sourcebook inventories program and management evaluations conducted by Federal agencies to determine if programs and operations are meeting their objectives. This document facilitates access to this information and should be a valuable reference tool for the Congress' use in carrying out its budget and oversight responsibilities.

The directory is divided into two sections, the citation section and the index section. The citation section is organized by agency and contains, for each evaluation cited, standard bibliographic information, a descriptive abstract, budget and program data, authorizing legislation, congressional committees of relevance, geographic coverage, and public availability. The index section provides access to the citation section by subject, agency, congressional committee, law, budget function, and program. The User's Guide on page xi provides a detailed explanation of how to use the two sections.

## PURPOSE AND SCOPE

*Federal Evaluations* is published primarily to facilitate access to the evaluation information in the Federal government which may be useful to the Congress. The directory permits the user to identify and locate evaluative studies on specific programs or other areas of interest. Thus, while the primary orientation is toward the Congressional user, the directory should also prove useful to others—those who produce or use evaluation studies and therefore need to know what work has been done in a given program or subject area.

This volume was derived from the inventory of Federal Evaluations (E-File) of the Congressional Information Sources Inventories and Directories (CISID) data base. It describes approximately 1,770 evaluations prepared by Federal agencies between October 1, 1980, and September 30, 1981. The previous four volumes identified approximately 7000 evaluation reports completed between 1972 and 1980. A cumulative index titled *Federal Evaluations: A Cumulative Index FY 73-FY 80* (PAD-82-10) provides access to the first four volumes by subject, congressional committees, and public law name and number.

## METHODOLOGY

Agencies were asked in July-August 1981 to submit a survey form on each program and management evaluation completed since October 1, 1980. Agency personnel were provided with guidelines explaining the purpose of the survey and containing conceptual guidance and detailed instructions for completing the survey forms.

The terms "program," "program evaluation," and "management evaluation" have not yet achieved a uniform interpretation throughout the Federal government. This lack of uniformity is reflected in this Sourcebook. Some of the citations represent rigorous scientific evaluations; others are undoubtedly less rigorous or evaluative. Some of the studies appear to be comprehensive reviews of entire programs or major components; others are more narrowly focused on specific activities within programs.

Because of our interest in making the Sourcebook as complete as possible, GAO did not attempt to screen out entries by applying rigorous standards of relevance or validity. Our judgment has been that an evaluation which some may consider flawed can still contain useful information for a decisionmaker. In general, each agency determined its contribution to the Sourcebook on the basis of its best judgment as to what reflected its evaluation activity.

## AVAILABILITY OF REPORTS CITED IN THIS DIRECTORY

The General Accounting Office does not possess copies of the reports cited in this directory, except for those produced by GAO. Copies of other agencies' reports must be obtained from the agency or from the other sources identified in the citation. Listed below is information on how to obtain reports from the General Accounting Office (GAO), the Government Printing Office (GPO), and the National Technical Information Service (NTIS).

**General Accounting Office.** Requests for copies of GAO reports should be sent to:

*U.S. General Accounting Office*
*Document Handling and Information Services Facility*
*P.O. Box 6015*
*Gaithersburg, MD 20760*
*Telephone: (202) 275-6241*

The first five copies of individual reports are free of charge. Additional copies of bound audit reports are $3.25 each. Additional copies of unbound reports (i.e., letter reports) and most other publications are $1.00 each. There will be a 25% discount on all orders for 100 or more copies mailed to a single address. Sales orders must be prepaid on a cash, check, or money order basis. Checks should be made out to the "Superintendent of Documents." GAO reports are also available on microfiche.

**Government Printing Office.** A number of reports are shown as being available from the GPO, Superintendent of Documents. Reports may be purchased from this source by writing to:

*Superintendent of Documents*
*U.S. Government Printing Office*
*Washington, D.C. 20402*
*Telephone: (202) 783-3238*

Include the GPO Stock Number when ordering reports. All orders must be prepaid. Visa and Master Card credit cards are accepted.

**National Technical Information Service.** Reports on file with NTIS should be ordered from:

*NTIS*
*5285 Port Royal Road*
*Springfield, VA 22161*
*Telephone: (703) 487-4650*

The order must include the report's NTIS number and should also include the title as a cross-check. The fastest service is provided to customers who charge to their Deposit Accounts or their American Express, Visa, or Master Card credit cards. Otherwise, payment by check or money order must accompany each order. A "ship and bill" service is available to customers who have established credit at a $5 surcharge on each order.

## AVAILABILITY OF COPIES OF THIS DIRECTORY

Both microfiche and paper copies of this directory are available free of charge to the Congress; Federal, State and local government agencies; members of the press; and academic libraries, by writing to:

*U.S. General Accounting Office*
*Document Handling and Information Services Facility*
*P.O. Box 6015*
*Gaithersburg, MD 20760*
*Telephone: (202) 275-6241*

Other organizations, officials, and individuals may purchase the directory by writing to:

*Superintendent of Documents*
*U.S. Government Printing Office*
*Washington, D.C. 20402*
*Telephone: (202) 783-3238*

The GPO Stock Number for this volume is 020-000-00213-1.

## QUESTIONS ABOUT THIS DIRECTORY

Questions regarding the information contained in this directory should be addressed to:

*Director, Program Analysis Division*
*U.S. General Accounting Office*
*441 G Street, NW.*
*Washington, D.C. 20548*
*Telephone: (202) 275-4614*

# USER'S GUIDE

*Federal Evaluations* attempts to provide the user with access to the most comprehensive collection of Federal agency program and management evaluation information. It is divided into two sections, the Citation Section and the Index Section.

## Citation Section

The citation section is arranged by agency. GAO evaluation reports on an agency's programs are named following the entries citing evaluations conducted by the agency itself. Evaluation citations for the 14 major departments appear first followed by those of the independent agencies, boards, and commissions. A section on multi-agency evaluations is also included. The multi-agency evaluations are evaluations conducted by GAO in which GAO reviewed the programs of more than one agency.

Each citation refers to an evaluation that has been completed or is in process. A citation may contain as many as 18 information elements, although all elements are rarely included for any one citation. The information elements are shown in the following sample citation entry. An explanation of each element follows the sample.

### Sample Citation

| 15. Program Objectives | **Program Objectives:** The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. | |
| 16. Abstract | **Abstract:** This study uses the initial two cohorts of the Continuous Longitudinal Manpower Survey (CLMS) to examine the earnings paths of persons who enrolled in audit-oriented Comprehensive Employment and Training Act (CETA) programs during the first six months of 1975. By using a pooled cross-section/time series data structure and multiple regression, earnings patterns from the fourth quarter prior to entry through the eighth quarter after termination are examined. Although it cannot be attributed to program participation, one overall pattern stood out among the several identified: postprogram earnings paths moved upward and there is no "fall back" to preprogram levels. The author cautions that the study findings are "exploratory and suggestive rather than conclusive." | |
| 17. Agency Contact | **Agency Contact:** Employment and Training Administration. (202) 376-7304. | |

1. **Accession Number:** 9-character alphanumeric which uniquely identifies the citation entry.
2. **Title/Subtitle:** Title of the evaluation report as derived from the title page or cover of the source document, or a proposed title, if the evaluation is in process.
3. **Agency Control Number:** Data inventory number assigned to the evaluation report by the preparing agency for internal reference, control, or cataloging purposes.
4. **Issue Date:** Actual or projected date of issue or publication.
5. **Volume/Pagination:** Number of volumes and pages in the evaluation document(s).
6. **Author(s):** Individual(s) who had primary responsibility for preparing the evaluation report. If three or more individuals were involved, usually only the first one is listed.
7. **Contractor:** Nongovernment contractor performing the evaluation and producing the report.
8. **OMB Funding Code/Title:** 11-digit identification code(s) and the associated budget account title(s) related to the specific program(s) being evaluated.
9. **Program:** Program(s) being evaluated in the study.
10. **Catalog of Federal Domestic Assistance Number:** CFDA number for program(s) listed in the *Catalog of Federal Domestic Assistance.*
11. **Congressional Relevance:** Congressional committees having oversight and spending jurisdiction for the program(s) evaluated.
12. **Law Authority:** Appropriate statutory or nonstatutory authority for the program(s) evaluated in the report, including the Public Law name and number, if appropriate.
13. **Availability:** Source(s) from which a report is available. The source(s) may be the issuing agency itself, GAO, GPO, NTIS, or other sources. Some reports are for internal use only.
14. **Geographic Relevance:** Level(s) of geographic reference utilized when aggregating data contained in the evaluation, e.g., national, state, county, Congressional District, etc.
15. **Program Objectives:** Objectives of the program(s) being evaluated in terms of purpose(s) and scope.
16. **Abstract:** Summary of the contents of the evaluation report, stating findings, conclusions, and recommendations.
17. **Agency Contact:** Office and telephone number of the issuing/preparing agency that can provide additional information on the evaluation.
18. **Agencies Evaluated:** Agencies whose programs were reviewed by GAO when more than one agency's programs were evaluated. This information element appears only in the multi-agency evaluations section.

## Index Section

Six separate indexes in this section allow the user to search for the evaluation information located in the Citation Section. Each index refers the user back to the Citation Section by a report title and accession number reference. To assist the user, a short explanation and sample entry appear at the beginning of each index. Descriptions of the indexes follow:

- **Subject Index:** This index allows the user to identify evaluation reports by searching for keywords relating to a chosen subject area. Subjects, concepts, and topics as well as names of specific entities, such as organizations and places, are arranged alphabetically.
- **Agency Index:** This index permits the user to identify evaluation reports on a specific Federal agency. Parent departments and agencies and subordinate bureaus and offices are arranged alphabetically.
- **Congressional Index:** This index allows the reader to identify evaluations relating to a particular Congressional committee. Individual evaluation reports are indexed under the committees that have oversight and spending responsibility for the program(s) evaluated. House of Representatives, Senate, and Joint Committees are arranged alphabetically.
- **Law Index:** This index assists the user whose familiarity with programs is based on the law that established the program. It is divided into four subsections of statutory references: Public Law Name; Public Law Number; U.S. Code number; and U.S. Statutes-at-Large number. The index also includes a Miscellaneous Authorities section which contains references to nonstatutory authorities, e.g. Executive Orders.
- **Budget Function Index:** This index enables the reader to identify evaluation reports as they relate to the budget functional/subfunctional categories by which Federal funds are classified. The three-digit codes are arranged in numerical sequence.
- **Program Index:** This index allows the user to identify evaluation reports relating to a specific program. Program names, for the most part taken from the Program and Financing Schedule of the Fiscal Year 1982 *Appendix to the Budget of the United States Government,* are arranged alphabetically.

## COUNCIL ON ENVIRONMENTAL QUALITY

**E00105-001**
*The Council on Environmental Quality: A Tool in Shaping National Policy.* (CED-81-66).
3/19/81; 18 pp. + 2 app. (2 pp.)
**OMB Funding Code/Title:** 11-1453-0-1-802 / Council on Environmental Quality and Office of Environmental Quality
**Program:** Environmental Policy Development and Program Evaluation
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works; *Senate* Committee on Commerce, Science and Transportation; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Environmental Policy Act of 1969 (P.L. 91-190, title II, § 204; 83 Stat. 852; 42 U.S.C. 4344). Environmental Quality Improvement Act of 1970 (P.L. 91-224, title II, § 203; 84 Stat. 114; 42 U.S.C. 4372). Toxic Substances Control Act (P.L. 94-469, § 2; 90 Stat. 2003; 15 U.S.C. 2601).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Council on Environmental Quality (CEQ) serves as an environmental advisor to the President and to Congress and has broached such issues as solar energy, land use, toxic substances, and endangered species. It has been instrumental in effecting the passage of major environmental legislation. *Abstract:* An in-depth look at CEQ's responsibilities and how they have been carried out was presented. Questions concerning whether another agency could effectively fill the role of CEQ and whether there is a continued need for the role were addressed. CEQ is organized by environmental issue areas to provide broad but flexible coverage of major environmental concerns and problems. Its workload consists of projects required by law, special projects requested by the White House, and self-initiated projects. CEQ oversees and coordinates Federal environmental efforts by: (1) advising the President and Congress on major environmental issues and problems; (2) coordinating the environmental efforts of Federal agencies' programs; (3) acting as a clearinghouse for environmental information; and (4) formulating and issuing regulations for Federal agencies to follow in reporting the environmental impacts of programs. CEQ has been successful in carrying out its responsibilities, but GAO perceived a continuing need for the delicate role of CEQ in balancing environmental concerns with the many Federal actions dealing with other national concerns such as energy development and economic growth.

**Agency Contact:** General Accounting Office (202) 755-9100.

## COUNCIL ON WAGE AND PRICE STABILITY

**E00107-001**
*The Council on Wage and Price Stability Has Not Stressed Productivity in Its Efforts To Reduce Inflation.* (FGMSD-81-8).
10/16/80; 39 pp.
**OMB Funding Code/Title:** 11-1600-0-1-802 / Salaries and Expenses
**Program:** Program Direction and Policy Coordination
**Congressional Relevance:** *House* Committee on Government Operations; *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Council on Wage and Price Stability Act, as amended (P.L. 93-387, § 2-4; 88 Stat. 750; 12 U.S.C. 1904).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objective of the study is to evaluate the Council on Wage and Price Stability's efforts to encourage productivity through its voluntary wage and price standards and through its position in economic decisionmaking. Despite Congressional concern that the Council on Wage and Price Stability focus on productivity improvement to reduce inflation, the Council has not actively encouraged productivity improvement. The Council believes it can best stimulate productivity by reducing inflation and has directed its efforts to monitoring wages and prices and reviewing Government regulatory actions. The Council has neglected an effective mechanism to reduce inflation. GAO recommends that the Council place more emphasis on its statutory responsibilities to focus attention on the need to increase productivity in the design and implementation of the wage and price standards.

**Agency Contact:** General Accounting Office (202) 275-1584.

## OFFICE OF MANAGEMENT AND BUDGET

**E00110-001**
*Review of Federal Agencies' Gift Funds.* (FGMSD-80-77).
9/24/80; 3 pp. + 4 app. (11 pp.)
**OMB Funding Code/Title:** 11-0300-0-1-802 / Salaries and Expenses
**Program:** Management, Regulation, and Information
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 67-13, title II, § 207; 42 Stat. 22; 31 U.S.C. 16).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* A request was made to review the larger gift funds managed by Federal agencies, including fund balances, sources of income, and purposes of expenditures with particular emphasis on travel and entertainment. During the Fiscal Year 1979, 41 Government agencies received a total of $21,631,000 classified as gift revenue. The revenue was derived from a variety of sources including private individuals, corporations, and nonprofit organizations. In addition to donations, income such as honoraria, travel reimbursements, and funds, received under agreements between Federal agencies and nongovernmental organizations is also classified as gift revenue. The agencies have great flexibility in using gift funds depending on their needs. GAO evaluated selected gift fund disbursements in light of this broad discretion and found that the funds were generally used to further agency goals. Because gift funds are financed by private sources, they do not go through the appropriation process as would other agency funds. Thus, Congress is not involved in setting funding limits or priorities for gift fund activities. In addition, Congress receives only minimal information about gift fund activities. In view of the lack of gift fund information available to Congress, the Office of Management and Budget should: (1) require Federal agencies to more fully disclose gift fund operations in their budget submissions; (2) review agency budget submissions to assure that reporting requirements are met; and (3) develop Government-wide criteria for the solicitation, receipt, and use of gift funds.

**Agency Contact:** General Accounting Office (202) 634-5217.

**E00110-002**
*Continuing and Widespread Weaknesses in Internal Controls Result in Losses Through Fraud, Waste, and Abuse.* (FGMSD-80-65).
8/80; 33 pp. + 2 app. (3 pp.)
**OMB Funding Code/Title:** 11-0300-0-1-802 / Salaries and Expenses
**Program:** Management, Regulation, and Information
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 67-13, title II, § 207; 42 Stat. 22; 31 U.S.C. 16).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* System vulnerability results from a series of longstanding, undetected weaknesses. While agencies usually correct specified deficiencies, they are generally slow to correct systemwide deficiencies in collection, disbursement, obligation, and imprest fund activities. Inadequate controls over collection could not ensure that amounts owed the Government were recorded as accounts receivable or that overdue accounts were identified and collected. Often, accounts receivable were so poorly controlled and safeguarded that the potential for theft, loss, or other misuse was high. Controls over disbursement activities were found to be deficient. Disregard for basic control procedures prescribed in manuals resulted in waste and overpayments. About half of the offices reviewed had serious weaknesses in controls over obligations that could result in improper or illegal payments. The most widespread deficiencies were noted in imprest fund activities. Weak controls together with the susceptibility of imprest funds to misuse allowed substantial losses to the Government. It was concluded that adequate internal audit coverage could have detected most of the deficiencies found. Legislation under consideration would place greater responsibilities on the heads of Federal agencies for improving their agencies' financial systems. Under this legislation, agencies would be required to undertake evaluation of their organizations' systems of internal control and report annually to Congress and to the President the results of such evaluations.

*Are Written Guidelines Needed To Establish New Agencies' Funding Needs.* (FGMSD-80-64).
8/6/80; 4 pp.
**OMB Funding Code/Title:** 11-0300-0-1-802 / Salaries and Expenses
**Program:** Management, Regulation, and Information
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 67-13, title II, § 207; 42 Stat. 22; 31 U.S.C. 16).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO was asked to inquire into the need for the Office of Management and Budget (OMB) to publish guidelines for new Federal agencies to follow in preparing requests for initial or supplemental budgets to cover their first year of operation. The request was prompted by problems the Merit Systems Protection Board encountered when it began operation in Fiscal Year 1979. The Board originally did not get enough funds to cover its operating costs for the year and experienced some difficulty in obtaining the needed funds. Analysis of the problems that the Board had in obtaining funding for operation showed that the Board had some unique problems, including the fact that the Board was given additional responsibilities in its charter beyond those originally planned, and the fact that the Board's operation was expected to be relatively small in the first year but was later increased by managerial decisions. Both of these conditions developed after the initial budget was submitted to Congress and would not have been avoided even if general guidelines existed. Additionally, OMB officials believe they could not identify any instances where general guidelines would have helped overcome budgeting problems of new agencies. Each new agency has a unique set of problems that must be resolved individually. Thus, GAO believes that general budgetary guidance could be developed for use by new agencies, but it would be impractical to develop guidance covering all possible problems that might develop.

*Proposed Changes in Federal Matching and Maintenance of Effort Requirements for State and Local Governments.* (GGD-81-7).
12/23/80; 74 pp.
**OMB Funding Code/Title:** 11-0300-0-1-802 / Salaries and Expenses
**Program:** Management, Regulation, and Information
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 67-13, title II, § 207; 42 Stat. 22; 31 U.S.C. 16).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County; Standard Metro. Stat. Area (SMSA)

*Abstract:* Matching and maintenance of effort requirements are often not effective in accomplishing their intended purposes of generating State and local government fiscal and managerial commitments to Federal programs. Even when effective from this standpoint, the requirements can produce adverse effects by distorting State and local budget priorities and deterring needy grantees from participating in the programs. The appropriateness of these two requirements is further questioned due to the recent reductions in State and local budgets and taxes which make these requirements more onerous for the State and local sector. Matching requirements should be used more sparingly and only where the Federal Government is not concerned with distributing the money to areas most in need; such requirements, in addition, need to be strengthened. Maintenance of effort requirements serve a more central Federal purpose in that they can ensure that Federal funds are not used by State and local governments to merely substitute for existing State or local spending. Congress should enact a standard maintenance of effort requirement which would promote this objective while, at the same time, allowing grantees to reduce their own spending (provided such spending is dictated by bona fide reasons such as tax reduction and productivity improvements).

## OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

### E00113-001

*Trade Preference Program Decision Could Be More Fully Explained.* (ID-81-10).
11/6/80; 61 pp. + 3 app. (16 pp.)
**OMB Funding Code/Title:** 11-0400-0-1-802 / Salaries and Expenses
**Program:** Trade Policy Coordination
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Trade Act of 1974 (P.L. 93-618, title I, § 141; 88 Stat. 1978; 19 U.S.C. 2171).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The Generalized System of Preference (GSP) Program permits duty-free entry of selected products from 140 developing countries and territories. In the past, GSP has been administered according to an equal application principle. Product eligibility decisions may now take into consideration a beneficiary's economic development level, its competitive position in that product, and the overall economic interests of the United States. *Abstract:* Not all eligible imports may receive duty-free GSP treatment. Products from a beneficiary are ineligible if, in the previous calendar year, they equaled 50% or more of total U.S. imports of that article or exceeded $41.9 million for 1979. No significant increase in benefits would accrue to mid-level and less developed countries if the competitive need exclusion and rules of origin were less stringently applied to them. Two of the factors influencing product eligibility decisions are: (1) the constraining effect of the initial product list of over 2,700 tariff lines, and (2) the interaction of several agencies with differing role perceptions. U.S. Trade Representative (USTR) does not fully disclose the basis of program decisions. USTR should annually report on a product-by-product basis to Congress on how preference changes are graduating advanced beneficiaries from the preference program and redistributing benefits to mid-level and less developed countries. USTR should take a number of specific actions to improve disclosure of information on program administration.

## OFFICE OF SCIENCE AND TECHNOLOGY POLICY

### E00115-001

*The Office of Science and Technology Policy: Adaptation to a President's Operating Style May Conflict with Congressionally Mandated Assignments.* (PAD-80-79).
9/3/80; 28 pp. + 5 app. (26 pp.)
**OMB Funding Code/Title:** 11-2600-0-1-802 / Salaries and Expenses
**Program:** Science and Technology Policy Analysis and Advice
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Science and Technology Policy, Organization, and Priorities Act of 1976 (P.L. 94-282; 90 Stat. 463; 42 U.S.C. 6611-6618, 6631-6635); Executive Order 12039.
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO studied the Office of Science and Technology Policy (OSTP) to examine the extent to which OSTP has studied the 13 issues on Federal organization and management of science and technology policy and to determine the extent to which OSTP is involved in strategic planning for science and technology. GAO found that OSTP does not intend to prepare the mandated comprehensive survey report. This assignment to OSTP placed a large burden on the Office and significantly increased its responsibilities without increasing its resources. The small and active OSTP has produced a list of its many activities, categorized according to the 13 issue areas. The OSTP staff attempts to give a strategic perspective to considerations of topical or mission issues, such as energy and space. OSTP believes that it is not feasible to do more comprehensive strategic planning and remain effective in the Executive Office of the President. It seldom studies the relationships of issues in the whole context of science and technology in society; instead, it usually focuses on a particular mission issue in isolation from its interactions with other national concerns. The small size of OSTP and its perceptions of the operating style of the President and the President's senior advisors inhibit its further involvement in comprehensive strategic planning. GAO believes that, within existing constraints, OSTP can and should establish a systematic and formal mechanism for identifying long-range emerging issues.

# DEPARTMENT OF AGRICULTURE

**E00200-001**

*Direct Farmer-to-Consumer Marketing Program Should Be Continued and Improved.* (CED-80-65).
7/9/80; 17 pp. + 4 app. (25 pp.)
**OMB Funding Code/Title:** 12-0502-0-1-352 / Extension Activities
**Program:** Administration and Coordination
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Farmer to Consumer Direct Marketing Act of 1976 (P.L. 94-463, § 5; 90 Stat. 1982; 7 U.S.C. 3004).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* As farmer-to-consumer direct marketing increases, small-volume producers may be persuaded to keep their land and/or increase production. Farm income could be improved, consumers could be provided with fresher, lower cost food, and dependence on out-of-region food sources and on long distance transportation may be reduced. However, the pilot program is limited. Federal activities need to be better coordinated with State, local, and privately sponsored activities to ensure that maximum benefits are achieved. Further, the program does not provide for adequately assessing the impact of direct marketing on issues which have become more important since the passage of the Farmer-to-Consumer Direct Marketing Act. Extending the program could allow for more participation by local governments and private nonprofit groups and time for the United States Department of Agriculture to assess its effects on energy, land, and resource issues. While increased direct marketing may have an adverse effect in some sectors, the extent of any negative effects has not been estimated. The negative effects are believed to be minor in view of the potential benefits. Congress should continue support for the Direct Marketing Program for an additional 2 to 3 year period by authorizing such funds as it deems appropriate to be used by the Secretary of Agriculture.

**E00200-002**

*Federal Role in Developing Grain Subterminals Should Be Coordinated by USDA.* (CED-81-101).
5/81; 10 pp.
**OMB Funding Code/Title:** 12-2800-0-1-352 / Salaries and Expenses
**Program:** Office of Transportation
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1621-1627). Agricultural Subterminal Facilities Act of 1980 (P.L. 96-358; 7 U.S.C. 3701 note).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* In response to a Congressional request, GAO reviewed selected activities on the development of subterminal grain storage facilities. The review was concentrated in States with significant grain production, available information, and the potential for subterminal development and improvement. The GAO objective was to gain an understanding of subterminal development benefits, obstacles, and potential. Farmers have benefited from subterminals in two ways: they receive higher prices for their grain and they are able to sell more grain when prices rise. Elevators that have become subterminals by contructing new, larger facilities or upgrading existing ones have benefited by significantly increasing their grain volume. Railroads have benefited from subterminals by becoming more price competitive with barges and truckes through the cost efficiencies of multiple car and unit train shipments. In addition, the faster turnaround times of multiple car and unit train shipments have enabled railroads to haul more grain with the existing fleet of rail cars. The Secretary of Agriculture should establish within the Department of Agriculture (UDSA) a focal point to oversee Federal subterminal planning and construction activities. Potential borrowers/grantees can then contact such a focal point for obtaining USDA subterminal planning, construction, and improvement funds as well as learn of the source of all other Federal programs that can provide funding for subterminal development. This focal point should be publicized by contacting State departments of transportation and agriculture officials, land grant university officials and researchers, State grain and feed dealers associations, and other agricultural associations.

*An Assessment of Parity as a Tool for Formulating and Evaluating Agricultural Policy.* (CED-81-11).
10/10/80; 50 pp. + 5 app. (33 pp.)
**OMB Funding Code/Title:** 12-0401-0-1-352 / Salaries and Expenses
**Program:** Economic Analysis and Research
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622). Agriculture and Consumer Protection Act of 1973 (P.L. 93-86; 87 Stat. 237; 7 U.S.C. 135b note).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The essence of U.S. farm policy has been to provide a certain level of economic security to the farm sector through various Government programs. Until 1973, these programs were linked to parity, a measure of the purchasing power of farm commodities today in relation to their purchasing power during the base period of 1910 to 1914. Although most programs are now linked to costs of production, policymakers and others still regard parity as a barometer of the economic health of the agricultural sector. *Abstract:* Parity is still a rallying point for many of today's farmers. Government price support programs have been, and some still are, linked to parity although the support levels have never been 100%. Parity does not adequately reflect total farm sector well being, total personal income of farm families, or increased farm assets and equities. Parity may or may not indicate the individual farmer's well being. Congress and other policymakers need, in addition to parity, a broader framework to use in developing, analyzing, and evaluating farm policies and programs. The framework which GAO developed can be a starting point for the Department of Agriculture and others in setting up a systematic methodology for considering the impact of various policy alternatives. The Secretary of Agriculture should develop a comprehensive and systematic framework for the use of policymakers in formulating and evaluating various policy options for U.S. agriculture.

*Improvements Are Needed in USDA's Soil and Water Resources Conservation Act Reports.* (CED-80-132).
9/3/80; 10 pp.
**OMB Funding Code/Title:** 12-1000-0-1-302 / Conservation Operations
**Program:** Resource Appraisal and Program Development
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Soil and Water Resources Conservation Act of 1977 (P.L. 95-192, § 5; 91 Stat. 1407; 16 U.S.C. 2004).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the Department of Agriculture's (USDA) efforts to promote better water management and conservation, focusing on whether USDA reports required by the Soil and Water Conservation Act of 1977 contain useful and accurate information for making future water program decisions. The reports do not fully comply with the Act's intent. Initial evaluations by USDA included fewer than half of its current soil and water conservation programs. Evaluation of current programs is incomplete. Field personnel have problems developing information for the reports. The Soil and Water Resources Conservation Act clearly intended the USDA to evaluate, on a continuing basis, each of its 34 current soil and water conservation programs and to periodically report the results to Congress. Failure to comply with the Act's intent is due primarily to USDA's early decision to limit the analysis to certain programs. USDA would also increase the usefulness of its reports by including additional pertinent data. The Secretary of Agriculture should amend the USDA continuing soil and water resources appraisal process to include in the 1980 reports and all future reports to Congress an assessment of the effects of water conservation including both advantages and disadvantages on achievable water savings, and a determination of the impact of institutional and social constraints on achievable water savings.

**Program:** Administration of the U.S. Grain Standards Act; Plant Disease and Pest Control; Animal Disease and Pest Control; All Programs; Inspection and Grading; Inspection and Weighing Services
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** U.S. Grain Standards Act, as amended (P.L. 64-190, § 1-19; 39 Stat. 482; 7 U.S.C. 71-87h). Department of Agriculture Organic Act of 1944, as amended (P.L. 78-425, title I, § 102; 58 Stat. 735; 7 U.S.C. 147a). Act of February 28, 1947 (P.L. 80-8; 61 Stat. 7; 21 U.S.C. 114). Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives of the program are to aid the orderly marketing of agricultural commodities through a wide range of services. These include: (1) inspecting, grading, or classing a host of diversified commodities; (2) disseminating price information via numerous market news reports; and (3) certain regulatory services, such as licensing and examining commodity warehouses, issuing plant variety certifications, inspecting meat and poultry plants, and inspecting animals, birds, plants, and seeds moving in interstate and foreign commerce. *Abstract:* The Department of Agriculture provides a wide range of marketing and regulatory services. Marked differences exist in the degree to which recipients bear the costs of these services. If recipients were charged for all costs except those which can be readily identified with public benefits, the current inconsistencies and inequities would be eliminated and Federal appropriations could be reduced as much as $48 million annually. The Secretary of Agriculture should: (1) charge requestors of phytosanitary inspections user fees which cover the costs of providing the service, either under authority contained in the User Charge Statute or by seeking specific legislative authority, and (2) determine appropriate funding policies for market news, plant variety certification, and imported seed inspection services.

*Improvements Are Needed in the Department of Agriculture's Centralized Payroll System.* (FGMSD-80-69).
7/17/80; 6 pp.
**OMB Funding Code/Title:** 12-0120-0-1-352 / Departmental Administration
**Program:** Operations and Finance
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Act of May 15, 1862, as amended (P.L. 92-419, title VI, § 603(a); 7 U.S.C. 2201).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Weaknesses in the Department of Agriculture's (USDA) centralized payroll system have caused pay problems such as duplicate, late, or erroneous payments, and incorrect deductions for health care premiums. The payroll-personnel system is operated by the National Finance Center (NFC) in New Orleans, Louisiana. The system has operated under the same basic design for the past 17 years. However, a redesigned payroll system is scheduled for implementation in late 1980. The system, which GAO has approved, will pay about 130,000 employees in almost 15,000 USDA offices. An analysis of the redesigned NFC payroll system by GAO showed that the new payroll system will not correct many of the current pay problems which result from inadequate controls by NFC over manual payroll processes. To correct these problems, NFC needs to: (1) ensure that predetermined control totals of time and attendance documents are established by all submitting offices; (2) ensure that manually prepared paychecks are independently verified; (3) periodically reconcile health enrollment records with health carrier's records; and (4) improve physical security, administrative controls, and security planning in the computer operations at NFC.

*Evaluation of the Standardization Division's Operations and Program.*
4/81; 19 pp.
George W. Wollam; Robert E. Laubis
**OMB Funding Code/Title:** 12-2400-0-1-352 / Salaries and Expenses
**Program:** Administration of the U.S. Grain Standards Act
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** U.S. Grain Standards Act, as amended (P.L. 64-190, § 1-19; 39 Stat. 482-485; 7 U.S.C. 71-87h).
**Availability:** Agency

*Abstract:* The objectives of this study were to complete personnel interviews to assist in appraising the efficiency and effectiveness of the Federal Grain Inspection Service (FGIS) Standardization Division and its program; to identify major activities, accomplishments, progress, program priorities and constraints, and other information about the program; and to prepare a written report. This study found that there are four major problem areas in the Division: (1) the program's policy, goals, and objectives are unclear to participants and may not be complementary to the needs of the market place; (2) the organizational responsibilities for the standardization program are unclear to those within and external to the Standardization Division; (3) the level of conflict and understanding between the managers and supervisors responsible for providing direction to the program must be resolved before other problem areas can be corrected; and (4) the attachment of the FGIS training program to the Division has placed an additional burden on Division management. A clear articulation of the Standardization Division's mission, program, and organizational responsibilities is essential before significant progress can be made toward adjusting the Division's internal structure and effectively reducing identified problems. The report presents eight initiatives and recommendations.

**Agency Contact:** (202) 447-8607.

**E00200-008**
*Evaluation of the Weighing Division's Operations.*
12/80; 143 pp.
Gary (Jim) White
**OMB Funding Code/Title:** 12-4050-0-3-352 / Inspection and Weighing Services
**Program:** Inspection and Weighing Services
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** U.S. Grain Standards Act, as amended (P.L. 64-190, § 7; 7 U.S.C. 79).
**Availability:** Agency

*Abstract:* The objectives of this study were to complete personnel interviews to assist in appraising the efficiency and effectiveness of the Federal Grain Inspection Service (FGIS) Weighing Division's program and operation; to identify major activities, accomplishments, progress, program priorities and constraints, and other information about the program; and to prepare a written report. The study found that members of FGIS have significantly different opinions as to whether the weighing program is a "regulatory" program, a "service" program, or a combination of both. There appears to be a lack of understanding or acceptance of the differences between the inspection and weighing programs, the skills needed to perform each function, and the effect of these differences on agency policies pertaining to career development, cross-utilization, rotation, training, supervision, and management. A feeling exists among members of the Weighing Division, and especially among its managers, that the Division is "second best, second-rated" to the inspection program. Weighing program management's fear of creating controversy and losing even more status and support in FGIS appears to have interfered and intervened in program development and growth. The weighing program is not consistently and uniformly accepted within FGIS and appears to be developing only to meet immediate needs. Longer-term planning and integration into the total FGIS program are needed. Suggestions were made for resolving program weaknesses and a proposed realignment was presented.

*Special Report on the Special Coordinator's Office.*
4/81; 11 pp.
Gary (Jim) White
**OMB Funding Code/Title:** 12-2400-0-1-352 / Salaries and Expenses
**Program:** Administration of the U.S. Grain Standards Act
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** U.S. Grain Standards Act, as amended (P.L. 64-190, § 1-19; 7 U.S.C. 71-87h).
**Availability:** Agency

*Abstract:* The objectives of this study were to complete personnel and that the Occupational Safety and Health Administration (OSHA) effectiveness of the Federal Grain Inspection Service (FGIS) Special Coordinator's Office (SCO) and its operations; to identify major activities, accomplishments, progress, program priorities and constraints, and other information about the program; and to prepare a written report. The study found that the SCO is continuing to perform a major function which, although originally assigned to it, was dropped in October 1978. The responsibility for handling grain explosion problems has not been officially delegated to FGIS nor does FGIS have the authority to carry out such a responsibility under the U.S. Grain Standards Act or any other identifiable public law. All other SCO responsibilities being carried out, assumed, or implied (except those approved in May 1980) are "unapproved" and "unauthorized" unless they are cleared by the Department of Agriculture. The report recommended that SCO be abolished as soon as possible and that the Occupational Safety and Health Administration (OSHA) be publicly identified as having full responsibility and authority to handle grain elevator explosion problems. SCO responsibilities approved in May 1980 should be merged with FGIS's Safety and Health Program. FGIS should not suggest that grain elevator explosion investigations be conducted at the Department level. If FGIS continues to be involved in these investigations under the legislative authority of OSHA and other agencies, those agencies should be fully responsible for the investigation outcomes and should assume full liability for the investigations and FGIS should perform such services on a reimbursement basis.

*Safety Program Evaluation Report.*
6/81; 73 pp.
Gary (Jim) White
**OMB Funding Code/Title:** 12-4050-0-3-352 / Inspection and Weighing Services
**Program:** Inspection and Weighing Services
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.

**Authority:** U.S. Grain Standards Act, as amended (P.L. 64-190, § 7; 7 U.S.C. 79). Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 7 U.S.C. 1622).
**Availability:** Agency

*Abstract:* The objectives of this study were to complete personnel interviews to assist in appraising the efficiency and effectiveness of the Federal Grain Inspection Service (FGIS) Safety and Health Program and its operations; to identify major activities, accomplishments, progress, program priorities and constraints, and other information about the program; and to prepare a written report. The study found that safety conscientiousness, awareness, and education have steadily increased in FGIS since August 1977 and that employees have confidence in management's commitment to a viable Safety and Health Program. The study recommended that responsibility for the FGIS Safety and Health Office (SHO) be shifted from the present assignment to one of several options; that FGIS consider bringing the SHO to the Washington, DC, headquarters; that SHO be given responsibility for safety communications to and from regional safety officers and regional offices; that FGIS management identify the best method for reviewing all safety functional responsibilities, activity assignments, and delegations to ensure that future changes to the organization are carefully planned and coordinated to determine all impacts; and that FGIS suspend its twice monthly safety inspections and follow the Department of Agriculture's policy of minimally inspecting each facility annually, except in situations where problems are identified or reported.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose of the program is to improve, develop, or finance business, industry, and employment and improve the economic and environmental climate in rural communities. *Abstract:* GAO summarized the major deficiencies in the Farmers Home Administration's (FmHA) Business and Industrial Loan Program based on audits by GAO and the Department of Agriculture (USDA) Office of the Inspector General (OIG) and internal FmHA studies. In 1977, GAO reported on loan evaluation and servicing deficiencies in the FmHA program. The review showed that many of the deficiencies identified in the 1977 report still exist. GAO believes that the continuing deficiencies in the FmHA program are the result of an imbalance between FmHA staffing levels and program activities and the failure of FmHA staff to follow or enforce program requirements. GAO believes that various actions to correct the deficiencies are required such as a better balance between FmHA staffing and program activities. Loan approving officials should be required to certify loan approval to some outside entity, such as OIG, for loans rejected previously. GAO found that FmHA was in the process of tightening program requirements for loans involving financing and that these new requirements should minimize differences in interpretations of FmHA requirements and result in approving sounder loans. If the new FmHA requirements do not achieve the desired results, FmHA should reconsider subjecting such loans to national office approval as previously suggested.

*Program Objectives:* The Single Family Housing Program is designed to provide decent, safe, and sanitary housing for individuals who can not obtain housing funds from commercial sources. Farmer Programs were created to provide funding for those engaged in agriculture production who can not obtain the necessary funding from commercial sources, which can be in the form of operating, farm ownership, or emergency type loans. *Abstract:* The purpose of the study is to determine: under what conditions reamortization/rescheduling is used; the costs and benefits for the borrower, the loan program, and the Agency; and the relationship of reamortization/rescheduling to debt management and delinquency. The data will be obtained from loan dockets submitted by a random sample of 20% of county offices in each state. Data will include characteristics of borrowers, loans, and, when applicable, farm enterprises. Analysis will also focus on changes in the financial status of the borrowers and field office policies and practices.

*Program Objectives:* The main thrust of the American Indian outreach program is to make all Farmers Home Administration (FmHA) programs more accessible and available to American Indians living on and off reservations and to increase the production level of FmHA loans and grants going to American Indians. *Abstract:* American Indian applications for eight FmHA loan programs (Farm Operating, Emergency Loans, Farm Ownership, Recreation Loans, Soil and Water Loans, Rural Housing, Rural Rental Housing and Labor Housing Loans) and loans made to American Indians increased significantly from Fiscal Year (FY) 77 through FY 80. FmHA received 1,449 more American Indian applications in FY 80 than in FY 77, a 73.7% increase. The American Indian share of all applications increased from 0.49% to 0.81%. A total of 717 more loans were made to American Indians in 1980 than in FY 77, and $33,041,000 more money was loaned. This is a 71.8% increase in number and 167.3% in the amount of money loaned.

*Program Objectives:* The objective of the Economic Emergency Farm Loan Program is to extend loans to farmers during a period of unusual economic stress, particularly scarce agricultural commercial credit, high interest rates, or an adverse imbalance of production cost and returns on farm products. *Abstract:* The results show that the Economic Emergency Loan Program effectively fulfilled its basic objective: to assist farmers to maintain their farming operation during a period of economic pressures. Many of the borrowers have been able to improve their financial situation. There is substantial evidence that the policies and requirements of the program are being adhered to, including the test for credit, preference to family farm operations, and use of loan funds.

## RURAL ELECTRIFICATION ADMINISTRATION

**E00203-001**
*Financing Rural Electric Generating Facilities: A Large and Growing Activity.* (CED-81-14).
1/28/80; 140 pp.
**OMB Funding Code/Title:** 12-3100-0-1-271 / Salaries and Expenses
**Program:** Administration of Rural Electrification Program
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Rural Electrification Act of 1936, as amended (P.L. 74-605, title I, § 1-3; 49 Stat. 1363; 7 U.S.C. 901-903).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Rural Electrification Administration (REA), through insured and guaranteed loans, makes available billions of dollars in financing to construct electric generating and transmitting facilities to meet the increasing demands for electricity in rural areas. *Abstract:* To gain better budgeting control and increase private credit involvement, GAO believes that changes are needed in how financing is budgeted for and funded. In making and guaranteeing loans, the prime concern of the REA must be the borrower's ability to repay the loans. The agency has little funding flexibility to finance demonstration projects, studies, or programs designed to solve the Nation's energy problems. Other organizations are funding such efforts. REA should act as a catalyst by evaluating the disseminating information about these studies and projects to its borrowers. REA may wish to seek broader funding authority to conduct its own demonstration projects. GAO made various recommendations to the Congress: revising the Rural Electrification Act of 1936 to limit the guarantee of REA loans made by non-Federal Financing Bank lenders to 90% or some other appropriate percentage; and eliminate the prohibition against REA charging a fee for the guarantee and, instead, require that a loan guarantee fee be assessed and used for funding a reserve for losses. GAO also made recommendations to the Secretary of Agriculture to direct the REA Administrator to require applicants seeking a guaranteed loan to obtain at least part of their loan from the National Rural Utilities Cooperative Finance Corporation or other private lenders, which portion would be gradually increased as conditions warrant.

**CFDA NO.:** 10.850; 10.851
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Rural Electrification Act of 1936, as amended (P.L. 74-605, title I, § 1-3; 49 Stat. 1363-1364; 7 U.S.C. 901-903).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The objective of the analysis is to determine whether the leased vehicle program is economically beneficial to the Rural Electrification Administration (REA). The project involves compiling data on all REA leased vehicles, such as leased cost, miles driven, and operating cost; organizing the data by Electric, Telephone, and Accounting Programs; and computing the average cost per mile per field person and agency average cost per mile. An analysis of the Fiscal Year (FY) 1980 publicly owned vehicle costs versus the FY 1981 leased costs will also be made.

**Authority:** Federal Seed Act, as amended (P.L. 76-354, title I, II, § 102, 201, as amended by; P.L. 91-577; 53 Stat. 1275; 7 U.S.C. 1562, 1571).
**Availability:** Agency
**Geographic Relevance:** International/Foreign; National; State

*Program Objectives:* The purpose of Federal Seed Act activities is to provide for orderly marketing of seeds by requiring truthful labeling in interstate commerce, by prohibiting the importation of unfit seeds and by standardizing seed testing methods. *Abstract:* The economic study addressed questions of whether Federal regulation of import and interstate commerce in agricultural and vegetable seeds under the Federal Seed Act is needed and whether such regulation is being effectively and efficiently administered. The study is based on extant economic theory, legislative and regulatory records, Agricultural Marketing Service records regarding administration and enforcement, and other records in the public domain. Alternative regulatory and administrative practices will be suggested.

## ANIMAL AND PLANT HEALTH INSPECTION SERVICE

**E00205-001**
*Procedures for Testing Garbage To Be Fed to Swine Need Strengthening.*
9/3/80; 5 pp.
**OMB Funding Code/Title:** 12-1600-0-1-352 / Animal and Plant Health Inspection Service
**Program:** Animal Disease and Pest Control
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Act of May 29, 1884, as amended (21 U.S.C. 112 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose is to prevent the interstate spread of swine diseases. *Abstract:* A primary component of the Swine Disease Surveillance Program is the periodic inspection of garbage-feeding premises to inspect swine for clinical disease signs, check cooking equipment, and check garbage to determine if it has been adequately cooked. Raw garbage is one of the primary media for the spread of several serious swine diseases. Federal regulations restrict the interstate movement of swine fed raw garbage or pork derived from such swine. The laws and regulations of each State are relied on to require proper treatments for killing any disease organisms because there is no current authority to impose uniform Federal requirements. The inspectors check garbage-cooking operations primarily by checking the temperature of the garbage being cooked at the time of their visits. However, garbage is not always being cooked at those times, and the temperature check does not provide any assurance of proper cooking when inspectors are not present. Greater assurance of proper garbage cooking could be achieved if the inspectors would use the phosphatase field test, a chemical analysis. This test can be made up to 48 hours after the cooking operation; thus, it can be used on an unannounced, after-the-fact basis. The Animal and Plant Health Inspection Service should: (1) revise its instructions to emphasize the need for the phosphatase field test; (2) add the controls necessary to assure that the test is used when practical and beneficial; (3) provide inspection personnel with the necessary training and equipment to conduct the test; and (4) provide guidance to Federal and State inspectors on making garbage-feeding premise inspections.

**E00205-002**
*Problems Plagued Department of Agriculture's Grasshopper Control Program in 1979.* (CED-80-95).
8/11/80; 35 pp.
**OMB Funding Code/Title:** 12-1600-0-1-352 / Animal and Plant Health Inspection Service
**Program:** Plant Disease and Pest Control
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Department of Agriculture Organic Act of 1944, as amended (P.L. 78-425, title I, § 102; 58 Stat. 735; 7 U.S.C. 147a, 148); Public Resolution 75-20.
**Availability:** GAO
**Geographic Relevance:** 17 Western States

*Program Objectives:* The purpose is to carry out operations or measures to detect, eradicate, suppress, control, or to prevent or retard the spread of plant pests. *Abstract:* The Animal and Plant Health Inspection Service (APHIS) did not adequately manage the program to control grasshoppers in 17 Western States in 1979. Efforts by Federal and State officials and local participants were not sufficiently coordinated. Management weaknesses reduced the ability of the local project managers of APHIS to effectively identify areas to be sprayed to control grasshoppers, schedule spraying operations at the best times, and evaluate the effectiveness of the spraying. APHIS has initiated some actions to improve program management and has plans for others. The Secretary of Agriculture should direct the APHIS Administrator to: (1) prepare a cost/benefit analysis of including cropland in the Grasshopper Control Program; (2) study the pros and cons of making participation of landowners in infested areas mandatory, including an assessment of the problems that would be encountered in implementing a mandatory program; and (3) provide the results of both studies, together with any recommended changes, to the appropriate legislative committees.

**Availability:** Agency
**Geographic Relevance:** Cotton Belt States

*Program Objectives:* The Boll Weevil Eradication and Optimum Pest Management Trials were cooperative State/Federal grower efforts designed to develop and demonstrate technological and operational capability to eradicate or manage the boll weevil in a specified geographic area. *Abstract:* The National Research Council (NRC) Committee reviewed the conclusions reached from the 1978 to 1980 boll weevil/cotton insect management trials as to the probable biological, economic, and environmental effects that might result from Federal implementation of either a boll weevil eradication or optimum pest management program throughout the Cotton Belt. The NRC Committee: (1) recommended that integrated pest management practices be the thrust of boll weevil and other cotton pest control programs for the next several years; (2) stated that as cotton insect control technology continues to evolve, the potential for eradication should be periodically reevaluated; (3) recommended an indefinite postponement of both trial programs; and (4) encouraged the private sector, the academic community, and government agencies to assist the development and adoption of private integrated pest management so that its potential is more fully realized.

## FOOD AND NUTRITION SERVICE

**E00207-001**
*Preliminary Information on Food Stamp Workfare Pilot Projects.*
(CED-80-129).
9/30/80; 15 pp.
**OMB Funding Code/Title:** 12-3505-0-1-604 / Food Program Administration
**Program:** Food Stamps
**CFDA NO.:** 10.551
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Food Stamp Act of 1964, as amended (P.L. 88-525, § 4; 78 Stat. 704; 7 U.S.C. 2013). Food Stamp Act of 1977 (P.L. 95-113, title XIII, § 1301; 7 U.S.C. 2026).
**Availability:** GAO
**Geographic Relevance:** National; State; County

*Program Objectives:* The purpose of the workfare demonstration was to assess the feasibility of adopting the food stamp workfare concept nationwide. *Abstract:* The Food Stamp Act of 1977 requires the Secretaries of Agriculture and Labor to jointly conduct a demonstration project of the workfare concept at 14 sites throughout the Nation. This concept involves the performance of work in return for food stamp benefits. The number of sites selected and the rural/urban mix fell short of congressional expectations for the project. The Department of Agriculture could have improved the quality of the effort it made in recruiting sites in the areas of focus of contacts, followup on contacts, and use of regional office staff. The demonstration was extended for 1 year in order to expand the size and scope. The Department implemented recommendations made in a draft of this report and was able to recruit the desired number and mix of sites for the extended demonstration. The report also gives some preliminary information on the performance of the contractor hired by the Department of Labor to assess the demonstration project.

*Evaluation of Alternatives to the National School Lunch Program Commodity Distribution System.*
12/84
**Contractor:** Abt Associates; 55 Wheeler Street, Cambridge, MA 02138
**OMB Funding Code/Title:** 12-3539-0-1-605 / Child Nutrition Programs
**Program:** Nutritional Studies and Education
**CFDA NO.:** 10.550
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** National School Lunch Act, as amended (P.L. 79-396, § 14, as amended by; P.L. 93-326, § 2; 42 U.S.C. 1762a).
**Geographic Relevance:** National; State; Agricultural Product Regions

*Program Objectives:* The primary program objectives of the National School Lunch Commodity Distribution System are to improve the diets of school children and to increase the market for domestically produced foods acquired under surplus removal or price support operations. *Abstract:* An evaluation of the National School

Lunch Commodity Distribution System is being conducted to estimate the cost effectiveness of the existing commodity distribution program compared to a commodity letter of credit and cash in lieu of commodity system. The project will run from July 1981 to June 30, 1985. Data will be collected on operating costs, food usage, administrative feasibility, food quality, plate waste, and student participation.

## AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

**E00209-001**
*National Summary Evaluation of the Agricultural Conservation Program.*
1/81; 90 pp.
Gordon G. Nebeker
**OMB Funding Code/Title:** 12-3315-0-1-302 / Agricultural Conservation Program
**Program:** Cost-Sharing Assistance to Farmers and Soil Conservation Service Technical and Assistance
**CFDA NO.:** 10.063
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Soil Conservation and Domestic Allotment Act, as amended (P.L. 74-46, § 1; 49 Stat. 163; 16 U.S.C. 590a).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The purposes of the Agricultural Conservation Program (ACP) are to promote control of erosion and sedimentation, voluntary compliance with Federal and State requirements to solve point and non-point source pollution, use of energy conservation measures, improvement of water quality, conservation of water resources, and assurance of a continued supply of necessary food and fiber for a strong and healthy people and economy. *Abstract:* The evaluation focused on the effectiveness of ACP practices intended to abate sheet and rill erosion and practices to solve water conservation problems. Information was collected from 171 counties in 46 States. An effort was made to develop an evaluation information base which could be used not only in decisions to improve performance over the near-term, but also as a basis for gauging the performance of the program in future years. Some 27% of the erosion control practices were installed on lands eroding at rates of 5 to 14 tons per acre per year. Lands eroding at rates in excess of 14 tons per acre received 21% of the assisted erosion control practices, but account for 84% of the excess erosion. More than 52% of the sample practices were installed on lands eroding at rates of less than 5 tons per acre annually.

*Personnel Management Evaluation: Emergency and Indemnity Programs Division.* (EO2).
1/6/81; 23 pp.
Paula Ehrenfeld
**OMB Funding Code/Title:** 12-3300-0-1-351 / Salaries and Expenses
**Program:** Operation of Supply Adjustment, Conservation, and Price Support Programs
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Adjustment Act of 1938, as amended (P.L. 75-430, title III, § 392, as amended by; P.L. 91-559; 52 Stat. 69; 7 U.S.C. 1392). Executive Order 9830; Federal Personnel Manual, Ch. 250.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This evaluation of personnel management in the Emergency and Indemnity Programs Division was designed to determine the degree to which personnel programs and responsibilities are understood and carried out; to identify strong personnel management activities and methods to disseminate them for application throughout the Agency; to define personnel management weaknesses and advise and counsel management/supervisory officials on methods of improvement; and to determine compliance with personnel regulations, policies, and procedures and bring about corrective action. The report concentrated on specific areas of personnel management. These were position classification, position management, staffing and merit promotion, employee development and training, employee relations, equal employment opportunity, and personnel services and information. Positive findings included high morale and satisfaction with the work environment, good access between supervisors and employees, and freedom to organize the work and try out new work methods. Three significant weaknesses were detected. First, there were a limited number of lower graded professional employees available to perform work of less than average difficulty. Future vacancies should be filled at lower or entry levels. Second, women and minorities are underrepresented, particularly at higher grade levels. Full consideration should be given to women and minorities for professional vacancies. Finally, the Merit Promotion Plan was not fully understood. Training is being developed to rectify this.

*Personnel Management Evaluation: Producer Associations Division.* (E04).
7/15/81; 20 pp.
Paula Ehrenfeld
**OMB Funding Code/Title:** 12-3300-0-1-351 / Salaries and Expenses
**Program:** Operation of Supply Adjustment Conservation, and Price Support Programs
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Adjustment Act of 1938, as amended (P.L. 75-430, title III, § 392, as amended by; P.L. 91-559; 52 Stat. 69; 7 U.S.C. 1392). Executive Order 9830; Federal Personnel Manual, Ch. 250.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This evaluation of personnel management in the Producer Associations Division of the Agricultural Stabilization and Conservation Service was designed: to determine the degree to which personnel programs and responsibilities are understood and carried out; to identify strong personnel management activities and methods to disseminate them for application throughout the Service; to define personnel management weaknesses and advise and counsel management/supervisory personnel on methods of improvement; and to determine compliance with personnel regulations, policies, and procedures and bring about corrective actions. The evaluation focused on: position classification, position management, and organization; staffing and merit promotion; employee relations; employee development and training; equal employment opportunity; and personnel services and information. The study found that positions were properly classified; good use was made of recruitment sources; there was high employee participation in training programs; and women and minorities were well represented. However, several problem areas were identified for which corrective actions were suggested. Higher level employees were performing lower level work in many cases, which could be corrected by redistributing lower level work to clerks and assistants. Employees were unsure of the Merit Promotion Plan procedures, which should be corrected by holding training sessions. Many employees were dissatisfied with performance standards. These should be discussed every 4 months so that appropriate adjustments can be made. There was no unit training plan. The Division was instructed to prepare a training plan for Fiscal Year 1981.

## FEDERAL CROP INSURANCE CORPORATION

**E00211-001**
*Information on Personnel and Travel at the Federal Crop Insurance Corporation.* (FPCD-81-22).
12/23/80; 7 pp. + app.
**OMB Funding Code/Title:** 12-2707-0-1-351 / Administrative and Operating Expenses
**Program:** Underwriting, Actuarial, and Program Development
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Federal Crop Insurance Act, as amended (P.L. 75-430, title V, § 508; 52 Stat. 74; 7 U.S.C. 1508).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to reimburse Federal employees for reasonable and necessary travel expenses while on official business. *Abstract:* A review was performed on the Federal Crop Insurance Corporation's (FCIC's) travel costs, type and number of personnel, personnel actions, and grading structure. A report by the Department of Agriculture's Office of the Inspector General (OIG) on personnel abuses and other wrongdoings at FCIC was also reviewed. The FCIC travel authorization policy was found to be a potential problem area warranting further study. Travel costs in recent years did not appear to be excessive; however, numerous overpayments indicated a need for improvement in the travel voucher audit system. Recent organizational changes made by FCIC were not reflected in its organizational chart and were found to be in violation of Department of Agriculture regulations. The type and number of personnel changes appeared to be justified, and no irregularities were found concerning recent personnel actions. The average personnel grade increase experienced at FCIC was found to be caused by an upgrading of regional offices. The OIG investigation into allegations of personnel abuses and other improprieties at FCIC was found to be adequate. The alleged early release of the report to the manager of FCIC did not benefit him or disadvantage the other individuals under investigation. OIG investigations of travel abuses were adequate, and reasonable efforts were made to contact all individuals with information on the charges under investigation.

*Competition among Suppliers in the P.L. 480 Concessional Food Sales Program.* (ID-81-6).
12/19/80; 3 pp. + app. (13 pp.)
**OMB Funding Code/Title:** 12-2274-0-1-151 / Public Law 480
**Program:** Financing the Sale of Agricultural Commodities for Foreign Currencies and for Dollars on Credit Terms (Titles I and III)
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 83-480, § 2; 68 Stat. 454; 7 U.S.C. 1691-1736d).
**Availability:** GAO
**Geographic Relevance:** Internationl/Foreign

*Program Objectives:* The objectives of the Agricultural Trade Development and Assistance Act of 1954, as amended, are to expand international trade, develop and expand export markets for U.S. agricultural commodities, use U.S. agricultural productivity to combat hunger and malnutrition, and encourage economic development in the developing countries and promote U.S. foreign policy. *Abstract:* GAO was asked to determine whether small grain exporting firms and farmers cooperatives were successfully competing against seven major grain exporters for sales under Public Law 83-480 and what changes might be needed in the legislation or program management to encourage greater competition. GAO found that the seven major firms had been the dominant suppliers and that Department of Agriculture (USDA) policy and regulations basically meet the requirements of existing legislation. As requested, GAO analyzed two possible legislative changes to increase competition. GAO also found that certain program requirements acted as barriers to greater industry participation and, therefore, recommended that the Secretary of Agriculture should direct the General Sales Manager of USDA to take action to: (1) standardize performance bond requirements; (2) improve procedures to provide earlier payment to suppliers; (3) simplify bid bond requirements; (4) standardize the letter-of-credit procedures; (5) develop standardized invitations for bids; and (6) limit the size of individual sales and seek to develop a more orderly sales distribution.

*Promoting Agricultural Exports to Latin America.* (ID-81-05).
12/11/80; 30 pp. + 3 app. (17 pp.)
**OMB Funding Code/Title:** 12-2900-0-1-352 / Foreign Agricultural Service
**Program:** Foreign Agricultural Affairs; Market Development Activities
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622). Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 83-480, title I, § 104; 68 Stat. 407; 7 U.S.C. 1704).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of Foreign Agricultural Service (FAS) market development activities is to maintain, develop, and expand foreign markets for U.S. agricultural commodities. *Abstract:* FAS uses relatively little of its resources to promote agricultural exports to Latin America. To assure optimal use of export promotion resources, FAS should be able to compare export opportunities in one country or geographical region, such as Latin America, with opportunities in other world markets. Presently, it does not allocate its resources this way. Instead, FAS relies heavily on private trade organizations and its judgments, based on past export performance, to decide where and how FAS export promotion resources will be used. Recognizing the need for a more systematic approach to guide marketing resource allocation, FAS has initiated a strategic planning process. However, FAS needs to strengthen its resource allocation system to assure that export markets in Latin America and elsewhere are receiving promotional attention commensurate with export sales opportunities.

**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 83-480, § 2; 68 Stat. 454; 7 U.S.C. 1691).
**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Abstract:* This annual report contains a global assessment of food production performance; recent trends in production of the major food aid donor and recipient countries; country-specific data on consumption, production, trade, and economic/financial conditions for 1981 and outlook. The planned programming of food assistance under Title I of Public Law 83-480 is also discussed.

*Evaluation of Cooperator (PEIA & USMEF) Activities in UK.*
In process
Frank Hokana
**OMB Funding Code/Title:** 12-2900-0-1-352 / Foreign Agricultural Service
**Program:** Market Development Activities
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 83-480, title I, § 104; 68 Stat. 456; 7 U.S.C. 1704).
**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The purpose of the cooperator program is to maintain and expand exports of U.S. agricultural products by conducting joint industry-government promotional activities in overseas markets for U.S. agricultural commodities. *Abstract:* The evaluation indicates that both the PEIA and the USMEF cooperator offices in the United Kingdom are following guidelines and programs as directed by their home offices. However, improvement in U.S. exports to the United Kingdom of high quality beef and poultry products could be expected with adjustments in current strategy and by increasing the number of trade contacts made by the two cooperator offices. The report reveals current economic instability in both the U.K. red meat and poultry sectors and attempts to develop, within the present market structure, a precursor to future demands in market development planning and programs.

## FOREST SERVICE

**E00216-001**

*Forest Service's Region 5 Should Consider Less Costly Ways To Meet Word and Data Processing Needs.* (CED-81-15).
10/23/80; 3 pp. + 4 app. (21 pp.)
**OMB Funding Code/Title:** 12-1100-0-1-302 / Forest Management, Protection and Utilization
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** National Forest Roads and Trails System Act (P.L. 88-657, § 4; 78 Stat. 1089; 16 U.S.C. 535).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objective of the study was to review the adequacy of Forest Service procurements. Although the equipment is providing benefits, GAO found the procurement to be unnecessarily costly. GAO reviewed the procurement of word processing equipment carried out during 1979 by the Forest Service's Pacific Southwest Region. GAO recommended that the Secretary of the Department of Agriculture should direct the Forest Service to conduct: (1) a postinstallation review to measure the cost effectiveness of the Pacific Southwest Region Systems, including both word and data processing capabilities, after 6 months of operation; and (2) an economic analysis of alternatives available to the region that could meet its requirements at a cost lower than its present leasing arrangement.

**Agency Contact:** General Accounting Office (202) 275-1000.

**E00216-002**
*Problems in Collecting and Setting Aside Adequate Knutsen-Vandenburg Funds To Do Planned Work.*
8/13/80; 8 pp.
**OMB Funding Code/Title:** 12-1100-0-1-302 / Forest Management, Protection, and Utilization
**Program:** National Forest System; National Forest System: Renewable Resource Management and Utilization
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** National Forest Roads and Trails System Act (P.L. 88-657, § 4; 78 Stat. 1089; 16 U.S.C. 535). Knudson-Vanderberg Act, as amended (P.L. 71-319; 46 Stat. 527; 16 U.S.C. 576b).
**Availability:** GAO
**Geographic Relevance:** National Forest Land

*Program Objectives:* The program is concerned with reforestation and timber stand improvement work needed to restore harvest areas after timber sales. *Abstract:* A review in the Forest Service's Region 6 of collecting and setting aside funds authorized by the Knutson-Vandenburg (KV) Act to finance reforestation and timber stand improvement work needed in harvest areas showed that: (1) some Forest Service officials were not adequately considering the expected impact of inflation when making KV estimates; (2) KV plans had not always been revised on a timely basis and the amount of moneys that can be deposited in the KV fund to cover any upward revisions had been administratively limited; and (3) KV balances may not be accurate. The Forest Service should revise its instructions to specifically require that: (1) the regions determine appropriate inflation rates for their areas and require the districts to use the rates when preparing KV plans; (2) the KV plans identify the time period in which the planned work is expected to occur so that appropriate inflation rates can be applied; and (3) KV plans and funds needed to be set aside be updated several times before formal sale closure. Also, the Forest Service should: remove or revise the volume limitation to allow for all needed KV funds to be set aside, review the inflation rates periodically, require headquarters and regional officials to include in their administrative reviews an assessment of the regions' and districts' applications of the inflation rates, emphasize to all forest officials the importance of coordinating the annual KV plans and funds, and determine the feasibility of allowing more time after the end of the fiscal year for determining the annual KV fund balances.

*Financial Management Practices at the Flathead National Forest.* (CED-80-131).
8/14/80; 5 pp.
**OMB Funding Code/Title:** 12-9973-0-7-302 / Miscellaneous Trust Funds
**Program:** Protection of National Forests and Adjacent Private Land
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Cooperative Funds Act, as amended (P.L. 63-122; 16 U.S.C. 498). Brush Disposal Act of 1916 (39 Stat. 462; 16 U.S.C. 490).
**Availability:** GAO
**Geographic Relevance:** National Forest

*Program Objectives:* The purpose is to dispose of brush and other debris resulting from timber sales operations to eliminate a source of fuel for potential wildfires. *Abstract:* An investigation was made of four allegations concerning certain financial management practices at Flathead National Forest. The report concluded that: (1) there was no indication that the Brush Disposal Fund was being disproportionately assessed for its share of overhead expenses; (2) no evidence was found that three ineligible employees were being routinely or systematically financed from overhead funds; (3) overhead assessments had increased significantly since 1960 but not as dramatically as alleged; and (4) although it was not a question, as alleged, that 49% of wilderness funds were being diverted to some unrelated purpose, it was true that 49% of the recreation moneys received during fiscal year 1980 did not get down to the district level.

*Need To Reevaluate Helistat Program Objectives and Progress.* (MASAD-81-31).
6/2/81; 3 pp. + app. (9 pp.)
**OMB Funding Code/Title:** 12-1100-0-1-302 / Forest Management, Protection, and Utilization
**Program:** Forest Research: Renewable Resource Management and Utilization Research
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Forest and Rangeland Renewable Resources Research Act of 1978 (P.L. 95-307, § 3; 92 Stat. 353; 16 U.S.C. 164).
**Availability:** GAO

*Abstract:* GAO found that the Forest Service failed to apply some needed fundamental acquisition management principles in Helistat program development. The Forest Service unnecessarily tied program milestones to land management planning time frames and moved too hastily, thereby overlooking essential considerations in planning a development strategy. The Forest Service did not get potential user participation and advice to determine the need for uses of and operational requirements for a Helistat concept vehicle. Potential users GAO contacted questioned the practicality of the Helistat concept as a timber harvesting method. In addition, the system being developed cannot be reproduced without substantial redesign. Consequently, it will not be useful in demonstrating the economics of aerial logging, the principal objective of the program. The Navy, which is administering the development contract for Forest Service, is being hamstrung in its efforts to obtain data necessary to evaluate the engineering adequacy and safety of the vehicle being developed. GAO recommended that the Secretary of Agriculture reevaluate the program before making further funding obligations.

## ECONOMIC RESEARCH SERVICE

**E00219-001**
*Estimating Costs of Production: Problems and Recommendations.*
6/12/81; 12 pp.
George Hoffman
**OMB Funding Code/Title:** 12-0401-0-1-352 / Salaries and Expenses
**Program:** Economic Analysis and Research
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622). Agricultural Act of 1970, as amended (P.L. 91-524, title VIII, § 808, as amended by; P.L. 93-86, § 1(27)(B); 7 U.S.C. 1441a).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The National Economics Division is responsible for developing and reporting annual estimates of U.S. average and regional costs for major field crops, cattle, hogs, dairy and selected specialty crops. *Abstract:* Important problems in the cost of production (COP) program are related to the imputations for opportunity costs. Such imputations often account for a significant portion of estimated cost so that small differences in assumptions can lead to substantial differences in cost estimates. Moreover, it is likely that current procedures to include opportunity cost imputations result in cost estimates that are not consistent with observed economic behavior. The evaluation recommends adjustments in current procedures to make COP estimates useful for describing the true economic condition of various producer groups and meaningful to policymakers. Two provisions of Section 808 of the Agricultural and Consumer Protection Act of 1973 produce the major conceptual problems in the COP program. The evaluation recognizes the need to amend the wording of this Section to permit the use of methods that will improve the validity of COP estimates and projections.

**E00219-002**
*Water Branch Research Program Review.*
2/81; 14 pp.
John Miranowski; Supalla; Jensen
**Contractor:** Iowa State University; Ames, IA 50011
**OMB Funding Code/Title:** 12-0401-0-1-352 / Salaries and Expenses
**Program:** Economic Analysis and Research
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** Not publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Water Branch Research Program provides economic information through research on public policies and programs affecting conservation, use, and quality of water to help public officials and private resource users make rational decisions. Indepth economic research is conducted to analyze the economic impacts on the agricultural sector of public water policy and programs; to analyze off-site impacts and other external effects of land and water management decisions on water quality and water use; to develop analytic tools to assess economic-environmental trade-offs in water quality programs; and to analyze alternative public programs to achieve water conservation and water quality goals. *Abstract:* This document contains a critique of the research program of the Water Branch and provides recommendations to guide research planning during the next 3 to 5 years. Major recommendations are that the Branch should: more clearly identify its role and clientele vis-a-vis other Federal research organizations and the university community, obtain more resources to adequately examine the range of research issues being addressed or reduce the scope of goals and objectives, place more emphasis on long-term policy research, establish better coordination of research with other agencies, and aggressively pursue resources to develop the Land and Water Resource Economic Information System.

**Agency Contact:** Economic Research Service. (202) 447-8081.

**E00219-003**
*Data Users Conferences.*
3/25/81; 33 pp.
Marshall L. Dantzler
**OMB Funding Code/Title:** 12-0401-0-1-352 / Salaries and Expenses
**Program:** Crop and Livestock Estimates; Economic Analysis and Research
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** Agency
**Geographic Relevance:** National; State; County

*Program Objectives:* The program objectives of the Economics and Statistics Service are: (1) to formulate, develop, and administer programs of economic research, analysis, and information related to food, agriculture, and rural resources and communities; and (2) to formulate, develop, and administer programs of collecting and publishing statistics related to food, agriculture, and rural resources and communities. *Abstract:* Four Economic and Statistics Data Users Workshops were conducted in January and March 1981 at Chicago, Memphis, Denver, and Washington, DC. These meetings provided data users the opportunity to express opinions on planned activities and to provide input regarding future program directions. An additional 2-day hearing was held in Washington, DC, June 23 and 24, 1981, to obtain data user input concerning prioritizing work in anticipation of possible funding reductions. The overall response at the first series of meetings was supportive of the quality and quantity of services provided by the Agency. There was a prevalent concern about credibility of Economics and Statistics Service with producers. A general consensus prevailed encouraging an educational effort toward the bulk of producers explaining the need for and use of this basic data. The hearings in June generally supported the need for the basic data now provided. Some items were identified as possible areas for reduction, mainly in the area of reduced frequency and/or detail of reports and further analysis, rather than cuts in quality.

**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The program objective of the Deputy area for Economics Research Service (ERS) is to formulate, develop, and administer programs of economic research, analysis, and information related to food, agriculture, and rural resources and communities. This activity includes the development of short-term forecasts and long-range projections of resource use, production, and distribution of food and fiber for both probable and possible future events. *Abstract:* An ERS-wide review of filing systems was conducted through survey questionnaires and interviews with maintenance personnel and file system users. It was determined that very few documented file systems exist, and because of this, users experienced confusion and limited access to these systems. This evaluation recommended the establishment of a formal records control schedule and an ERS-wide filing system that would be usable by all offices. Included in this system are file subjects disposition authorities and retention periods. The system has been approved by ERS. Training of file personnel and orientation of users has been completed. Full implementation of the system will be completed during Fiscal Year 1982.

**Program:** All Programs
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The program objectives of the Economics and Statistics Service (ESS) are to formulate, develop, and administer programs of economic research, analysis, and information related to food, agriculture, and rural resources and communities and to formulate, develop, and administer programs of collecting and publishing statistics related to food, agriculture, and rural resources and communities. *Abstract:* An evaluation was conducted of ESS photocomposition requirements and the photocomposition service provided to ESS by the Department of Agriculture system. It was determined that the Department system photocomposition costs were excessive and that the system interface between the Department and ESS was too complex, given the communication requirements of the Department system. The Department system was also not providing adequate turnaround for ESS documents to be photocomposed. This analysis recommended that photocomposition services be decentralized and that ESS establish an internal photocomposition system to improve response time, decrease system complexity, and decrease photocomposition costs to the Agency.

**Availability:** Not Publicly Available

*Program Objectives:* The program objectives of the Economics and Statistics Service are to formulate, develop, and administer programs of economic research, analysis, and information related to food, agriculture, and rural resources and communities and to formulate, develop, and administer programs of collecting and publishing statistics related to food, agriculture, and rural resources and communities. *Abstract:* The postage fees system needed refinements to provide more accurate forecasts by cost center. A major effort is being made to maximize source data automation. The revised system has not been fully documented; however, when completed it is expected to provide up-to-date projections that management requires for more effective budgeting and mail cost control. This system should be operative by October 1981.

**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The program objectives of the Economics and Statistics Service are to formulate, develop, and administer programs of economic research, analysis, and information related to food, agriculture, and rural resources and communities and to formulate, develop, and administer programs of collecting and publishing statistics related to food, agriculture, and rural resources and communities. *Abstract:* This evaluation calls for an in-depth review of the effectiveness of current Computer Publishing Center (CPC) operations. Included in this evaluation is a complete review and documentation of CPC equipment, facilities, staffing, workflow, procedures, controls, and management reports. A survey of user satisfaction is also scheduled to measure the level of current performance against desired results. Findings and recommendations will be made available through a final report, which will identify problem areas and propose alternative or more effective actions.

**Authority:** Department of Agriculture Organic Act of 1944, as amended (P.L. 78-425, title I, § 102, as amended by; P.L. 93-629; 58 Stat. 735; 7 U.S.C. 147a); Public Resolution 75-20. Bankhead Jones Act, as amended (P.L. 74-182, § 1; 49 Stat. 436; 7 U.S.C. 427). Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1622).
**Availability:** Agency
**Geographic Relevance:** Cotton Belt States

*Program Objectives:* The Boll Weevil Eradication and Optimum Pest Management Trials were cooperative State/Federal grower efforts designed to develop and demonstrate technological and operational capability to eradicate or manage the boll weevil in a specified geographic area. *Abstract:* Two boll weevil/cotton insect management trials, conducted during 1978 through 1980, demonstrated the technical and operational feasibility of eradicating a boll weevil population from a geographic area or eliminating the need for boll weevil treatments during the cotton-growing season. Six cotton insect management programs were specified and evaluated for application in the boll weevil infested areas of the Cotton Belt. The Optimum Pest Management with No Incentive and Boll Weevil Eradication Program would yield substantially higher total economic and environmental benefits than the other programs. The Optimum Pest Management with No Incentive Program was estimated to yield the highest benefit/cost ratio in terms of public expenditures.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the need for improved management of plant genetic resources to minimize crop damage due to disease, insects, or adverse weather conditions. The Department of Agriculture has a number of programs meant to reduce the risks resulting from the vulnerability of these crops. Because producers use relatively few high-yielding varieties, plant vulnerability has increased over the past 50 years. A group of Federal, State, and private programs called the National Plant Germplasm System has been established to reduce the vulnerability and to further improve plant varieties. However, this system lacks a sense of direction and purpose and does not have effective, centralized management. The problems experienced by the system in the collection, storage, and maintenance areas included: (1) the lack of systematic collection of new germplasm; (2) inadequate storage facilities; (3) incomplete and sporadic evaluation of the distinguishing characteristics of stored germplasm; and (4) possible permanent loss of some genetic stock which is not regularly replenished by periodic growing out of seed. Critical policy questions have not been addressed, indications are that mechanisms are inadequate, and comprehensive plans have not been made to cope with present and future problems. The Secretary of Agriculture should centralize authority over the Federal portion of the National Plant Germplasm System with that central authority having responsibility for all Agriculture funded germplasm activities. The system's first priority should be to develop a comprehensive long range plan.

**Availability:** GAO
**Geographic Relevance:** National; State; County

*Program Objectives:* Objectives are to improve small farmers' incomes and small farm productivity through research and extension programs directed specifically to small farmers. *Abstract:* The Director of the Science and Education Administration contended that much agricultural research and extension work is size neutral, benefiting both large and small farmers. He said that funding requested for small farm programs under the Rural Development Act of 1972 could cause potential duplication. Land grant universities could redirect funds from other areas into small farm research and extension activities. In a 1975 report, GAO concluded that many small farm operators could be helped to increase their incomes through more extension and research programs oriented to the specific, known needs of small farm operators. Although the focus on small farms has increased, more remains to be done. Increased funding has been recommended. It appears that the benefits from such programs are positive, both in terms of returns to indivudual small farm families and in social terms. The Department of Agreiculture has the flexibility to award grants for priority research projects, and such projects could include small farm projects. Agricultural research has generally been underfunded in recent years and could be redirected. Large scale enterprises have been the principal beneficiaries of agricultural research and extension in the farm sector. The reason for the lack of expansion of State programs to assist small scale farmers seems to be a lack of funds. The Department of Agriculture may only encourage, not direct, research areas undertaken in cooperation with the States.

**Geographic Relevance:** National

*Program Objectives:* The purpose of the Adult Expanded Food and Nutrition Education Program (EFNEP) is to improve the diets of low-income families through guidance on diet and good buying, care, and preparation. *Abstract:* EFNEP program managers need to consider alternative ways to reach and educate more target families with less funds and personnel. One-to-one communication is the EFNEP basic approach to recruiting and instructing homemakers. This approach is costly and limits the number of families that can be reached. The Secretary of Agriculture should instruct the Director of Science and Education to encourage State and local EFNEP officials to develop and test various innovative methods for reaching more families within the constraints of available resources. He should evaluate the methods that are developed and disseminate to all EFNEP officials information on those found to be feasible and effective. He should develop objective and measurable standards for judging program effectiveness and the evaluation and feedback tools needed to measure program performance against such standards. The Director should provide additional guidance and training to State and local program officials on supervisory and recordkeeping requirements and responsibilities. He should develop specific criteria for State program official to use in selecting program sites and allocating funds among the sites, encourage increased State and local EFNEP coordination with other nutrition-related programs for reaching more families, and ensure adequate evaluations of the 16 pilot projects which are exploring ways of increasing food stamp families' participation in EFNEP.

*U.S. Grain Transportation Network Needs System Perspective To Meet Future World Needs.* (CED-81-59).
4/4/81; 79 pp. + app. (8 pp.)
**OMB Funding Code/Title:** 12-2800-0-1-352 / Salaries and Expenses
**Program:** Office of Transportation
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1621-1627).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO examined the grain transportation system. It identified actual and potential bottlenecks, explained their significance, and explored the status of activities addressing them. The grain transportation system in the United States is complex and interrelated and involves railroads, waterways, roads, and ports. Changes and events in one area affect all others, straining their ability to perform efficiently. Efforts to improve grain transportation tend to concentrate on individual transportation modes rather than on the transportation network as a whole. An integrated analysis that considers interrelationships between the various components of the grain transportation system has yet to be conducted. An analysis is needed of overall system constraints, interactions, and solutions to prepare for the export industry. The Secretary of Agriculture should: (1) expand the monitoring of the grain transportation system to identify potential bottlenecks and analyze their impact on the total grain transportation system; (2) bring together industry, labor, and Government to explore the best way to alleviate present bottlenecks and forestall future ones; (3) examine the impact of a changing railroad role in grain movement on alternative modes of transportation and export facilities including the rural road and bridge network and port facilities; (4) explore the relationship of grain shipments via the Mississippi River and the Great Lakes and the capability of the Welland Canal to accommodate projected Great Lakes grain shipments and suggest actions that could be taken to improve grain movement through the Canal; (5) determine the impact of port congestion and inefficiencies on the entire grain transportation system and help involved parties find solutions to improve overall system effectiveness; and (6) review the level of resources available for this purpose to determine what adjustments are warranted.

**Program:** Public Affairs
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Act of May 15, 1862, as amended (P.L. 37-63; 7 U.S.C. 2201); Revised Statute 520.
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Office of Governmental and Public Affairs provides information support and services through regional information offices in order to bring the Department of Agriculture closer to its public and to better serve client groups. *Abstract:* Consolidation of agency filed information offices most likely would result in cost savings. Information delivery would be more cost effective, and services to the public would be broadened. Regional offices could serve Department-wide demand on a regional basis. By instituting systems to handle the Department-wide range of regional inquiries, the coordinated regional offices would reduce the work that is now fed back to Washington, DC.

**Authority:** International Investment Survey Act of 1976, as amended (P.L. 94-472; 90 Stat. 2059; 22 U.S.C. 3101-3107). Bretton Woods Agreements Act (P.L. 79-171, § 8; 22 U.S.C. 286f).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Bureau of Economic Analysis (BEA) collects and analyzes data on U.S. direct investment abroad, on foreign direct investment in the United States, and on income flows associated with such investments for inclusion in balance of payments and international investment position accounts. Government and industry use the information extensively in economic planning and decision making. *Abstract:* The audit disclosed that BEA needs to take more aggressive action to reduce the number of persons or organizations who fail to report. BEA should develop and implement procedures for reporting habitually delinquent respondents to Department officials responsible for investigating such noncompliance and for initiating civil or criminal enforcement actions under the provisions of the International Investment Survey Act of 1976. The audit also disclosed that BEA needed to take prompt followup action on potential reporters. The International Investment Division (IID), BEA, needed to provide for appropriate off-site backup of its data files to prevent accidental loss. BEA should prepare and issue written operating procedures to guide day-to-day activities of the IID staff and BEA should provide clearly defined criteria for proper compensation for work performed for other Federal and non-Federal entities. The audit also disclosed that BEA could do more to reduce survey mailing costs.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The National Oceanic and Atmospheric Administration works with States and territories to carry out research and development of commercial resources. *Abstract:* This survey found that the National Marine Fisheries Service (NMFS) has not established criteria for evaluating the results of individual projects as they are completed. While some projects may have produced benefits, there is evidence that in certain geographic areas they have not. In the absence of definitive standards for prompt performance, NMFS has no assurance that Federal resources are being used effectively and no means, therefore, for evaluating the overall effectiveness of the grants program. Also, there are no controls to ensure that project costs claimed are reduced by amounts grantees receive when they resell property acquired with grant funds.

*Program Objectives:* Objectives are to provide essential administrative support and management advice to the Department of Commerce to enable operating units to execute programs in an efficient and effective manner. *Abstract:* Recommendations resulting from the review are that: responsibility for Equal Employment Opportunity (EEO) programs mandated by law be retained by operating units; secretarial control over these programs be strengthened through improved direction, guidance, and monitoring; no reductions be made in legally mandated programs; programs not legally mandated be eliminated, reduced, centralized, or modified; expenses to EEO Committees be reduced; and special emphasis programs manager positions in operating units be eliminated. These recommendations have been approved by the Secretary of Commerce and are in various stages of implementation.

*Program Objectives:* Objectives are to provide management advice and administrative support to the Department of Commerce and to enable operating units to execute programs in an efficient and effective manner. *Abstract:* The study will assess the impact of requirements imposed on the Department of Commerce by laws, regulations, and external Federal agency directives, as well as those imposed on the bureaus by the Department. The study will include all administrative management areas and address the basis for the requirements, staff time and other costs associated with compliance, utility and necessity of requirements, extent of overlap among requirements, and improvements necessary to streamline administrative processes. A data base of these requirements will be established. Recommendations will be made for modification and/or elimination of unproductive requirements. Guidelines will be developed for implementing a work simplification effort.

**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* Objectives are to provide management advice and administrative support to the Department of Commerce to enable operating units to execute their programs in an efficient and effective manner. *Abstract:* The report concludes that cost reductions and improvements in the management and utilization of the Department's Automatic Data Processing (ADP) resources can be achieved, primarily through consolidation. Particular consolidations should be reviewed on a case-by-case basis, but generally appear to be more viable where existing facilities are being used to process similar applications, use similar equipment, or are located in the same geographical location. Recommendations for immediate action call for the consolidation of Main Commerce building computer installations and the economic replacement of obsolete computer equipment. Further consolidations were targeted in the areas of systems analysis, programing, and operations for administrative systems; and ADP activities relating to maintenance, data preparation, computer operations, and backup facilities. Further recommendations were referred for Departmental consideration for achieving compatibility of word processing systems, bulk purchase of ADP supplies, and training of Contracting Officer's Technical Representatives.

**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 1; 15 U.S.C. 1501).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* Objectives are to provide management advice and administrative support to the Department of Commerce to enable operating units to execute their programs in an efficient and effective manner. *Abstract:* Survey results indicate the majority of senior executives are more aware of what is expected of them, communicate more frequently with their bosses, and believe their performance can now be viewed in a more objective manner as a result of the Senior Executive Service (SES) performance appraisal process. Despite these changes, many senior executives view the increase in paperwork as burdensome and time-consuming and question the benefits of the process which reduces executive efficiency. Improving the process is an area the Department will look at during the development of its new Management by Objective system. In addition, there were strong feelings of disenchantment, disappointment, and bitterness among the SES members regarding executive compensation matters. SES members object to the many unfulfilled compensation "promises" made by Congress, such as failure to lift the pay cap and restrictions on bonuses and incentive awards. Many report they are seeking employment outside the Federal government.

*Program Objectives:* The purpose of the program is to provide essential administrative support and management advice to the Department of Commerce to enable operating units to execute programs in an efficient and effective manner. *Abstract:* The major findings/recommendations are: centralization of the personnel function would not yield significant staff savings; and the Department can best influence personnel management activities by strengthening central policies, systems, and oversight. The major changes are: Departmental participation in the selection of people for key jobs, an active personnel management evaluation program, establishment of work measurements and standards, coordination of college recruiting, and greater standardization of personnel policies.

**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO studied the extent and nature of foreign investment in, and its impact on, the U.S. seafood processing industry. GAO identified 61 U.S. seafood processing firms with foreign ownership and 27 seafood processing firms which had loans from foreign sources. GAO noted that: (1) a high percentage of foreign investment originates from relatively few companies within one country, Japan; (2) foreign investors may use a variety of indirect investment methods to gain control of seafood processors; (3) the percentage of the industry's total output by processors with foreign investment is unknown; (4) foreign representatives are sometimes on the boards of directors of U.S. seafood processors; and (5) foreign investors may specify certain provisions in loan agreements with U.S. processors.

**Availability:** GAO
**Geographic Relevance:** International/Foreign; National; State; City

*Program Objectives:* The program objective is to provide for U.S. participation in International Expositions. *Abstract:* A Federal reuse plan was not developed for the U.S. pavilion at Expo '82. Because there was none, the Department of Commerce's construction of a permanent pavilion was not justified. The applicable law does not specify that a less costly, temporary pavilion should be built when no such plan exists. The sponsors were late in developing an adequate financial plan. As a result the General Services Administration (GSA) decided not to manage the construction, and Commerce had to hire a construction manager and overlap design and construction; this will result in higher cost. Congress should amend Public Law 91-269 to provide for full documentation by Commerce and GSA that a permanent structure is required. In addition, Commerce should be required to disclose in its appropriations justification whether there is sufficient leadtime to design and build a permanent pavilion using conventional contracting procedures. If not, the extra cost should be disclosed.

**Authority:** Tariff Act of 1930, as amended (P.L. 71-361, title III, § 303; 46 Stat. 687; 19 U.S.C. 1303). Trade Expansion Act of 1962, as amended (P.L. 87-794; 19 U.S.C. 1303). Anti-Dumping Act of 1921 (P.L. 67-10, § 201; 42 Stat. 11; 19 U.S.C. 160-173).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The steel trigger price mechanism was established to speed up antidumping investigations affecting the steel industry. If steel imports were priced below pre-established trigger prices, the Treasury Department, which originally administered the program with the Customs Service, and later the Department of Commerce, could initiate antidumping investigations without prior industry complaint. *Abstract:* GAO's main conclusions are: (1) Customs may have overlooked a large volume of potential dumping, based on criteria it and the Treasury used–tonnage criteria to identify potential dumping were established only for some product categories and were not directly related to potential injury to the domestic steel industry; and (2) Treasury may not have exercised sufficient care in handling customs recommendations and investigations. GAO makes a number of specific recommendations for imprcving the administration of the program.

**Geographic Relevance:** International/Foreign

*Program Objectives:* U.S. antidumping and countervailing duty laws are designed to counter the import of goods into the United States at unfair prices. The market disruption provision of the Trade Act of 1974 (section 406) is intended to provide additional protection in the event that imports from Communist countries disrupt U.S. markets. *Abstract:* This review focused on the application of antidumping and countervailing duty laws to goods from nonmarket, principally Communist, countries and the use of the market disruption provision of the Trade Act of 1974. U.S. antidumping law is not easily applied to imports from nonmarket countries because of the nature of these coutries' economies. The Commerce Department should publish regulations more clearly specifying how the law will be applied to imports from nonmarket countries. Further, the Congress should consider amending the legislation to provide more workable methods for calculating dumping and suspending dumping investigations. To date, U.S. industries have obtained no relief under the market disruption statute, and ways are presented to amend the statute should the Congress deem it advisable.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose of the Development Grants Program is to attract business to distressed areas which, in turn, would cause or create jobs for area residents. *Abstract:* GAO reviewed industrial park projects to evaluate their effectivenss in attracting businesses and saving or creating jobs for area residents. A number of park projects have problems. They have not attracted businesses, are not well utilized, and have not created as many jobs as anticipated when the projects were proposed. The Economic Development Administration (EDA) must improve its assessments of the need for and location of proposed projects. EDA should also establish a management assistance program to help the park applicants attract business to their parks. Although a primary purpose of EDA-funded industrial park projects is to attract new businesses or business expansion, about 46% of the businesses reviewed were business relocations. Despite an EDA policy which prohibits businesses from relocating from outside of the immediate area of the park, such relocations are occurring. Many of the relocations did not provide additional jobs. EDA has not systematically gathered, monitored, or evaluated data on project accomplishments to judge their overall effectiveness. It will be several years until park project accomplishment data will be available. EDA has designed a system to monitor and evaluate all projects; however, GAO believes criteria used may be too high and too easily attainable to be a realistic measure of project success; timeframes are too short for realizing employment projections; and the number of businesses required to submit employment reports is too limited to effectively measure employment data. GAO made recommendations to the Secretary of Commerce to improve the program, including the requirement for applicants to conduct feasibility studies on proposed projects which include assessment of whether the project is needed and favorably located to attract businesses.

**Availability:** GAO
**Geographic Relevance:** National; State; City; County; Congressional District; Standard Metro. Stat. Area (SMSA)

*Abstract:* The General Accounting Office (GAO) studied the possible politicization of the Federal discretionary grant award process in election years. Gross patterns of awards over a 10-year period to 6 key states were analyzed. The analysis did not reveal any apparent differences in award patterns in election versus nonelection years. Fluctuations in awards did occur, but they appeared to be either random or related to such things as increased program funding, a dominant end-of-year spending peak, or the funding of one-time special items. To the extent that politicization may have occurred, it was related to the timing and orchestration of normal awards to achieve maximum visibility.

**Program:** Policy and Market Development
**CFDA NO.:** 11.800
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 3; 15 U.S.C. 1512). Small Business Act, as amended (P.L. 85-536, § 3; 15 U.S.C. 631 note); Executive Order 11625.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** City; New York (NY)

*Program Objectives:* The purpose of the New York City Minority Business Development Office is to coordinate minority enterprise activities within the city's administrative structure and to act as advocate for the furtherance and advancement of minority businesses through the use of resources available from the City and from the private sector, viz targeting business opportunities for minorities through City-controlled procurements and contractual opportunities, bonding assistance, capital resources, tax abatement and incentives, and through education and training programs. *Abstract:* The study found that the scope of work was too broad and encompassed unnecessary duplication, especially in the area of private sector resources; that there was a high vacancy and turnover rate; that the systems and procedures were inadequate; that there was a lack of procurement and contract goals; and that the program was nonagressive, with the City providing less than 2% of procurements and contracts to minority business enterprises. It was recommended that the scope of work be refined to concentrate solely on City-controlled markets and other resources with requisite systems and procedures for monitoring; that goals be established for the minority business enterprises; that the City's Interagency Committee for Minority Business Development, which was the focal point for procurements and contracts, be reactivated; that staff size be reduced and that the City be required to make cash contributions to the program; and that the Minority Business Development Agency regional managers and technical staff become more involved in the program. This evaluation report is being used in negotiating the terms for grant renewal.

**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 3; 15 U.S.C. 1512). Small Business Act, as amended (P.L. 85-536, § 3; 15 U.S.C. 631 note); Executive Order 11625.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Interracial Council for Business Opportunity "High Impact Program" was intended to increase, on a national basis, the number of medium and large size minority owned firms in this country through internal and external expansion techniques, acquisitions, mergers, and buy outs. *Abstract:* Major findings of the study revealed that the grantee: (1) was focusing the majority of its client assistance resources almost solely on the New York State area; (2) while having some strong staff capabilities, generally lacked the capacity to address more complex client transactions; and (3) failed to achieve a minimally acceptable level of performance. Further, major areas of the program represented duplications of other similar agency initiatives. It was, therefore, concluded that the program was operationally dysfunctional and economically inefficient. Continued funding by the Minority Business Development Agency was not recommended.

*Evaluation of the National Shoe Retailers Association Minority Business Opportunity Program (NSRA/MINBOP).* (658101).
3/81; 20 pp.
David A. Rakes
**OMB Funding Code/Title:** 13-0201-0-1-376 / Minority Business Development
**Program:** Enterprise Development
**CFDA NO.:** 11.800
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 3; 15 U.S.C. 1512). Small Business Act, as amended (P.L. 85-536, § 3; 15 U.S.C. 631 note); Executive Order 11625.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National; State; City

*Program Objectives:* The Minority Business Opportunity Program (MINBOP) is an adjunct initiative of the National Shoe Retailers Association and was established in 1972 to provide "hands on" assistance to minorities seeking to purchase former majority owned retail shoe outlets and to enter other phases of the industry underrepresented by minority entrepreneurs. *Abstract:* The study generally found that the large influx of minorities into the retail shoe industry during the early 1970s–which fostered the development of the National Shoe Retailers Association's Minority Business Opportunity Program–has dropped sharply over the intervening years. Further, the drop in new entries was accompanied by a rising number of minority owned shoe store failures or discontinuances which were apparently brought on by market trend dynamics and escalating costs of doing business. Also, it was found that the national orientation of the program, as envisioned by the Minority Business Development Agency, was no longer being pursued. Rather, the MINBOP staff was basically focusing its primary attention on the New York and Los Angeles metropolitan areas, virtually deleting major retail shoe markets from the program. It was, therefore, concluded that the program concept was no longer valid and that the program was generally inefficient, ineffective, and economically wasteful. The Agency was advised to discontinue its financial support of the "MINBOP" program.

**Geographic Relevance:** National

*Program Objectives:* This program was designed to develop and test methodologies for measuring the contributions of National Bureau of Standards (NBS) research to productivity growth at the industry level. The NBS programs are designed to provide measurement methods, data, standards, and standard reference materials for various technical areas in industry and government agencies. *Abstract:* Phase I examined the NBS Semiconductor Technology Program. The results of Phase I found that firms acquiring significant amounts of technical information from the NBS semiconductor program could increase the productiveness of their own research and development by at least one third. Social rates of return of the NBS program were substantially above the social costs of the projects.

**Availability:** National Academy of Sciences

*Program Objectives:* The National Bureau of Standards is responsible for the custody, maintenance, development, and promotion of the national standards of measurement; determination of physical constants and properties of materials; development of methods for testing materials, mechanisms, and structures; promotion of standard practices incorporated in codes and specifications; and provision of scientific and technical services to government agencies. *Abstract:* Since 1959, the National Academy of Sciences has provided a continuing evaluation of the technical functions and operations of the National Bureau of Standards (NBS) through the appointment of panels of experts that periodically review the programs of the various units. The findings from these reviews are reported to the Director of NBS and are incorporated into appropriate management decisions. The reports assess the balance and general effectiveness of all programs of NBS and make recommendations and suggestions with regard to: increasing or initiating technical work in fields where needs exist or are anticipated; improving the mix or capabilities of the technical staff; eliminating or curtailing work of lower priority; modernizing existing equipment and facilities or adding new equipment or facilities; improving technical methods; and improving the dissemination of technical results to the science industry and to the public.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The National Bureau of Standards (NBS) supports the U.S. scientific and technical community by setting standards for the Nation's physical measurement system and carrying out a number of scientific and technical services for industry and Government. *Abstract:* The broad and multifaceted statutory mission of NBS has prompted concern about the ability of NBS to carry out its functions in relation to enabling legislation and the many subsequent legislative mandates. GAO identified several actions that may help NBS carry out its current and future responsibilities. These include: (1) encouraging Government agencies to have others perform work which can be done outside NBS; (2) limiting the services NBS provides to industry that are available elsewhere; and (3) expanding the limited NBS-funded research grant program. In addition, Congressional concern with productivity and innovation in the economy has stimulated interest in adding new roles or functions to NBS that could help these factors. Also, GAO believes that the possibility of expanding the NBS Joint Institute for Laboratory Astrophysics should be explored. However, new NBS roles or functions should be adopted only after careful consideration is given to how these added responsibilities will impact on the effectiveness of NBS.

## NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

**E00306-001**
*An Evaluation of the Mariners Weather Log.* (718013).
7/80; 28 pp.
L. Pitt
**OMB Funding Code/Title:** 13-1450-0-1-306 / Operations, Research, and Facilities
**Program:** Environmental Data and Information Services
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Commerce, Justice, State, the

Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** National Weather Service Organic Act, as amended (26 Stat. 653; 15 U.S.C. 311).
**Availability:** Agency
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The Mariners Weather Log is designed to provide weather information for mariners on the oceans and the Great Lakes, to foster interest in the cooperative observation program, to establish liaison with marine weather observers, and to promote attention to weather aspects of maritime safety. *Abstract:* The purpose of this study was to determine the efficiency and effectiveness of the Mariners Weather Log in meeting consumer needs. The study found that more than half the subscribers are ships and shipping companies; the remainder are in a wide variety of categories. By fostering interest in the National Weather Service cooperative ship observation program, the Log saves the Government money be obtaining free weather observations from ships. The report recommends that the Weather Service should solicit more articles from port meteorological officers, monitor reader response to subscriber purges, follow through better on reader suggestions, and institute a subscription charge for non-eligible readers.

**E00306-002**
*Need To Assess Quality of U.S.-Produced Seafood for Domestic and Foreign Consumption.* (CED-81-20).
10/15/80; 5 pp.
**OMB Funding Code/Title:** 13-1450-0-1-306 / Operations, Research and Facilities
**Program:** Ocean Fisheries and Living Marine Resources
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Fish and Wildlife Act of 1956, as amended (P.L. 84-1024, § 5, 11; 70 Stat. 1119; 16 U.S.C. 742d, 742j). Agricultural Marketing Act of 1946, as amended (P.L. 79-733, title II, § 203; 60 Stat. 1087; 7 U.S.C. 1621-1627).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO is studying the adequacy of current Federal efforts to improve the quality and safety of seafoods processed in the United States for domestic and foreign consumption. The study includes an assessment of the National Marine Fisheries Service (NMFS) program and efforts to improve the quality and safety of seafood harvested and processed in the United States. A controversy exists over whether the quality of U.S.-produced seafoods is competitive for foreign trade or adequate for domestic consumption. NMFS officials believe that the variable quality of U.S. seafoods is contributing to the low volume of seafood sales in the United States. The Secretary of Commerce should direct the Administrator of the National Oceanic and Atmospheric Administration to initiate a study to assess the quality of U.S. seafood produced for domestic and foreign consumption.

**E00306-003**
*Improvements Needed in NOAA's Long-Range ADP Plans.* (CED-80-136).
8/29/80; 9 pp.
**OMB Funding Code/Title:** 13-1450-0-1-306 / Operations, Research, and Facilities
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 4; 32 Stat. 826; 15 U.S.C. 1511 note); Reorganization Plan 4 of 1970.
**Availability:** GAO

*Abstract:* A review of the National Oceanic and Atmospheric Administration's (NOAA) management of its automatic data processing (ADP) resources focused on the adequacy of the NOAA efforts to plan for and meet its current and future ADP needs and to ensure the efficient use of such resources. NOAA has certain organizational weaknesses that have hindered past efforts to plan for ADP resources and may continue to limit its ability to plan effectively for its future ADP needs. The Secretary of the Department of Commerce should, in evaluating the plans provided by NOAA and other Department agencies, review the organizational structure, policies, procedures, and processes used to collect the information to assure that actions proposed in the plans are the most efficient and effective alternatives. Further, the Secretary should direct the NOAA Administrator to give the Office of Management and Computer Services (OMCS) the authority necessary to require the main program elements to provide information for the NOAA-wide plans. As a minimum, OMCS should have the authority to require formalized ADP planning structures for ADP at the main program elements.

**Agency Contact:** General Accounting Office (202) 443-8691.

**E00306-004**
*Marine Sanctuaries Program Offers Environmental Protection and Benefits Other Laws Do Not.* (CED-81-37).
3/4/81; 25 pp. + 2 app. (11 pp.)
**OMB Funding Code/Title:** 13-1451-0-1-302 / Coastal Zone Management
**Program:** Marine Sanctuaries
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Marine Protection, Research, and Sanctuaries Act of 1972, as amended (P.L. 92-532, title III, § 302; 86 Stat. 1061; 16 U.S.C. 1432).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Title III of the Marine Protection, Research, and Sanctuaries Act established the marine sanctuaries program, which preserves or restores ocean areas for their conservation, recreational, ecological, or aesthetic values. *Abstract:* A review was performed to determine whether the program is providing marine environmental protection over and above that which is provided under other Federal statutory authorities. Although the program overlaps with other Federal laws that protect the marine environment, it complements their authority by offering benefits other laws do not. The program provides comprehensive regulation, planning, and management to assure long-term preservation of all the resources that require protection. It also provides environmental protection where gaps exist in the coverage provided by other Federal regulatory authorities. The program also encourages and supports the research and assessment of the condition of sanctuary resources and promotes public appreciation of their value. GAO believes that title III is an appropriate way to accomplish the basic objectives Congress envisioned in establishing an effective marine sanctuaries program.

**Agency Contact:** General Accounting Office (202) 443-8691.

**E00306-005**
*Need For and Plans To Strengthen Procurement and Property Management Controls at National Oceanic and Atmospheric Administration Laboratories.* (PSAD-80-66).
8/18/80; 18 pp. + app. (4 pp.)
**OMB Funding Code/Title:** 13-1450-0-1-306 / Operations, Research, and Facilities
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 4; 32 Stat. 826; 15 U.S.C. 1511 note).
**Availability:** GAO
**Geographic Relevance:** Government Installations

*Program Objectives:* The purpose of the National Oceanic and Atmospheric Administration's (NOAA's) Laboratories Program is to operate a group of laboratories performing research, technical development, and service programs dealing with weather, marine, and environmental matters. *Abstract:* GAO reviewed the procedures and controls designed to prevent fraud, abuse, and waste in selected procurement and property management operations at NOAA. GAO found a serious lack of adherence to procedures and controls prescribed by Federal Procurement and Property Management Regulations. At the National Severe Storms Laboratory, deficiencies existed in approving purchase requests, ordering and receiving goods and services, and soliciting competitive prices. At the NOAA Procurement Office, deficiencies existed in preparing contract solicitations, performing price or cost analyses, preparing memorandums of contract negotiations, requiring timely audits of contractor costs, controlling contractor-purchased Government property, and using contracts having illegal cost-plus-a-percentage-of-cost type features. The Secretary of Commerce should support the efforts of NOAA officials to strengthen their controls over local procurement and supply management functions and direct NOAA to furnish GAO with periodic progress reports on the status of those implementation efforts. He should direct NOAA to stop using illegal cost-plus-a-percentage-of-cost type contractual arrangements and recover all sums which were improperly paid under such arrangements. The Inspector General should be directed to determine whether the case of cost-plus-a-percentage-of-cost arrangement which GAO discovered is only an isolated instance or whether there is widespread use of this illegal contract type in the Department of Commerce.

## PATENT AND TRADEMARK OFFICE

**E00308-001**
*Quality Review Program.* (418104).
In process
William A. Smith, III
**OMB Funding Code/Title:** 13-1006-0-1-376 / Salaries and Expenses
**Program:** Patent Process
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of July 19, 1952, as amended (P.L. 82-593; 66 Stat. 792; 35 U.S.C. 131).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The objectives of the Quality Review Program are to evaluate and continuously monitor the quality of the patent examination process in order to prevent the allowance of unpatentable claims, to improve public confidence in issued patents, to detect trends away from normal practice, to feed back information to management for evaluation and corrective measures, to emphasize the importance of quality to patent examining corps personnel, and to compile a data base on the quality of the patent examination process. *Abstract:* The Quality Review Program involves a continuous review by patentability review examiners of a randomly selected sample of allocated patient applications. The review examiners primarily consider the correctness of the field of search and the appropriateness of the classification of each application, the patentability of the allowed claims in view of the prior art of record or other statutory reasons, and compliance with current examining procedures and practices.

**Authority:** Act of July 19, 1952, as amended (P.L. 82-593; 66 Stat. 792; 35 U.S.C. 1-42). Trademark Act of 1946, as amended (P.L. 79-489; 15 U.S.C. 1062-1072).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The basic goals of the Patent and Trademark Office are to stimulate inventiveness and technological progress pursuant to patent laws enacted by the Congress, to protect business investments and consumers by administering Federal laws relating to registration of trademarks, and to disseminate the technological information disclosed in patents. *Abstract:* This evaluation will compare original and current projections of automatic data processing (ADP) related costs, anticipated staff savings, introduction of new ADP systems, and outputs to be derived as a result. The validity of information utilized in developing current projections regarding the ADP capabilities of the Patent and Trademark Office will be reviewed. Variances from the original projections will be identified, the cause or causes for variance will be determined, and recommendations for corrective action will be prepared.

## BUREAU OF THE CENSUS

**E00309-001**
*Coverage Evaluation of the 1978 Census of Agriculture.* (518201).
11/81
D. Dean Prochaska
**OMB Funding Code/Title:** 13-0450-0-1-376 / Periodic Censuses and Programs
**Program:** Economic Statistics Programs: Census of Agriculture
**CFDA NO.:** 11.002
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of August 31, 1954, as amended (P.L. 83-740, § 1; 13 U.S.C. 142).
**Availability:** Agency; GPO
**Geographic Relevance:** National; State; County; census regions

*Program Objectives:* The purpose of the Census of Agriculture is to provide a periodic statistical picture of the agricultural sector of the economy at the county, State, and national level. *Abstract:* A major source for indications of completeness of farm count and accuracy of specified characteristics of farms is the census of agriculture. The primary purposes of the programs are to provide users of census data with estimates of the completeness of the census and to identify factors associated with census error in order to improve coverage in future censuses.

**Agency Contact:** Bureau of the Census. (301) 763-5534.

**E00309-002**
*Evaluation of the Public Information Campaign for the 1980 Census.* (518202).
In process
Jeffrey Moore
**Contractor:** DAMANS and Associates; Chilton Research Service; Rockville, MD; Radnor, PA
**OMB Funding Code/Title:** 13-0450-0-1-376 / Periodic Censuses and Programs
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of August 31, 1954, as amended (P.L. 83-740, § 1; 13 U.S.C. 141).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The purposes of the public information campaign for the 1980 census were to inform the public that a census was to be taken; to create and reinforce knowledge about, and more favorable attitudes toward, the census; and to elicit the public's cooperation in responding accurately and promptly. *Abstract:* The purpose of the evaluation is to determine the effectiveness of the public information campaign for the 1980 census in terms of overall penetration of (exposure to) census messages, changes in knowledge about and/or attitudes toward the census, and effects of exposure to the campaign on response to the census.

**Agency Contact:** Bureau of the Census. (301) 763-7331.

**E00309-003**
*Procedures To Adjust 1980 Census Counts Have Limitations.* (GGD-81-28).
12/24/80
**OMB Funding Code/Title:** 13-0450-0-1-376 / Periodic Censuses and Programs
**Program:** Demographic Statistics Programs: Decennial Census
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of August 31, 1954, as amended (P.L. 83-740, § 1; 68 Stat. 1012; 13 U.S.C. 141).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County; Congressional District; Standard Metro. Stat. Area (SMSA)

*Program Objectives:* Objectives of a decennial census are to determine the distribution of legislative representatives. Fund distributions and many governmental and private sector policy decisions are based on census data. *Abstract:* The 1980 Decennial Census results will affect the distribution of seats in the Congress and many billions of dollars in Federal and State assistance. Incorrect counts could cause inequities. The Census Bureau acknowledges that in each census there is a net undercount. It conducts evaluations to estimate the size of the undercount, but the evaluations have known limitations for adjusting census counts. Bureau research suggests statistical analysis might be helpful. In obtaining an estimate of the undercount, the Bureau deleted a major part of its planned evaluation. Time was saved, but some precision was lost. Congress was not notified. GAO is recommending steps to formalize a statistical analysis research program and to require a report of plans to estimate census over or undercounts and an independent evaluation of the plans. GAO is also recommending legislation to keep the Congress informed of the plans. The Bureau currently believes there is no statistically defensible way of adjusting the census counts. It plans to continue research.

**Agency Contact:** General Accounting Office (202) 275-4808.

## UNITED STATES TRAVEL SERVICE

**E00311-001**
*Survey of Participants of the 1981 International Tourism Exchange.* (608101).
4/81; 5 pp.
Don Wynegar
**OMB Funding Code/Title:** 13-0700-0-1-376 / Salaries and Expenses
**Program:** International Tourism Development
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** International Travel Act of 1961, as amended (P.L. 87-63, § 1-5; 22 U.S.C. 2121-25).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** International/Foreign

*Program Objectives:* The purpose of the annual International Tourism Exchange is to bring together foreign tourbrokers and U.S. tour packagers in order to stimulate foreign travel to the United States. *Abstract:* A questionnaire was filled out by the International Tourism Exchange participants to determine their evaluation of the 1981 program. Results were compared to a survey of the 1979 participants. The answers to the survey questions were very similar to the 1979 response; 73% found the International Tourism Exchange useful and 64% made new sales commitments. Very few suggestions for improvement were made, and 95% of the participants said they would probably attend next year. Data on concerns of the participants about the growing size and complexity of the annual International Tourism Exchange will be used in planning for subsequent exchanges.

## CHIEF ECONOMIST

**E00314-001**
*Program Evaluation Review.* (508101).
8/81
Doris L. Trunfio
**OMB Funding Code/Title:** 13-1500-0-1-376 / Salaries and Expenses
**Program:** Office of Economic Affairs
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 3, 4; 15 U.S.C. 1512, 1516).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The role of the Office of Economic Affairs is to monitor, interpret, and prepare forecasts of current business conditions and to advise the Chief Economist on the economic impact of proposed legislation and Federal activities. *Abstract:* This limited study was conducted to provide management with some indication of the time and cost of processing routine, repetitive assignments and to provide data for future use in supporting requests for additional appropriations. It was recommended that the study be expanded to provide a more in-depth evaluation of the utilization of existing resources.

**Agency Contact:** Chief Economist. (202) 377-5710.

## BUREAU OF ECONOMIC ANALYSIS

**E00316-001**
*Review of State Personal Income Series.* (558101).
In process
Edwin J. Coleman
**OMB Funding Code/Title:** 13-1500-0-1-376 / Salaries and Expenses
**Program:** Bureau of Economic Analysis: National Economic Accounts
**CFDA NO.:** 11.025
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Department of Commerce Organic Act, as amended (P.L. 57-87, § 3; 32 Stat. 826, 827; 15 U.S.C. 175; 15 U.S.C. 1512).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** State; County

*Program Objectives:* The objective of the Bureau of Economic Analysis program is to provide a clear picture of the U.S. economy through the preparation, development, and interpretation of the national income and product accounts, summarized by the gross national product (GNP); the wealth accounts, which show the business and other components of national wealth; the input-output accounts, which trace the interrelationships among industrial markets; personal income and related economic series by geographic area; the U.S. balance of payments accounts and associated foreign investment accounts; and measures relating to environmental change and to welfare within the framework of the national economic accounts. The work on the national economic accounts is supplemented by the preparation and analysis of other measures of business activity, including various tools for forecasting economic developments, such as surveys of investment outlays and plans of U.S. business, econometric models of the U.S. economy, and a system of leading, coincident, and lagging economic indicators. *Abstract:* The State Personal Income Series (1929-80) is undergoing an internal evaluation with respect to methodological consistency. The objectives of this evaluation are to improve methods of estimation of the State series, to provide reference tools for staff members, and to correct defects in documentation. At the county level, this evaluation is based on a review of the method flow charts. These charts serve to document estimating procedures for the county personal income series.

**Agency Contact:** Bureau of Economic Analysis. (202) 523-0901.

## BUREAU OF INDUSTRIAL ECONOMICS

**E00317-001**
*Operational Plan for the Bureau of Industrial Economics.* (588201).

**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The objectives are to provide for the construction, acquisition, replacement, addition, expansion, extension, alteration, operation, and maintenance of the housing units the military services provide their married personnel. *Abstract:* For many years the Department of Defense (DOD) has not had a completely effective cost accounting and reporting system to manage its family housing inventory. GAO's review at eight service installations disclosed various housing-related problems which resulted in increased operations and maintenance costs and contributed to unit cost differences. Present family housing cost reports also contain inaccuracies, and DOD's method of averaging unit costs of unlike units makes comparisons among the services meaningless. This report also discusses DOD's budget justification process and controls. GAO recommends that the Secretary of Defense direct each military service to provide feedback to each installation on changes made to its initial housing budget request.

*Program Objectives:* The Department of Defense (DOD) is responsible for insuring that adequate capacity exists for most mobilization needs in case of war. *Abstract:* The latitude provided in DOD guidance on the wartime use of military hospitals in the continental United States (CONUS) permits significant differences in the way the military services determine the extent of care that could be provided in their facilities if a war began. As a result of these differences, DOD does not have an accurate assessment of the medical mobilization capacity of CONUS military facilities. Economic feasibility studies have been used primarily to select the most cost-effective means of meeting peacetime military medical care needs. Hospital design concept studies are also oriented to meeting peacetime performance requirements. Congress should consider the relative importance of the planned hospitals' role in the event of mobilization, the extent of mobilization expansion flexibility being built into the new hospitals, the gain or loss of mobilization capacity resulting from the planned hospital replacements, and whether nearby civilian hospitals can be expected to support mobilization needs. The Secretary of Defense should develop information necessary to assess the impact on mobilization of each hospital to be replaced and provide guidance to the military services to consider wartime readiness needs.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* GAO was requested to review allied cost sharing for U.S. military forces stationed overseas. GAO studied a related issue involving two minor military construction account (MMCA) projects. The projects were constructed in connection with a complex for an Army battalion in which most of the funding came from special Federal Republic of Germany (FRG) accounts. GAO believes that the Army avoided the statutory MMCA dollar limitation by classifying the construction of two adjacent and similar buildings as two separate MMCA projects. Although the Army could argue that their action was authorized under applicable Army regulations, GAO believes that the classification of these buildings as two separate projects defied the spirit and intent of the statutory funding limitation. Also, the Army constructed an addition to one of these buildings using funds obtained from FRG. GAO believes that the Army failed to obtain satisfactory compensation from FRG for return of facilities in connection with the move. This situation suggests that future, similar incidents are possible, especially if congressional calls for increased allied cost sharing result in more cooperative projects using host nation funds. The Secretary of Defense should clarify Department of Defense (DOD) regulations on the mixing of MMCA and nonappropriated funds, specifying that foreign source funds should be treated as nonappropriated funds. The Secretary should also assure that the services' regulations on the matter are in compliance with the regulations of DOD. The Secretary should emphasize the importance of obtaining adequate compensation for facilities returned to host nations and develop regulations for control of funds obtained in this way or in other cost-sharing initiatives to assure that their use complies with host nation agreements. The Secretary of the Army should strengthen his control over MMCA funding to prevent fragmenting of projects.

*Abstract:* A review was performed of procedures and controls relating to military pay cross disbursements and the reconciliation of accounting data to pay data at the finance centers of all the military services. Objectives were to determine if the services were following applicable guidance in reporting and controlling cross disbursements and if the services' systems were effective in preventing or detecting pay errors and irregularities. The review included an examination of regulations, policies, procedures, document flow, and management reports. A test of transactions was also performed. It was determined that when one military service pays another's members, overpayments may result. In a test of almost 3,000 cross disbursements cases, 160 payments were found which had not been charged to the members' pay accounts and represented potential overpayments. The cross disbursements not posted were from several months to over a year old. Disbursing officers in many cases did not adhere to prescribed procedures in reporting cross disbursements. The Secretary of Defense should require the Secretaries of the Army, Navy, and Air Force to: make a special review of available documentation at all disbursing offices and finance centers to ensure that all cross disbursement procedures had been followed, collect any overpayments identified by the special review, establish effective military procedures to control military pay cross disbursement vouchers, and institute a reconciliation process to ensure proper charges to the military pay appropriations.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* The review included all interest-bearing accounts used by foreign countries to meet current obligations from Defense trust fund used for foreign military sales as of September 1980. The purpose was to perform an indepth review of policies and procedures used by Defense for interest-bearing accounts. Concern was expressed about the policy allowing foreign countries to transfer moneys not needed to meet current obligations from their trust fund account to interest-bearing accounts. GAO found that a more accurate Department of Defense (DOD) accounting system is needed to bill, collect, and disburse advance segments from foreign countries which are held in trust fund accounts to meet obligations incurred under military sales agreement. As of September 1980, about $3.5 billion of the $8.5 billion in advance deposits has been transferred to the interest-bearing accounts. Certain safeguards are needed to adequately protect U.S. interests: (1) established collection procedures must be enforced, (2) the amount of funds available for transfer into interest-bearing accounts must be accurately determined, and (3) definitive guidelines must be established by DOD for processing foreign countries' requests to invest advance payments in interest-bearing accounts. GAO recommended that the Secretary of Defense should establish controls to ensure that funds received for possible contract termination are not used for routine contract payments.

**Authority:** Act of August 10, 1956 (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The purpose of the review was to determine whether the military services' property accounting systems for Government-furnished material issued to production contractors adequately monitored the status of the material and provided reliable financial information. Production contracts were reviewed at the electronic procurement activities of three of the military services and at four Defense plants having custody of Government-furnished material. Inquiries were made about property accounting systems at other procurement and contract administration activities. The Defense policy of relying almost solely on contractors for accounting controls over the estimated billions of dollars in materials furnished to them is not effective. GAO's review of four production contractors showed that lack of proper accounting led to Defense providing or initiating shipments of $1.3 million in material that was over contract allowances. The same problem was noted in prior GAO and Defense reports on overhaul and repair contracts. The Secretary of Defense should require the military services to establish systems which, together with contractors' records, will effectively account for and control Government-furnished material.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to identify and quickly fund low-cost capital equipment which can reduce costs and improve productivity. *Abstract:* Except for the Navy, the services' program management has improved since the 1978 review. The Air Force and Army efforts have demonstrated that, under the program, good ideas can be quickly evaluated and funded and savings made promptly. However, the full potential of this fast payback program has not been realized because of inadequate management attention. The Air Force and the Army need to improve their postinvestment analysis and reporting to clearly demonstrate PEIF program benefits and meet congressional requirements. The Navy particularly has not devoted the management resources and emphasis needed to ensure a successful and credible PEIF program. GAO found that: (1) the Navy's program was not being adequately promoted; (2) Navy guidance did not fully comply with Department of Defense and Congressional guidance; (3) extensive delays occurred between investment identification and installation; (4) the justification for many approved projects was invalid or insupportable; and (5) postinstallation analyses were inadequate. The Secretary of Defense should require the Director of Defense Productivity Program Office to evaluate the relative merits of all capital investment incentive programs for which it has responsibility to determine whether or not resources needed to ensure proper program implementation and guidance can be made available to PEIF program. If needed resources cannot be found with the Defense Productivity Program Office, the Secretary should consider other alternatives such as reallocating resources from other programs, hiring additional personnel, or terminating the PEIF program. The Secretaries of the Air Force and the Army should take action to enhance the credibility of the program by establishing a system of independent, onsite postaudits to validate savings achieved and submitting the reports that are required as part of the budget process, stating where savings have been realized and applied. The Secretary of the Navy should request no additional money for PEIF program until an action plan for improving the program is developed and then reviewed and approved by the Secretary of Defense.

**Availability:** GAO

*Abstract:* Concern was expressed about the loss of large numbers of quality noncommissioned officers (NCOs) from the services. Beyond the loss of too many skilled NCOs, the concerns centered on whether those NCOs staying in the services are of the same quality level as those who are leaving. GAO made a trend analysis which examined three quality indicators: (1) mental category, (2) educational level, and (3) pay grade. GAO found that among those NCOs the services desire to retain: (1) the services tend to be losing those who have higher mental aptitudes than those reenlisting, (2) there is little difference in the educational levels of those staying and those leaving; and (3) those staying have average pay grades slightly higher than those leaving.

**Authority:** Uniform Code of Military Justice, as amended (P.L. 90-623; 82 Stat. 1314; 10 U.S.C. 815).
**Availability:** GAO

*Program Objectives:* Article 15 of the Uniform Code of Military Justice is intended to give military commanders a swift, efficient, and easy way to punish those committing minor offenses, maintain discipline, and deter misconduct. The punishments authorized for Article 15 are limited and generally less severe than those that can be imposed by court martial. *Abstract:* In recent years, about 350,000 Article 15s were imposed per year; however, about 96% were imposed on personnel in the lowest pay grades (E-1 through E-4). GAO found that Article 15 can negatively affect service members' entire careers. The Article 15 punishment often becomes a permanent part of the service members' personnel file and can lead to involuntary separation from the service with a less than honorable discharge; such discharge can limit veterans' benefits and civilian employment opportunities. The Article 15 punishment process involves only a minimum of legal and procedural safeguards. GAO believes that most commanders conscientiously attempt to make appropriate, fair, and effective decisions in imposing Article 15; however, wide disparities exist within and among the services with respect to how offenses are dealt with. GAO recommends that the Department of Defense and the services: (1) provide more guidance on the uses of Article 15 punishments, (2) monitor its use, and (3) minimize the unwarranted consequences associated with receiving Article 15 punishments.

**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* GAO conducted a study to determine whether more useful information on historic trends, current situations, and future projections could be provided from within the services and the Department of Defense (DOD), and whether they have the capability to project minority and female representation for use in formulating manpower policies. Total minority and female representation in each service increased between 1970 and 1979, while the active force size was reduced from 2.7 to 2 million members. The increases were more heavily concentrated in the enlisted force. This caused the proportion of minority enlisted personnel to be significantly higher than the proportion of the officer force, and the gap has grown wider each year since 1971. GAO found that computer models exist which could be used to satisfactorily estimate future distribution patterns. The models would, of necessity, employ variables to account for expected changes in such factors as accessions, attrition, length of tours, promotions, and duty assignments. In the annual requirements report to the Congress, the Secretary of Defense should provide: (1) historical data on the distribution (grade, rank, and occupational specialty) of minorities and females; and (2) future projections for the distribution of minorities and females along with the methodology and models used, variables considered, and any assumptions made.

*Recruiting Management in the National Guard.* (FPCD-80-79).
8/15/81; 4 pp.
**OMB Funding Code/Title:** 21-2065-0-1-051 / Operation and Maintenance, Army National Guard; 57-3840-0-1-051 / Operation and Maintenance, Air National Guard
**Program:** Training Operations; Training Support
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 3032-3033). 10 U.S.C. 8032-8033.
**Availability:** GAO

*Abstract:* GAO reviewed the recruiting management in the Air National Guard (ANG) and the Army National Guard (ARNG) by examining pertinent records, interviewing management and recruiting officials, and observing the various organizational structures in operation. GAO found that ANG appeared to be selecting, training, and managing its recruiting force in a manner which will achieve its recruiting objectives. The ARNG goal-setting practices may be detracting from the depth of the actual recruiting problem. ARNG has an official policy that its units should develop their recruiting objectives on the basis of their ability to recruit personnel rather than on the manpower needed to reach desired peacetime manning levels; GAO believed that the use of the actual objectives needed to reach peacetime manning and the related resources necessary to accomplish that goal should be the driving force in all recruiting-management resources decisions. In this way, if reductions in recruiting goals and related resourcing levels are necessary, they would be viewed in the proper context of providing less than adequate levels. GAO also determined that: (1) State ARNG practices may be hindering recruiting effectiveness, (2) recruiting management tools are not being fully utilized, and (3) recruiting monitoring and evaluation can be improved.

*Equitable Cost Sharing Questioned on NATO's Airborne Early Warning and Control Program.* (ID-80-47).
7/1/80; 29 pp. + 2 app. (3 pp.)
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Combat Aircraft; Aircraft Support Equipment and Facilities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Authorization Act of 1979 (P.L. 95-485).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* The United States will pay about 42% of a $1.8 billion airborne early warning and control program funded by the North Atlantic Treaty Organization (NATO) that has been placed on a cooperative basis wherein the costs will be shared by participating countries. Factors which are delaying the successful negotiation of a production contract or otherwise contributing to potential funding shortfalls include: the prime contractor's not-to-exceed estimate is approximately $147 million over the agreement figure, nonparticipation by Belgium or other nations, expenses associated with the British aircraft interoperability, termination of the planned sale of aircraft to Iran, failure of participants to pay an agreed fair share of inflation on the base year costs, and any reduction in Air Force aircraft buy. The program currently faces substantial potential funding shortfalls, and the United States could be faced with absorbing these costs. Several countries qualified their program commitments in the agreement, expressing various reservations. The linkage to several separate offset arrangements to the aircraft program could affect its successful completion. GAO believes that the United States has not put enough emphasis on obtaining commitments from participating NATO allies to equitably share in any program cost increases over and above the amounts provided for in the basic agreement. Congress may wish to require a full reporting from the Department of Defense (DOD) on the status of the overall NATO program. It might require DOD to identify any conditions or caveats placed upon the aircraft purchase by participating countries, total U.S. program costs (including waivers and other identifiable concessions), unresolved program issues, and any potential funding shortfall, with an explanation on how the shortfall is expected to be absorbed.

**Program:** Support of Other Nations
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 150; 10 U.S.C. 2667). International Security Assistance and Arms Export Control Act of 1976 (P.L. 94-329; 90 Stat. 734; 22 U.S.C. 2751). Arms Export Control Act (P.L. 90-629; 82 Stat. 1320; 22 U.S.C. 2341).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* The Senate Foreign Relations Committee requested a review of the implementation of the defense property leasing authority contained in 10 U.S.C. 2667 which enables the Secretaries of the military departments to lease nonexcess property when it is determined to be in the public interest or will promote national defense. The law was intended to aid the industrial facilities' standby programs of the military services after World War II by authorizing the lease of defense plant production equipment and real property to domestic private enterprises. However, in recent times, the law has been used to transfer military equipment to foreign countries. The transfer of military equipment to a foreign government should only be authorized under the Foreign Assistance Act (FAA). The alternative has been to either provide military equipment to foreign countries under a grant basis under FAA or through sales made under the Arms Export Control Act. Restrictions contained in the FAA and the Arms Export Control Act have been avoided by leasing property to foreign countries under 10 U.S.C. 2667. The Department of Defense has not established procedures in leased agreements, thereby causing mismanagement in billing and collection of lease-associated payments. Adoption of the Arms Export Control Act dollar threshold in the International Security and Development Cooperation Act of 1980 will prevent further avoidance of the reporting requirements. Congress should amend 10 U.S.C. 2667 to prohibit the lease of defense property to foreign governments on a rent-free or nominal-rent basis. Equipment transferred on this basis should be done exclusively under the authority of the FAA. The Secretary of Defense should direct his agency in establishing management control and accountability procedures, by monitoring lease agreements, and by assuring that all lease payments are made when due.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* Department of Defense (DOD) policy states that the services have the right and the duty to discharge enlisted members who clearly demonstrate that they are unqualified for retention and that their behavior and performance should be so characterized. Typically, 90% or more of the discharges issued are honorable, but over 1.5 million members have received less than fully honorable administrative discharges in the last 25 years. GAO believes that DOD needs to promptly establish and enforce timeframes for processing adverse separations and modify, where necessary, the services' different and sometimes inconsistent discharge procedures. Faster processing is possible without reducing service members' rights. Such processing would save pay and allowances which would otherwise be paid to members awaiting discharge and to commanders processing them and would reduce the time that unproductive and potentially disruptive members remain on active duty. GAO found that differences in the services' processing procedures were a major factor in the time it takes to discharge a service member and that command monitoring and attention to discharge timeframes significantly decreased processing time.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National; Military Installations Major Commands

*Abstract:* Under the All Volunteer Force, morale, welfare and recreation (MWR) activities are viewed as an inducement to attract and retain men and women who may not ordinarily choose military service and its hardships, discomfort, and inconvenience. The Department of Defense (DOD) also believes that MWR activities are essential to the well-being of service personnel, contributing to unit input to corps, unit identity, and military readiness. Although DOD has a large backlog of facility needs which cannot presently be funded, some other construction projects are being funded that are larger than needed, have not been adequately justified or planned, or will be used primarily by persons not on active duty. GAO recommended that DOD improve its long-term project-planning processes and offer more guidance on this to the Services; revise construction criteria to provide more realistic guidance on how to meet MWR needs; and provide more central funding of construction projects.

*Program Objectives:* The Department of Defense (DOD) operates military exchanges as an important part of its morale, welfare, and recreation program. The exchanges are essential to the morale and esprit de corps of military personnel and, accordingly, contribute to improved combat readiness. Military exchanges are found worldwide and, in one year, generate billions of dollars in sales. *Abstract:* DOD reported that during the first half of Fiscal Year 1980, military exchanges accounted for 58% of all potential fraud cases referred to the Justice Department for investigation. GAO examined the efforts made by the military exchange system, the services, and DOD to prevent fraud and waste in exchange procurement. It was found that controls were lax and that not all management levels involved had been aggressive in exercising their oversight responsibilities. GAO recommended that the exchanges develop a management information system to provide data on the nature and extent of fraud in their operations and a system of management controls to deter fraud.

*Military Exchange Systems: How They Can Provide More Benefits for Military Personnel.* (FPCD-80-50).
7/18/80; 23 pp. + 2 app. (7 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropria-

tions: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028). Civil Service Reform Act of 1978 (P.L. 95-454, title IX, § 906; 92 Stat. 1111; 5 U.S.C. 552).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National; Military Installations Major Commands

*Program Objectives:* The Department of Defense (DOD) operates military exchanges as an important part of its morale, welfare, and recreation program. Military exchanges are essential to the morale and esprit de corps of military personnel and, accordingly, contribute to improved combat readiness. Military exchanges are found worldwide and, in one year, have sales totaling in the billions of dollars. *Abstract:* Consolidating and centralizing the military services' exchange systems could reduce costs and increase the economic benefits to service personnel. Also, if DOD did not require exchange systems to fund other morale, welfare, and recreation activities, the exchanges could operate without appropriated fund support and could focus attention on providing the lowest practicable prices. To reach a decision on consolidation, GAO recommended that the Armed Forces Exchange Coordinating Committee or a similar study group identify the potential cost savings; improved benefits; and feasibility of consolidating the three Defense exchange systems, in whole or in part. GAO also recommended that exchanges become self-sufficient.

*Automated Career Management for DOD Civilians: Performance and Potential.* (FPCD-81-3).
11/14/80; 42 pp. + app. (5 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1979 (P.L. 95-457, title III, § 131).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Automated Career Management System (ACMS) is a computer based civilian personnel inventory, appraisal, and referral system designed to provide Department of Defense (DOD) management with the information needed to assure proper career development and placement of civilian employees in large DOD-wide career fields. *Abstract:* GAO noted the following problems with ACMS: (1) questionable validity of the appraisal instrument; (2) doubtful reliability and job-relatedness of the rating system; and (3) insufficient training in ACMS rating and ranking process. The main problem is that DOD is not using ACMS for purposes other than appraisal and promotion referral. The Secretary of Defense should: (1) determine costs, benefits and results of DOD-wide appraisal and referral; (2) validate ACMS; (3) train supervisors in ACMS appraisal procedures; (4) redefine and restate need for DOD-wide automated personnel system; (5) determine information needs; (6) evaluate whether ACMS satisfies those needs; (7) establish new feedback system; (8) develop guidance on management use of ACMS; (9) investigate use of ACMS as tool in mobilization planning.

*Evaluation of Defense Attempts To Manage Battlefield Intelligence Data.* (LCD-81-23).
2/24/81; 27 pp. + 6 app. (19 pp.)
**OMB Funding Code/Title:** 57-3600-0-1-051 / Research, Development, Test, and Evaluation, Air Force; 21-2040-0-1-051 / Research, Development, Test, and Evaluation, Army
**Program:** Tactical Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Battlefield Exploitation and Target Acquisition (BETA) project was initiated as a joint service experiment to develop a test bed for automated collection, analysis, correlation, and dissemination of tactical intelligence data. *Abstract:* In June 1980 congressional committees redirected the BETA project after learning of development schedule slippage, inordinate cost increases, reduced capabilities, and poor performance during testing. GAO concluded that: (1) BETA project capabilities were not sufficiently developed and tested for early fielding, and considerable corrective action is needed; (2) data are not processed within required response times; (3) pressure from DOD management contributed significantly to project development problems; (4) Air Force was formerly the only service committed to using the BETA design and software; and (5) Army planned further test bed experiments. GAO recommended that the Secretary of Defense should include certain provisions in the revised project plan requested by Congress, such as an orderly, well-planned software development process.

*Decisions To Be Made in Charting of DOD's Assault Breaker.* (MASAD-81-9).
2/28/81; 17 pp.
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force; 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** General Purpose Forces
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropria-

tions: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Program Objectives:* The Assault Breaker antiarmor weapon system was conceived to attack and neutralize enemy armored vehicle reinforcements before they reach the central battle. Assault Breaker is designed to markedly increase destructive capability against massed armor using conventional munitions, in hopes of obviating a need to resort to nuclear munitions. *Abstract:* The Department of Defense (DOD) must still demonstrate that the Assault Breaker concept is technologically feasible and that it is cost-effective and affordable. DOD must also devise a management approach to deal with the joint Army-Air Force nature of the program. GAO recommends that the Secretary of Defense: review whether planned testing is sufficient basis for a full-scale development decision; coordinate Services' and OSD cost and effectiveness studies; and establish an office to centrally manage development of Assault Breaker.

*Air Force and Navy Plans To Acquire Trainer Aircraft.* (MASAD-81-11).
2/28/81; 29 pp.
**OMB Funding Code/Title:** 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy; 57-3600-0-1-051 / Research, Development, Test, and Evaluation, Air Force
**Program:** Technology Base
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Program Objectives:* The military services must train pilots to accomplish those missions requiring aircraft. Current trainer aircraft are reaching the end of their service life. Therefore, under OMB Circular A-109, the Department of Defense (DOD) instructions, and congressional direction, the Air Force and Navy have each initiated trainer aircraft programs. *Abstract:* Congressional interest and direction have been toward common aircraft for both the primary and advanced phases of the Navy and Air Force undergraduate pilot training programs. However, in the Air Force's Next Generation Trainer and the Navy's Undergraduate Jet Flight Training System acquisition programs, there is little likelihood that the selected aircraft for the two services will be common. It is recommended that Congress explore with DOD whether: (1) Defense has adequately complied with congressional direction regarding common aircraft; (2) the apparent decrease in support, primarily by the Air Force, for common aircraft is warranted; and (3) the Air Force plans for consideration of the Navy's trainer, T-34C, meet congressional intent as expressed in August 1980 by the Armed Services Committee. It is recommended that the Secretary of Defense should modify the Companion Trainer Aircraft reliability testing to include B-52D crews to obtain actual data on applicability of the training to all crews.

*Recruiting Management in the Armed Services.* (FPCD-80-78).
8/15/80; 2 pp. + app. (34 pp.)
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army; 57-3400-0-1-051 / Operation and Maintenance, Air Force; 17-1804-0-1-051 / Operation and Maintenance, Navy; 17-1106-0-1-051 / Operation and Maintenance, Marine Corps
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 3032). 10 U.S.C. 8032. 10 U.S.C. 5531.
**Availability:** GAO

*Abstract:* GAO conducted a limited review of recruiting management practices of the armed services. GAO found some service-unique problems which were reported to the services in question. Many of the problems have either already been corrected or are now being corrected. Problem areas noted in the Navy included: recruiters' quality of life, treatment of urban versus rural recruiters, control operations, delayed entry program usage, and recruiter training. Areas of Army recruiting in which GAO noted problems were: training of supervisory personnel, coordination of management control systems, and performance evaluations of management at district recruiting commands, area commands, and recruiting stations. Areas which contained problems in the Marine Corps were: operational control policies, goal inflation practices, enlistment processing and recruiting reporting systems, training provided to recruiting personnel and adequacy of training records, perceptions about awards and management support, and policy adherence by station commanders. A review of the Army National Guard found that their practices may be hindering recruiting effectiveness, recruiting management tools are not being fully utilized, and recruiting monitoring and evaluation can be improved. GAO also reviewed the Army's recent internal investigaiton of recruiter malpractice.

**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The review was undertaken in an effort to identify changes which are needed in the acquisition process to minimize problems with future weapon systems. Many of today's weapon systems cannot be adequately operated, maintained, or supported because the Department of Defense (DOD) does not pay enough attention to logistic support, human factors, and quality assurance during the design phase of the acquisition process. These problems deter the systems' effectiveness to defend the country in case of war. It was found that DOD has made changes to direct more attention to these three factors, but GAO believes that several additional actions need to be taken if these considerations are to receive adequate emphasis in the design of military systems and equipment. The Secretary of Defense should: (1) develop new or modify current data reporting procedures; (2) establish logistic support research and study programs; (3) provide detailed guidance critical program documents; (4) provide for improved testing and evaluation of the supportability of systems; (5) modify human factor specifications, standards, and handbooks; (6) develop common methodologies and data sources for use by system designers in forecasting skill levels of military personnel; (7) ensure that all major systems are subjected to adequate testing and examination from a human factors standpoint; (3) produce comprehensive guidance for program managers as to how a design should be evaluated for quality assurance; (9) ensure that the quality history files on contractors are fully established; and (10) strengthen the quality assurance work force.

**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* In a Government-wide study of research and development (R&D) laboratories, some Department of Defense (DOD) laboratory directors expressed concern about their laboratories' loss of opportunity to perform long-term basic research because DOD has placed emphasis on solving near-term problems. Therefore, GAO reviewed the levels and trends of in-house basic research and the extent that the levels have declined in recent years to determine what impact this might have on basic research because the future health and vitality of the DOD laboratories. GAO found that the defense R&D provides the technological foundation for national security. DOD in-house laboratories play a vital role in striving for technological leads in areas important to defense and guarding against technological surprise by the adversary. Doing basic research is essential to the laboratories' vitality because it helps them to attract good scientists, keep up with and use advances in science, and increase the overall level of technical ability. The level of basic research performed at the in-house laboratories has seriously declined, and the DOD research growth is planned for the external research community. Allowing the laboratories to remain at the current level of basic research performance could erode their long-term ability to perform those functions which are basic to supporting a mission organization. The DOD laboratory directors should consider whether the present level of in-house research is adequate to maintain the health and vitality of laboratories. In addition, the Secretary of Defense should give the same careful consideration to the research base represented by the in-house laboratories as has been given to the needs of the external research community.

*Use of Cost-Deferred-Free Contracts Can Be Costly to the Government.* (MASAD-81-10).
3/11/81; 2 pp.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Administration and Associated Activities: Defense Contract Audit Agency
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Cost Deferred Free (CDF) contracts are the least desirable method of contracting for supplies and services. They are temporary contracts issued to begin work and are to be converted to a full definitized contract. They are not recognized in Defense regulations and must be issued following a deviation procedure. The eight CDF contracts have not been definitized in a timely manner because of the parties' inability to agree on price. Until definitized, they operate like cost-reimbursement-type contracts under which the Government is responsible for essentially all costs incurred in performing the contract. While these contracts remain undefinitized, the contractor has litte incentive to control costs, and the Government's negotiating position deteriorates. These higher costs may be used as the basis for the negotiation of subsequent contracts. The contractor does not bear an equitable share of the contract cost risk. At this late stage in the program, it would probably be unwise to establish other sources for the weapons. However, the agency should try to avoid dependence on sole sources in future contracts. If information on the manufacturing costs and labor hours incurred were included in the contractor's cost accounting system, the parties would be in a better position to predict future costs. The agency has failed to adequately implement the Department of Defense policy of maintaining a single face to industry in administrating contracts. This is costly and confusing. DCAS should be the sole representative with the contractor on contract administration.

*DOD Should Determine Cost and Operational Effectiveness of Helicopter In-Flight Escape Systems.* (PSAD-80-65).
7/14/80; 9 pp. + app.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The efforts of the Department of Defense to develop helicopter in-flight escape systems were reviewed to determine what actions were taken on GAO recommendations for development contained in a June 1973 report to Congress. GAO assessed the bases for subsequent decisions not to develop the escape systems. The in-flight escape issue is complex and emotional. Studies by the services before 1973 supported the need for escape systems. Virtually all development efforts stopped in 1974, even though interest in the systems resurfaced from time to time and still exists. More recent studies generally supported a continuing need for the Cobra in-flight escape system. GAO also found that decisions against development were based on subjective appraisals rather than quantitative analyses which would have provided the best decision base. An Army organization recommended such an analysis as far back as 1973. Because of the potential for saving lives, the complexity of the issue, and the lack of quantitative bases for a proper decision to develop or not to develop the system, a cost and operational effectiveness study is needed to settle the issue. The Secretary of Defense should require a thorough and quantitative cost and operational effectiveness study of the Cobra attack helicopter escape system. Included should be such factors as: (1) the number of pilots that would be saved both in peacetime and during combat; (2) benefits to be derived from increased pilot morale and military readiness; (3) savings from eliminating death payment and reducing training costs; (4) the percentage of time spent flying in the nap-of-the-earth environment; (5) the effect of the system's added weight on the operational mission; (6) costs to develop and retrofit the system on existing Cobras and install it on newly produced helicopters; and (7) the concept's application to other service helicopters.

*The Congress Should Require Better Justifications of Aircraft for Noncombat Missions.* (LCD-80-83).
7/22/80; 2 pp. + 3 app. (15 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Since 1976, GAO has issued several reports questioning the Department of Defense's justifications for aircraft intended for noncombat missions, such as training, peace-time attrition, and backup during depot maintenance. The aircraft justifications were based on unrealistic data and without adequate consideration of more economical alternatives. GAO observed virtually no change in the quantities of noncombat aircraft to be procured and little improvement in the requirements to save as much as $6.9 billion by limiting the number of noncombat aircraft to those that can be adequately justified. Congress should require the Secretary of Defense to provide justifications for the planned procurement of noncombat aircraft that: (1) are based on current and realistic data; (2) recognize the impact of the procurement on readiness; and (3) consider the modern aircraft design and improved maintenance techniques. In addition, Congress should withhold approval of appropriations requested to procure these aircraft until these justifications are provided.

**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The purpose of this study is to evaluate Department of Defense (DOD) use of consultants. In spite of the continuing attention being focused on the use of contract consultants, serious and pervasive problems continue to exist. These problems include: (1) the weakening in-house capabilities of DOD to perform its mission; (2) extensive contract awards resulting from unsolicited proposals; (3) the significant involvement of former DOD officials and employees in contracts; (4) the continuous renewal of contracts; (5) instances of questionable need for and use made of extensive contract modifications. Congress should consider legislation which would minimize the funding of sole-source contracts for management support services and the funding of such contracts resulting from unsolicited proposals. The Director of the Office of Management and Budget (OMB) should: (1) extend the management controls outlined in OMB Circular A-120 to other categories of management support services; and (2) assure that agencies identify all requested funds to be used for management support services and provide this information to Congress. The Secretary of Defense should: (1) require DOD activities to establish an independent review board to assure the highest level review of proposed contract awards and modifications over $100,000 for management support services; (2) identify functions being performed by contractors which are governmental in nature and determine personnel needs and develop ways to meet those needs; and (3) identify management support services which are not governmental in nature and which are required on a continuing basis.

*Comparison of Air Force and Navy Aircraft Engine Parts Reparability Coding.* (LCD-80-85).
7/8/80; 5 pp.
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force; 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* A survey was undertaken of depot overhaul and repair procedures for aircraft engines and their associated costs. In the survey, GAO noted that some aircraft engine parts, which both the Air Force and the Navy repair, are coded as reparable by the Air Force and nonreparable by the Navy. This is possible since both the Air Force and Navy consider in their coding of engine parts the purchase price, cost to repair, and the number of parts in each inventory. In its review, GAO found that all the potential savings to be gained from repairing a part are not being realized. An estimated 700 out of a total of 1,300 parts, being repaired by each service and coded differently, are parts which could be condemned at maintenance levels below the depot level. The potential savings from their repair could total $1.3 million. Additionally, GAO found that the difference in coding hinders the Department of Defense's efforts to integrate the management of parts used by two or more services. According to Air Force officials, a part repaired by two services will never be integrated beyond Phase I if each service codes the parts differently. Parts coded reparable and nonreparable are funded separately and have different requirement computations for new purchases. These differences are such that it is impractical for one service to effectively manage the parts of another service unless both code the parts the same. The Secretary of Defense should require the Navy to review its coding of aircraft engine parts now coded nonreparable and to recode these parts appropriately if they can be economically repaired by either the Navy or the Air Force.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Industrial Preparedness Planning Program of the Department of Defense (DOD) was developed to assure that sufficient industrial capacity exists to meet potential wartime needs for defense systems, equipment, and component parts. *Abstract:* GAO recommends that the Congress, in coordination with the Executive Branch, should establish a clearly defined and comprehensive national policy regarding industrial preparedness. Then the Secretary of Defense should restructure the program to complement the policy. He should also define priority and funding availability for industrial preparedness planning in relation to other DOD and service branch programs. The Secretary should also ensure that service planning efforts interface with other DOD programs to assure continuity of support over the planned period and that service branch planning efforts are scaled to what can be accomplished realistically within assigned priority and available funds.

*Employment Trends and Grade Controls in the DOD General Schedule Workforce.* (FPCD-81-52).
7/28/81; 34 pp. + 8 app. (22 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* The Department of Defense's (DOD's) General Schedule average grade rose from 7.29 in 1964 to 7.89 in 1980. This was due, in large part, to technology advancement and increasingly complex defense work, creating the need for more high grade professional, administrative, and technical workers and fewer low grade clerical personnel. It was not possible to determine the amount of grade escalation caused by any one factor. DOD's grade escalation was less than that experienced in other Federal agencies, suggesting that control mechanisms applied in DOD slowed growth. However, some controls can produce staffing imbalances, poor morale, reduced services, and other cost inefficiencies. Position management offers a better alternative to control unnecessary grade escalation. It does not arbitrarily cap justified grade increases, and it avoids the problems associated with other controls now in place. GAO recommends that the Secretary of Defense insure each component complies with DOD policy guidance on position management and require supervisory/managerial performance appraisals to include position management as a critical element. GAO recommends that the Congress require DOD components to report on the adequacy of position management programs and, where a component demonstrates it has implemented an effective position management program, use it as the grade control mechanism in lieu of other controls.

*Follow-up on Actions To Improve Coordination and Utilization of Human Resources Research and Development.* (FPCD-81-62).
7/23/81; 7 pp.
**OMB Funding Code/Title:** 21-2040-0-1-051 / Research, Development, Test and Evaluation, Army; 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy; 57-3600-0-1-051 / Research, Development, Test and Evaluation, Air Force; 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** All Programs; Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 101 et seq.).
**Availability:** GAO

*Abstract:* GAO reviewed the actions taken by each of the services and the Office of the Secretary of Defense (OSD) to coordinate and increase the use of human resources research and development. GAO believed the two OSD staffs most concerned with human resources research had made a great deal of progress in improving coordination. Additional actions suggested were: (1) development of a Department of Defense (DOD) directive specifying OSD offices' roles in managing and reviewing research programs; (2) priority development of an automated research information system; (3) additional staffing; and (4) production of a DOD annual report of research and development efforts. GAO also had observations on actions taken by the individual service laboratories primarily involved in human resources research.

*Congress Cannot Rely on the Military Services' Reported Real Property Maintenance and Repair Backlog Data.* (LCD-81-19).
2/2/81; 35 pp. + 2 app. (5 pp.)
**OMB Funding Code/Title:** 21-2020-0-2-051 / Operation and Maintenance, Army; 17-1804-0-1-051 / Operation and Maintenance, Navy; 17-1106-0-1-051 / Operation and Maintenance, Marine Corps; 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 2661 et seq.).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* Congress cannot rely on the Department of Defense's (DOD's) reported real property maintenance and repair to ensure uniform interpretation of its definition and guidance for backlog reporting. This resulted in: the Navy revising its reporting system to show only part of its total maintenance and repair backlog; the Air Force designing its reporting system to show only part of its real property deficiencies to be corrected by commercial contract; Army and Marine Corps systems generally reporting unconstrained backlog; and certain commands and installations taking individual actions, some in violation of service regulations, which further constrained the level of reported backlog. The reported backlog data are further understood and unreliable because: (1) facility inspections do not ensure that all deficiencies are found; (2) DOD's requirement that backlog be identified from installation work plans is not consistently followed; (3) cost estimates do not always show increased facility deterioration and price escalation; and (4) inadequate command reviews result in erroneous and inconsistent data reporting. GAO recommended that the Secretary of Defense: (1) require the services to modify their systems to ensure uniform interpretation of guidance for backlog reporting; (2) report DOD's unconstrained total requirements in annual budgets; (3) require the services to improve inspections to ensure complete project identification based on adequate cost estimates; (4) establish criteria for determining acceptable or manageable levels of backlog; and (5) provide that the defined manageable level be uniformly used by the services.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 101 et seq.).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO reviewed the contrasts and similarities among the military compensation systems of the United States and five other countries and identified foreign pay policies or practices which offered the potential for use by the United States in countering All-Volunteer Force manpower problems. The military compensation system of the United States differs from the compensation systems of other countries in the manner in which it undertakes to satisfy personal living requirements with goods, services, and facilities, and in the way it compensates according to marital and dependency status. Australia, Canada, and the United Kingdom have discarded pay and allowances structures similar to those of the U.S. system in favor of a taxable salary system. In Australia and the United Kingdom, the taxable salary system also includes an "X factor" paid to servicemen to compensate for the disadvantages and rigors of military life. U.S. pay rates, particularly when expressed in terms of purchasing power, are well below those of other volunteer force countries. The following concepts appear to offer promise for use in U.S. efforts to overcome current manpower problems: (1) the application of an "X factor" to the military pay system; (2) the linkage of the military pay system to the civilian economy; (3) the creation of a taxable salary system as the U.S. military compensation system; (4) the employment of differential pay rates as inducements for longer term enlistments; and (5) the application of special and premium pays to attract and retain military personnel to specific duties and occupations.

*Recruiting Malpractice: Extent, Causes, and Potentials for Improvement.* (FPCD-81-34).
7/20/81; 50 pp.
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army; 17-1804-0-1-051 / Operation and Maintenance, Navy; 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 3032). 10 U.S.C. 5531. 10 U.S.C. 8032.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Department of Defense's (DOD's) military recruiting program is responsible for providing the nation's active, reserve, and Guard components with volunteers to man the Army, Navy, Air Force, and Marine Corps. *Abstract:* This report is based on a questionnaire survey of Armed Forces recruiting personnel in all Services. Malpractice is perceived by many recruiting personnel to be a problem, mostly in the Active Force components, particularly the Marine Corps. Types of malpractice thought to be occurring range from violating minor administrative regulations to downplaying of arrest records and drug problems and misleading of applicants about the military service. Most instances of malpractice are attributed to pressure to meet difficult quotas. Recruiting personnel believe that the lessening of unnecessary administrative and processing responsibilities would be the most effective action to counter malpractice. The Secretary of Defense should periodically measure the incidents and causes of recruiting malpractice and use the results in making oversight reviews.

*Flexible Management: A Must for Effective Armed Services Recruiting.* (FPCD-80-64).
9/18/80; 36 pp. + app.
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army; 57-3400-0-1-051 / Operation and Maintenance, Air Force; 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Training, Medical, and Other General Personnel Activities; Training, Medical and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 3032). 10 U.S.C. 8032.
**Availability:** GAO

*Abstract:* The effectiveness and integrity of recruiting programs in the Armed Services are influenced to a very large degree by policy and resource allocation decisions made within the Office of the Secretary of Defense (OSD) and the service headquarters. Perhaps the greatest stumbling block to achieving recruiting goals is the inflexibility inherent in the management of service recruiting programs. In addition, the requirement for all services to obtain congressional committee approval for spending additional recruiting funds through reprograming hinders management's ability to quickly adjust its recruiting program. The Secretary of Defense should: (1) monitor the service's implementation of the recruiting objectives to determine that the regulations and guidelines are being interpreted with reasonable flexibility; (2) improve the recruiting data monitoring and analysis within OSD by obtaining more staff and more funds for such activities, including long-range analyses; (3) direct each service to develop a formal plan concerning nonmonetary, standby enlistment initiatives which recruiting managers can use to quickly adjust to changes in the recruiting marketplace; (4) direct the Army to improve recruiting data gathering and analysis in the National Guard and Reserve; and (5) direct the Army and the Air Force to further investigate their Active, Reserve, and National Guard decisionmaking activities.

*Additional Efforts Needed To Improve Morale, Welfare and Recreation Program Management.* (FPCD-81-59).
6/22/81; 7 pp.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National; military installations (major commands)

*Program Objectives:* Under the All Volunteer Forces, morale, welfare and recreation (MWR) activities are viewed as an inducement to attract and retain men and women who may not ordinarily choose military service and its hardships, discomfort, and inconvenience. The Department of Defense (DOD) also believes MWR activities are essential to the well-being of service personnel, contributing to unit esprit de corps, unit identity, and military readiness. *Abstract:* Additional efforts are needed at the service and DOD headquarters levels to establish minimum standards and periodic surveys by which to assess needs and monitor progress. This study found that service headquarters needed specific information on the types of MWR activities offered at individual installations. It was recommended that each service establish minimum standards for its MWR program and eventually combine them into a DOD-wide standard, consider using periodic surveys as a tool to measure need, and make improvements in their facility inventory systems.

*DOD's Use of Remotely Piloted Vehicle Technology Offers Opportunities for Saving Lives and Dollars.* (MASAD-81-20).
4/3/81; 25 pp. + 3 app. (8 pp.)
**OMB Funding Code/Title:** 97-0400-0-1-051 / Research, Development, Test, and Evaluation, Defense Agencies
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 101 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Remotely piloted vehicles have been credited with eliminating pilot and crew losses and lowering operating costs. They have also been said to increase vehicle survivability and performance because of their increased maneuverability and detection avoidance. GAO reviewed the status of remotely piloted vehicle technology to see if it could have wider application in the military and civil sectors. While some technological limitations to widespread use of the vehicles exist, experts agree that problems could be overcome if a real interest in them were to develop. Because the military services have been reluctant to take advantage of the promise which was demonstrated by unmanned aircraft in Vietnam, funding support has diminished. No civil programs for using remotely piloted vehicles exist. Unless they are developed for military use, which would make them affordable, they will not find widespread use in civil applications. The Department of Defense (DOD) has no operational remotely piloted vehicles, only two development programs, and limited plans for future applications. A remotely piloted vehicle is considered to be better suited than manned aircraft for harassment, decoy, surveillance or reconnaissance, and electronic warfare support missions. These vehicles eliminate pilot risks, are cheaper to build, entail less training costs, save fuel, and are more survivable than manned aircraft. Their performance under emergency or unforeseen conditions and recovery difficulties are the most widely perceived disadvantages to military unmanned systems. In the civil sector, they could be used effectively for meteorological data gathering, atmospheric sampling, and surveillance. Congress should scrutinize proposed manned aircraft developments to assure that DOD gives adequate consideration to the use of the remotely piloted vehicle technology for some missions.

*NORAD's Missile Warning System: What Went Wrong?* (MASAD-81-30).
5/15/81; 21 pp. + app. (1 p.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Intelligence and Communications
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The NORAD command post is in the underground Cheyenne Mountain Complex in Colorado. Missile warning information gathered from the Worldwide Military Command and

Control system (WWMCCS) is processed on the 427M system computers which are presently in an upgrade program. *Abstract:* This study reviewed recent missile warning system failures at NORAD. GAO could not document any relationship of the acquisition policies, directives, or procedures to 427M system problems. However, NORAD should be released from any requirements to use WWMCCS equipment and software. NORAD has taken actions to correct the problems that led to recent missile warning failures. In examining the documentation on the 427M system interim upgrades and planned follow-on replacement systems, GAO could not identify any potential hinderance to their acquisition from the current applicable legislation, policies, or implementing regulations. The Secretary of Defense should: (1) assist and support current NORAD 427M system replacement planning and creation of overall missile warning and space surveillance architectures; (2) assist and support NORAD plans for providing stable, reliable electrical power for the Cheyenne Mountain Complex computers; (3) curtail further consideration of additional delegation of procurement authority for NORAD until such time that the system architectures are completed, and then only if some critical need has been validated; and (4) take action to exempt NORAD from Joint Chiefs of Staff direction to use standardized WWMCCS computers and allow acquisition of systems that are based on actual NORAD mission requirements. However, GAO suggests that these NORAD systems be required to maintain interface compatibility with WWMCCS.

*Review of the High Speed Antiradiation Missile Program.* (C-MASAD-81-7).
2/28/81; 4 pp.
**OMB Funding Code/Title:** 21-2040-0-1-051 / Research, Development, Test, and Evaluation, Army; 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy; 57-3600-0-1-051 / Research, Development, Test, and Evaluation, Air Force
**Program:** Strategic Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 101 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Full-scale production of the High Speed Antiradiation Missile (HARM) is scheduled to begin in 1982, following completion of operational testing. Major problems that halted flight testing in October 1979 appear to have acceptable solutions. Some remaining problems include: (1) a great deal of labor and time on test facilities is required to compensate or adjust each HARM seeker and perform acceptance testing; (2) in one of the Navy's operational modes for using HARM, missiles may be launched at targets that are falsely displayed to the pilot; (3) wing flutter has been noted on some firings and captive flights; (4) the Air Force HARM system is limited in its effectiveness by a basic design limitation in another part of the aircraft weapons system that will use HARM; (5) operational testers are concerned with the adequacy of the HARM built-in test capability; (6) in the Navy HARM system, common threat information is not programed into both the radar warning receiver and the command launch computer; and (7) the Air Force does not believe that the so-called multipath phenomenon is adequately understood and that corrective actions to mitigate its effects on HARM are sufficient. Solutions acceptable to the Navy and the Air Force, although not necessarily complete solutions, appear available for the remaining problems. GAO believes that the HARM system has demonstrated the performance that was required before limited production. The Secretary of Defense should provide assurance to Congress that: (1) key identified technical problems have been solved and their solutions proven by testing; and (2) HARM has the potential for meeting anticipated future threats despite the specification change which reduced the capability of HARM against certain radars.

*Most Critical Testing Still Lies Ahead for Missiles in Theater Nuclear Modernization.* (MASAD-81-15).
3/2/81; 36 pp. + 3 app. (4 pp.)
**OMB Funding Code/Title:** 21-2040-0-1-051 / Research, Development, Test, and Evaluation, Army; 57-3600-0-1-051 / Research, Development, Test, and Evaluation, Air Force
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 101 et seq.).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The Department of Defense is developing two missiles, the Army's Pershing II and the Air Force's Ground Launched Cruise Missile, as part of a program to modernize its theater nuclear forces in Europe. The two missiles are to provide the North Atlantic Treaty Organization (NATO) with the capability to launch land-based theater nuclear missiles from Western Europe that can strike targets within the Soviet Union. *Abstract:* GAO studied the progress being made in developing these missiles for eventual deployment in Europe. The Army's schedule for developing and producing the initial quantities of Pershing II missiles contains a high degree of concurrency. Considerable subsystem and component testing has not surfaced any significant problems with Pershing II. However, the limited number of live firings held so far does not appear sufficient to indicate whether the system will be able to meet all of its performance objectives by the scheduled initial deployment date. The Ground Launched Cruise Missile contains many critical unknowns, as it still must be tested in a realistic operational environment. The recent slip in the cruise missile's test schedule raises further concerns about the program. Since any modifications after deployment of the missiles could result in considerable cost, the two programs will bear close watching to assure that they perform satisfactorily before deployment begins. The Secretaries of State and Defense should include in their annual presentations before the appropriate committees, and more frequently if critical events occur, details on the progress made towards modernization and deployment of the theater nuclear weapons in the context of the December 12, 1979, NATO decision.

**E00400-045**

*Recommendations To Improve Defense Reporting on Weapon Systems.* (MASAD-81-7).
3/2/81; 3 pp. + app. (6 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Intelligence and Communications
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* This report on Department of Defense (DOD) reporting to Congress on weapon systems covers: (1) Selected Acquisition Reports (SARs); (2) research, development, test, and evaluation (RDT&E) descriptive summaries; (3) Congressional data sheets; (4) other budget justification data; and (5) testimony. DOD agreed with some of the recommendations and identified improvements which have been made in the reporting system. However, DOD believes that it is fully complying with the desires of Congress and, therefore, does not intend to implement the other recommendations. GAO believes that the recommendations would result in Congress receiving information that would be valuable in carrying out its oversight responsibilities. Congress should require the Secretary of Defense to change the SAR system to: (1) include important systems that are in advanced development; (2) expand the required mission capability assessment statement to describe shortcomings and limitations of systems in their expected operational environments; (3) include planning estimates and a one-time variance analysis for the planning and development estimates in the first report that includes the development estimate; (4) include a brief narrative section on technical and operational risks; (5) include cost estimates for categories of logistic support/additional procurement costs related to the weapon system, such as modification costs, component improvement costs, replenishment spare costs, industrial facilities/production base, simulators, consumables, and modification spares; and (6) include a chart showing the impact on the program cost estimate of different escalation rates. In addition, Congress should require the Secretary to include a section of technical and operational risks in RDT&E descriptive summaries.

*Deficiencies in the St. Louis Defense Telephone Service Should Be Avoided in Future Consolidations.* (LCD-81-4).
10/27/80; 21 pp. + 3 app. (7 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies; 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Intelligence and Communications
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National; City

*Program Objectives:* The Department of Defense (DOD) has established a long-range program, the Defense Metropolitan Area Telephone System, to develop consolidated local area telephone systems for its activities. Discussions between DOD and the General Services Administration (GSA) are underway to create Governmentwide consolidated local-area systems. The DOD consolidated telephone system in St. Louis, Missouri, uses modern technology and serves both DOD and a growing number of Government civil agency subscribers. *Abstract:* DOD officials responsible for developing the Defense Metropolitan Area Telephone Service program and Army officials currently procuring facilities for the initial DOD consolidated system of Boston were generally unaware of the details of the operational defects, design flaws, and management problems experienced with the St. Louis system. Anticipated reductions in commercial toll costs and improved system management associated with certain special devices were not realized at St. Louis. The authority of the Director of the St. Louis system was uncertain, and the Director failed to control abuse and misuse of system resources. The Defense Metropolitan Area Telephone System presents an excellent opportunity for DOD to eliminate inefficient independent military telephone systems in metropolitan areas. The Secretary of Defense should clarify and strengthen the role of the Defense Metropolitan Area Telephone Service Director, and the Secretary of the Army should devote the necessary resources to correct the design deficiencies at St. Louis.

*DOD's Carrier Evaluation and Reporting System.* (LCD-81-6).
10/6/80; 2 pp. + 3 app. (21 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* As the manager of the worldwide personal property moving and storage program of the Department of Defense (DOD), the Military Traffic Management Command (MTMC) is responsible for periodically evaluating the program's overall efficiency, economy, cost effectiveness, and adequacy. MTMC is proposing to automate carrier evaluations nationwide under its carrier evaluation system (CERS) and to expand CERS worldwide. CERS was developed to quantifiably measure the level of service that carriers were providing. To promote quality improvements, it offered more shipments to higher performing carriers. It was also designed to standardize implementation of quality control policies. Performance factors considered are ontime pickup and delivery, absence of loss or damage, customer satisfaction, and shipment handling and administrative procedures. In making allocations, both cost and performance are considered. Although performance is a key factor in tonnage distribution, rates are the first consideration. *Abstract:* Although the CERS objective of high quality service at reasonable cost is good, current implementation practices preclude DOD from attaining this objective. GAO found that while administrative costs are increasing, additional benefits attributable to CERS are questionable. GAO also found that: (1) DOD emphasis on awarding shipments by cost over quality of service limits the usefulness of CERS; (2) the current evaluation process is unreliable; (3) the scores and rankings of CERS do not reflect quality of service; (4) the complexity of CERS causes confusion and diverse implementation; and (5) CERS does not appear workable in the peak shipping season. The Secretary of Defense should establish a task force to review the quality control requirements of MTMC, the resources available to meet these needs, and the potential for correcting the problems identified here. MTMC plans for expanding CERS should be deferred until the task force's findings are available.

**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO was requested to review 10 questions relating to military, civilian, and contract employees who provide physical security at military facilities. GAO found that there was no clear-cut criteria for determining security personnel requirements for military facilities. The Department of Defense (DOD) requires military people to protect nuclear assets; however, the Government now requires case-by-case determinations of whether guard and protective services will be provided by military, civil service, or contract. Many similar security functions are performed by different types of people, including the military, civil service, and contractors. The total authorized position understates the number of military people involved in security because many military people perform security functions on a part-time basis.

*DOD Energy Monitoring and Control Systems Potential for Nonenergy Savings: Better Planning and Guidance Needed.* (LCD-80-81).
8/14/80; 39 pp. + 3 app. (4 pp.)
**OMB Funding Code/Title:** 21-2050-0-1-051 / Military Construction, Army; 17-1205-0-1-051 / Military Construction, Navy; 57-3300-0-1-051 / Military Construction, Air Force
**Program:** Major Construction
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Military Construction Subcommittee; *Senate* Committee on Appropriations: Military Construction Subcommittee.
**Authority:** Military Construction Authorization Act of 1979 (P.L. 95-356, title VI, § 602); Executive Order 1203.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* To help energy conservation goals for federally owned buildings, the Department of Defense (DOD) is installing Energy Monitoring and Control Systems (EMCS) at installations. EMCS provided central control over heating, ventilating, and air conditioning systems. Personnel reductions can be achieved through use of EMCS; however, present criteria require projects to be justified on the basis of energy savings, and DOD cannot take advantage of reductions in staffing. Congress has appropriated about $144 million for the Energy Conservation Investment Program in DOD. GAO reviewed 16 projects at 14 Army, Navy, and Air Force bases and found the following problems: (1) 13 bases programmed EMCS without the benefit of master plans; (2) 9 bases did not include all buildings which might be serviced by the system or included demolished or other unsuitable buildings; (3) the services did not know if the most cost-effective buildings were selected; (4) insufficient planning and poor cost estimating reduced the scope of 6 projects; (5) inaccurate savings or cost estimates were used to justify 10 projects; and (6) programmed savings for 9 projects will not be achieved because of reduced scopes, inaccurate savings assumptions, or failure to offset savings with recurring costs. Generally, systems have been installed to service a single installation. Although the services have given limited consideration to joint-use systems by activities in the same command, further study of potential joint use by installations in different commands is needed. GAO recommended that DOD: (1) assure that energy system projects with substantial nonenergy cost-reduction potential be given consideration in the military construction program; (2) issue guidelines requiring the services to prepare energy system master plans which would evaluate costs and savings; (3) oversee and evaluate the services' efforts in carrying out economic analysis policy of DOD and review of system projects; and (4) establish policy on joint use of energy systems which will require consideration when planning and evaluating systems.

*Need for DOD Focal Point for the Studies and Analysis Program.* (LCD-80-97).
8/12/80; 1 pp. + app. (10 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the progress of the Department of Defense (DOD) in improving its overall management of the studies and analyses program and in strengthening program weaknesses identified during earlier reviews. GAO found that current program weaknesses are basically the same as those identified during earlier reviews, and DOD has taken little or no action to correct these weaknesses. DOD is not centrally managing its studies and analyses program and has no assurance that program results are effectively used. DOD should establish a steering group to monitor the program and determine its responsiveness to needs. In addition to the specific duties outlined in DOD Directive 5010.22, the group should be responsible for providing additional guidance as to the specific types of studies on which the DOD components are to report cost data to the DOD level (and include the study results in the data bank), a more uniform basis for determining cost data on in-house studies, and more effective procedures for assuring that DOD components evaluate the usefulness and overall effect of study efforts.

*DOD's Management of Automatic and General Purpose Electronic Test Equipment.* (LCD-80-106).
9/4/80; 7 pp.
**OMB Funding Code/Title:** 21-2040-0-1-051 / Research, Development, Test, and Evaluation, Army; 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy; 57-3600-0-1-051 / Research, Development, Test, and Evaluation, Air Force
**Program:** Technology Base
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Air Force and the Navy are the largest users of automatic testing; they have about $15 billion invested in current automatic test equipment inventories. The Navy has recognized its opportunities to improve its visibility over, and use of, general-purpose electronic test equipment and has taken action to better redistribute equipment to establish a centralized system. Such a system would provide visibility over all general-purpose electronic test equipment inventory (estimated at over $1 billion). A system is being developed by the Naval Electronic Systems Command to identify general purpose electronic test equipment shortages and overages among commands. The system is expected to be complete in about 3 years. Currently, the Command has data available from air and sea activities to identify overages in one command to direct intercommand transfers of equipment. The Secretary of Defense should direct the Navy to eliminate the obstacles that currently inhibit the redistribution of excess general purpose electronic test equipment among using commands and to require the Naval Electronic Systems Command to certify that all available general-purpose electronic test equipment has been screened for availability and redistribution before purchasing new equipment.

*Consolidating Military Base Support Services Could Save Billions.* (LCD-80-92).
9/5/80; 25 pp. + 10 app.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies

**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Military base support costs have not been significantly reduced because the Department of Defense (DOD) is reluctant to force functional consolidations and because the services are reluctant to let someone else provide support services. To overcome these obstacles, forceful leadership from the Office of the Secretary of Defense (OSD) is needed. Furthermore, the following problems need management attention: (1) the three programs dealing with the above-mentioned problems, Defense Retail Interservice Support (DRIS), Commercial Industrial Type Activities (CITA), and Interservice Support, are managed separately and sometimes nullify each other; (2) DOD has not set savings goals; (3) DRIS lacks adequate full-time staffing; (4) DRIS data hauls do not highlight potential consolidation functions and locations; and (5) interservice support programs are unstructured and do not document successes or failures. To address each of these problems, the Secretary of Defense should enclose a coordinated DOD-wide effort to eliminate unnecessary duplication of base support services. Specifically, the Secretary of Defense should: (1) establish a focal point, preferably the DRIS program, to coordinate these programs and monitor DOD-wide efforts; (2) set specific yearly cost-reduction goals for each service; (3) reduce support funds for any service failing to meet those goals; and (4) assign additional full-time personnel to the DRIS program working groups.

*Legislation on Sizing Military Medical Facilities Needed To Correct Improper Practices, Save Money, and Resolve Policy Conflicts.* (HRD-81-24).
12/17/80; 35 pp.
**OMB Funding Code/Title:** 97-0500-0-1-554 / Military Construction, Defense Agencies
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Military Medical Benefits Amendments of 1966 (P.L. 89-614, § 2(7); 80 Stat. 866; 10 U.S.C. 1087).
**Availability:** GAO

*Program Objectives:* The objective of the program is to replace or renovate existing military hospitals and clinics or construct new ones as necessary. *Abstract:* The Department of Defense (DOD) should have the flexibility to plan the size of new military hospitals and clinics, based on considerations of cost effectiveness, staff availability, realistic workload projections, and teaching and training requirements. New legislation could correct the services' current improper sizing practices, save money in the long run, and align the sizing policy with the requirements for providing staff and other medical resources to facilities once they are built. Currently, the military services are required to limit the size of new hospitals and clinics to accommodate active-duty members and their dependents, plus additional capacity not exceeding 5 or 10% to meet training and teaching requirements. The three military services do not now fully comply with DOD hospital sizing limitations. Either enforcement of the requirement, or modification of the law, is indicated. Congress should amend Title 10, section 1087 of the U.S. Code to allow for the sizing of military medical facilities based on cost effectiveness, projected staff availability, realistic workload projects, and teaching and training requirements. Several recommendations are also made to the Secretary of Defense.

*DOD Should Give Better Guidance and Training to Contractors Who Classify National Security Information.* (PLRD-81-3).
3/23/81; 44 pp.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Administration and Associated Activities: Secretary of Defense
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028). Executive Order 12065.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Executive Order 12065 establishes requirements for the classification, marking, and protection of national security information. *Abstract:* Despite the specific requirements of Executive Order 12065 and implementing instructions, GAO found that: classification guidance was approved and issued by Department of Defense (DOD) personnel who did not have original classification authority; classification guidance was outdated, vague, inconsistent, and oral; and information was originally classified by contractor employees who were not authorized original classifiers. About 51% of the documents examined had one or more classification error. Some contained information that was underclassified. About 90% of the documents were improperly marked for classification. The Secretary of Defense should revise the industrial security program regulation to: (1) clarify that contract security classification specifications not transmitting or referencing approved classification guides and containing the only classification guidance furnished to contractors are, in effect, classification guides and need to be approved personally and in writing by officials with top secret classification authority as required by the Executive Order; (2) require that DOD schools which train project managers emphasize the need for compliance with regulations concerning classification guidance furnished industry; (3) require that every solicitation or contract dealing with classified matters be accompanied by a contract security classification specification that has the concurrence of the cognizant security official; (4) require that pre-award and post-award conferences with contractors discuss security requirements; and (5) expand the industrial security education program to include more contractor personnel in the training courses given by the Defense Industrial Security Institute and provide assistance to contractors in developing and expanding their programs on derivative classification.

*Military Personnel Eligible for Food Stamps.* (FPCD-81-27).
12/9/80; 2 pp. + app. (7 pp.)
**OMB Funding Code/Title:** 21-2010-0-1-051 / Military Personnel, Army; 17-1453-0-1-051 / Military Personnel, Navy; 17-1105-0-1-051 / Military Personnel, Marine Corps; 57-3500-0-1-051 / Military Personnel, Air Force
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* There have been reports that from 100,000 to as many as 275,000 military families are eligible to receive food stamps. GAO evaluated the validity of the most widely-quoted estimates, prepared its own estimate, and examined whether military personnel would be eligible for other public assistance programs. GAO found that, of 1.8 million enlisted military personnel, 19,700 members were potentially eligible for food stamps at the beginning of Fiscal Year (FY) 1980, based on a comparison of the cash elements of regular military compensation to the food stamp eligibility criteria. For FY 81, 21,000 military members are potentially eligible for food stamps. GAO also reviewed eligibility criteria for some 60 welfare programs. Only in extreme cases would a military household be eligible to receive benefits provided by these programs. GAO reviewed annual military compensation calculated by pay grade, longevity step, and family size; food stamp eligibility regulations; and data on food stamps redeemed at military commissaries. GAO's estimates of military participation in the food stamp program could vary, depending on the assumptions used.

## AIR FORCE

### E00402-001

*Use of Air National Guard Aircraft To Transport Personnel to and from a Bowling Tournament.* (AFMD-81-44).
3/27/81; 6 pp. + 3 app.
**OMB Funding Code/Title:** 57-3840-0-1-051 / Operation and Maintenance, Air National Guard
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956 (P.L. 84-1028; 70 Stat. 493; 10 U.S.C. 8062).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objective of the review was to inquire into the effectiveness of controls over the use of National Guard aircraft in transporting personnel to sporting events. Responsible Defense and Guard officials were interviewed to determine passenger airlift policies, and flight records were examined. GAO found that the Air National Guard was using military aircraft to transport personnel to and from a bowling tournament. According to Air Force policy, only previously scheduled valid training flights may airlift space-available passengers to participate in sporting events. It is inappropriate to schedule flights to airlift space-available passengers to a sporting event and then justify the flights as training missions. The Secretary of Defense should require the Chief of the National Guard Bureau to: (1) investigate the circumstances surrounding the flights in question; (2) issue formal reprimands to those who authorized the flights; (3) seek reimbursement, where appropriate, from those passengers who were on the unauthorized flights; and (4) arrange for periodic audits of the use of aircraft to transport passengers to and from sporting events.

### E00402-002

*U.S. Participation in the United Kingdom's Development of JP-233: A Costly Deviation from Acquisition Policy.* (MASAD-81-17).
2/27/81; 7 pp. + app. (2 pp.)
**OMB Funding Code/Title:** 57-3600-0-1-051 / Research, Development, Test, and Evaluation, Air Force
**Program:** Tactical Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1979 (P.L. 96-527).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* The purpose of JP-233 was to reduce the sortie generation capability of Warsaw Pact Air Forces by damaging runways and other operating surfaces and impeding efforts to repair them. *Abstract:* Department of Defense (DOD) participation in the JP-233 development did not follow the prescribed acquisition strategy which requires initial project definition and continued formal oversight at key decision points. DOD committed the United States to paying half the development cost of JP-233 without formal analyses of mission requirements, current capabilities, needs, and alternative solutions. As a result, the United States was formally committed to developing a weapon with an ally without the assurance that it would either accomplish the U.S. mission or that it was the best alternative. By December 1980, DOD had spent about $109 million and is now negotiating termination costs which may exceed $25 million. The Secretary of Defense should: (1) assure that mission requirements, capabilities, and needs are well defined before committing significant resources for either U.S. or allied weapons development or procurement; (2) direct the Secretary of the Air Force to specifically define the requirements for the airfield attack mission to provide a basis for identifying and comparing alternative weapons and delivery modes; (3) require high-level reviews for any costly weapon; (4) limit funding requests for airfield attack weapons to only those levels needed to validate the various technologies as a basis for system comparisons; and (5) require that the funding limitation restriction apply until the Secretary of the Air Force completes the mission analysis and the Secretary of Defense certifies the mission.

*Recruiting Management in the United States Air Force Recruiting Service.* (FPCD-80-62).
8/15/80; 5 pp.
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 8032).
**Availability:** GAO

*Abstract:* GAO reviewed recruiting management in the U.S. Air Force Recruiting Service by reviewing selected Air Force recruiting activities and interviewing officials, supervisors, and recruiters. GAO found that the Air Force's automated control system for its recruiting program is sufficient to insure that quality recruits are procured in a timely fashion. Some potential problems were observed in recruiter management practices, and there are too few supervisors for the number of recruiters dispersed over large geographical areas. GAO also observed that the production recruiters perceive the leased family housing program as a significant area; processing leased housing requests is very time consuming. GAO also found that the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) causes recruiters significant financial and personal hardships. These hardships include: extremely slow payment, outdated allowable fee schedules, and refusal from hospitals and doctors to take patients. An education program has been established to improve recruiters' understanding of the administration and operation of the CHAMPUS program.

*The MX Weapon System: Issues and Challenges.* (MASAD-81-1).
2/17/81; 32 pp. + 3 app. (11 pp.)
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Modification of Inservice Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Progress has been made during the first year of full-scale development of the MX weapon system, particularly in missile development. However, the Department of Defense (DOD) is faced with a tremendous management challenge in achieving cost, schedule, and performance goals. MX is designed to provide a certain number of surviving reentry vehicles, assuming a threat constrained by the unratified Strategic Arms Limitation treaty. Without a treaty, the Soviets could build enough weapons to neutralize MX; MX could then be expanded to counter that threat, at considerable cost, by adding missiles, shelters, or the cost of MX. The Air Force assessed existing military bases and concluded that neither land nor facilities were available for an MX operating base. However, excess land at Nellis Air Force Base was not included in the assessment. In addition, consideration was not given to placing part of the facilities on existing bases. The Air Force is considering options that would enhance its ability to take necessary actions to protect location uncertainty. Some of these options could be construed as restrictions on public access or activities, but no final decisions have been made. The Secretary of Defense should restudy the need for MX verification features. The results of this study should be provided to Congress, along with information previously requested by Congress on the cost of view ports. The Secretary should have an independent assessment made and inform Congress of the feasibility of placing one of the operating bases on excess Federal land at Nellis Air Force Base. If not feasible to locate an entire MX operating base at Nellis, the potential for starting some MX facilities at existing military bases should be examined. The Secretary should inform Congress of how the Air Force will enforce measures to assure the preservation of location uncertainty, including an identification of any new laws or changes to existing laws that may be required.

**E00402-005**
*Evaluation of EF-111A Extended Development and Full-Scale Production Decision.* (PSAD-80-71).
8/27/80; 5 pp.
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Aircraft Support Equipment and Facilities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* In February 1979, the Department of Defense (DOD) decided to initiate a 12-month effort to define and demonstrate corrections for numerous technical/design deficiencies in the EF-111A Tactical Jamming System. This effort was to be successfully completed before the full-scale production decision. Program monitoring showed that by March 1980 the Air Force had defined and demonstrated corrections for most of the technical and design deficiencies detrimental to the EF-111A's operability, reliability, and maintainability. DOD approved full-scale production of the EF-111A in March 1980. The Air Force, however, fell short in demonstrating the system's military worth or cost effectiveness that would support spending $1.3 billion for 42 EF-111As. At this date, a decision to defer further production until operational effectiveness and military worth can be better demonstrated may be too costly. Before requesting funds for Fiscal Year 1982 and 1983 EF-111A procurements, the Secretary of Defense should reconcile differing concepts of deployment. Such a reconciliation would assure a realistic basis for additional dedicated effectiveness testing and analysis when the improved threat radar simulators are in place and another EF-111A becomes available. The Secretary of Defense should also advise the authorization and appropriation committees of the results of the tests and evaluations. Further, the Secretary of Defense should develop proposals for congressional consideration to fund the development and maintenance test facilities and environment suitable for testing electronic warfare systems.

**E00402-006**
*Are Management Problems in the Acquisition of Aircraft Gas Turbine Engines Being Corrected?* (PSAD-80-72).
9/30/80; 55 pp. + 3 app. (8 pp.)
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force; 17-1506-0-1-051 / Aircraft Procurement, Navy
**Program:** Combat Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* GAO found that recent problems with fighter/attack aircraft engines have been primarily due to development concepts, procedures, and practices that did not provide the time and money to adequately develop the engines before production and use and did not bring promising technology to the point that it was ready for applications in new engines. Other major factors that adversely affected engine development were: (1) an inadequate definition of the engines' usage and, consequently, the inability to design engines to their expected usage and to verify the design by testing to that usage; (2) emphasis on performance requirements with a resulting lack of standards, data base, and analytical procedures to achieve a balance among performance, operability, reliability, durability, and costs; and (3) inadequate flight testing of engines. Incomplete development has resulted in extensive Component Improvement Programs, increased spare parts costs, reduced operational readiness, and expensive retrofits. The Secretary of Defense should delegate specific responsibility to an organization within his Office to direct and supervise the Air Force and the Navy efforts to establish an organized and disciplined approach to the structural design, analysis, development, production, and life management of aircraft gas turbine engines. The designated organization should require the services to: (1) establish a master plan for developing the standards, supporting methodology, data base, and analytical procedures needed to make the development process more rational and analytical; (2) realign funding priorities to expand and improve advanced development programs in general, and structural testing and development in particular; (3) coordinate the improvement efforts to enhance and encourage joint acquisition programs; and (4) monitor the F101 Derivative Fighter Engine and Advanced Technology Engine joint programs.

*DOD Should Resolve Certain Issues concerning the C-X Aircraft.* (PSAD-81-8).
10/10/80; 6 pp.
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Combat Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropria-

tions: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the C-X aircraft program, addressing major issues concerning the aircraft's range and its load capability. The Department of Defense (DOD) has not yet completed its strategic mobility requirements study as directed by Congress, nor has a mission element need statement been approved. Nevertheless, the Air Force plans to solicit formal design and cost proposals from potential contractors in the immediate future For the full-scale engineering development of the C-X aircraft. GAO believes that such action, before these matters are resolved, is both premature and contrary to sound acquisition principles. The current design range of the C-X may be inadequate unless substantial refueling is provided at intermediate land bases or by aerial refueling. Proposed modifications to the Army's main battle tank could increase its total combat weight beyond the maximum load capacity of the C-X. Although congressional committees believe there is a need for additional strategic aircraft capability, it is uncertain as to whether the C-X concept proposed by the Air Force is the best way to provide this capability. The DOD strategic mobility requirements study may require the Air Force to revise and reissue requests for proposals and solicit new proposals from contractors. This effort could cost the contractors several million dollars which would be shared in part by the U.S. Government through the allocation of overhead to Government contracts. The Secretary of Defense should direct the Secretary of the Air Force to delay issuing C-X requests for proposals or, proceeding further with the C-X program, until the Air Force resolves the aircraft's range and load limitations and until the mobility requirements study is completed and a mission element need statement is approved.

*Department of Defense Should Resolve Major Issues Regarding Reengining the KC-135 Aircraft before Continuing the Program.* (PSAD-80-80).
9/23/80; 6 pp.
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Aircraft, Other
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The purpose of the review was to determine the program's status and to identify unresolved pertinent issues. The issues addressed included questions concerning the program's pace, cost effectiveness, need, and affordability. The GAO review of the Air Force's KC-135 tanker aircraft reengining modification program showed that the primary reason for reengining the KC-135 is the need for additional aerial tanker off-load capability. Although the program is in the early stages of full-scale development and meets all the criteria of a major system acquisition, it has not been designated a major system and was not subjected to review by the Defense System Acquisition Review Council (DSARC). A review by DSARC is particularly critical at this time because of Air Force plans to award contracts (totaling about $140 million) to modify the first KC-135 aircraft and to complete research and development. Further, while a mission element needs statement has been prepared for the program, it has not yet been approved by the Office of the Secretary of Defense. To avoid the possibility of continuing to develop a system which may not be needed, affordable, or the most cost-effective alternative, the Secretary of Defense should direct DSARC to review the program in order to answer the basic questions concerning the program. Further, the Secretary should direct the Air Force to withhold its planned October 1980 contract awards until DSARC has completed its review.

**Geographic Relevance:** National

*Abstract:* GAO reviewed the pricing of the Air Force contract awarded to the Lockheed Georgia Company in 1978. The contract, for eight C-130 Hercules airplanes and technical data for the Air National Guard, was negotiated at a firm-fixed price. It was selected as part of a nationwide review of the pricing of noncompetitive prime contracts awarded by the Department of Defense. The objectives were to determine: (1) if laws, regulations, and procedures were followed in negotiating the contract price; and (2) whether the contract price is reasonable in relation to the cost or pricing data available to the contractor at the time of contract negotiations. GAO found that the negotiated contract price was overstated by more than $4 million because proposed costs for production material were not based on current, complete, and accurate cost or pricing data and because the most representative experience available did not support proposed costs for production labor and development labor. Proposed labor costs were overstated by as much as $2,949,699 because the most representative experience available supported, significantly, lower manufacturing labor costs. Also, it was found that the Air Force Plant Representative Office (AFPRO) had not adequately responded to the Defense Contract Audit Agency's reports of weaknesses in Lockheed's accounting and estimating systems. The Secretary of Defense should direct the contracting officer to consider the information presented and take appropriate action to reduce the contract price. The Secretary should emphasize to the contracting officer the importance of obtaining, reviewing, and using cost and pricing data in negotiating noncompetitive contract prices. Finally, the Secretary should determine that the actions of AFPRO are adequate to protect the Government's interest in negotiating future contracts with Lockheed.

**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028). Armed Services Procurement Act of 1947 (P.L. 80-413; 62 Stat. 21; 10 U.S.C. 2301 et seq.).
**Availability:** GAO

*Abstract:* The ARC-164 radio is used in Air Force, Army, and foreign military aircraft. The initial production contract and subsequent contracts awarded to Magnavox since 1974 have totaled about $99 million, and 20,000 radios have been produced as of April 1980. In 1977, the Air Force purchased a procurement data package, under an option in the initial production contract, which should have provided sufficient detail for other firms to produce the radio and parts and compete for ARC-164 requirements. GAO was requested to determine why certain ARC-164 components and parts are procured from the prime contractor instead of competitively. Certain ARC-164 components and parts are procured noncompetitively on the grounds that procurement from Magnavox insures reliability and maintainability. Since the procurement data package should provide sufficient detail for other firms to produce identical components and parts, as well as radios, GAO believes that the Air Force should have acquired the procurement data package and competed ARC-164 requirements when the final order for radios was issued under the initial production contract and before the second contract was awarded to Magnavox. The Secretary of the Air Force should direct that savings attributable to competing for the remaining ARC-164 requirements and costs associated with establishing other production sources be computed and future ARC-164 procurements of either the radios or the main components and parts, or both, be made competitively if warranted by a potential cost reduction. The Air Force performed a cost study, in response to GAO's recommendation, which indicated that competing the remaining ARC-164 requirements would not be cost effective. Furthermore, the Air Force did not believe any competition would, in fact, exist for the requirements.

*Millions of Dollars Can Be Saved by Storing Air Force Inventories Nearer the User and Improving Distribution Practices.* (LCD-80-105).
8/22/80; 8 pp. + 2 app. (4 pp.)
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Air Force Logistics Command has not positioned its spare parts inventories at the air logistics centers which could best serve customers while still minimizing distribution cost. The Air Force can save money on inventory investment costs by storing spare parts at the air logistics center located nearest the ultimate user. More can be saved by eliminating reshipments of reparable items to repair centers. The Commander of the Air Force Logistics Command should stress the importance of proper positioning of spare parts and monitor air logistics center progress in implementing the latest regulations. He should increase efforts to insure that users are provided accurate shipping instructions, establish procedures for isolating misrouted items so the items can be quickly identified and resolved, and issue shipping instructions to users who do not have them.

*F-16 Integrated Logistics Support: Still Time To Consider Economical Alternatives.* (LCD-80-89).
8/20/80; 43 pp. + app. (2 pp.)
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* The current F-16 aircraft program provides for coproduction between the United States and four European North Atlantic Treaty Organization countries of 1,113 aircraft. GAO found that the Air Force could save $56 million in avionics equipment by centralizing intermediate maintenance in Europe and the United States. A memorandum of understanding with the European participating Governments commits the United States to having the Europeans do depot repair for F-16 aircraft in Europe. Air Force provides a 10% backup aircraft inventory for depot maintenance and modification. However, GAO questions the need for this number because the F-16 was designed to eliminate planned depot maintenance and overhaul. Reducing the inventory could save up to $1.4 billion. Portions of the pilot training equipment of the F-16 are still being developed, and as a result, the Air Force planners did not know how often these trainers would be used. The Secretary of Defense should direct the Air Force to: (1) centralize F-16 intermediate maintenance; (2) accelerate negotiations with the European Participating Governments for depot repair of United States F-16s in Europe; (3) reexamine the need for backup aircraft inventory; and (4) assess the cost/benefit of buying a weapons system trainer for every F-16 base.

*Review of Selected Negotiated Contracts under the F-16 Multinational Aircraft Program.* (PSAD-81-3).
10/17/80; 35 pp.
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Combat Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028). Truth in Negotiations Act (P.L. 87-653; 76 Stat. 528; 10 U.S.C. 2301 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed 20 contract actions, valued at over $3 billion, associated with the F-16 multinational aircraft program. Overpricing of about $14.2 million was found with about $6 million attributable to subcontract price options which may be subject to recovery under the Truth in Negotiations Act. When the prime contract cost sharing ratio for overruns was reduced from 100% to 70% no adjustment was made in the contractor's profit allowance even though it had received an additional $51 million to assume full risk for overruns. This could result in the contractor's receiving an unintended reimbursement of about $13.3 million. All nonrecurring inplant materials costs are being charged to the Air Force program. Since the contractor supplies inplant materials to its European subcontractors, the European participating government program (EPG) should bear a pro rata share of these costs. The Air Force and the prime contractors and subcontractors involved were generally successful in negotiating reasonable prices. The overpricing resulted from situations in which sufficient cost data were available to the contracting officer to have supported the negotiation of a lower price; or accurate, complete, and current data were not made available to the contracting authority, resulting in overpricing that is potentially subject to downward adjustment. Essentially all of the potential defective pricing GAO identified resulted from failure to audit the vendors' proposed materials costs. The remaining overpricing resulted from poor procurement practices. The Secretary of Defense should: (1) determine the Government's rights to a contract price adjustment, (2) review coproduction subcontract costs, and (3) review contract incentives showing ratios.

*Survey of the Readiness of Minuteman Missiles.* (LCD-80-102).
9/16/80; 2 pp. + app. (5 pp.)
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** Strategic Forces
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* The principle objectives of the survey were to examine: (1) the adequacy of readiness reporting procedures; (2) the crews' status and training; (3) impacts of planned modifications and modernization programs on the missiles' capabilities; and (4) the efficiency of logistics support systems. However, because of severe constraints on GAO audit resources and because limited tests indicated that reported high levels of readiness appeared accurate, the audit was suspended. During the survey, several situations were found to warrant management attention. GAO recommended that the Air Force: (1) use the magnetic drum memory units installed at the two Minuteman II wings as spare parts for the other sites; and (2) reassign qualified pilots and navigators to flying as soon as possible and practical.

*Delays in Disposing of Former Communication Sites in Alaska: Millions in Property Lost and Public Safety Jeopardized.* (PLRD-81-28).
5/28/81; 25 pp. + 5 app. (3 pp.)
**OMB Funding Code/Title:** 57-3400-0-1-051 / Operation and Maintenance, Air Force
**Program:** General Purpose Forces
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 9771-9780).
**Availability:** GAO
**Geographic Relevance:** State

*Abstract:* Agencies with excess real and personal property should promptly report it to disposal agencies and protect it until disposal has been properly completed. Former Air Force communications sites in Alaska are not being properly protected and maintained. Some sites contain valuable personnel property and facilities. Some also contain chemicals that are hazardous to individuals and the environment and contain other safety defects. Disposal delays have resulted in property loss and destruction. The Secretary of the Air Force should direct the Alaska Air Command to: (1) assure that sites are properly maintained until disposal is completed; (2) rid sites of dangerous chemicals and environmental pollutants; and (3) inspect sites periodically to assure they are safe until disposal is completed. The Secretary should also require the command to: (1) establish a time limit for reporting closed sites to Congress; (2) properly dispose of real property as quickly as possible; and (3) use combat distribution teams for returning property from sites when this is cost effective.

**Program:** Airlift Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the major issues concerning the C-X aircraft program, including the aircraft's limited range and load carrying capabilities. The Air Force has begun to evaluate the proposals received from three major contractors and plans to award a development contract for the C-X if the program is approved and if congressional funding is authorized. The Air Force estimates that the program could include about 200 aircraft at a cost of $10 to $11 billion for development and production. GAO believes that the C-X range and payload issues discussed in the previous report warrant further consideration. GAO still believes the Air Force is specifying a C-X design which is sacrificing the aircraft's primary mission of intertheater airlift to achieve a greater capability to operate within a theater on small, austere airfields. The Air Force requested the contractors to propose an aircraft designed to meet or exceed certain minimum performance specifications and which could best complete the airlift requirements of four airlift scenarios described in the Request for Proposal (RFP). Although the Air Force has emphasized the importance of procuring a C-X aircraft with the ability to use small, austere airfields, the C-X Mission Element Need Statement (MENS) states that the feasibility of requiring this capability will depend upon the extent of its penalty to the primary mission. The Secretary of Defense should reassess the range and payload issues discussed to determine if the C-X aircraft being considered by the Air Force provides the capability to fill the mission need as stated in the C-X MENS. In addition, should the Secretary determine that a smaller aircraft is not appropriate, the proposal evaluation currently underway should be terminated and the RFP reissued on the basis of the assessment.

*The F-16 Program: Progress, Concerns, and Uncertainties.* (C-MASAD-81-10).
2/28/81; 4 pp.
**OMB Funding Code/Title:** 57-3010-0-1-051 / Aircraft Procurement, Air Force
**Program:** Combat Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* The study sought to determine what can be done to reduce the total cost of ownership of systems and report the status of the program to the Congress. The F-16 program is generally progressing on schedule and meeting performance requirements. Its mission capability rates have met or exceeded Air Force expectations. However, technical, operational, and program concerns and uncertainties still exist. Provisions are being built into the program to allow for future improvements which would transform it into a more expensive and sophisticated weapons system. Risk and uncertainty exist regarding the improvement efforts which are being considered. The Secretary of Defense should: (1) provide to Congress in the Air Force's budget hearings an assessment of the cost, risk, and

impact on F-16 logistics and support that the F-16 improvements will have if incorporated; (2) provide justification to Congress for the total number of F-16s and the number of differently configured F-16s that would be required if the improvements are incorporated as now planned; (3) inform Congress as to the current and expected effect of the U.S. F-16 program of the foreign military sales to Israel and Egypt; (4) direct that mission element need statements be drafted, based on mission analyses at broad mission levels, to establish a Defense-wide position on the mission deficiencies being addressed by the planned improvements for the F-16 and other aircraft; and (5) review the mission element need statements and either formally identify the improvements as the accepted approaches to satisfy the mission deficiencies or direct that other possible solutions be solicited and given adequate consideration in accordance with OMB Circular A-109.

*Some Land Attack Cruise Missile Acquisition Programs Need To Be Slowed Down.* (C-MASAD-81-9).
2/28/81; 5 pp.
**OMB Funding Code/Title:** 57-3020-0-1-051 / Missile Procurement, Air Force; 17-1507-0-1-051 / Weapons Procurement, Navy
**Program:** Missiles, Other
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed some major areas of concern with regard to matters which affect the acquisition and deployment of land attack cruise missiles. The Office of the Secretary of Defense has placed the highest national priority on deployment of the Air-Launched Cruise Missile system in order to preclude shortfalls in strategic weapons in the 1980's. Accordingly, a rigorous, success-oriented, highly concurrent schedule was established. Production of the missile was authorized, even though a number of critical problems remained to be resolved. Congress should not appropriate additional funds for procurement of either land attack Tomahawk or the Medium Range Air-to-Surface Missiles until the Secretary of Defense comprehensively defines and reconciles overall Defense requirements to attack land targets from standoff ranges characteristic of tactical cruise missiles. The Secretary of Defense should: (1) closely monitor the Air-Launched Cruise Missile program to ensure the resolution of operational testing issues, engine reliability problems, uncertainty about terrain roughness thresholds, and deficiencies in the terrain elevation data base prior to deployment; and (2) withhold authorization to proceed with full-scale production of any land attack missile with a conventional warhead until the accuracy and survivability of such a system is convincingly demonstrated in realistic operational testing.

**E00402-019**

*Improved Management of Air Force Modification Programs Can Save Millions.* (PLRD-81-5).
3/16/81; 26 pp.
**OMB Funding Code/Title:** 57-3080-0-1-051 / Other Procurement, Air Force
**Program:** Base Maintenance and Support Equipment, Other
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO found that the Air Force purchases most of its modification kits through contracts without considering the Department of Defense (DOD) supply system. GAO believes that the lack of screening for the needed items has resulted primarily from vague and sometimes contradictory Air Force regulations and a lack of faith on the part of the Air Force that the Defense Logistics Agency (DLA) can effectively support the modification programs. The Air Force has proposed alternative procedures to correct unnecessary costs. However, the Air Force proposal which has not been implemented will not afford DLA the opportunity to provide items through procurement actions. In its application of the DOD phased items through procurement policy, the Air Force overlooks opportunities for significant savings. Congress, DOD, GAO and the Joint Logistics Commanders have recognized that the exceptions to the phased procurement policy may result in significant savings. The Joint Logistics Commanders have recommended that the DOD directive be revised to clarify this. The Secretary of Defense should require the Secretary of the Air Force to: (1) amend and clarify current regulations and procedures which deal with modification programs on screening the DOD for items in modification kits; (2) direct Air Force managers to obtain DOD-managed items through the DOD supply system where savings can be realized; and (3) take maximum advantage of existing Air Force capabilities to aggregate and assemble modification kits at lower costs. The Secretary of Defense should adopt the Joint Logistics Commanders' recommendation to clarify the DOD directive permitting advance procurement in situations where good business practices and significant savings can be achieved and require the Air Force to establish procedures for the air logistics centers to identify, document, and report instances where substantial production costs on modification kit items can be avoided through consolidated and advanced procurements.

**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028). Truth in Negotiations Act (P.L. 87-653; 76 Stat. 528; 10 U.S.C. 2301 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The review sought to determine if contracting officers are rushing to award contracts at the end of the fiscal year and to determine if the practice is causing contract prices to be overstated. To avoid loss in obligation authority, contracting officers took substantial shortcuts and did not comply with procurement procedures normally used. As a result: (1) price proposals were incomplete, (2) a revised proposal was not requested, (3) proposal reviews were waived, and (4) the contract was overpriced. The Secretary of Defense should emphasize to contracting officers the requirement to obtain review and use cost or pricing data to award noncompetitive contracts and establish controls to prevent future shortcuts.

**Agency Contact:** Air Force. (202) 275-3157.

## ARMY

### E00403-001

*Evaluation of Military Justice and Discharge Systems.*
Peter Nordlie
**Contractor:** Human Science Research Corp.; 7710 Old Spring House Road, McLean, VA 22101
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 32; 10 U.S.C. 262).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The program objective is to ensure that Army Military Justice and Discharge Systems are administered equitably and efficiently. *Abstract:* Blacks were significantly overrepresented in all forms of disciplinary actions from Article 15 to General Courts-Martial. The overrepresented generally ranged from 40 to 80% except for courts-martial resulting in confinement to United States Disciplinary Barracks where the overrepresentation is 178%. For the most part, sentences were handed out evenly for similar offenses. Black and White prisoners at Fort Levenworth were restored to duty or given clemency at about equal rates. White prisoners, however, had a significantly better chance at parole. Blacks have tended to receive proportionately fewer Honorable Discharges then Whites, but more General Discharges. The pattern for Hispanics has been the reverse, with proportionately more Honorable Discharges and fewer General Discharges. For Other-than-Honorable (formerly Undesirable) Discharges, Blacks have moved from significant over-representation to significant underrepresentation, while Hispanics have stayed underrepresented. Both Blacks and Hispanics are significantly overrepresented in Punitive Discharges. In the categories of personality, discreditable incidents, drugs, civil conviction, in lieu of court-martial, unsuitability, and the Expeditious Discharge, Hispanic soldiers are underrepresented in most categories and Blacks are overrepresented. For discharges related to drugs and in-lieu-of-courts-martial, Black underrepresentation appears to be increasing. The study found no evidence that the Army's Military Justice and Discharge systems were, per se, racially discriminatory, once in the system; i.e., once found guilty of an offense, soldiers appear to have been treated equally.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 32; 10 U.S.C. 262).
**Availability:** Agency

*Program Objectives:* The Fiscal Year 1980 civilian personnel management program objectives were to implement provisions of the Civil Service Reform Act, recruit and retain a qualified work force, develop a highly motivated and productive work force, minimize costs, and improve minority and female representation. *Abstract:* This evaluation is made against Civilian Personnel Management Program goals and objectives published in DA Circular 690-15, dated 10/18/79. The Army was able to overcome strength shortages resulting from the earlier hiring limitations. Constraints such as the pay cap, reduction in number of Senior Executive Service bonuses, and anticipation of legislation restricting future annuity computations increased the number of employee retirements. Army's average grade remained unchanged due to adherence to a firm policy to stop grade escalation. Most affirmative action goals have been met, and there have been significant improvements in representation of minorities and women. Final actions were taken to implement the Merit Pay System.

**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 32; 10 U.S.C. 262).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This evaluation produces a simple, consistent, objective method of properly identifying each active Army manpower position for commissioned officer, warrant officer, enlisted and civilian incumbency. The evaluation developed a decision logic and quantitative methodology to designate each Active Army position for incumbency by category (commissioned officer, warrant officer, enlisted or civilian). Job task analysis and job factor/sub-factor scoring methods were used to identify individual position by category. Conclusions drawn indicate procedures can be used by manpower managers to attain a consistent identity for positions in the Army force structure. The principal recommendation suggests an expanded and detailed test process to permit final validation and refinement of the position identification methodology prior to Army-wide implementation.

Executive Order 12113.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Tennessee-Tombigbee Waterway has had a long, troubled history. Congress authorized the project in 1946 but construction did not start until 1971. The approved project consists of the largest waterway currently under construction by the Corps of Engineers. Ten years after construction started, the waterway is 53% complete, and expenditures continue at approximately $20 million a month. GAO believes that two major issues remain: (1) whether the approximately $600 million to be saved by halting the project is worth the almost total loss of the $1.1 billion invested in the project; and (2) whether Congress, in approving the waterway, is sowing seeds for a future project to eliminate bottlenecks in the adjacent waterway. Neither waterway can reach Corps traffic projections without improvements. Congress may wish to explore alternative financing. A Corps study of the waterway showed a marginal, but satisfactory, benefit-cost ratio. The estimating practices used in the study may have been too liberal. Since the study was made, coal exports have increased which might increase movements on the waterway. If the waterway is completed, the Corps will have to propose an improvement project to Congress to eliminate traffic constraints caused by physical barriers and limited lock capacity. The Corps' budget estimate is reasonably accurate and includes proper inflation estimates. Land purchases to mitigate the loss of wildlife habitats will be submitted to Congress for approval. Regulations require that local sponsors perform, at their own expense, certain needed tasks and the States involved are expected to complete these tasks before the waterway opens. Operational and maintenance costs would be saved if the project were terminated, but funds would still be needed for upkeep, fire prevention, etc. for the remaining project. Congress should consider the investments States and localities have made in anticipation of the waterway being completed.

*Action Needed To Improve Timeliness of Army Billings for Sales to Foreign Countries.* (AFMD-81-61).
4/30/81; 8 pp.
**OMB Funding Code/Title:** 11-8242-0-7-155 / Advances, Foreign Military Sales
**Program:** Military Assistance
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** Foreign Military Sales Act, as amended (P.L. 90-629; 82 Stat. 1323; 22 U.S.C. 2761-2763).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* GAO reviewed the Army accounting system used to bill and collect for foreign military sales from foreign countries' trust fund accounts. GAO found that: (1) the Army has not promptly collected from trust fund accounts for goods and services delivered to foreign customers; (2) serious weaknesses exist in the Army billing system, and many deliveries were not billed at the time of shipment as required; and (3) when the Army's procedures provide for obtaining advance funds, the accounts requested do not always recover costs. GAO recommended that the Secretary of Defense should require the Commander of the Army Material Development and Readiness Command to: (1) place increased management emphasis on monitoring and followup efforts to ensure that foreign customers are billed for all shipments, and (2) establish procedures to compare amounts obtained from trust fund accounts with accounts disbursed. In addition, the Secretary of Defense should ensure that the Army devises and implements a system which provides for directly charging the foreign government's trust fund account.

**Program:** Training, Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 501-515).
**Availability:** GAO

*Abstract:* GAO reviewed recruiting management in the Military Enlistment Processing Command (MEPCOM) and other military services addressing the recruiting decisionmaking processes and the extent and causes of, and potential for, correcting recruiter malpractice. Information provided by MEPCOM was of great value in describing the various organizations, procedures, and systems used to operate the recruiting programs. On the basis of a limited review, GAO did not identify any problems unique to MEPCOM that need to be specifically addressed.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO

*Abstract:* GAO reviewed Army recruiting management at the U.S. Army Recruiting Command headquarters, Midwest Region Recruiting Command, and at the Army Recruiting Districts. The Army recently completed the most massive investigation of recruiter malpractice in its history. The investigation represented a reasonable, systematic effort to detect recruiters who violated regulations or procedures, particularly those recruiters who inappropriately assisted applicants on tests. The accuracy of the data base and the methodology used to identify recruiters to be investigated had limitations. Inaccuracies in the data base were, for the most part, beyond the control of the Army; the methodology may not have identified all violations. Nevertheless, it was an attempt to reach a reasonable balance between the need to identify violators and the need to minimize the demoralizing effects of placing large numbers of innocent recruiters under suspicion. The areas in recruiting in which GAO noted problems include: (1) training of supervisory personnel; (2) coordination of management control systems; and (3) performance evaluations of management at district recruiting commands, area commands, and recruiting stations.

**Availability:** GAO

*Abstract:* GAO evaluated the Army's decisionmaking process, dealing mainly with recruiting and retention, to see if Total Force policy is being carried out. GAO did not evaluate the decisions themselves, but considered only whether all components were consulted and whether their views were considered in the Total Force management process. Some Army actions which showed a commitment to Total Force participation were: (1) an integrated family of automatic data processing systems to support Army strength projections and personnel management data forecasting requirements; (2) the development of the enlisted force management plan as a single management document; (3) the presentation of management data in a Total Force format; (4) the offering of an opportunity to prospective enlistees to be in the Guard while pursuing a Reserve Officers' Training Corps commission; and (5) the development of a program which is designed to improve the operational readiness of Guard and Reserve units that will be required to support a mobilization.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the Army's individual skill training programs at 15 active units and administered questionnaires to soldiers throughout the Army. GAO found that soldiers are not being fully trained because: (1) individual skill training does not receive enough emphasis at the battalion and company levels; (2) unit commanders do not take advantage of all available time to provide individual skill training; (3) aids specifically designed to enhance training are not used as extensively as they should be; (4) there is a shortage of experienced trainers; (5) personnel are constantly being rotated in and out of units; and (6) equipment, ammunition, and other training items often are not available for use in training. The Secretary of the Army should: (1) emphasize the importance of unit skill training and the commanders' responsibilities for providing it; (2) require commanders at the battalion level and above to better monitor skill training in their subordinate units; (3) determine ways existing resources, including noncommissioned officers, can be better used to improve training; (4) establish a more effective Army-wide system to monitor the accomplishment of skill training provided to enlisted personnel; (5) require the Army Training and Doctrine Command (TRADOC) to evaluate fully the current individual skill training doctrine; and (6) require TRADOC to evaluate the effectiveness of the Battalion Training Management System.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* An audit was performed of the costs of performing four functions with in-house personnel and by contract. The functions were custodial services, laundry and drycleaning, and refuse collection at the U.S. Military Academy (USMA) and maintenance services at the Stewart Army Subpost (STAS). The maintenance services at STAS had been contracted out for over a year, and the other three functions at USMA were being contracted out after cost comparisons were made in accordance with the Office of Management and Budget (OMB) Circular A-76. The actual first year savings at STAS exceeded the cost comparison estimated savings, and the laundry and drycleaning contract and refuse contract will result in sufficient savings to justify contracting out. The custodial services cost comparison indicated that contracting out would not generate sufficient savings to meet the minimum OMB requirements. Because of time constraints, the USMA estimate of first year costs for in-house performance was not verified. The original estimate prepared under the old A-76 guidance was reviewed, and results indicated that the current estimate could have been even higher under the current A-76 guidance, thereby increasing the savings by contracting out. Certain elements in the cost comparison for custodial services were found to be questionable. The proposed contract price for the services was understated due to the outdated wage determination that was supplied to the offerors. The cost of contract administration was understated because USMA determined the cost by taking 4% of the contract cost instead of the actual expected cost of contract administration. The Secretary of the Army should direct USMA to: (1) cancel the requests for proposals for custodial services, since they do not contain the appropriate wage determination; (2) resolicit the requirements using a current Department of Labor wage determination; and (3) prepare an updated cost comparison which uses the actual expected cost of contract administration.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028); DOD Directive 4140.41.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Four of the five Army inventory control points are not doing enough to use the material in their long supply inventories as Government-furnished material on major end-item contracts. Defense regulations require that this material be screened and furnished, when practicable, as Government-furnished material to contractors for use on major systems and equipment production contracts, thereby reducing the amounts paid to contractors. Each of the five Army control points, which are required to implement these procedures, had substantial amounts of long supply material on hand which had potential use as Government-furnished material. Only one control point had instituted a required screening procedure to ensure that material was provided to contractors when practicable.

The Secretary of the Army should direct the Commanding General, DARCOM, to take prompt action to develop procedures to ensure that all Army inventory control points make maximum and economical use of long supply inventories as Government-furnished material on production contracts.

*Significant Savings Possible through More Efficient Depot Maintenance of Army Combat Vehicles.* (LCD-80-82).
8/7/80; 48 pp. + 2 app. (4 pp.)
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* During Fiscal Year 1979, the Army spent about $688 million on depot maintenance, of which about $263 million was spent to overhaul and repair combat vehicles and associated components at three depots in the United States and one in Mainz, West Germany. It was found that productivity could be improved and maintenance costs could be reduced if the Army: (1) operated its three U.S. depots as effectively as the one in Mainz; (2) overhauled vehicles only when needed; and (3) eliminated work at the depot level that could be accomplished at a lower level. Good estimating techniques, based on reliable work measurement data, were not used to identify and control labor requirements for combat vehicle overhauls and repairs. The methods and standards program lacked management emphasis, quality, and quantity. The labor and production reporting system did not contain reliable data. Work methods emphasized overhaul rather than less costly repairs of major vehicle assemblies. The Secretary of Defense should direct the Army to: (1) determine total combat vehicle maintenance requirements for Europe and the quantities to be satisfied by Mainz and other maintenance sources; (2) establish more realistic wartime workloads for depots in the United States; (3) determine contractor potential for doing more combat vehicle depot maintenance work; (4) identify the extent of repair parts shortages and make sure the impact of such shortages is considered in mobilization planning; (5) discontinue overhauls on the basis of mileage; (6) periodically evaluate the progress made in implementing reliability-centered maintenance on combat vehicles; (7) identify and assign work to the appropriate maintenance level; and (8) estimate labor requirements on the basis of valid labor standards.

*Small Arms Ranges at Reserve and Guard Facilities.* (LCD-81-8).
10/15/80; 3 pp. + app. (3 pp.)
**OMB Funding Code/Title:** 21-3085-0-1-051 / Military Construction, Army National Guard
**Program:** Major Construction: Armory
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Military Construction Authorization Act of 1979 (P.L. 95-356, title VII, § 701; 10 U.S.C. 2231); DOD Directive 4000.19.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Centers and armories are constructed to provide training facilities for Army Reserve and Guard personnel. When planning a construction or alteration program, consideration should be given to facilities in the same area that could be used, thereby reducing construction and alteration costs. *Abstract:* GAO found that: (1) small arms ranges are well suited for use on a regional basis; (2) Department of Defense procedures require shared used of facilities; (3) most Reserve components are required to consider existing capability before programing the constuction of a small arms range; (4) the Army National Guard builds an indoor range in most new armories without consideration of ranges in the area; and (5) unused indoor ranges can be used to meet other space needs. The Secretary of Defense should direct the Secretary of the Army to establish criteria for the Army National Guard that will require consideration of existing range capacity when planning the construction of ranges at armories. The 54 indoor ranges planned for construction in new armories for Fiscal Years 1979 through 1981, as well as existing ranges in any of the 7 armories with alteration or expansion projects, should be evaluated against these criteria. To the extent that contracts have not been awarded, planned ranges could be canceled or existing ranges could be considered for satisfying other space requirements.

*Questionable Need for Product Improvements to Army's VULCAN Air Defense System.* (MASAD-81-21).
3/16/81; 5 pp.
**OMB Funding Code/Title:** 21-2040-0-1-051 / Research, Development, Test, and Evaluation, Army
**Program:** Tactical Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Authorization Act of 1979 (P.L. 95-485, title II, § 201).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* Proposed improvements to the VULCAN Air Defense System were congressionally initiated to enhance the near term readiness of air defense in the airborne and air assault divisions of the Rapid Deployment Force (RDF). Two concerns were raised by GAO that need to be addressed before any action is taken to improve the VULCAN system: (1) the effectiveness of the improved VULCAN against the representative threat; and (2) whether alternative systems can satisfy the need. A current Army analysis of the improved VULCAN will not, and was not intended to, focus on these areas. The Army has not completed assessing the threat to the airborne and air assault divisions of RDF. Also, increased range and lethality of the improved VULCAN have not yet been tested by the Army. Preliminary analyses show that the proposed product improvements will extend the VULCAN's range with new ammunition, enhance operability and tracking accuracy, and reduce reaction time. The effectiveness of these improvements remains to be proven. The Army should consider alternatives to the improved VULCAN system and the strategic mobility, timeliness, and effectiveness of both VULCAN and possible alternatives. The Secretary of Defense should require the army to fully justify the need for the improved VULCAN before the improvement program is allowed to proceed.

*The Army's Battery Computer System.* (MASAD-81-18).
3/6/81; 4 pp. + 2 app. (7 pp.)
**OMB Funding Code/Title:** 21-2040-0-1-051 / Research, Development, Test, and Evaluation, Army
**Program:** Advanced Technology Development
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO was asked to evaluate test results of the Army's Battery Computer System (BCS) to determine whether the test results were valid and whether congressional direction had been followed. In evaluating the BCS test results, laboratory tests being conducted were observed and briefings regarding the test results were attended. GAO expressed concern that tests that can demonstrate the operational effectiveness and suitability of the system are not scheduled to be conducted until just prior to the scheduled third-year production continuation decision. This decision involves the production of 217 systems at a cost of about $47 million. It does not appear that there will be adequate time to evaluate the operational test results before the production decision. Congress directed that, before obligation of the Fiscal Year 1981 appropriation for BCS, the Secretary of Defense must certify that deficiencies identified in the 1979 development/operational tests have been corrected and successfully tested and that the test results demonstrate that the system meets all contract specifications for performance and reliability. The Secretary of Defense has been unable to certify that the deficiencies have been corrected, but he has authorized the Army to proceed with the 1981 appropriations for BCS. GAO believes that there has not been sufficient testing to provide an estimate of the operational effectiveness and suitability of BCS. The Secretary of Defense should delay the third-year production continuation decision to provide sufficient time to evaluate the 1982 test results and allow time for any retesting that may be necessary. There should be no further production approval if the operational tests do not justify producing more units.

*Problems with Commercial Vehicles When Used in Tactical Environments.* (LCD-80-114).
9/29/80; 8 pp.
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* An assessment was made of the Army's use of commercial trucks in tactical environments. GAO reviewed the M-880/890 series commercial trucks to determine how the vehicles assigned to tactical units were used and how the vehicles performed in tactical areas. GAO found that the commercial trucks were performing tasks for which they were not intended or designed. Also, the tactical units were using the trucks to haul and pull cargo that exceeded their maximum weight capacity. As a result, mechanical problems are limiting the vehicles' durability, performance, and availability. Most of the personnel at the tactical units said that the body construction of the vehicles was too weak to withstand the rough terrain environments. The commercial trucks needed frequent maintenance and repairs to keep them operational. The Secretary should develop a vehicle replacement program, using study results, to match vehicle acquisition and assignments with the environment in which the vehicle will be used.

*Opportunity To Improve the Army's Stock Distribution Practices.* (LCD-80-116).
10/8/80; 3 pp.
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO surveyed shipments from Army supply depots to U.S. and overseas customers to determine whether depots were being selected in a manner that would minimize transportation costs and shorten pipeline time. The Army's system for making shipments from the most economical depot works well based on a limited sample of items shipped from three depots. However, GAO observed two practices which require management attention. There is a lack of coordination and communication between item managers and procurement personnel during the procurement and positioning of stocks to the area-oriented depots. This resulted in numerous shipments being made from one depot to supply the customers of another depot. Consequently, shipments to customers were delayed and there were unnecessary transportation costs. Item managers were not stocking items in the designated area-oriented depot. This practice also caused shipments to be made from depots other than the designated area depot. As a result, customers waited longer to receive shipments, and transportation costs were increased. Army officials reported that they are considering a recently developed computer program which would periodically identify items for inter-depot transfer that were significantly out of position. This program would give item managers greater visibility and control over their depot stocks.

**E00403-018**
*Opportunities Still Exist for the Army To Save Millions Annually through Improved Retail Inventory Management.* (LCD-81-16).
1/19/81; 36 pp.
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* In 1975, GAO reported to the Secretary of Defense that the Army could save tens of millions of dollars annually through improved management of inventories at installations and divisions. The Department of Defense (DOD) agreed and advised GAO of a number of corrective actions that the Army would take to bring about the desired improvements. A review was conducted to determine the effectiveness of actions taken by the Army and to determine whether additional opportunities for savings existed. GAO found that the Army has made little progress in resolving the previously disclosed retail inventory management problems and that opportunities for savings of $126 million exist. GAO found that: (1) Army retail supply activities continue to hold for prolonged periods tens of millions of dollars of stock excesses which are critically needed elsewhere; and (2) Army installation, division, and corps supply activities overstate stock requirements and inflate budget requests for procurement funds and spending authority by millions of dollars annually because of inaccuracies in data used in requirements computations. The Secretary of Defense should direct the Army to take the following corrective actions: (1) reprogram installation and corps logistics systems to provide for automated monthly identification, reporting, and return of stocks of wholesale-level, intensively managed items exceeding stockage objectives and to prevent errors in the quarterly inventory stratification reports; (2) revise retail supply policy to require installation and corps supply activities to apply item serviceable materiel return rates to reduce item demand rates in forecasting requirements; and (3) give priority to eliminating the division logistics system automated capability of erroneously changing demand codes on orders from non-recurring to recurring when orders are passed to the wholesale level.

**Agency Contact:** General Accounting Office (202) 275-4146.

*Management Attention Is Needed To Identify Reasons for High Volume of Serviceable Material Returns to Depots.* (PLRD-81-12).
3/26/81; 7 pp.
**OMB Funding Code/Title:** 21-2020-0-1-051 / Operation and Maintenance, Army
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028); Army Regulation 710-2.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO found that the Army does not identify the causes for field returns of serviceable excess material. When the logistics system is operating effectively, there should be few field returns of serviceable material. Every material return to the wholesale level represents an expenditure of resources in terms of work force to process and handle the item and transportation costs from the depot to the retail level and return. At the retail level, the transportation costs for returned items could not readily be determined since they were paid with Army operation and maintenance funds. Because these funds were used to pay for all transportation, the cost for returned items could not readily be identified. In addition, GAO found that the Army has no procedures for accumulating data to accurately reflect the reasons for material returns. Two general reasons given for the returns were: (1) items become excess to installation supply when authorized stockage levels are revised, and (2) items become excess to installation supply authorized stockage levels due to returns by using units. The Secretary of the Army should establish a pilot program at one or more Army installations to identify and quantify the reasons for excess material and field returns and provide this information to Army managers so that corrective action can be taken.

**E00403-020**
*Adequacy of Safety Procedures at Fort A. P. Hill and National Guard Training Facilities.* (FPCD-81-16).
10/22/80; 8 pp.
**OMB Funding Code/Title:** 21-2065-0-1-051 / Operation and Maintenance, Army National Guard
**Program:** Training Operations
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1979 (P.L. 95-457; 10 U.S.C. 262, 2238); Army Regulation 385-10; Army Regulation 385-40.
**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* GAO conducted an investigation into National Guard safety programs because of the deaths of two National Guardsmen during training at Fort A. P. Hill, Virginia. GAO inquired whether the safety procedures were adequate; the extent to which safety procedures were followed and enforced; whether any previous accidents involving fatalities or serious injuries had occurred at the Fort; and whether the two deaths might be indicative of safety problems throughout the National Guard. The higher accident rates in the National Guard may or may not be caused by failure to follow and/or enforce safety procedures. The regulations and procedures at the National Guard level appear adequate and, in the case of the two units investigated, these procedures were supplemented with specific safety procedures for the training functions. For the specific accidents investigated, the units did not enforce and/or follow established safety procedures during training activities, and, if the regulations and safety procedures had been followed, the accidents might have been prevented. Records were not available at Fort A. P. Hill for all serious accidents that occurred there. The National Guard agreed to look into the cause for its higher accident and disabling injury rates and possible corrective actions.

*The Navy's Computerized Pay System Is Unreliable and Inefficient: What Went Wrong?* (FGMSD-80-71).
9/26/80; 28 pp. + app.
**OMB Funding Code/Title:** 17-1453-0-1-051 / Military Personnel, Navy
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956 (P.L. 84-1028; 70 Stat. 297; 10 U.S.C. 5401 et seq.).
**Availability:** GAO

**Geographic Relevance:** National

*Abstract:* Over the last 12 years, the Navy has spent more than $150 million to develop and operate a central automated military pay system that is largely unreliable and inefficient. Although GAO approved the system design, it is not working as designed because it was not implemented as designed. The major problems with the system stem from the lack of timely and accurate input data from field organizations to the central computer. Field units average 12 days to prepare input as opposed to the 3 days required by the system design. The approved system design required an automated control over rejects, but management does not rely on it for control purposes because the automated system was not properly implemented. Studies conducted in 1978 revealed that 42% of 291 selected pay accounts reviewed were inaccurate, and 52,000 accounts remained in an overpaid status for more than 90 days. Despite costly efforts to overcome system inefficiencies, the system continues to operate inadequately. The Secretary of Defense should require the Secretary of the Navy to improve the reliability, efficiency, and effectiveness of the Navy's military pay system by requiring commanding officers, disbursing officers, and administrative officers to operate the pay system as designed and as approved by GAO.

*F/A-18 Naval Strike Fighter: Progress Has Been Made but Problems and Concerns Continue.* (MASAD-81-3).
2/18/81; 31 pp.
**OMB Funding Code/Title:** 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy; 17-1506-0-1-051 / Aircraft Procurement, Navy
**Program:** Tactical Programs; Combat Aircraft
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1981 (P.L. 96-527).
**Availability:** GAO

*Program Objectives:* The F/A-18 is intended to provide improved air strike capability to meet projected threats. Development and procurement were to be accomplished by IAW OMB Circular A-109 and DOD instructions. *Abstract:* The F/A-18 has continued to improve during development and has made noteworthy achievements in certain areas. However, cost and technical problems continue. It is at the stage where the following should be considered: (1) Will modifications to the wing correct the fail-rate problem without adversely affecting other performance areas? (2) Can the high-oil and built-in temperature conditions be corrected? (3) Are modifications to the bulk heads adequate? (4) Can the fuel cell leakages be corrected? and (5) Can the causes of the accidents be corrected to assure safe flight conditions and operational effectiveness? It is recommended that the Secretary of Defense: (1) identify the development, production, and operational risks associated with outstanding technical problems, (2) identify cost estimates associated with varying production rates for Fiscal Year 1982, including the most efficient and economical rate, and (3) provide a program cost estimate based on realistic inflation rates.

*The Light Airborne Multipurpose System LAMPS, MK III: Progress Evident but Some Problems and Questions Remain.* (C-MASAD-81-4).
2/23/81; 4 pp.
**OMB Funding Code/Title:** 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy
**Program:** Tactical Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1981 (P.L. 96-527).
**Availability:** GAO

*Program Objectives:* The LAMPS MK III is developed to meet Navy mission requirements for antisubmarine warfare requirements with secondary capabilities for antiship surveillance and targeting, search and rescue, medical evacuation, and logistics support. *Abstract:* Potential problems were found which raise questions about the ability of LAMPS MK III to carry out both its Antisubmarine Warfare (ASW) and Antiship Surveillance and Targeting (ASST) missions. This includes its dependence on other systems, problems in reliability and maintainability and reduced capability to carry out the ASST mission. The cost estimates have also been understated. It is recommended that the Secretary of Defense address the issues of the interrelationship and interdependence of the key weapon systems being acquired to carry out the Navy's ASW responsibilities and present a plan to the Congress on the capabilities of performing the ASW mission. He should also require the Navy to: (1) determine the number of MK III helicopters needed to meet the requirements, (2) establish the role of the LAMPS MK III to fill the ASST mission, (3) reassess the reliability, availability, and maintainability aspects to determine if it will be adequate to meet its operational requirements, and (4) determine the cost impact resulting from the above recommendation and disclose it to Congress.

*Recruiting Management in the United States Navy Recruiting Command.* (FPCD-80-60).
8/15/80; 5 pp.
**OMB Funding Code/Title:** 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Training Medical, and Other General Personnel Activities
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 5531-5540).
**Availability:** GAO

*Abstract:* GAO reviewed recruiting management in the U.S. Navy Recruiting Command. Included in the review were selected recruiting activities performed at command headquarters, two area commands, and selected recruiting districts. GAO examined documentation and interviewed officials, including recruiters concerned with management and productions. GAO noted that the Navy had taken positive steps to improve recruiting operations, including the establishment of standard operational procedures and the Standardization Audit Team to insure that such procedures are being carried out effectively. The Freeman Plan and Enlisted Tracking System appeared to be useful management tools for overseeing recruit quality results and potential incidents of recruiter malpractice. GAO found some situations which, if unaddressed, could hamper effective recruiting operations. The areas in which problems were noted include: (1) recruiters' quality of life, (2) treatment of urban versus rural recruiters, (3) control operations, (4) Delayed Entry Program usage, and (5) recruiter training.

*The Navy's Advanced Lightweight Torpedo: A New Weapon That Faces Many Development Challenges.* (C-MASAD-81-3).
2/18/81; 3 pp.
**OMB Funding Code/Title:** 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy
**Program:** Tactical Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1981 (P.L. 96-527).

*Abstract:* The ALWT is intended to address the advancing Soviet submarine threat and overcome deficiencies in current lightweight torpedoes. However, the increasing threat since the ALWT requirement was issued, particularly in the areas of speed and capability may require enhancement of the baseline design. Early in advanced development, contractor cost overruns prompted: (1) deleting contractor development of the warhead; (2) eliminating documentation in system integration, design to cost, life-cycle cost, and reliability and maintainability; and (3) reducing testing. ALWT warhead technology must still be developed and proven and modifications to a variety of surface ships and aircraft launch platforms will be required. Availability of a new target system, currently under development is critical for LAWT testing. Development to date compares favorably with OMB circular principles. Should ALWT perform as planned, it will provide a valuable addition to ASW capability. It is recommended that Congress direct the Secretary of Defense to periodically provide it with an assessment of ALWT technical and programmatic issues and plans for their resolution. It is also recommended that the Secretary of Defense direct the Navy to: (1) reexamine the wisdom of the reductions in reliability, maintainability, platform integration, and testing in light of their future impact on the program; and (2) begin preparing selected acquisition reports now to help insure adequate attention to its cost, schedule, and performance goals.

*Retention of FRAM Destroyers May Be Impractical.* (LCD-80-76).
7/3/80; 6pp. + 6 app. (17 pp.)
**OMB Funding Code/Title:** 17-1806-0-1-051 / Operation and Maintenance, Navy Reserve
**Program:** Mission Forces
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 452; 10 U.S.C. 7307).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* A request was made to review the Navy's reasons for retiring Fleet Rehabilitation and Modernization (FRAM) destroyers in the Naval Reserve Force. Specifically, GAO was requested to: (1) evaluate the material condition of the ships, (2) determine if these ships could be provided with mission essential equipment to enable them to perform a useful mission through 1985; and (3) determine if these ships could be overhauled and upgraded to extend their useful life at a reasonable cost. Because of incomplete overhauls in the past, the FRAM destroyers would now require more extensive overhauls to operate an additional 3 to 5 years. Each overhaul is estimated to cost $24 million. Such an overhaul would require approximately 3 years to perform. This does not seem practical since the FRAM destroyers are being considered for extended operations only through 1985. It is concluded that the retention of the FRAM destroyers is not warranted or practical.

*Contracting Out Vehicle Maintenance and Operation Functions at U.S. Naval Station, Mayport, Florida.* (MASAD-81-8).
3/4/81; 4 pp. + app. (12 pp.)
**OMB Funding Code/Title:** 17-1810-0-1-051 / Other Procurement, Navy
**Program:** Civil Engineering Support Equipment
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The study reviewed the Navy's decision to contract out for motor vehicle maintenance and operations at the Naval Station, Mayport, Florida. A Navy report showed revisions to the original cost comparison were appropriate but that contractor performance was still more economical over the 3 year period. GAO believed that the report did not adequately resolve some of the questions raised nor demonstrate the validity of the comparison, and further revisions to the comparisons are appropriate which would result in a cost advantage for in-house performance. However, if a new comparison using the current guidelines were prepared, GAO believes that it would probably support the Navy's decision.

*Opportunities To Improve the Navy's Retrograde Materials Program.* (LCD-80-99).
8/14/80; 7 pp.
**OMB Funding Code/Title:** 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 282; 10 U.S.C. 5082, 5111).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO found that the Naval Air Forces, U.S. Atlantic Fleet had not reported about $44 million of excess reparable and consumable material to the Aviation Supply Office (ASO), the cognizant inventory manager for these items. GAO also found that: (1) a lack of [illegible]line on the part of item managers in the ASO to follow establish[illegible] policies and procedures contributed to the backlog of items awaiting repair parts; (2) about $2 million of inventory carried in Naval Industrial Fund Inventory Record store accounts, which provide support to the repair shops, had not been reported for disposition even though it was classified as excess; (3) identical items were stocked in several stores; (4) some stores were exceeding their authorized stock levels, and storing stocks which were not authorized; (5) unauthorized supplies held by some stores were needed and on-order at stores authorized to carry the items; (6) management reports of the total time needed to repair an item did not include time awaiting parts for that time which exceeded 30 days; and (7) the computer system at the ASO could arrive at a breakdown for total repair cycle time. The Chief of Naval Operations (CNO) should direct the Commander in Chief, Atlantic Fleet, to issue guidance and procedures to ensure that excess aviation materials are reported to national inventory managers for Navy-wide redistribution and use. Additionally, the CNO should direct the Commander, Naval Material Command to take action to: (1) reduce the backlog of items awaiting repair parts at the rework facility in Norfolk, (2) improve the management of the Navy industrial fund stores inventories, and (3) assure that accurate repair cycle time is reported to item managers in the ASO and to the Naval Air Logistics center. Further, the Chief of Naval Operations should check to see if similar problems exist at the other Naval Air rework facilities and Fleet Commands.

**Program:** Communications and Electronics Equipment
**Congressional Relevance:** *House* Committee on Veterans' Affairs; *Senate* Committee on Armed Services. *House* Committee on Armed Services; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Authorization Act of 1979 (P.L. 95-485, title I, § 101).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objectives of the review were to determine: (1) why the Navy did not get more than two manufacturers to make offers on the AN/UYK-43 and 44 development; (2) if and how well the Navy can implement Ada; and (3) what the Navy needs to do in the future to enhance competition and Ada effectiveness. Competition for the AN/UYK-43 and AN/UYK-44 computers was limited for a number of reasons though the Navy made a concerted effort to get companies to make offers on the computers the Navy specified. Many U.S. computer manufacturers prefer more latitude to determine how to meet a customer's needs than the Navy allowed in its proposals. The Navy will be able to convert to Ada and plans to use Ada for new weapon systems programs and major upgrades. However, the consensus of the industry representatives is the Navy will not be able to obtain anticipated Ada software economics because the instruction set architectures specified are not suited to Ada. The Navy defined these specific architectures to obtain further benefits from software expenditures. The current Navy computers are becoming inadequate. Increased requirements for new weapons system applications necessitate new computers to maintain a high level fleet capability. The Navy has begun to develop a concept for replacement of the computers. The Navy should convert to Ada on a program-by-program basis in present systems whenever conversion becomes cost beneficial vs. maintaining the existing software base and adopting Ada for new programs and major upgrades only. In addition, the Navy should employ a concept which states its needs with minimum technological constraint.

*Supply Support Costs of Combat Ships Can Be Reduced by Millions and Readiness Enhanced.* (LCD-81-9).
1/15/81; 31 pp. + app. (12 pp.)
**OMB Funding Code/Title:** 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Veterans' Affairs; *Senate* Committee on Armed Services. *House* Committee on Armed Services; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 282; 10 U.S.C. 5082, 5111).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Prior reviews by GAO of the Navy's supply support of its submarine and aircraft carrier fleets disclosed that opportunities for significant reductions in inventory excesses and increased readiness exist for the Navy's fleet of combat surface force ships. Thus, GAO undertook a review of the Navy's supply support of its combat surface force ships in the Atlantic and Pacific Fleets. In its review, GAO found that the Navy can save as much as $101 million over a 5-year period on procurements and repair of supplies and parts for combat surface force ships. This can be accomplished by updating shipboard inventory allowances and equipment part replacement rates, and shipboard supply management practices. The Secretary of the Navy should require: (1) the discontinuance of Navy policy allowing combat surface force ships completing supply overhauls to arbitrarily retain reparable-type items, which are applicable to installed equipment, but not included in their updated inventory allowance due to lack of prior usage; (2) surface force fleet commands to establish uniform policies providing for periodic identification and prompt return to the wholesale supply system of shipboard item stock excesses valued at $50 or more during intervals between supply overhauls; (3) the Ships Parts Control Center to identify and eliminate from updated inventory allowances for ships undergoing supply overhauls those parts that have a unit price of $100 or more and have not been used by the overhauled ships or by other ships of the same type for the past 4 years; (4) the Pacific Fleet Surface Force Command to adopt the Atlantic Fleet policy of monthly validation of outstanding shipboard orders for materiel and prompt cancellation.

**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 280; 10 U.S.C. 5061).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the Naval Sea Systems Command (NAVSEA) including two shipyards and two other activities which provide support services to NAVSEA to determine whether the internal control systems of these activities adequately protect Federal funds and assets from fraud, waste, and abuse. Weaknesses in internal controls at the Naval Sea Systems Command, including two shipyards and two other activities that provide service to the Command, make them vulnerable to fraud, waste, and abuse. GAO believes that prevention is the key to combating fraud and abuse and that sound internal controls are the best means of prevention. The Navy should strengthen internal controls and minimize the vulnerability to fraud, waste, and abuse. The report contains 11 specific recommendations to the Secretary of the Navy regarding how internal controls can be strengthened.

*Opportunities for Improving Management of the Navy's Aegis Cruiser Program.* (C-MASAD-81-8).
2/28/81; 4
**OMB Funding Code/Title:** 17-1319-0-1-051 / Research, Development, Test, and Evaluation, Navy
**Program:** Tactical Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1981 (P.L. 96-527).
**Availability:** GAO

*Program Objectives:* The Aegis weapon system is to provide anti-air warfare capability to protect Navy carrier battle groups from air and sea launched missiles. *Abstract:* The planned Aegis weapon system supply support system will not insure that the system reaches its maximum operational availability. Only subsystems of the weapon system, rather than the whole system have been studied. Also, the planned SPS-49 air search radar system is inadequate backup for the Aegis, and there is inadequate margin for growth on the ship housing the Aegis, CG-47 class. It is recommended that the Secretary of Defense direct the Navy to evaluate how various supply support methodologies affect the availability of the weapon system and select the one providing the greatest effectiveness at about the same cost as the current plan. The Navy should also be directed to: (1) reexamine the need for the SPS-49 on the CG-47 class ships, (2) insure that Defense Acquisition Regulations are followed in procuring power converters for the CG-48 and subsequent ships in the class, and (3) emphasize weight reduction efforts and carefully monitor the effect of future systems on the ships weight and stability. Additionally the CG-47 Selected Acquisition Report should identify the status of important weapon systems scheduled to be deployed in the multimission ship. If critical systems will not be available on time such limitations in the ship's capability should be reported to Congress.

*Use of Chartered Cargo Ships by the Military Sealift Command.* (LCD-80-110).
9/30/80; 10 pp. + app.
**OMB Funding Code/Title:** 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* The military's use of chartered cargo ships was examined because it was noted in a prior review of the Military Sealift Command's (MSC) readiness capability that these ships appeared to be underused. MSC charters commercial ships to carry military cargo. While these usually sail more than half empty, the Navy is buying space on regularly scheduled commercial ships. Cargo which could have been shipped with MSC was being shipped commercially. In an analysis of two voyages, GAO found that the Department of Defense (DOD) transportation costs could have been reduced by about $438,000 by diverting some of the cargo which moved commercially to the two chartered ships. DOD officials believe the underuse of chartered ships is a price which should be paid for readiness. The Secretary of Defense should reexamine the need for chartering excess ships for contingencies. However, if the excess capacity is needed, the Secretary should clarify the DOD policy on the use of chartered ships versus commercial ships to make the maximum use of the excess capacity in peacetime.

*Weaknesses in Negotiating Rates and Services for Commercial Containerized Sealift.* (PLRD-81-27).
4/28/81; 1 pp. + app. (13 pp.)
**OMB Funding Code/Title:** 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* Containerization is a relatively recent innovation in shipping which allows the loading of cargo into intermodal containers for shipment from source to user over several modes of transportation without intermediate rehandling. GAO wanted to find out how well the Military Sealift Command (MSC) was obtaining rates and services for meeting DOD shipper's container requirement. GAO found the present system for negotiating rates for commercial containerized ocean service did not ensure the maximum competition among carriers in bidding for MSC's traffic. Basically this was because MSC did not make known what its complete shipping requirements were at the time of the rate solicitation and it required carriers to bid rates on route segments, not the through routes. Further compounding the problem was that rates had to be fixed for set periods of time and allowed to be reset even though there has been no change to warrant it. What MSC got through its negotiations was a set of unilateral offers based on little information on the demand for the carrier's service. To achieve more competition in bidding for its traffic and place itself in a better position to get the best possible rates, GAO believes MSC needs to define its requirements in sufficient detail and to allow carriers to bid for specific traffic. All rates should be held to those levels until circumstances warrant changing them.

**Agency Contact:** General Accounting Office (202) 275-4164.

**E00404-016**

*Management of Repairable Spare Aircraft Components Needs To Be Improved.* (PLRD-81-17).
4/21/81; 6 pp.
**OMB Funding Code/Title:** 17-1804-0-1-051 / Operation and Maintenance, Navy
**Program:** Central Supply and Maintenance
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 70 Stat. 282; 10 U.S.C. 5082, 5111).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the Navy's management of repairable spare aircraft components, including operational support inventory items and rotatable pool items. Although the management of these components has been the subject of past reviews, serious weaknesses still exist. Much of the operational stock inventory material is excess to authorized allowances, and many of the allowances are higher than can be justified based on demand. These problems exist in spite of the fact that much of the material is managed under the Closed Loop Aeronautical Management Program (CLAMP), a program of intensified management for critical mission essential repairable components. Neither the Aviation Supply Office (ASO) nor the responsible base supply activities have kept accurate records of the rotatable spare material at the naval air rework facilities. Spares allowances are not always updated to reflect experienced demand, and assets excess to established allowances are not always returned to the wholesale system to allow for automatic referral of requisitions and to facilitate redistribution. The Secretary of the Navy should direct the Commander of the Naval Supply Systems Command to reemphasize to ASO and the operating activities the need to consistently follow established procedures for setting and adjusting spares allowances and for managing assets on hand. The Secretary should direct the Auditor General to make follow-up reviews to ensure that these procedures are consistently followed.

*Navy Has Housing Problems at Virginia Beach and Scrap Metal Disposal Problems at Sewells Point.* (PSAD-80-73).
9/19/80; 39 pp. + 2 app. (3 pp.)
**OMB Funding Code/Title:** 97-0701-0-1-051 / Family Housing, Defense
**Program:** Construction Improvements
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** Military Installation

*Program Objectives:* The program objective is to provide expenses of family housing for the Army, Navy, Marine Corps, Air Force, and Defense Agencies for construction (including acquisition, replacement, addition, expansion, extention, and alteration) and for operation, maintenance, and debt payment (including leasing, minor construction, principal, and interest charges), and insurance premiums. *Abstract:* Although it is less than 2 years old, the Carper housing complex has had numerous maintenance problems. Existing construction standards and inspection were inadequate. Therefore, when planning new housing projects, the Secretary of the Navy should identify those items likely to require considerable maintenance if only the minimum standards are met. The Secretary should require construction personnel to provide maintenance personnel with a complete list of applicable warranties at the time of occupancy to reduce the likelihood of paying for work which should be covered by warranty and require maintenance personnel to keep records of all work paid for which should have been covered by warranty so that claims or counterclaims can be instituted by the Government. The Navy is violating Department of Defense regulations by letting a contractor keep valuable scrap metal. The Navy is not turning the scrap metal in to a Defense Property Disposal Office because it believes it is more cost effective to contract for disposal. The Secretary of the Navy should direct the Commander of the Atlantic Division, Naval Facilities Engineering Command, to use either Navy personnel or to pay a contractor to collect, sort, and deliver the scrap metal from Sewells Point to the Defense Property Disposal Office or request an exemption to the DOD regulations for a contractor to keep the scrap metal only if the Public Works Center: (1) collects adequate data to show the cost effectiveness of doing so, and (2) establishes an adequate system to monitor the contract and assess the value of scrap metal being collected.

**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 5531-5540).
**Availability:** GAO

*Abstract:* GAO reviewed recruiting management of the U.S. Marine Corps (USMC) recruiting program. Included in review were selected recruiting activities performed at USMC headquarters and four selected subordinate stations. GAO examined documentation and interviewed officials, including recruiters concerned with management and production. GAO found that the USMC had taken positive steps to improve its recruiting operations, including the establishment of systematic recruiting process and procedures for retesting enlistees at training depots to deter and prevent incidents of recruiter malpractice and fradulent enlistments. GAO found some areas which, if unaddressed, could hamper effective recruiting operations. Some of these areas were related to only one or more of the locations visited. The areas in which problems were include: (1) operational control practices, (2) goal inflation practices, (3) enlistment processing and recruit reporting systems, (4) training provided to recruiting personnel and adequacy of training records, (5) perceptions about awards and management support, and (6) policy adherence by station commanders.

## DEFENSE LOGISTICS AGENCY

**E00410-001**
*Study of Contract Administration Services Workload Resources and Functions.*
In process
David Carr
**Contractor:** Coopers and Lybrand; 1800 M Street NW, Washington, DC 20036
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Central Supply and Maintenance: Defense Logistics Agency
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028; 10 U.S.C. 2301 et seq.).
**Availability:** Agency

*Abstract:* This study is first intended to examine the need for performing the functions assigned to the Defense Contract Administration Services (DCAS) component of the Defense Logistics Agency (DLA) as set forth in DAR 1-406. Secondly, it is to determine better methods of quantifying the workload associated with the performance of these functions in terms of the benefits gained as a result of doing them. Thirdly, it is to develop methodologies that better identify resource requirements for the performance of the functions to the benefits gained and to more effectively target resource allocations to optimize these benefits. Review of DCAS operations has been approximately 75% completed as has the data collection required for this study. The contractor has begun to make initial analysis and synthesis of the data collected and to develop hypotheses which will be tested in later phases of the study.

*Millions in Stock Funds Mismanaged at Defense Personnel Support Center.* (AFMD-81-2).
11/21/80; 34 pp. + 9 app. (19 pp.)
**OMB Funding Code/Title:** 97-4961-0-4-051 / Defense Stock Fund
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of September 7, 1962 (P.L. 87-651, § 207(a); 76 Stat. 521; 10 U.S.C. 2208).
**Availability:** GAO

*Abstract:* The Defense Personnel Support Center is the second largest of the Defense Logistic Agency's six supply centers. It is responsible for the procurement and supply management of more than 42,000 subsistence, medical, and clothing and textile items used by its customers which include the military services, some Federal civil agencies, and authorized foreign governments. The Center lost control of hundreds of millions of dollars in stock funds. The Center made adjustments of about $556 million in an attempt to correct its financial records, but the validity of most of these adjustments could not be determined because of inadequate documentation. Fiscal 1978 and 1979 accounts were certified as correct by officials at the Center and the Defense Logistics Agency despite their knowledge of the Center's financial problems. These certifications may have violated the law. The Center's funds control problems occurred because its accounting systems were ineffective. GAO recommended that Defense develop an overall plan for resolving the Center's problems and take other measures to strengthen financial operations.

*Management of Cold Storage Facilities Needs Improvement.* (LCD-80-95).
8/1/80; 8 pp.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Central Supply and Maintenance: Defense Logistics Agency
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Act of August 10, 1956, as amended (P.L. 84-1028).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Better utilization of military cold storage space can be achieved by using available capacity to store stocks of mobilization rations presently held under refrigerated conditions in commercial warehouses. The Defense Logistics Agency has generally been unsuccessful in its efforts to obtain cold storage space from the military services. Defense policy is to make optimum use of existing military facilities to help minimize overall storage and distribution costs. Military components are required to gather, maintain, and exchange storage data to ensure visibility of available storage space. Routine inquiries into the availability of refrigerated space in the military services have not been very successful. Separate management has not been conducive to the easy identification and quick response on the availability of refrigerated space. The military services have been reluctant to release available space due to inherent fears of economic concerns such as location, condition, and size of facilities. They maintained that if an economic analysis were performed at each location, many facilities would require extensive rehabilitation that might not be cost effective. GAO believes that a more extensive use of such facilities should be pursued and explored by economic analysis or a similar comparative cost study. The Secretary of Defense should make a concerted effort to identify available refrigerated space and provide a comprehensive report to the Defense Logistics Agency. The Defense Logistics Agency should also verify the reports and conduct studies of its own on available space.

**E00410-004**

*Expanded Use of an Improved Defense Automated Small Purchase System Would Yield Big Savings.* (PSAD-81-10).
11/13/80; 24 pp. + app (5 pp.)
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Central Supply and Maintenance: Defense Logistics Agency
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1979 (P.L. 95-457, title III, § 131).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objective of the study was to assess the Defense Logistics Agency's (DLA's) automated small purchase system. The quality of SASPS compares favorably with manual buys, and it is less costly to administer. However, improvements are needed to increase the efficiency of the system and to broaden its scope. No formal long-range management plan exists to guide the orderly development, modification, and expansion of the system. The expansion of automated purchasing to include most of the small purchase items would result in an estimated savings in administrative costs of at least $4.5 million annually. The Secretary of Defense should require DLA to immediately establish and implement a time-phased action plan to expedite implementation of system improvements and to expand automation of small purchases to items that are presently processed manually. The plan should provide for: (1) automating the processing of most of the remaining manual small purchases at the hardware centers and justifying the instances of continued manual purchasing; (2) increasing the consolidation of procurements to effect maximum economies through reduced prices, quantity price breaks, and lower administrative costs; (3) improving the reliability of base and standard prices and documentation of award decisions; (4) reducing the processing time for automated buys; (5) reassessing the role of the automated noncompetitive system; and (7) developing cost data that can be used to better evaluate the effectiveness and efficiency of the automated system. The Secretary should also require DLA to periodically report to him on the activities undertaken and the progress achieved in improving and expanding SASPS.

## DEFENSE AGENCIES

**E00415-001**

*Performance of CHAMPUS Fiscal Intermediaries Needs Improvement.* (HRD-81-38).
2/2/81; 12 pp.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Training, Medical and Other General Personnel Activities: Civilian Health and Medical Program of the Uniformed Services
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1979 (P.L. 95-457, title III, § 131). Dependents' Medical Care Act (P.L. 84-569; 10 U.S.C. 1071 et seq.).
**Availability:** GAO

*Abstract:* It was found that fiscal intermediaries were not fulfilling many of their contractual responsibilities. Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) did not have adequate means to measure performance and enforce requirements. Improvements were needed in: (1) the accuracy of administering benefits in order to comply more fully with CHAMPUS regulations, instructions, and policies; (2) the systems established for controlling and containing costs; (3) the services to beneficiaries and providers in processing claims, correspondence, and appeals; and (4) the management of funds covering benefit and administrative costs. GAO recommended that Congress enact legislation requiring that no benefits be payable for dependents of active-duty members when the benefit claimed is payable under another insurance plan, obtained by employment or law, by which the beneficiary is covered. GAO also made recommendations to the Secretary of Defense.

**Agency Contact:** General Accounting Office (202) 426-5246.

**E00415-002**
*New Claim Forms and Changes in Administrative Procedures May Increase Improper CHAMPUS Payments.* (HRD-81-75).
4/15/81; 8 pp.
**OMB Funding Code/Title:** 97-0100-0-1-051 / Operation and Maintenance, Defense Agencies
**Program:** Training, Medical, and Other General Personnel Activities: Civilian Health and Medical Program of the Uniformed Services
**Congressional Relevance:** *House* Committee on Armed Services; *Senate* Committee on Armed Services. *House* Committee on Appropriations: Defense Subcommittee; *Senate* Committee on Appropriations: Defense Subcommittee.
**Authority:** Department of Defense Appropriation Act of 1979 (P.L. 95-457, title III, § 131). Dependents Medical Care Act (P.L. 84-569; 10 U.S.C. 1071 et seq.).
**Availability:** GAO

*Abstract:* The Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) has no central files of beneficiaries that may be checked to determine each claimant's eligibility. Instead fiscal intermediaries determine eligibility from data provided on the claim form. GAO believes that certain program changes recently implemented or planned by CHAMPUS will result in weakening program controls, increasing improper benefit payments, and providing slower service to beneficiaries due to claim processing delays. GAO is concerned that: (1) new claim forms do not provide adequate beneficiary eligibility data and will result in delays in processing in order to obtain necessary information; (2) beneficiaries residing within 40 miles of a uniformed services medical facility will no longer be required to submit, with their CHAMPUS claims, statements that nonemergency inpatient care is unavailable at those facilities; and (3) fiscal intermediaries no longer are required to obtain certification as to the continued eligibility of dependent children over age 21. GAO made several recommendations to the Assistant Secretary of Defense (Health Affairs).

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Office of Economic Opportunity and the Department of Health and Human Services (HHS) initiated income maintenance experiments, the first ever in the United States, to measure the extent to which a guaranteed income would reduce recipients' work efforts. *Abstract:* GAO believes the experiments were important social research but identified several problem areas which may have affected the usefulness of the results. GAO recommended that Congress, in authorizing future social research such as the experiments, should require Federal agencies to: (1) prepare plans identifying end-users, user needs, and expected results; (2) set forth project monitoring and coordinating procedures, criteria, and standards by which to assess project progress and results; and (3) detail procedures for disseminating interim and final results to users and summarizing both technical results and operational lessons learned from the proposed projects. Further, the Secretary of HHS should summarize the four experiments' results in layman's terms and distribute them to all interested and affected Federal legislators and executive branch program managers. The lessons learned about the conduct of experiments should be summarized and shared with such agencies as the Department of Labor, Housing and Urban Development, Agriculture, and others planning or likely to conduct related research projects.

**Program:** Mental Health: Services
**CFDA NO.:** 13.295
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963, as amended (P.L. 88-164, title II, § 206; 89 Stat. 316; 42 U.S.C. 2689e).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This is the first phase of an ongoing project to provide previously unavailable information on the specific relationships among client characteristics, services utilization, organizational characteristics, costs, and treatment outcomes in Community Mental Health Centers (CMHCs). In this first phase 16 pre-selected representative CMHCs are being inducted into a specialized data collection project in which data on clients are being provided to the National Institute of Mental Health on a client specific rather than facility wide aggregated basis, thereby offering opportunities for a variety of important analyses which have not been possible before. In a subsequent project (ADM 79-341) an additional 32 CMHCs are being inducted, leading ultimately to a rotating ongoing representative cohort of 48 CMHCs.

*Abstract:* This project supported an evaluability assessment of the State Manpower Development Program. Activities included efforts to clarify and obtain consensus on the goals and objectives of the program, express the underlying program logic in the form of logic models, comparison of the program intent with implementation of the program in the field, an analysis of program plausibility, development of performance measures and indicators, and preparation of recommendations for program change and further evaluation of the program.

*A Followup Study of the Beneficiaries of the NIAAA Clinical Training Program.* (1892).
3/81
**Contractor:** Systemetrics, Inc.; Bethesda, MD
**OMB Funding Code/Title:** 75-1361-0-1-553 / Alcohol, Drug Abuse and Mental Health
**Program:** Alcohol Abuse: Training
**CFDA NO.:** 13.274

**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301, 303; 58 Stat. 691; 42 U.S.C. 241, 242a).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project is a continuation of an effort initiated in late Fiscal Year (FY) 79 to (1) determine National Institute on Alcohol Abuse and Alcoholism funded trainee involvement in the alcoholism field following completion of their training and (2) to determine trainee perceptions of the strength and weakness of the training programs in which they were involved. The study, to be completed in the second quarter of FY 81, will provide helpful information in furthering development and planning related to the Institute Clinical Training Grant Program.

*Assessment of State Alcohol Services Demonstration Program.* (1893).
4/81
**Contractor:** University Research Corporation; 5530 Wisconsin Avenue, Washington, DC 20016
**OMB Funding Code/Title:** 75-1361-0-1-551 / Alcohol, Drug Abuse and Mental Health
**Program:** Alcohol Abuse: Services, Grants to States
**CFDA NO.:** 13.257
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, as amended (P.L. 91-616, title III, § 301; 84 Stat. 1849; 42 U.S.C. 4571).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project is to assess the State Alcoholism Services Demonstration Program in regard to implementation and impact. The first year will be directed to collection of baseline data and the development and refinement of data collection procedures followed by the start-up of collection. Results of the assessment of this program impact will provide information essential to assessing the potential of the transfer of responsibility of National Institute of Alcohol Abuse and Alcoholism treatment grants to the States nationwide and improvement of the system of alcohol services in the community.

*NIAAA's Public Education Campaign Evaluation.* (1894).
6/82
**Contractor:** Kappa Systems Incorporated; Arlington, VA
**OMB Funding Code/Title:** 75-1361-0-1-552 / Alcohol, Drug Abuse and Mental Health
**Program:** Alcohol Abuse: Program Support
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project is a continuation of a 24-month effort initiated in Fiscal Year (FY) 1980 to evaluate the National Institute of Alcohol Abuse and Alcoholism Public Education Campaign directed to (1) women, (2) women and Fetal Alcohol Syndrome (FAS), and (3) youthful drinking drivers. The objectives of this project are to: (a) assess effects of the campaign on target audiences regarding changes in awareness, knowledge, and attitudes, and to the extent possible assessment of changes in behavior; (b) assess various methods of distribution of campaign materials through States and intermediary groups; and (c) provide information that can be used to plan future public education programs.

**Agency Contact:** Alcohol, Drug Abuse, and Mental Health Administration. (301) 443-3862.

### E00503-016

*ADM Impact Workshop.* (1896).
4/81
**Contractor:** Birch and Davis Associates, Inc.; Silver Spring, MD
**OMB Funding Code/Title:** 75-1361-0-1-552 / Alcohol, Drug Abuse and Mental Health
**Program:** Alcohol Abuse: Research; Drug Abuse: Research; Mental Health: Research
**CFDA NO.:** 13.271; 13.272; 13.273; 13.891; 13.277; 13.278; 13.279; 13.242; 13.281; 13.282
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The contractor will prepare, coordinate, and conduct a two-day workshop which will evaluate past and current research on the impact of alcohol, drug abuse, and mental health (ADM) treatment on medical care utilization and health status. Most importantly, the workshop will advise the Alcohol, Drug Abuse and Mental Health Administration and its Institutes regarding potential means and opportunities for studies and also regarding the most fruitful uses of future research monies on this topic. The contractor will also prepare a written report based on the conference.

**Agency Contact:** Alcohol, Drug Abuse, and Mental Health Administration. (301) 443-4408.

### E00503-017

*Review of ADAMHA Evaluation of Prevention Program Effectiveness.* (1897).
6/81
**Contractor:** National Institute for Advanced Studies; 1133 15th Street NW, Suite 1000, Washington, DC 20005
**OMB Funding Code/Title:** 75-1361-0-1-552 / Alcohol, Drug Abuse and Mental Health
**Program:** Program Management
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The contract is undertaken in coordination with the National Institute on Drug Abuse (NIDA) to provide the Alcohol, Drug Abuse and Mental Health Administration (ADAMHA) with a critical review of in-house prevention program evaluation activities. The main objective of the review is to inform ADAMHA policymakers as to how much confidence can be placed in reported findings of ADAMHA-funded primary prevention programs, i.e., a review, according to agreed upon methodological standards, of the quality of documentation efforts. It is also to provide the agency with an overview of the degree of documentation existing for prevention program effectiveness so that policymakers will know how much confidence to place in stated program results, i.e., ADAMHA is interested in knowing how projects/programs have been evaluated, what the evaluations show regarding efficacy, and which projects/programs have sufficient support and documentation to disseminate on a large scale. Another purpose is to indicate the degree to which current evaluations of minority-oriented programs provide culturally valid measures of project and program effectiveness. Addressing these objectives may lead to identifcation of gaps in the documentation and evaluation of ADM primary prevention projects and programs.

**Agency Contact:** Alcohol, Drug Abuse, and Mental Health Administration. (301) 443-3706.

**E00503-019**
*Management Assessment of the NIDA National Training System–Phase I and II.* (1899).
4/81
Keith L. Smith, Ph.D.
**Contractor:** JWK International Corp.; 7617 Little River Turnpike, Annandale, VA 22003
**OMB Funding Code/Title:** 75-1361-0-1-553 / Alcohol, Drug Abuse and Mental Health
**Program:** Drug Abuse: Training
**CFDA NO.:** 13.280
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301, 303; 58 Stat. 691; 42 U.S.C. 241, 242a).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The National Institute on Drug Abuse (NIDA) has established over the past 8 years a National Training System (NTS) with the mission to assure an adequate supply of competent personnel to work in the nation's drug abuse treatment and prevention programs. The NTS, comprised of an interlocking series of grants and contracts to States, educational institutions, and private firms, is being assessed by NIDA to maximize its efficiency and effectiveness and to assure its responsivenss to the manpower development needs of the drug abuse field. Thirteen "management issues" are to be addressed through the review of major reports, an analysis of the goals structure of the NTS and site visits to major components of the system. Components to be visited will include, but not be limited to: NIDA, the National Drug Abuse Training Center, 5 regional support centers, 10 representative State agencies, 20 representative treatment and rehabilitation programs, 20 representative prevention programs, the Career Development Center, the Management Intern Program, medical schools participating in the Career Teachers program, and organizations representing special populations served by the NTS. The contractor will submit a 30-50 page report of its assessment findings and recommendations. Findings will be supported with objective quantifiable documentation wherever possible. Deficiencies identified will be diagnosed as to probable causality. Standards of efficiency and effectiveness against which the NTS is measured will be explicitly stated and justified.

## CENTER FOR DISEASE CONTROL

**E00504-001**
*Evaluation of Surveillance Systems in Several Provider Settings.* (1851).
6/81
**OMB Funding Code/Title:** 75-0943-0-1-551 / Preventive Health Services
**Program:** Epidemic Services
**CFDA NO.:** 13.283
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 95-626, title II, § 202, 204; 42 U.S.C. 247b).
**Availability:** Agency
**Geographic Relevance:** State

*Abstract:* The purpose of this study is to evaluate the current public health surveillance of four infectious diseases: measles, rubella, salmonella, and hepatitis. The study is designed to determine: the degree to which completeness, timeliness, and consistency vary by month of year and by category of disease reporters; the time sequence from disease onset until the case report is received by the health department; and the proportion of all cases detected by current surveillance techniques. The contractor has initiated a 12-month period of individual case counts in the health jurisdictions chosen in accordance with the protocols and is editing all cases to prevent duplication and to insure accuracy. Upon completion of the 12-month reporting period, the contractor will analyze all data collected in accorrdance with the evaluation protocol. In addition to the New York State and Monroe County study, the State of Vermont is conducting a similar study on a statewide basis.

**Agency Contact:** Center for Disease Control. (404) 329-3491.

**E00504-002**
*Exploratory Evaluation of Model Standards.* (1852).

**Program:** Basic Preventive Health
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301, as amended by; P.L. 95-626; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this study is to evaluate the feasibility and success of negotiating measurable performance objectives between States and community agencies responsible for the types of preventive services covered in the document "Model Standards for Preventive Health Services." The study will assess the negotiation process itself, from a standpoint of forms, barriers to success, administrative costs, and other variables. It will subsequently assess also the actual attainment levels of negotiated commitments. Two States-Maine and California-will evaluate negotiations, one with local health departments and one with multiple community agencies. Data will consist of that generated by the study, such as questionnaires and cost analyses, and that generated locally for program needs and used to monitor measurable targets such as morbidity and services statistics. The report will present quantitative and qualitative assessment of the success of standards implementation in these states.

**E00504-003**
*Evaluation of the Extent to Which Potential Vaccine Recipients Comprehend "Important Information" Forms.* (1853).
11/30/80; 366 pp.
Joanna Tyler, Ph.D.
**Contractor:** Applied Management Sciences; 962 Wayne Avenue, Silver Spring, MD 20910
**OMB Funding Code/Title:** 75-0943-0-1-551 / Preventive Health Services
**Program:** Disease Prevention: Immunization
**CFDA NO.:** 13.268
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301, 311, 317, as amended by; P.L. 95-626; 42 U.S.C. 241, 243, 247b).
**Availability:** Agency; EDC
**Geographic Relevance:** National

*Abstract:* The objectives of this project were to develop and pilot test a study design to evaluate the extent to which potential recipients of vaccines or their parents or legal guardians comprehend "Important Information" forms which describe the risks and benefits of various vaccines. During the study, various instruments for measuring reading comprehension were developed and tested and a national study was designed and pilot tested. The pilot study produced the following major conclusions and suggestions: (1) a national field study to evaluate "Important Information" forms by testing client comprehension and weighing client and clinic characteristics is feasible; (2) with a few modifications, the basic study design is sound; (3) more planning of the study logistics important for implementation is required and recommended; (4) more data are needed to accurately analyze the client comprehension of the forms and the effects of client and clinic characteristics on such comprehension; (5) the actual and perceived reading comprehension instruments require refinement and (6) the reading level of the forms is too high for the clinic popluation and they need to be revised.

**Geographic Relevance:** National

*Abstract:* This study will obtain information on: (1) the purpose and value of offering various laboratory tests; (2) the reasons that specimens are submitted to the Center for Disease Control (CDC); (3) the criteria and procedures for specimen submission, acceptance, and processing; and (4) the timeliness of specimen submission, analysis, and reporting and the usefulness of the test results for clinical, epidemiologic, and laboratory quality control purposes. Currently, reference diagnostic services are provided primarily to 54 State and territorial public health laboratories and, through them, as support to local public health and clinical laboratories. The study methodology will consist of describing and categorizing all current CDC diagnostic services, developing criteria for selection of representative tests to be studied in depth, conducting a survey of users of the services, and analyzing the data collected to support recommendations on continued services.

## FOOD AND DRUG ADMINISTRATION

**E00505-001**

*Need for More Effective Regulation of Direct Additives to Food.* (HRD-80-90).
8/14/80; 37 pp. + 2 app. (5 pp.)
**OMB Funding Code/Title:** 75-0600-0-1-554 / Salaries and Expenses
**Program:** Foods
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Food, Drug and Cosmetic Act, as amended (P.L. 75-717, § 409; 42 Stat. 1479; 12 U.S.C. 348). Meat and Poultry Act (P.L. 90-201, title I, § 2; 81 Stat. 584; 21 U.S.C. 601 et seq.). Poultry Products Inspection Act (P.L. 90-492; 82 Stat. 791; 21 U.S.C. 451 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Food and Drug Administration (FDA) is responsible for insuring the safety and quality of a major segment of the Nation's food supply. FDA reviews industry petitions and publishes tolerances for the safe use of food additives, conducts research, develops analytical methods to detect and prevent food adulteration, sets standards for classes of food, and defines good manufacturing and sanitary practices. *Abstract:* The Food, Drug and Cosmetic Act requires that the safety of direct food additives be based on scientific evidence. However, the Act exempts from FDA review and approval substances generally recognized as safe (GRAS) by experts or approved for use before 1958 and allows the safety determination for some of those substances to be based on common use in food. GAO found that experience from common use in food has questionable value in assuring that an additive is safe, because individuals are exposed to numerous substances, including environmental contaminents, over a long period. Adverse effects from exposure to harmful substances may not occur for many years. Since FDA is not required to review and approve GRAS substances, there is no assurance that consistent criteria are applied in determining the safety of all such substances. Congress should amend the Federal Food, Drug and Cosmetic Act to eliminate exemptions for GRAS and prior sanction substances. The Secretary of Health and Human Services should direct the FDA Commissioner to publish regulations establishing review criteria for assessing the safety of food additives and issue guidance defining the methods and controls to be used in conducting scientific safety tests. Further, the FDA Commissioner should be directed to revise regulations which list substances that FDA affirmed as GRAS to indicate the kinds of evidence that support their safety.

**E00505-002**

*FDA's Regulation of Gentian Violet Appears Reasonable.* (HRD-80-91).
8/14/80; 61 pp. + 5 app. (17 pp.)
**OMB Funding Code/Title:** 75-0600-0-1-554 / Salaries and Expenses
**Program:** Drugs and Devices
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Food, Drug and Cosmetic Act, as amended (P.L. 75-717, § 501, as amended by; P.L. 85-929; 52 Stat. 1046; 21 U.S.C. 351-357).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Food and Drug Administration (FDA) is responsible for insuring the safety and quality of a major segment of the Nation's food supply and that animal drugs are safe and effective. FDA reviews industry petitions and publishes tolerances for the safe use of food additives, conducts research, develops analytical methods to detect and prevent food adulteration, and defines good manufacturing practices. *Abstract:* GAO was asked to determine if: (1) some FDA officials exhibited malice against certain companies and individuals who sold gentian violet; (2) the FDA regulatory machinery was improperly used to force some companies out of the market; and (3) if FDA was unresponsive to efforts made in good faith by three companies to resolve problems concerning the adequacy of safety and effectiveness data they submitted to FDA. No evidence was found to substantiate any of the charges. FDA has not approved gentian violet for use in veterinary products and has determined that gentian violet does not qualify for interim food additive status. The safety and effectiveness of gentian violet in veterinary use have not been demonstrated, nor has its effectiveness as a mold inhibitor in animal feeds been demonstrated. According to FDA, the safety must be demonstrated in long-term tests designed to assess whether or not gentian violet is carcinogenic. The GAO review disclosed that the regulatory actions taken by FDA against three firms were not unreasonable in view of the FDA decisions that gentian violet products are unapproved as food additives and new animal drugs. Although some statements made by FDA officials to Members of Congress were inaccurate, GAO could not conclude that these were deliberate attempts to discredit or drive the firm out of business.

*Abstract:* The purpose of this project is to learn the status of individual facility planning for energy induced emergencies and the specific impacts of rapidly increasing energy costs and energy shortfalls on health services delivery and costs. Data to be collected include: energy type changes, consumption and cost patterns, employee and service staffing patterns, percentages of occupancy, collection of community data including changes in public transportation systems, closing of health facilities, major employment changes, and major population changes. Findings will be used to educate health planners and decision makers that failure to include energy as a resource to health planning will result in a deterioration of our health care delivery system.

*Abstract:* P.L. 94-484 currently provides for two types of traineeship grants in public health. Section 748, Public Health Traineeships, authorizes grants to accredited schools of public health and other public or nonprofit institutions which provide graduate or specialized training in public health and which are not eligible to receive a grant under section 749. These grants provide traineeships (tuition, fees, and stipends) for students pursuing graduate degrees. Traineeships for students in other graduate programs, authorized under Section 749, are grants to "public nonprofit private educational entities, including graduate schools of social work, but excluding accredited schools of public health," which offer a program in health administration, hospital administration, or health policy analysis and planning. As a requirement for receipt of these grants, each institution must assure that a percentage of all funds awarded go to students who have previously received a postbaccalaureate degree or have a year's work experience in health services. This project will design the instruments, methods, and approaches necessary to test the assumption that these Federal conditions for traineeship support assure greater academic and employment success for these individuals, increase the number and availability of trained public health professionals in priority categories, and have no negative influence on career opportunities for persons entering the public health professions which are related to characteristics of sex and/or ethnicity.

*Evaluation of Family Practice Residency Programs.* (1952).
12/80
**Contractor:** Koba Associates; 1441 L Street NW, Washington, DC 20417
**OMB Funding Code/Title:** 75-0712-0-1-553 / Health Resources
**Program:** Health Professions Education: Primary Care
**CFDA NO.:** 13.379; 13.896
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title VII, § 786; 42 U.S.C. 295g-6).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Section 767 of the Comprehensive Health Manpower Training Act of 1971 and Section 786 of P.L. 94-484 authorize the development and operation of Family Practice Residency Programs. The primary purposes of family medicine grants are to stimulate the growth of these programs, increase the proportion of physicians entering primary care as a career, and ultimately make primary care services available to the general population. This evaluation is designed to provide current information on the developmental and operational experiences relating to family practice residency programs and, in particular, to test the utility and impact of Federal support in its present form. Using the existing data, an analysis will be conducted of the following areas: apparent impact of the Family Practice Programs on specialty and geographic distribution of participating physicians; individual program factors which tend to optimize geographic distribution of residents to areas in which there is a shortage of primary care physicians; and identification and determination of the apparent impact of factors which explain initiation, continuance, and size of programs, including Federal support as a variable.

**Availability:** Agency; EDC
**Geographic Relevance:** National

*Abstract:* The findings of this study document the effectiveness with which the Financial Distress program has met its purpose. As a result of the program, each of the eight recipient institutions has succeeded in attaining and maintaining financial solvency. In an era of economic uncertainty, with a reduction in Federal institutional and research support, and a reduction in private philanthropy, such a program will be required to assure continued development of physicians, especially in the primary/ambulatory care specialties, to serve in the Nation's health manpower shortage areas. Thus, in addition to the documentation, the study shall serve also as a basis for review and evaluation of the policy and procedures which must govern a continuing program in order to enhance the strengths and eliminate, or at least reduce, the weaknesses in the expectation of an even larger role over the next several years.

**Geographic Relevance:** National

*Program Objectives:* The Training in Expanded Auxiliary Management (TEAM) Grant Program was initiated in 1971. The TEAM approach to the delivery of dental services is one which can increase the productivity of the current dental care system. The concept is based on increasing efficiency and productivity through incorporation of management philosophies and utilization of expanded function auxiliaries. The purpose of the TEAM Program is to demonstrate to and educate dental students in the organization and management of a multiple auxiliary dental team practice as a means of increasing the productivity of the current dental delivery system.
*Abstract:* This study is to design a project to assess the impact of TEAM training on dental practice. The study is to be designed so that practices of dentists who had TEAM training will be compared to dentists who did not have TEAM training as dental students. The characteristics of practices to be studied include information on auxiliaries and production and economic outputs such as gross and net income. The data will be analyzed to determine the impact of the TEAM training on dental practice and to determine the effectiveness and impact of the TEAM grant program.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Health Professions Loan Repayment Program is authorized by Section 741(f) of the Public Health Service Act, as amended. This authorization enables the Health Resources Administration to pay a portion of education loan balances owed by health professionals as a condition for their agreement to enter into and remain in practice in designated health manpower shortage areas. In 1979, the General Accounting Office questioned the need for continuation of this program as an effective means for remedying existing shortages of physician practitioners throughout the Nation. The purpose of this project is to design and conduct an assessment of the role of the loan repayment program in attracting and retaining program participants in manpower shortage areas. For the most part, retrospective data will be collected from loan recipients currently in medical practice.

**Availability:** Agency; EDC
**Geographic Relevance:** National

*Abstract:* Rapid growth in health care expenditures during the past decades has created controversy over appropriate health manpower policy. Those proposing reductions in the growth of health manpower often cite counterproductive effects of a physician surplus as argued from a supplier-induced demand or demand creation theory. According to this theory, physicians deliberately create demand and overutilization of professional care due to the ignorance of patients and the rapid growth in the stock of physicians. An evaluation of the demand creation theory found that the model is incomplete and contains internal inconsistencies. Its apparent goal is to explain the positive correlation between physicians' fees and physician density. Extensions of the model addressing equally important empirical evidence become troublesome and inaccurate. A completed demand creation model developed within this project yields predictions largely indistinguishable from an expanded demand-supply model with patient waiting time included. Presently, data necessary to test between models are unavailable. Without convincing empirical support of a completed model, it is inadvisable to adopt demand creation premises within a forecasting model of the health care market. The Bureau of Health Professions should continue with its existing model, making continual refinements but not adopting the alternative approach. Continued growth of the stock of physicians will in the long run retard inflationary pressures and promote a broader geographical dispersion of physicians.

*Abstract:* An assessment of the contribution community organization grantees have made/are making to legislative objectives that authorize the Health Career Opportunity Program (HCOP) is being undertaken. Objectives include the recruitment, admission, and retention of disadvantaged students in health professions training and their graduation. Community organizations are one of three categories of HCOP grant recipients. Others are undergraduate institutions and health professions schools. It is expected that the study will provide information that will give insight into the impact of these grants and be useful as a management information tool, in the selection of grantees, in the monitoring of grants, and in the provision of technical assistance. Process and outcome data will be collected from project staffs, students, and selected educational institutions. Descriptive and statistical analysis will be performed as appropriate. The entire universe of 52 grantees, as well as approximately 300 students, are to be surveyed. Additionally, seven representative projects are to be selected for in-depth case studies. The projects under study are located throughout the country and serve individuals who are disadvantaged by virtue of race/ethnicity, economic status, and/or by sex. The final report will include the case studies, an executive summary, a report of study findings, and recommendations that would facilitate improved program objective accomplishment. It is expected that the study results will be published and made available to all HCOP grantees and potential grantees and other interested individuals and entities.

**Geographic Relevance:** Natonal

*Abstract:* P.L. 94-484 provides support for grants to institutions to develop and improve general practice residency programs in dentistry. At the present time there are no available data to indicate whether, or to what extent, training of this nature results in any demonstrable improvements in the competence of dentists who have taken these programs, when compared to those that have not. Through a previous contract, a survey design and survey instrument were developed to compare the profiles of dental practices of dentists who have completed General Practice Residencies compared to dentists who have not. This design and instrument will be used in the survey to be conducted under this study. This study proposes to test the hypothesis that a General Practice Residency experience leads to differences in the profiles of dental practice shown by graduates as compared to non-graduates. The test of this hypothesis will provide valuable input into later decisions concerning Federal support to general practice residency programs.

**Program:** Health Facilities: Program Support
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XVI, § 1610; 42 U.S.C. 300r).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This study was designed to develop a methodology to evaluate the impact of the Title XVI regulations and their effectiveness. Should the evaluation results demonstrate that the new rules are not effective, the Department of Health and Human Services will reconsider the applicable provisions of the regulations. Results from this study should indicate whether the new rules increased access to uncompensated and community services provided by Titles VI and XVI assisted facilities. Also, identification of problems resulting from the new rules will help the Bureau of Health Facilities to make the appropriate administrative changes and to recommend legislative actions needed to improve the efficiency and performance of Titles VI and XVI recipients. The findings will also provide information needed to improve policy and management decisions to assure that recipients of Titles VI and XVI funds are providing uncompensated and community services consistent with the new statutory requirements. Quantitative and qualitative aggregate data and information will be collected from the facilities and analyzed. This information will include health services and fiscal data from about 7,000 health facilities throughout the United States, Guam, the Trust Territories of the Pacific Islands, American Samoa, Puerto Rico, and the Virgin Islands. The final report will present a methodology to be used to evaluate the impact and effectiveness of the new rules. The final regulations, which incorporate comments from health care providers, consumers, and government groups, were issued on May 18, 1979. These regulations become effective for most obligated health care facilities on September 1, 1979, and for the remainder on May 1, 1980.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title VII, § 791, as amended by; P.L. 94-484; 42 U.S.C. 295h).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Sections 796(a) and 797 of P.L. 94-484 authorize "establishment of methods of recruitment, training, and retaining of allied health professionals." Evidence has shown that the number of minority allied health workers has gradually increased during the past 10 years; however, specific information about the level of training, the number of minorities currently enrolled in allied health educational programs, and the methods employed to recruit and retain minority students in the allied health professions is lacking. This study proposes to assess the effectiveness of federally-supported educational programs funded under sections 796 and 797 in attracting and retaining minorities in allied health educational programs. The contractor shall design and develop survey instruments and methodologies which will: (1) solicit information about the degree to which the purposes established in P.L. 94-484 are being met for minority students; (2) determine the kinds of activities which have been initiated to increase the enrollment and retention of minorities in allied health educational training programs; and (3) assess the impact of training program activities toward meeting these goals in terms of recruitment and retention.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XV, § 1516, 1525, as amended by; P.L. 96-79; 42 U.S.C. 300m-4; 42 U.S.C. 3001-3005).
**Availability:** Agency; EDC
**Geographic Relevance:** National

*Abstract:* Sections 1513(g) and 1523(a)(b) of the Public Health Service Act as amended by the Health Planning Amendments of 1979 (P.L. 96-79) authorizes all Health Systems Agencies (HSAs) and State Health Planning and Development Agencies (SHPDAs) to perform regular review to determine the continued appropriateness of existing institutional and home health services in the health service area. In making this review of health services, the agency must consider the need for the service; its accessibility and availability, financial viability, and cost effectivenss; and the quality of the services provided. In order to do this, the agency must collect and analyze data; establish criteria and standards; develop and carry out a review process for comparing existing services to the criteria and standards; and make public the resultant findings. The purpose of this exploratory evaluation is to: (1) ensure that program objectives and assumptions are well defined, agreed to, and plausible; (2) determine if program inputs and operations match program objectives; (3) determine feasible appropriate measures of program objectives and program operations; and (4) identify feasible evaluation and management options. The products of this evaluability assessment will be models describing the intent of the review function, actual review processes, and agreed upon measures of performance that will be used to frame short- and long-term evaluation studies to obtain information on appropriateness review implementation.

**Geographic Relevance:** National

*Abstract:* This study will assess the roles Titles VI and XVI loan and modernization grant programs have played in assisting acute care facilities located in urban and rural poverty areas to provide health services to the medically underserved. Data on approximately 790 assisted facilities will be available from computer files and will be the basis of a series of comparative analyses to determine whether there are any significant differences in characteristics between poverty area and non-poverty area facilities. Follow-up case studies of unfunded Sec. 1625 (now Sec. 1610(a)) applicants and successful applicants will be conducted to assess the consequences of disapproval as well as characteristics of successful applicants. The study findings will expand the knowledge base about the capability of acute care facilities in poverty areas to maintain and improve their service capacity, an issue which has important implications for the health facilities financing program.

**Geographic Relevance:** National

*Abstract:* The objectives of the study are to identify the social, institutional, financial, and other relevant factors that act as barriers which reduce opportunities for minority groups to pursue health professions; to analyze the effect of these factors on admission, attrition, and graduation of minority groups from health professions schools; and to develop recommendations on how the Federal government can change existing or institute new programs and guidelines to increase the number of minorities entering and graduating from health professions schools. Secondary data sources will be used to document the enrollment trends of minorities in health professions schools over the past few years. A sample of minority students in their last year at pre-health sciences schools, who have taken the MCAT or DAT, will be surveyed to determine their career aspirations and how they were developed; schools to which they have applied and responses; levels of assistance received from health sciences advisors; and avenues of financial assistance of which they are aware and for which they have applied. In addition, 12 pre-health sciences schools will be chosen for in-depth case studies to augment data from the survey.

**Geographic Relevance:** National

*Abstract:* The Health Professions Educational Assistance Act of 1976 provides support for the training of health professions in various fields, including dentistry. The law is designed primarily to improve health services in manpower shortage areas. Administration of Section 787 of the law, which supports the recruitment of students from disadvantaged backgrounds into health professions training, is the responsibility of the Office of Health Resources Opportunity. This study will be a nation-wide survey of approximately 7,500 recent dental school graduates to determine the impact of federally-financed aid programs on the practice location and practice mode preferences of minority and women dentists, as compared to those of white male dentists. Specifically, the survey will focus on two loan programs administered by the Public Health Service: The Health Professions Student Loan Program and the National Health Service Corps. Analysis of survey data will provide information that will assist the government in its efforts to improve the geographic distribution of dental practitioners, encourage a more heterogeneous membership in the dental professions, and chart the future direction of Federal aid and manpower programs.

*Abstract:* The purpose of this study is to analyze and interpret existing studies and information to provide answers to policy questions concerning: (1) the extent of a match or mismatch between skills developed in nursing education and skills requirements in hospitals, nursing homes, and ambulatory care settings; (2) the extent to which Federal support for nursing education has affected the match or mismatch; and (3) implications of findings for Federal policy, to date, on nursing education and supply and requirements for nurses. Emphasis is placed on Federal legislation and programs, 1964 to 1980, supporting nurse training and education, particularly the three types of programs preparing individuals for licensure as registered nurses. The major tasks of the contract include development of policy questions and answers focusing on: (1) the relationship of Health Resources Administration (HRA)-supported programs to the registered nurse supply; (2) the need for registered nurses in hospitals, nursing homes, and ambulatory care facilities; (3) the match between the supply of and need for registered nurses; (4) implications for the appropriateness of HRA-supported programs to date; (5) characteristics of the nurse employment market related to the alleged shortages of nurses; and (6) changes, if any, needed in HRA support to meet current requirements for nurses in hospitals, nursing homes, and ambulatory care facilities. The findings of this study will be used to develop recommendations for Federal policies and programs concerning nursing education.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title VII, § 751; 42 U.S.C. 294t). (P.L. 78-410, title III, § 331; 42 U.S.C. 254d).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this joint Health Resources Administration/Health Services Administration evaluation is to empirically determine the impact of National Health Service Corps (NHSC) placements upon health care delivery and upon access to health care within communities served by the Corps. More specifically, the contractor will determine changes in care delivery patterns attributable to the placement of NHSC physicians as well as investigate differences in productivity both among NHSC physicians and between NHSC and private-sector physicians. A second purpose is to identify differences, if any, in morbidity and treatment between patients seen by NHSC and those seen by private-sector physicians. A third purpose is to determine whether the NHSC has reduced access barriers for communities and subpopulation groups. Findings from this study will be relevant to the redesignation of existing shortage areas and to the modification of shortage area criteria. In addition, study results will furnish information about the deployment of NHSC physicians. Finally, the study will yield results concerning the efficiency and effectiveness of the NHSC and suggest possible program alternatives.

**Geographic Relevance:** National

*Abstract:* This study will identify the data needs relevant to Section 1501(e) requirements of the Public Health Service Act as amended by the Health Planning and Resources Development Amendments of 1979. This will involve a careful examination of the intent and language of the legislation in order to determine the data necessary to be responsive to the law. This task will define the scope of the project and provide direction to the data aggregation activities which will follow. Next, the study will review existing data sources in order to determine the information available on health planning issues, including that currently supplied to the Health Resources Administration by the health planning agencies. It will then develop a strategy for a recommended data set and a methodology for linking data on health system and health status changes with health planning goals, objectives, implementation strategies, and resource requirements. It is assumed that if some of the information identified as necessary to meet the 1501 requirements is not currently available, it will be necessary to assess the ability of planning agencies to provide this information in the future. Therefore, telephone contacts and/or site visits to health systems agencies and State health planning and development agencies will be conducted to assess their current abilities to supply needed information.

*Assessment of the Early Warning Loan Monitoring System of the Bureau of Health Facilities.* (1980).
2/81
Robert M. Clinkscale
**Contractor:** LaJolla Management Corporation; 7910 Woodmont Avenue, Suite 1301, Bethesda, MD 20014
**OMB Funding Code/Title:** 75-0712-0-1-551 / Health Resources
**Program:** Health Facilities: Facilities Financing/Loan Monitoring
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XVI, § 1610, as amended by; P.L. 96-79; 42 U.S.C. 300r).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The need for an effective loan monitoring system has been discussed in a number of studies; the most critical was published by the General Accounting Office on 6/27/79 and entitled "Report to the Congress on Hospital Loan Assistance Programs: Actions Needed to Reduce Anticipated Defaults." The problem was the inability of the Department of Health and Human Services to monitor a large loan portfolio, to identify potential defaults, and to offer timely technical assistance to the facility. Furthermore, the Government could be liable for payments under the Federal guarantee or become "owner" of bankrupt facilities. THe Bureau of Health Facilities is developing the Early Warning Loan Monitoring System (EWLMS), an automated system designed to compute the financial strength of a facility through multivariate discriminate analysis. The system can rank the facilities by category: (1) good loan–little chance of default; (2) marginal loan–potential default; and (3) defaulted loan–actual default with one or more payments in arrears. Financial data for the EWLMS will come primarily from the Medicare Cost Report Form 2552, a useful source, readily available in a standardized format. Audited financial statments from the facilities provide supplementary data. The EWLMS will provide a management tool for both Regional and Central Office staffs in their stewardship of the loan portfolio.

**Program:** Health Facilities: Facilities Financing/Loan Monitoring
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XVI, § 1642, as amended by; P.L. 96-79; 42 U.S.C. 300t-12).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project is to develop an evaluation design for the demonstration phase of the conversion and discontinuance (C/D) program authorized by P.L. 96-79. The evaluation design will define the variety of experiences which need to be examined to develop and assess the effectiveness of alternative designs for a C/D program beyond the demonstration phase and the procedures to be used by the Bureau of Health Facilities (BHF) to choose among applicants for grants in the demonstration stage to insure an optimum mix of awards for evaluation. A report to the Congress on the effects of the C/D program is required by the authorizing legislation; this project will also provide information for that report. The contractor will synthesize information from existing sources. In collaboration with BHF staff, short issue papers will be written covering the relevant dimensions of institutional and conditional variety. An evaluation design will be developed based on an analysis of the most important issues to be explored during the demonstration. The problem of conducting an effective demonstration evaluation with limited resources will be specifically addressed.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The authorizing legislation for the conversion and discontinuance grants program specifically prohibits a grants award whenever the Secretary of Health and Human Services is unable to demonstrate that the cost of providing inpatient health services in the area will be lower after the discontinuance compared with before the discontinuance. The objective of this project is to construct a relatively simple method to estimate savings from discontinuance at the areawide level using existing data. Papers written by three different authors will discuss the economic issues and factors associated with capacity reduction/closure, the financial and budgetary issues involved in reduction of excess capacity, and the market and community impacts of closure. The cost savings methodology will be constructed from the components and knowledge provided in the three issue papers. An expert advisory panel will be involved throughout the project to review the intermediate and final products.

*Evaluation of the Effectiveness of the Placement Mechanisms in Physician Assistant Programs Required by Section 783 of P.L. 94-484.* (1984).
12/80
**Contractor:** JWK International Corporation; 7617 Little River Turnpike, Annandale, VA 22003
**OMB Funding Code/Title:** 75-0712-0-1-553 / Health Resources
**Program:** Health Professions Education: Other Training Support Assistance
**CFDA NO.:** 13.886
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title VII, § 783, as amended by; P.L. 94-484; 42 U.S.C. 295g-3).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This evaluation is designed to provide more definitive information regarding the usefulness and utilization of the deployment mechanisms and how they function within physician assistant training programs. This investigation shall determine the amount and type of shortage area experience the students receive during training and whether these experiences have had any affect on the deployment patterns of graduates from the training programs. The evaluation shall also determine what, if any, assistance the programs offer in helping graduates find jobs in health shortage areas and in primary ambulatory care settings in which the graduates are most likely to utilize the skills with which the training program has provided them. Thus, the evaluation will concentrate on three major areas: (1) Is the mechanism utilized by the students? (2) Does the deployment mechanism appear to increase the percentage of program graduates who locate in health manpower shortage areas? and (3) Does it appear that the mechanism has an effect on the types of practices in which the graduates obtain their first employment after training (i.e., primary ambulatory care sites with employing physicians in the primary care specialties of internal medicine, family practice, pediatrics, general practice, and obstetrics and gynecology)?

*Hearing Impairment Services Evaluation Methodology.* (1801).
Sidonie Davis
**Contractor:** InterAmerica Research Associates; 1500 Wilson Boulevard, Suite 860, Rosslyn, VA 22209
**OMB Funding Code/Title:** 75-0350-0-1-551 / Health Services
**Program:** Community Health Services: Maternal and Child Health
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).

*Abstract:* There will be two distinct final products of this study. The first one is an evaluation methodology that can be used by the Bureau of Community Health Services Office of Maternal and Child Health (BCHS/OMCH) to: (1) identify resource needs, gaps, problems and types of services provided within the agency's Title V audiological service delivery system; (2) establish/improve the standards and policies affecting the delivery of quality audiological and other related services; (3) mobilize and target resources and/or financial and technical assistance in these areas where needed; and (4) monitor the progress and quality of services being provided by the various Title V programs which provide audiological care to infants and preschool children. The second product of the study will be a cost effective methodology for providing and/or extending audiological services to infants and preschool children within the existing BCHS/OMCH Title V, health delivery system.

*Evaluation of Management Information Systems of Public Health Service Clinics.* (1802).
10/80
**Contractor:** Birch and Davis Associates, Inc.; 1112 Spring Street, Silver Spring, MD 20910
**OMB Funding Code/Title:** 75-0350-0-1-551 / Health Services
**Program:** Direct Delivery of Medical Services: PHS Hospitals and Clinics
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this procurement was to identify and inventory all data describing costs and utilization of services in the Public Health Service (PHS) freestanding clinics, evaluate the variations in the cost and utilization data, access the PHS clinics and assess the utility of the data for management of the PHS clinics system. Information was collected from Bureau of Medical Services headquarters in Hyattsville, from the data processing center at the Baltimore Public Health Service Hospital, and from site visits to 23 of the 27 clinics. The final report includes assessments of the accuracy of cost, utilization, and personnel data reported by the clinics to the central office and includes suggestions for improvements in the systems. It also develops a list of performance indicators for measuring the efficiency of the clinics. The implementation of the recommendations from this final report should result in a data system which is useful for management at headquarters and the clinic levels.

**Geographic Relevance:** National

*Abstract:* The primary purpose of this contract was to identify and catalogue the efforts of public and private institutions to collect data on handicapped youth up to six years of age. The methodology included personal interviews, a mail campaign, flyers distributed at professional meetings, and advertisements in national journals. The major effort of this contract is the Sourcebook of Extant Data Bases on Developmentally Disabled Children Up to Six Years of Age. It includes a description of the major Federal laws and regulations which affect disabled children in addition to the listing of the Federal, multigeographic, State and local, and private data bases. It is a useful reference document for program planners concerned with developmentally disabled children, especially at the national level. The final report contains a description of the methodology utilized, problems encountered, recommendations for others who might undertake such an bibliographic effort, and the report appendices. It is in two volumes of 244 and 78 pages.

**Program:** Community Health Services: Family Planning
**CFDA NO.:** 13.217; 13.260; 13.974
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Ap-

propriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title X, § 1003; 84 Stat. 1506; 42 U.S.C. 300a-1).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This study investigates the difference in family planning clinic performance among a sample of Title X programs which the Bureau of Community Health Services (BCHS) has funded to identify determinants of those differences and to develop, without sacrificing program quality effectiveness, policy alternatives to foster improved productivity and efficiency. Among the issues investigated are: types of BCHS-funded family planning programs that have had the "best" performance in terms of the measures of productivity and factors associated with that performance; the effect of various factors such as local clinic staffing patterns, site protocols, site, and client characteristics on the measures of productivity; the effect on performance measures of factors such as education/counseling efforts and follow-up protocols; possible appropriate measures of clinical performance beyond the basic user and encounter data currently employed by BCHS; the relationship of the productivity of providers of nonmedical services to clinic productivity; and the various influences on productivity of a sample of Title X clinics with different levels of productivity.

*Abstract:* The work involves an examination of methods for identifying medically underserved populations and measuring the extent of medical underservice. The Health Interview Survey (HIS) will be explored for its usefulness in improving current methods for identifying medically underserved areas and estimating the number of medically underserved individuals in the population. The HIS includes a wide variety of health status and health services utilization measures which can be related to social, economic, and demographic characteristics. Analysis of these relationships may result in clarification of the concept of medical underservice and development of new methods for targeting limited resources.

*Abstract:* The purpose of this contract is to determine how community health centers affiliated with major institutions differ from other health centers in their planning processes, implementation strategies, and initial operational phases. Nine case studies of community health centers will be undertaken. The centers will differ in organizational development, management approaches, institutional affiliation, "front end" and technical assistance during planning, program design, and implementation. The nine urban community health centers to be studied fall into three groups: freestanding community health centers; hospital affiliated primary care centers in or adjacent to a hospital; and teaching hospital or medical school-linked centers receiving Johnson Foundation support for developmental purposes. The study will provide a detailed description and comparative analysis focusing on the centers' organizational and financial plans, and services projected, initially offered, and used.

**Geographic Relevance:** National

*Abstract:* The purpose of this contract is to identify and evaluate the methods and approaches which have been used by 11 Health Services Administration/Administration on Aging (AOA) demonstration grantees to plan for and deliver health and social services to the unserved and underserved elderly. This is to be accomplished by a comparative and descriptive analysis of how the HSA/AOA demonstration program has been implemented. The analysis will focus on: (1) the methods used by the demonstration grantees to achieve HSA/AOA program requirements; (2) the extent to which HSA/AOA program requirements have been achieved; and (3) the identification of the major environmental/organizational factors which have influenced achievement of the HSA/AOA program requirements. Pertinent findings will be compiled into a final report which will be disseminated by HSA and AOA to the entities operating under the auspices of HSA and AOA.

**Geographic Relevance:** National

*Abstract:* This study will describe seven designated State or local Maternal and Child Health (MCH) Identification/Tracking Systems designed to assure continuity of care for the MCH population. The description of identification/tracking systems will include: (1) how patients enter the system; (2) how and in what form records are kept; (3) how the record system monitors the use of health services by clients; and (4) the system designed and the data required for monitoring effectiveness, administrative efficiency, and quality assurance/accountability. The study will also provide cost analyses on the operation of the main functional areas of these identification/tracking systems. It will also provide a comparative assessment of the success of these systems in assuring continuity of care and their impact on the MCH population.

**Geographic Relevance:** National

*Abstract:* The purpose of this study is to design, collect data on, and analyze a three-part evaluation of the National Health Service Corps (NHSC) program. The evaluation is intended to determine empirically the impact of the NHSC placement upon the health care delivery system and upon access to health care within Corps communities. The first part of the study will survey the NHSC physicians, replicating data first collected in 1975 by the Physician Utilization Survey. The second part of the study will develop morbidity profiles of patients seen by the NHSC physicians and profiles of the treatment provided to those patients. These profiles will resemble the 1979 National Ambulatory Care Survey. The third part of the study will analyze microdata from the Health Interview Survey for the years 1974-present, conduct surveys of several communities, and conduct site visits to these communities and to their respective NHSC sites.

## Department of Health and Human Services: Health Services Administration

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XI, § 1121; 86 Stat. 650; 42 U.S.C. 300c-11). Sudden Infant Death Syndrome Act of 1974 (P.L. 93-270, § 1, as amended by; P.L. 96-142; 88 Stat. 90; 42 U.S.C. 300c-11).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Sudden Infant Death Syndrome (SIDS) grantees and contractors provide assistance to families who have suffered a sudden infant death. *Abstract:* SIDS projects generally were making progress in meeting program objectives. Autopsies were generally done promptly, and SIDS was recorded on death certificates when appropriate. The projects generally saw that parents were notified of the cause of death, given information on SIDS, and offered counseling. The project's performance varied considerably in seeing that parents were notified and counseled within the period desired by the Department of Health and Human Services (HHS). Two major problems were the failure of some medical examiners and coroners to promptly inform the projects of SIDS deaths and the failure of many projects to collect sufficient data. The families GAO contacted believed the services were helpful. The extent of voluntary participation varied. HHS procedures determining the funding of individual grantees resulted in excessive funding for several projects. HHS did not follow established procedures for making sure that grantees' unused funds were applied to the next year's funding. GAO made recommendations to both the Congress and the Secretary of Health and Human Services.

*Unexpended Fund Balance in the Indian Health Service Water and Sanitation Facilities Construction Program.* (HRD-80-124).
9/30/80; 5 pp.
**OMB Funding Code/Title:** 75-0391-0-1-551 / Indian Health Facilities
**Program:** Sanitation Facilities
**Congressional Relevance:** *House* Committee on Energy and Commerce; *House* Committee on Interior and Insular Affairs; *House* Committee on Ways and Means; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** (P.L. 83-568, title III, § 7; 73 Stat. 267; 42 U.S.C. 2004a). Indian Health Care Improvement Act (P.L. 94-437, title III, § 301; 25 U.S.C. 1631).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Indian Health Service's (IHS) Water and Sanitation Facility Construction Program is responsible for addressing water and sanitation project needs among the Indian population. *Abstract:* Data in the project files showed various reasons for delays in starting or continuing project construction, which include: (1) problems in obtaining rights-of-way or resolving problems concerning historical preservation of land; (2) problems encountered with contractors; (3) tribal tardiness in providing required data; (4) curtailment pending completion of other projects linked to planned projects; (5) inclement weather; and (6) problems in obtaining an adequate water supply. GAO found that the finance offices had a 3- to 5-month backlog in posting the transactions to the financial records. As a result, the reported unexpended balance was overstated by several million dollars.

### E00507-016

*Need To Clarify IHS Responsibilities For Maintaining Indian Water and Sanitation Facilities.* (HRD-80-14).
7/80; 20 pp.
**OMB Funding Code/Title:** 75-0391-0-1-551 / Indian Health Facilities
**Program:** Sanitation Facilities
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Finance; *Senate* Committee on Banking, Housing and Urban Affairs; *Senate* Select Committee on Indian Affairs. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** (P.L. 83-568, title III, § 7; 73 Stat. 267; 42 U.S.C. 2004a). Indian Health Care Improvement Act (P.L. 94-437, title III, § 301; 90 Stat. 1400; 25 U.S.C. 1631).
**Availability:** GAO
**Geographic Relevance:** State; City; County

*Program Objectives:* The Indian Health Service (IHS) and Sanitation Facility Construction Program is responsible for addressing water and sanitation needs among the Indian population. *Abstract:* In 1976, the Department of Health and Human Services Assistant General Counsel for Public Health concluded that IHS lacked the legislative authority to maintain water and sanitation systems transferred to tribes and communities. These circumstances have posed a dilemma. IHS is responsible for ensuring that adequate health care is provided to Indians and has invested heavily in the construction and improvement of Indian water and sanitation facilities, but it has been told by its General Counsel that it has no authority to maintain the water and sanitation facilities after the Indians acquired ownership responsibilities. The significant IHS capital investment could be lost because of lack of maintenance, and the overall health of the Indians could deteriorate, thereby placing a greater burden on the IHS health care system. The IHS authorities and responsibilities for maintaining transferred sanitation facilities under the Indian Sanitation Facilities Act should be specifically addressed.

### E00507-017

*Problems in the Structure and Management of the Migrant Health Program.* (HRD-81-92).
5/8/81; 21 pp.
**OMB Funding Code/Title:** 75-0350-0-1-551 / Health Services
**Program:** Community Health Services: Migrant Health
**CFDA NO.:** 13.246
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act. as amended (P.L. 78-410, title III, § 331, as amended by, P.L. 95-626; 84 Stat. 1868; 42 U.S.C. 254d).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the design of the migrant health care delivery system and discussed alternatives in response to congressional concern about the appropriateness of combining migrant funds with funds for the medically underserved under the Community Health Center (CHC) program to operate integrated centers. Because of these concerns, GAO examined the reasons for the integrated operations and the impact of combined funding. The three alternatives for combining programs included: (1) eliminating seasonal farmworkers from the migrant health program and incorporating them into the CHC program; (2) discontinuing the use of migrant health program funds at consolidated centers, serving all eligible users of CHCs with CHC funds, and using migrant health program funds in those areas without CHCs or for special access-to-care problems which migrants face, such as access to in-hospital care; and (3) consolidating the migrant health program and the CHC program. All of these options have the advantage of eliminating unnecessary program distinctions among migrants, seasonal farmworkers, and the medically underserved with similar health needs.

**Program:** Intramural Research
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301, 442-444; 58 Stat. 691; 42 U.S.C. 241, 289e, 289g).
**Availability:** NTIS (PB 80-210 586)
**Geographic Relevance:** National

*Abstract:* The purpose of this evaluation was to test the ability of two related bibliometric methodologies (citation historiographs and co-citation clusters) to detect transitions between basic and clinical (applied) biomedical research. Data on three areas of research were collected and analyzed: Lesch-Nyhan syndrome, Tay-Sachs disease, and the effects of the drug methotrexate. In the first two cases, a transition from basic research on enzymes to clinical research on human disease was anticipated, and, in the third case, clinical research on a drug was expected to lead to work in basic cell biology. In each of the cases, the citation historiograph methodology was able to detect the anticipated transitions, though the magnitude of the transition was shown to vary from case to case. Co-citation cluster methodology was capable of indicating the basic or clinical orientation of these research areas, but the sought-for transition points could not be observed due to the limited time series of cluster data available to this study. Hypotheses on the time lags and frequencies of transitions from basic to clinical research were tested using citation historiograph data for the three cases.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, IV, § 301, 442-444; 58 Stat. 691; 42 U.S.C. 241, 289).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* It is a common tenet that individuals holding both M.D. and Ph.D. degrees have a breadth of perspective and range of skills that prepare them specially to be creative biomedical scientists, both basic and clinical. The Medical Scientist Training Program was designed to provide highly qualified trainees with a rigorous education in basic science combined with broad training in clinical medicine. Since its beginning in 1963, the program has maintained rigorous standards and has grown slowly. Increasing numbers of fellows are graduating each year. A total of 354 fellows had completed the program as of 1979. Of this group, 88 are now 5 years beyond award of the dual degree and presumably have entered the scientific community as independent researchers. Determination is being made of the number of program graduates who are doing research and their places of employment. Plans to investigate their publications and research grant support will follow. The outcome of this evaluation should provide information that can be used to determine: whether the objectives of the program have been met; and whether the program should continue and desired expansion and funding levels.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Minority Access to Research Careers (MARC) Faculty Fellowship Program provides opportunities for advanced research training for selected faculty members of 4-year colleges, universities, and health professional schools in which student enrollments are drawn substantially from ethnic minority groups. The program was begun in 1972 and has since supported 98 individuals, most for periods of 2-3 years. After completion of the doctoral degree or postdoctoral study, it is the intent of this program that the fellows return to the nominating school. The purpose of this study is to evaluate the success of the program in terms of: (1) the proportion of the fellows who return to the nominating institution; (2) evidence for the effectiveness of the research training, e.g., publications or research grant support; and (3) the impact on the minority institutions. Data were obtained by contacting the institutions directly, and searching current lists of National Institutes of Health and National Science Foundation grants.

Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, IV, § 301, 442-444; 58 Stat. 691; 76 Stat. 1072-1073; 42 U.S.C. 241, 289).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project evaluates the productivity of recipients of Research Career (K06) Awards which were made in 1961-1964 by tracing the grant support and bibliometric history of awardees. By studying the research grant history of the recipients, it is hoped to establish the ability of the recipients to obtain research support after receiving the K06 award. A bibliometric data search will be made and a list of publications of each recipient will document the contributions made by these individuals to the scientific literature in their field. The impact of citations can be evaluated in terms of the journal in which the manuscript was published. A Medline search from 1964 to date will also be made. Similar information will be obtained from control peer populations. The comparison of the impact of the individuals in the control and experimental groups on their fields of biomedical research will indicate the value of this program to the recipients and to the research community. This evaluation, when completed, will be published and circulated within the National Institutes of Health.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The main goal of this project is to evaluate the progress made in the National Heart, Lung, and Blood Institute Pediatric Pulmonary Disease Program, since enactment of the Heart, Blood Vessel, Lung, and Blood Act of 1972. The Institute Program in Pediatric Pulmonary Diseases seeks to prevent, if possible, and improve the prognosis for patients with cystic fibrosis, brochiotitis, and respiratory distress syndrome. The main questions to be addressed under this project are as follows: (1) What progress has been made in pediatric pulmonary disease in meeting the goals outlined at the inception of the National Plan? and (2) What directions or goals seem appropriate for future development? During the project, a steering committee will made extensive use of the judgmental assessments of scientists from the areas of interest. Progress in the research areas will be assessed by experts formed into small working groups. Each working group will examine a particular area of pediatric pulmonary disease research. The working groups in concert with the steering committee and other consultants, as required, will use the results of this analysis to formulate potential directions for future development.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* A major change in blood banking procedures took place during the summer of 1978, a change due to research on the extension of the storage-period for red blood cells. This project will evaluate the results of that change. At the present time, the amount of blood which becomes outdated varies in different institutions from as little as 5% fo as much as 50%. As a result of extensive research over the past 15 years, it has been found that the addition of adenine to blood cells for transfusion will permit the extension of the storage period from 21 to 35 days. Limited studies with computer models have suggested that this extension of the outdating period will result in more efficient use of blood, especially by hospitals with low volume of transfusion. The overall project goal is to obtain a measure of the efficiency with which red blood cells are provided for medical use before and after the availability of adenine. In order to do this, the following goals will be sought: To identify specific parameters of efficiency in the collection, distribution, and use of red blood cells, and to analyze these parameters so as to derive a quantitative or semiquantitative assessment of the pre- and post-adenine efficiency of the blood establishment.

*Abstract:* Health Hazard Appraisal (HHA) may be a useful technique and basis for preventive programs. This project will identify and describe types of HHA programs used in industry and the extent to which HHA has an impact on cardiovascular risk reduction. It will describe the industry approaches to document changes in work loss days, insurance premiums, and morbidity and mortality rates relating to HHA efforts as well as the cost of administering HHA programs. The information to meet the above objectives will be obtained by survey.

*Abstract:* The Hypertension Statewide Coordination program was initiated to demonstrate whether coordination of the State activities related to hypertension detection and control can cause major changes in hypertension status as well as in morbidity and mortality of those diseases linked to elevated blood pressure. Since 1978 four States (Connecticut, Maryland, South Carolina, and California) have received funding from the National Heart, Lung, and Blood Institute as part of this program, and it is expected that three other States will soon join the program. This project will perform an interim evaluation of the progress to date and will develop a final evaluation plan for the 5-year effort. In addition, the project will plan and coordinate the State evaluation activities in the program. It is important that an evaluation plan be developed at an early stage of the program so that data on blood pressure status as well as program processes will be available for final evaluation.

*Abstract:* This project sponsored a working conference (December 1978) on coronary prone behavior (CPB). It is anticipated that the output of this conference will be: (1) a clearly delineated position on each aspect of the CPB problem in terms of the value of the research done to date; (2) the legitimacy and validity of the conclusions based upon this research; (3) a critical and objective review of the statistical procedures and design employed in the studies; (4) an intensive analysis of the theoretical underpinnings of the CPB concepts from physiologic, cardiologic, psychologic, sociologic, anthropologic, and epidemiologic standpoints; (5) an understanding as to whether intervention studies are yet justifiable on the basis of existing research findings; and (6) a synthesis of the data combined with recommendations for future activities in this area. The final report from the conference is in preparation.

*Abstract:* This project will evaluate patient and staff compliance in two long-term clinical trials of medications to prevent recurrent heart attacks–the Aspirin Myocardial Infarction Study (AMIS) and Beta Blocker Heart Attack Trial (BHAT). The evaluation will focus on two facets of compliance: the extent to which patients are taking their medication as prescribed and the extent to which clinic staff are adhering to protocol in encouraging and measuring patient compliance. The purpose of the project is to develop methods for determining the adequacy of the various measures of compliance used in the two trials (blood and urine tests, pill counts, patient representations, and staff assessments) and to apply these methods in evaluating compliance data routinely collected in the trials. Knowledge gained from the evaluation will be used to improve the management of the BHAT trial, the analysis of data from both trials, and the design of future studies.

*Abstract:* This project will address the important question of the effectiveness of the Specialized Centers of Research (SCOR) program mechanism. This mechanism, now under extensive use by the National Heart, Lung, and Blood Institute (NHLBI) was designed to provide an interdisciplinary research to address research problems of national significance within the NHLBI purview. In order to efficiently allocate the Institute's limited resources, an assessment is needed of the extent to which the mechanism is effective in expediting the development and application of new knowledge in these research areas. As a step toward this assessment, the project will develop, and apply on a pilot basis, a methodology for the evaluation of the SCOR mechanism. The project will test the utility and feasibility of a full-scale evaluation and will reach preliminary conclusions about the program. In so doing, it will be of significant importance to the Institute's future programing and its response to research needs.

**Availability:** Agency; EDC
**Geographic Relevance:** National

*Abstract:* This project sought full support and won partial support of a National Heart, Lung, and Blood Institute (NHLBI) workshop to evaluate the possible causal factors involved in the decline of coronary heart disease. This workshop is the first effort in an Institute program to identify possible causal factors involved in the decline of coronary heart disease mortality. Evaluating the reasons behind the decline will enable the Institute to plan its programs to continue or accelerate the reduction in mortality. The workshop provides the basis for a detailed Institute evaluation of the reasons behind the decline and its relation to NHLBI programs. The workshop took place during early Fiscal Year 1979 under Institute auspices. A new project related to this effort to extend the analysis of mortality trends is discussed.

*Abstract:* A weak link in the chain of hypertensive control is the failure of patients to follow through on the health provider's recommendations for treatment. Recognizing this problem, the National Heart, Lung, and Blood Institute (NHLBI) sponsored a grant program to develop a better understanding of and improved methods for achieving compliance. This project, utilizing a committee of expert scientists, is evaluating the results of the grants supported under the program and integrating these findings with other recent work on compliance. Recommendations will be made as to areas requiring increased research support and stimulation by the Institute. In addition, the project will develop recommendations for the National Health Blood Pressure Education Program on actions to improve patient compliance.

*Abstract:* Various health education and promotion efforts of the National High Blood Pressure Education Program (NHBPEP) are aimed at health professionals, patients, and the general public; the preponderance of effort has been devoted toward health professionals. Most attention regarding the variables that influence the attitudes and practice of health professionals has focused on profession-related influences (peer attitudes, professional journals, etc.). However, professionals are also continuously exposed to general mass media in quantities that probably far exceed so-called professional sources. The purpose of this project is to assess the impact of NHBPEP popular media messages on health professionals. Through the use of an interview survey, the project will address whether health professionals are influenced or reinforced by information in the mass media related to hypertension detection and control, as indicated by their recall of public service announcements, newspaper articles, and similar materials. The results of the project will better enable the National Heart, Lung, and Blood Institute to assess the relative value of the investment in this communicative channel and to achieve the most effect from the activities supported.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* National programs for the prevention and treatment of cardiovascular disease include efforts to change food habits; as these efforts increase, the need for nutrition personnel trained in this speciality will increase. To address this need, the National Heart, Lung, and Blood Institute is sponsoring an experimental series of regional workshops aimed at improving and maintaining the nutrition knowledge and counseling skills of hyperlipidemia practicing nutritionists. The purpose of this project is to evaluate these workshops in order to determine whether they are effective and whether they can be effectively applied on a national basis without Institute assistance.

The project will examine impacts on enrollees, the management of the workshops, and the cost. The project will assist the Institute in its resource allocation decisionmaking and in assessing the strengths and weaknesses of the workshops. In addition, if the knowledge and skills of enrollees increase as expected, the demand for these programs and for similar continuing education programs from other support sources should increase as should referral to nutrition counselors.

**Geographic Relevance:** National

*Program Objectives:* Erythropoietin is a hormone that stimulates red cell production and is important to the National Heart, Lung, and Blood Institute's blood diseases program. The objective of this project is to evaluate the Division's erythropoietin program with regard to procurement of urine, purification of the hormone, and distribution to the scientific community. *Abstract:* The procurement and distribution program began in 1960 at the recommendation of the Hematology Study Section. It was expanded in 1976 at the recommendation of the Division of Blood Diseases and Resources Advisory Committee, when a Request for Proposal for procurement and a Request for Announcement for development of purification methods were issued. The existing system will now be reevaluated in light of current and future needs and the outcome of the Institute-initiated program. A working group of expert consultants will examine existing program records and evaluate the current status of research. Surveys or site visits of current grantees, contractors, and recipients may also be necessary. The results will be used to set short and longterm goals for the erythropoietin program and to develop strategies for achieving these goals. While the immediate benefits of the study will be to the Division and program manager, the long-term benefits will be to the scientific community and to patients afflicted with a number of red cell disorders.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The National High Blood Pressure Education Program (NHBPEP) utilizes a variety of mechanisms to increase public and professional awareness of the dangers of hypertension and ways of treating the problem. The electronic media are used extensively in the program. A key factor in the effectiveness of this approach is the extent to which the messages are aired. In order to evaluate this factor nationwide, this project will monitor on a periodic basis the airing of messages across the country. Data will be obtained from a commercial monitoring service. The primary application of the results will be to guide NHBPEP planning and resource allocation for its television public service messages. The market-by-market analysis of monitoring data will be used to assess message placement strategies and to identify those markets in which the program needs to intensify efforts to place messages with stations. If the messages are not being used or are used during nonprime time, the program will be able to respond, for example, by changes in message style, or by direct discussions with program managers. In addition, audience reached and frequency of exposure to high blood pressure messages will be analyzed in relation to other program evaluation activities, especially Health Message Testing Service results and current data from surveys on high blood pressure awareness and behavior.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* In order for a clinical trial to be undertaken, a balance must be met between the uncertainty of the effects of the regimens under test, the potential impact of the clinical trial on health practice and on research, and the scientific information available to buttress the trial. To assess the state of information concerning a therapy's efficacy, it usually is necessary to aggregate the information from several small clinical trials. This project will test a methodology for evaluating the results of previous trials by combining these results patient-by-patient using multivariate techniques. Several small clinical trials on low dose heparin, a promising therapy for preventing pulmonary embolism and deep vein thrombosis stemming from major surgery, will serve as a test for the methodology. The project will be of significance to the National Heart, Lung, and Blood Institute in its knowledge validation program as well as to the National Institutes of Health in its consensus conferences. If the methodology proves successful, it will be useful in analyzing the results of trials and comparing them with other trials and in developing the knowledge base for determining the need for a clinical trial. It could also be used prior to the analysis of clinical trial results by the consensus groups.

*Abstract:* The National Cancer Institute (NCI) has awarded grants to support cancer education programs in schools of medicine and dentistry for the purpose of increasing the knowledge, skills, and attitudes of undergraduate students toward cancer so that they may more effectively deal with cancer patients. It has been assumed that cancer education at this level is particulary effective. This study is designed to test this assumption and to explore alternative methodologies relative to cancer with the ultimate goal of finding the most efficient mechanisms for assuring professional competence in dealing with malignant diseases. The study will examine ongoing and recent cancer educational backgrounds of a representative sample of practicing oncologists. It will also include, but not be limited to, a review of cancer education programs in medical and dental schools, teaching hospitals, official and voluntary agencies, and professional organizations. Data from a survey of cancer education programs conducted by the American Association of Cancer Education will be analyzed. This will be supplemented by literature review surveys, interviews, and workshops where specific additional information is neeeded to develop a comprehensive data base from which assumptions may be tested.

*Abstract:* The purpose of this evaluation is to assess progress made by the program toward achieving stated objectives and to make recommendations to strengthen the program. Specific tasks will involve the evaluation of the portfolio of projects in three major areas: congenital craniofacial anomalies, malocclusion, and acquired oral-facial disfigurement. The program will attempt to determine the degree to which the setting of objectives has been appropriate and balance and progress have been achieved. Gaps in objectives and research activity will be identified, as will areas warranting increased or decreased programatic initiative and resource allocation. Panels of scientific experts will assess projects and will attempt to offer constructive suggestions for modification of program content. Parallel methodologies have been employed in previous evaluations of Periodontal Research Activities and the National Caries Program. The panel chairman has been selected and oriented. The Request for Proposal is currently in procurement channels awaiting advertisement and potential funding during Fiscal Year 1980.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project evaluated the National Institute of Child Health and Human Development's (NICHD's) use of the research contract mechanism. Specifically, the evaluation includes an examination of scientific content, scope, and strategy of Institute-wide contracting. The NICHD is one of the major sources of contract research support at the National Institutes of Health. Faced with an increasing percentage on NICHD research funds being expended by the contract mechanism and greater competition for research support moneys, it is important that the NICHD evaluate its performance in supporting contract research. The study was conducted under the direction of an ad hoc group of eight scientific experts headed by Dr. Theodore Cooper. The other seven consultants are Dr. Robert Alway, Dr. Ralph Dorfman, Dr. Louis Hellman, Dr. James Gallagher, Dr. Ann Miller, Dr. Sheldon Segal, and Dr. Mildred Stahlman. The consultants held interviews with staff heads of contracting program units, the NICHD chief contracting officer, Executive Officer, and Director. They individually performed study assignments and reported to the group. The final report and the project were completed before the end of January 1980. The general conclusion of the study is that the NICHD contracts program is sound and requires only some modification to enhance current management. The final report made four principal recommendations to improve the performance of the NICHD research contract program.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* An analysis will be conducted of the Federal Government's activities in ionizing radiation research with emphasis on human health and related biological aspects of that research. The major emphasis of the review is to evaluate whether the research is adequate to meet the needs for knowledge about the effects of ionizing radiation and whether the management and review techniques are satisfactory to ensure that high quality research will be conducted. Each agency will provide a statement of its statutory authorities, an inventory of the research projects, and a list of research goals and objectives. The committee of expert consultants, provided through the National Academy of Sciences, will review the listings, contact a sample of the principal investigators, and prepare a review of individual projects from reports submitted. In some cases, site visits will be conducted. The committee will prepare a report that will analyze and evaluate Federal research effort in the field of biological and human effects of exposure to ionizing radiation. From this report the committee will identify research areas that need further development or are not being addressed. The project originated through Public Law 95-622, November 9, 1978, and is amplified by statements in the Congressional Record, October 14, 1978, pages H13471, and H13573.

**Geographic Relevance:** National

*Abstract:* This evaluation will assess the impact and effectiveness of the National Institute on Aging's (NIA's) program of production, characterization, and distribution of biologics (such as human cell lines, laboratory invertebrates, and plants) for grant-supported and related research. It represents the first segment of a comprehensive evaluation of the NIA program on basic aging and the biological properties and mechanisms of aging. NIA's program in Genetics and Cellular Resources was established 5 years ago in order to stimulate research in the cellular and molecular mechanisms of senescence. The program's repository of approximately 200 cell lines represents the major source of cellular models used in aging research. With the new and growing demands for cellular resources catalyzed by NIA, both technical and logistical questions have arisen regarding the policies and operations of the program. The evaluation will utilize an advisory panel, with National Advisory Council on Aging representation, which will be divided into sub-panels. These sub-groups will meet to address questions relating to genetics and cellular resources in aging, review the state of the science, identify gaps in research support, and analyze the managerial and policy aspects of the program. A summary report of the evaluation will be published as a program statement of NIA.

**OMB Funding Code/Title:** 75-0843-0-1-552 / National Institute on Aging
**Program:** Program Management
**CFDA NO.:** 13.866
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, IV, § 301, 461-464; 58 Stat. 691; 42 U.S.C. 241, 289).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The National Institute on Aging (NIA) Research Management Information System will meet NIA needs for planning, evaluation, resource allocation, and program accountability. The system will be designed to interrelate data on scientific content, demography and epidemiology of the aged, project management, budget, and resource development as they relate to NIA programs. It will also incorporate data on selected aspects of the aging research programs of agencies working cooperatively with NIA and on the aging research community. Data from CRISP, IMPAC, population data bases, and aging research programs will be included in the system. The first step in developing this system, clarification of system objectives, has been completed by NIA staff. An outside consultant will assist NIA staff in the synthesis of a classification framework for aging research; the development of data bases and programs for the system; the identification of data sources and clients; the development of procedures for collection, storage, retrieval, and dissemination of system information; and a cost estimate of operating various components of the system. Information from this system will be published as research grant abstracts as well as through other mechanisms such as the NIA Annual Report and Research Advances formats shared by all Institutes. The data sets evaluation will be published as an NIA document and form the basis for articles in the general literature.

**Geographic Relevance:** National

*Abstract:* The American Society for Microbiology (ASM), using its membership, will compile and analyze questionnaire data in an effort to determine the size of the universe of scientists concerned with activities relevant to the National Institute of Allergy and Infectious Diseases (NIAID) mission. Information to be obtained includes: (1) source of training support; (2) the mobility in and out of a subgroup; (3) evidence for changes in demand; (4) the effective rate of attrition; and (5) an estimate of the number of trainees and type of subspecialty training needed to meet the net effect.

**Geographic Relevance:** National

*Abstract:* This project is designed to note changes in the national patterns of the prescription of amantadine for the prophylaxis and treatment of influenza A infections over a 5-year period spanning the Consensus Development Conference on Amantadine. It is proposed to use the National Drug and Therapeutic Index data of the numbers of prescriptions private physicians write each quarter for the prophylaxis and treatment of influenza A infections. Such data will be employed to relate temporally the prescription patterns for amantadine to the Conference which promulgated specific recommendations for use of the drug.

**Geographic Relevance:** National

*Abstract:* This evaluation will be a comprehensive assessment of the effectiveness of the National Institute on Aging's (NIA's) program for providing aged animals for support of research on aging and of the relative efficiency of various alternatives for meeting the need for aging animal models. The aged animal program administered by NIA is the principal commercial source of aged animals for research in the United States. Phase I of the evaluation of retrospective assessment of the current NIA Animal Models Program will commence with the gathering of a panel of outside experts to determine the necessary data for the evaluation. Subsequently, several sub-panels will assemble to review and analyze various program activities, including the basis for selecting species and strains of animals, the validity of characterization data, the adequacy of the resource base and projected increases, the overall impact of the program on the development of aging research, the efficiency of resource utilization, procedures and policies for distributing and utilizing aged animal resources, and the relative merits of commercial and institutionally funded resources in support of aging research. Phase II, an assessment of future animal resource needs of NIA, will utilize an advisory panel in order to determine the supplemental animal resources that must be developed to meet projected needs for animals singular to NIA research. The final report of this study will be circulated to both Government and non-Government personnel involved in animal model development.

*Abstract:* The National Cancer Institute is interested in learning the extent that estrogen receptor (ER) assays are being performed on human breast cancer tissues, primary and metastatic, and the extent that ER assay results influence the clinical management of patients with breast cancer. In research settings, the ER determinations have been shown to be useful in predicting response to endocrine therapy. There are data which suggest that Stage II cancers of the breast that lack ER recur much earlier than those which are positive for ER, independent of the size of the tumor or the degree of nodal involvement. This study will evaluate the application of these research gains in current clinical practice. The information will prove useful in planning special educational and other programs concerned with these advances in clinical oncology.

*Abstract:* The National Library of Medicine (NLM) has a large scale computer which is used to provide on-line access for the medical community to the bibliographies of medical literature. This project is evaluating the performance of the system in relation to its increasing workload. Decisions regarding restrictions to be placed upon projected growth and/or requirements for additional equipment will be based upon results of the evaluation. Performance statistics of the system will be collected over time and trends determined. Computer performance measurement is a critical part on NLM's ongoing program performance evaluation activities.

*Abstract:* The Program Planning Work Group was established to convert the wide-ranging report ("Human Health and the Environment-Some Research Needs") of the Second Task Force on Research Planning in Environmental Health Sciences to a set of program plans to guide the development of the National Institute of Environmental Health Services (NIEHS) research programs. Two of the Work Group's subgroups have reviewed the recommendations of the task force in order to identify and prioritize those that are NIEHS' responsibility. The third subgroup has reviewed the NIEHS training programs in environmental toxicology, environmental epidemiology and biostatistics, environmental mutagenesis, and veterinary pathology. It has identified disciplines within environmental health sciences where increased training of scientists is essential to provide the manpower needed for research to meet the program goals established by the research program review subgroups.

**Geographic Relevance:** National

*Abstract:* The purpose of this study is to evaluate the impact of the existing National Institute of Environmental Health Services (NIEHS) training program and policies in environmental toxicology and to develop baseline data against which to evaluate the effectiveness of the Institute's training mechanisms, whether extant, new, or improved. From the data obtained, NIEHS wants to acquire a complete analysis of the current environmental toxicologist supply/demand situation and projections of future needs. It wants to determine if its training program is developing appropriately trained personnel; what features of its program are most effective in meeting employer needs; how requirements of industry, academia, and government differ; the impact of the NIEHS program institutional training; the reliance of these institutions on other sources of funding; and the capacities for training program expansion. To obtain the data, NIEHS plans a comprehensive survey of all institutions with environmental toxicology training programs and of employers of environmental toxicologists in academia, industry, and government. A sample of past graduates of training institutions will also be queried, and other sources of supporting information, such as organizations and professional societies, will be contacted. For the survey, environmental toxicology is defined as the study of the hazardous properties of environmental chemical and physical agents with application of the results of problems related to human health. The final agency report will be widely distributed.

**Program:** Prediction, Detection, and Assessment of Environmentally Caused Diseases and Disorders
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241, 242a).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Office of the Secretary, Department of Health and Human Services, specifically requested that the National Institute of Environmental Health Sciences (NIEHS) conduct a study to quantitatively determine paraquat and its combustible byproducts obtained in smoking machines within the context of a comprehensive study of the dynamics of marijuana smoking. Information from this contract provided the Secretary with the necessary exposure data from the smoking of paraquat-contaminated marijuana to assist in evaluating any potential health hazards of smoking paraquat-contaminated marijuana in the United States, as required by law. Based upon the results of this evaluation project (which was designed to validate the National Institute of Drug Abuse's initial efforts in this area based on their previous contract with the Research Triangle Institute), as well as on other studies mandated by the Secretary, the Secretary decided that marijuana sprayed with paraquat is likely to cause serious harm to the health of persons who may consume it. Using non-setaside funds, NIEHS plans to extend this project to answer some remaining questions and to permit preparation of the final report.

*Abstract:* The National Academy of Sciences' National Research Council, since 1969, has provided evaluation and advisory services to the Toxicology Information Program (TIP) through its Toxicology Information Program Committee (TIPCOM). TIP is a major component of the National Library of Medicine's specialized information services. TIPCOM reviews and evaluates guidelines to be used in the identification and collection of toxicological information and the creation and management of services intended to disseminate this information among Federal agencies and the biomedical community. TIPCOM evaluates the performance of the TIP in providing information services and recommends improvements in program performance. A program performance summary will be available in December 1980.

*Abstract:* The Medical Library Resource Project Grant Program was one of the National Library of Medicine (NLM) Extramural Programs (EPs) authorized by the Medical Library Assistance Act. From 1971 to 1978 approximately 14.5 million dollars have been expended in almost 900 awards to health science libraries for the purpose of improving information service activities. The evaluation will determine program impact, identify areas of program modifications, if needed, and recommend future activity in terms of present needs. Results will assure continued development of health information services and systems in the most efficient and effective manner possible. The results of some EP projects currently underway or beginning will relate to the Project Grant evaluation; the evaluation of the Regional Medical Library Program; and the communication of results from NLM-supported library research and development activities. Two years ago a similar evaluation was completed for the Medical Library Resource Improvement Grant Program. Results were reported, and the program was modified to be more responsive to current needs.

**Geographic Relevance:** National

*Abstract:* The Board of Regents of the National Library of Medicine (NLM) requested a review of the research and development programs of the Lister Hill National Center (LHC) for Biomedical Communications. On October 10-12, 1979, the major segments of the Center's activities underwent review by an ad hoc external group of experts. The reviews were structured in a way that program objectives, technology assessments, proposed and alternative solutions, program contributions to library communications and information transfer, and likelihood of program success were described for each of the four research and development activities. Resource requirements for each were forecast by LHC staff. The results were for the most part confirmation of the soundness of the research underway and proposed, with some recommendations for modifying the research objectives and methodologies. The impact on the specific programs reviewed was to ensure that they would be pursued with the full knowledge of similar and related activities in other research environments. One impact on the research community will be to ensure that the research activities to the LHC make a unique contribution to the body of knowledge in the respective program areas by not duplicating activities that are underway elsewhere. The findings of the group have been carefully reviewed by the NLM Board of Regents and NLM senior staff as well as the LHT and will be used heavily in future LHC planning. A program performance summary will be available by late 1980. This is part of an ongoing evaluative activity to be performed by the LHC Board of Scientific Counselors, staff, and consultants, as appropriate.

**Geographic Relevance:** National

*Abstract:* In May 1979, the Director of the National Library of Medicine (NLM) appointed a MEDLARS III Task Force to develop, by September 1980, functional specifications for future automation at NLM. The new system is intended to extend and enhance MEDLARS II capabilities. MEDLARS II is the present computer system that provides NLM's automated publications, technical processing, and online bibliographic retrieval operations. This activity will provide NLM Library Operations with a significant program performance evaluation as the development of the new system requires extensive analysis of current operations and a delineation of alternatives for the future. The development of MEDLARS III is being carefully reviewed by staff, the Library community, and outside experts. These reviews will lead to further refinement of the plans for MEDLARS III development. One of these reviews which was conducted by consultants in February 1980 addresses the problem of the reasonableness of the concept and the soundness of the proposed approach to the development of MEDLARS III. The results of the expert consultant review were confirmation of the basic soundness of the concept and proposed systems approach and the identification of some potential problem areas which were recommended to be further examined. The impact of the recommendations will be to ensure that broadly based expert experience has been reflected in the further detailed development of MEDLARS III.

*Program Objectives:* The mission of the National Medical Audiovisual Center (NMAC) is to improve health professional education through expanding the use of audiovisual instructional technology. Research and development of new methods to apply instructional technology include the collaborative design and production of experimental instructional media combined with programs to provide technical users within the health science community. *Abstract:* NMAC program reviews to be undertaken with National Library of

Medicine (NLM) executive staff, peers within the NLM in related research programs, other government agencies and selected consultants focus on the selection of areas of research and service, or priorities for project development, on the efficiency and effectiveness of individual activities, and the successful synchronization within NMAC programs and with parallel NLM efforts in related disciplines and technologies. Current program reviews are concentrating on developing criteria for evaluating program development utilizing the importance of NMAC's recent relocation and joining of the other programs of the NLM in the Bethesda, Maryland facilities. The reviews will improve targeting of priority objectives for NMAC programs and will tighten management processes.

*Abstract:* Contradictory results and varying interpretations of research data have been cited as evidence that marijuana is extremely dangerous or essentially innocuous. Despite annual reports on marijuana and health by the National Institute on Drug Abuse, scientific controversy and public confusions persists. Consequently, there is a need for overall reassessment of available data on health hazards and risks to various types of marijuana users. The Institute of Medicine assessment will include review and analysis of existing scientific evidence of possible hazards of marijuana use to health and safety, as well as possible therapeutic use of marijuana, and the Federal research program underlying these efforts. The study will also delineate important directions for further investigations for Federal research support.

*Abstract:* Institutions of higher education vary widely along many dimensions. It is therefore essential that information about such variation be available (and used) in any study of Federal programs or policies in which they figure. This project will produce assessments of the quality of the doctoral education programs in U.S. institutions of higher education. Significant features of the study that are expected to enhance its value include: (1) plans to obtain larger numbers of subjective judgments than have been obtained in previous studies of this type; (2) plans to go beyond departmental boundaries in assessing the quality of an institution's effort in a specific discipline; and (3) plans to include objective information in the assessment process.

**Geographic Relevance:** National

*Abstract:* The report, Nontenure Track Science Personnel: Opportunities for Independent Research was published by the American Council on Education. The data confirm the existence of a substantial population of doctoral-level scientists who occupy nontenure track positions at advanced degree-granting institutions. These data suggest that, for reasons of policy, tradition, or low expections, these scientists are only marginally engaged as principal investigators. These findings should be of particular interest to manpower planners and others concerned with optimal utilization of the nation's research manpower resources in health-related fields.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, IV, § 301, 431-443; 58 Stat. 691; 42 U.S.C. 241, 289).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project will evaluate the effectiveness and potential effectiveness of the MEDLARS related program activities for servicing the information needs of the specialists in communicative disorders. The study will determine whether the new approach being used by the Communicative Disorders Program (CDP) to serve the information needs of both clinicians and investigators is satisfactory. The study will require three stages of data compilation. During the first stage, the users will be surveyed regarding their professional characteristics and information needs. During phase II, data will be compiled from each of the On-Line Centers included in the study on the daily/weekly use of the system and of the service model, inquiries about the services and cost of searches, etc. During phase III, data will be gathered on users' experience with the MEDLARS during the evaluation period and their level of satisfaction with the service. Upon completion of the study, a report will be published to communicate to others in the field of information sciences on the feasibility of the service model developed by CDP. Five reports will be produced for this project.

*Abstract:* The Pulmonary Academic Award Program is designed to improve the basic pulmonary curriculum in a medical school through curricula change and faculty educational development. Fourteen medical schools that received Pulmonary Academic Awards will be evaluated in the following terms: improvement in respiratory disease curricula for medical students, increase in number of students who demonstrate an interest in respiratory diseases, increase in number of students who choose academic careers in pulmonary medicine, improvement in caliber of pulmonary faculty; and increase in commitment of the grantee institution to sustaining an effective pulmonary program. The selection of a contractor is currently in progress.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Dietary intervention is the recommended initial treatment for hyperlipoproteinemia. In many cases, diet alone is sufficient to return lipids to normal levels. Even if drug therapy is necessary, diet should be continued since the effects of diet and drug are additive. In 1971 the National Heart, Lung, and Blood Institute (NHLBI) developed the booklets for Dietary Management of Hyperlipoproteinemia. This effort was undertaken to satisfy a need for practical and effective dietary guidelines that were specific for each of the five types of hyperlipoproteinemia. About 7 million of these booklets have now been distributed to physicians and dietitians meeting the largest demand for an NHLBI publication on record. The booklets have been duplicated in many local and regional hospital diet manuals and have been transcribed into several languages. The NHLBI is initiating this evaluation project to determine the population being reached by this publication, whether the booklets sufficiently meet the needs of professionals and patients, and what revisions are needed to improve the booklets.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The National Institutes of Health (NIH) has recently assumed an expanded role in translating the output of biomedical research into knowledge, products, and techniques which can be effectively employed in the practice of medicine and public health, i.e., medical technology transfer. Specifically, within the last two years, NIH has initiated a consensus development program, consisting of a series of activities to identify the extent of agreement and disagreement among relevant experts concerning various new and existing medical technologies and their role in health care–whether they are scientifically sound, safe, effective, and suitable for introduction or use in practice. The primary objective of this study is to identify and evaluate alternative group decision processes applicable to consensus building and develop recommended alternative models for various types of NIH consensus development activities. These models would serve as the basis for guidelines and designs for future consensus exercises. A second objective is to develop guidelines for a built-in evaluation mechanism to assess future consensus processes.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of the project is to develop the general capability to search existing data bases for information on research and training awards, research publications indexed by MEDLINE, and relate these to program management data and information; to develop a strategy for computer-assisted test runs made to date to show that MEDLINE-indexed publications can be selected by computer using MEDLINE indexing terms; and that the names of the authors of the selected records (most publications have more than one author) can be matched to the names of principal investigators of the IMPAC filed. The result is a file of authors of research publications matched to principal investigators with the same name. The reverse process in which a list of program component award numbers is developed by program staff and used to select a file of IMPAC records to match MEDLINE records is also feasible. The results must next be examined by specifically knowledgeable program staff to minimize false matches.

*Abstract:* One of several steps in the dissemination of the results of the recently completed National Heart, Lung, and Blood Institute (NHLBI) clinical trial, the Hypertension Detection and Followup Program (HDFP), is a demonstration of a hypertension control program in a community health center setting. This evaluation project is the first phase of a three-phase project to evaluate the demonstration program. The project will involve the design of a format for the conduct of the demonstration, the design of an evaluation methodology, the selection of sites, and the collection of necessary baseline data. The implementation and evaluation of the demonstration will be performed in subsequent phases over a five-year period. The results of the evaluation are expected to identify how much of the clinical trial protocol can be implemented in an existing health care system and whether the approach is economically feasible.

**Geographic Relevance:** National

*Abstract:* This project will assist in efforts to evaluate the impacts of the Hypertension Detection and Followup Program (HDFP), a recently concluded clinical trial. Several tasks will be conducted under the project including: (1) synthesis of data from various existing sources–National Center for Health Statistics (NCHS), National Heart, Lung, and Blood Institute (NHLBI) Surveys, Food and Drug Administration surveys, and private sources–to form a baseline of information from which to measure changes in practice, knowledge (professional and lay), and social impact (cost, insurance coverage, treatment settings, etc.); (2) expansion of the existing NHLBI system of tracking the dissemination of information on the clinical trial; (3) planning for and potential implementation of a system (or survey) to gather information from various targeted audiences on audience exposure to this information; (4) planning for future data collection of the change in knowledge and practice and coordination of these efforts with other data needs of the NHLBI and other agencies; and (5) tracking of hypertension treatment policy changes in government and in the public sector related to the HDFP results.

**Program:** Direct Operations
**CFDA NO.:** 13.837
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410. title III, IV, § 301, 412-419B; 58 Stat. 691; 42 U.S.C. 241, 287).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project will evaluate the feasibility of a measurement methodology based on the just-developed National Death Index (NDI) and its use with Census Bureau data in furnishing basic mortality data for the United States. To use the NDI, the Census file containing name, birth date, sex, race, marital status, State of birth, and State and county of residence for each person in the cohort will be matched against the NDI which will have the names and other identifying information for about 2 million decendents on tape each year. The possibility of missing deaths in the matching process because of processing errors (erroneous non-matches or match failures) exists and is believed to be much more likely than the opposite situation of counting a person dead who is in fact alive (erroneous match). Therefore, a feasibility study and pretest of the NDI used in matching against a Census file is needed. The basic questions to be answered in the feasibility study are first, whether deaths are seriously underestimated and second, whether there is a significant bias due to matching on the basis of demographic information.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project is the first step in a longer range strategy for evaluating the National Heart, Lung, and Blood Institute (NHLBI) postdoctoral training programs. The longer range objective is to assess two aspects of the NHLBI postdoctoral training program–the impact of NHLBI training on the currently active researcher pool and the effect of NHLBI training on the careers of individual trainees. The immediate objectives are the selection and testing of methodologies. The study will consist of two phases. In Phase 1, Study Design, approximately four consultants will be brought to Bethesda during a 6-month period. Methodologies will be selected for measuring success of scientists (5 to 10 years after NIH postdoctoral support), for estimating the proportion of National Institutes of Health (NIH-supported scientists whose research training was not supported by NIH. In Phase 2, Field Testing, the methodologies will be applied to NHLBI postdoctoral research training programs.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Since its inception, a substantial proportion of research efforts at the National Heart, Lung, and Blood Institute (NHLBI) has been devoted to the delineation and quantification of risk factors for the development of coronary heart disease. The primary question addressed by this project is how applicable is the Framingham-derived model for predicting coronary heart disease to the U.S. population as a whole. This evaluation project will be able to capitalize upon a follow-up study being organized and conducted by the National Institute on Aging. The survey will attempt to locate and determine the health status of all 15,500 adults in the original Health and Nutrition Survey cohort conducted in 1971-74. This will provide an excellent opportunity to evaluate the utility of major predictive models (such as Framingham) of coronary heart disease in a large probability sample of the U.S. population in which serum cholesterol and other major variables were initially collected in a standardized manner.

*Abstract:* This evaluation is being conducted to assess the effectiveness of the National Institute of Arthritis, Metabolism and Digestive Diseases (NIAMDD) Musculoskeletal Diseases Program in order to provide a foundation for improving research efforts. It will also provide an assessment of the health-care impact of selected medical technologies that have been developed with program resources. The contractor will convene evaluation groups (a Steering Committee, Task Groups, and a Plenary Group) having broad public and private membership in order to utilize their diverse expertise to determine evaluation strategy, select appropriate methodologies, establish a uniform format for all reports, define evaluation goals and procedures, and generation of the final report. The resultant report is intended to provide a foundation for improving research and operational effectiveness.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* In its Fiscal Year 1972 Appropriations Report, the Senate recognized the principal role that the National Institute of General Medical Science (NIGMS) had begun to play in funding genetics research, and in that year and subsequent years, congressional committees recognized and enunciated the clear potential for the growing genetics discipline to provide the basic foundations for diagnosing and alleviating the large number of genetic disorders of man. The purpose of this project is two-fold and will be carried out in two phases. Phase I is to determine the depth and range of the genetics research activities of the National Institutes of Health (NIH) by a survey of research activities of the extramural grant portfolios and of the intramural research programs; the output of the survey is intended to provide an overview of genetics activities for use by NIH managers, extramural scientists, other Federal agencies, and the Congress. Phase II will utilize the data generated as a major component of a program performance evaluation within this context to see if the NIGMS genetics program is meeting the expectations of the Congress and with what success. It cannot be foreseen what management actions are likely to be taken on the basis of results from this study.

**Availability:** Agency; EDC
**Geographic Relevance:** National

*Abstract:* Phase I of the study included a major national meeting of the Institutional Biosafety Committee (IBC) chairmen in November 1980 as a forum for input into the study from key institutional officials. A key recommendation that resulted from that meeting was that experiments currently covered by Section III-0 of the National Institutes of Health (NIH) Guidelines be made exempt. The consensus of the group was that the risks associated with most recombinant DNA research do not justify the current procedures. At its April 1981 meeting, the Recombinant DNA Advisory Committee took formal action recommending to the Director of NIH changes in the NIH Guidelines for marked reduction in those aspects of the paperwork burden of the IBC's associated with minimal risk research projects. National Institute of Allergy and Infectious Diseases staff is currently collaborating with the Director, Division of Safety, OD/-NIH in developing a revised approach to Phase II of the study in response to concerns from several quarters that the institutions need broad assistance in safety matters (i.e., chemical carcinogenesis and etiological agents).

*Abstract:* The Behavioral Medicine Branch has sought to encourge researchers and clinicians interested in the cardiovascular system to consider biobehavioral factors and optimization of the preventative, diagnostic, therapeutic, and rehabilitative approaches to cardiovascular disease. The purpose of this project is to evaluate three major program directions: the use of cardiovascular instrumentation in behavioral investigations of cardiovascular disease; the experimental designs employed in the research; and the integration of the results from neuroscience studies of the cardiovascular system. These evaluations will be undertaken in conjunction with a concurrent non-set-aside funded effort to define the current state of the art in the biobehavioral area. Each area will be addressed by a separate group of scientists representing various disciplines who will define the current state of the science and outline progress over the past decade. A workshop will be used to facilitate the assessment.

*Abstract:* In its final report to the Congress, the National Commission on Diabetes recommended establishment of a national diabetes clearinghouse as the primary means of addressing the need for a central resource for educational materials and information in diabetes. In response to the Commission's report, the National Institute of Arthritis, Metabolism, and Digestive Diseases (NIAMDD) established the National Diabetes Information Clearinghouse within its Diabetes, Endocrine and Metabolic Disease Program in September 1978. The Clearinghouse currently serves as the central focus for the collection and the dissemination of information about diabetes materials and programs and for encouraging and coordinating the preparation of new, accurate educational materials. The Institute believes this is an appropriate time to conduct an evaluability assessment to determine if a pilot or full-scale program performance evaluation would be possible, meaningful, and useful. The contractor will prepare a report detailing the following: (1) program objectives, as perceived by management, policymakers, other key individuals, and groups; (2) program activities, which include direct interventions such as Institute staff with Clearinghouse staff, indirect interventions such as the Clearinghouse Advisory Committee, and program accountability, or activities through which the program reports performance to policymakers; and (3) program evidence–data that indicate the level and extent of program performance and productivity. Based on the results of this study, it is expected that management will either initiate an evaluation using the program description prepared by the contractor or take steps to modify the description in order to make the program more evaluable.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Clinical Center of the National Institutes of Health (NIH) has in place a computerized medical information system used to enter and track patient records, all medical orders, treatment protocols, and laboratory and ancillary orders and results. The purpose of this project is to provide information to enable Clinical Center management to make informed decisions and to provide the results of experience with the system to the hospital community. Specifically, the study must provide answers to these key questions: (1) How well does the system work? (2) How well has it facilitated medical care and the work? (3) How well has it facilitated medical care and the relationships of expenditures for the system to benefit from it? and (4) How well can the system meet the future care research needs of the Clinical Center? The study will be undertaken in two phases. In Phase I, methodologies and instruments will be designed and tested so that the evaluation protocol is appropriate to the Clinical Center environment. Phase II will be the execution of the protocol and application of the methodologies, culminating in a report of the findings and recommendation. This will be provided to the Clinical Center management and to the hospital community at large.

**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241). Cancer Act of 1971 (P.L. 92-218, title IV, § 410A; 85 Stat. 782; 42 U.S.C. 286e(b)).
**Availability:** GAO

*Program Objectives:* The National Institutes of Health (NIH) employs advisory councils to consider research proposals. *Abstract:* GAO found that while the institutes establish their own planning processes, the methods used, the criteria considered, and the groups involved are basically similar. Priority research program areas are generally being funded as planned. The institutes are using several groups, including NIH staff and contractors, to perform evaluations of their research activities. The advisory councils are actively involved in planning, funding, and evaluating research activities. GAO found that other council members believe lay members make significant contributions in many areas of council activities. Although the councils had experienced delays in replacing many of their members when their terms had expired, changes have recently been made in the appointment process which appear to have corrected this problem.

**Availability:** GAO

*Program Objectives:* Grants are made to public or nonprofit universities, hospitals, laboratories, and other institutions to complement other types of targeted research support. *Abstract:* Program objectives, as currently established, appear to be too general to permit the National Institutes of Health (NIH) to effectively measure the extent to which they are being met. GAO found that sometimes annual reports were inaccurate or not supported by backup records. Because grantees apply different definitions to terms used in the annual reports, combining the data from all the reports does not yield valid results. NIH officials recognize that the program objectives are too broad, and no plausible method exists to measure the extent to which the objectives are being met; however, efforts to make an objective assessment of the program have been limited. In order to make the 1983 planned evaluation meaningful, measurable objectives should be established and an evaluation methodology developed as soon as possible.

## SOCIAL SECURITY ADMINISTRATION

### E00510-001

*Evaluation of the Child Support Enforcement Program.* (1877).
9/82
David Mastran
**Contractor:** Maximus, Inc.; 6723 Whittier Avenue, McLean, VA 22101
**OMB Funding Code/Title:** 75-0412-0-1-609 / Assistance Payments Program
**Program:** Child Support Enforcement: State and Local Administration
**CFDA NO.:** 13.679
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Social Security Act, as amended (P.L. 74-271, title IV, § 455, as amended by; P.L. 96-178; P.L. 93-647; 42 U.S.C. 651).

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this study is to evaluate the Child Support Enforcement program which became effective August 1, 1975, under Title IV-D of the Social Security Act. Although the program is open to both Aid to Families with Dependent Children (AFDC) and non-AFDC recipients, the basic purpose of the program is to transfer the burdens of welfare from the taxpayer to the legally responsible parent. In broad terms, the evaluation will examine program results in relation to the specifications of the law and Congressional intent. More specifically, costs will be weighed against savings in the light of regulations (policy) and administrative practices (program operations). Comprehensive data analysis is needed in order to evaluate the program as it presently exists as well as to assess its future course. The evaluation of the Child Support Enforcement program will consist of two general approaches: a cost benefit analysis and an administrative practices component. Initially, the contractor shall study these areas separately, but ultimately, the relationship between costs and benefits and administrative practices shall be analyzed. Because the Child Support Enforcement program constitutes an important part of efforts to assure integrity and efficiency in the AFDC program, it has evoked Departmental and Congressional interest. This project provides a formal, objective evaluation to assess the program's cost effectiveness and is intended to respond to this interest.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* A need exists to better understand how the States define and determine incapacity under the Aid to Families with Dependent Children (AFDC) program. This study provides Federal policy staff and researchers with an overview of existing practices in determining incapacity in AFDC and analyzes effects of alternative policies. It also provides State administrators information on what has been done in other States and what can be done to improve their incapacity programs. The project examines the current state of the art in determining incapacity in AFDC and documents definitions and procedures for incapacity in the 50 States and the District of Columbia. It examines and analyzes in detail data from selected States for greater insight into AFDC incapacity practices. Data are collected from existing data sources and by means of a literature review, mail surveys, and interviews with State and local welfare administrators and staff. The data base provided by this study is expected to be useful to future assessments of AFDC reform proposals which attempt to link benefit structures to employability decisions.

**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Social Security Act, as amended (P.L. 74-271, title II, § 201, as amended by; P.L. 94-202; 70 Stat. 833; 42 U.S.C. 401).
**Availability:** GAO

*Abstract:* The efforts of Social Security Administration (SSA) to redesign its retirement, survivors, disability, and health insurance automated system was reviewed. This redesign represented a major multi-faceted automatic data processing system modification project undertaken to improve service to program beneficiaries. Although substantial effort and resources were invested in this project, it was largely unsuccessful. Only one of the five major new features expected during the redesign was fully implemented successfully, and SSA suspended further efforts to complete the project as it was originally planned. GAO believes that inadequate planning and management of the redesign and deficiencies in the SSA systems modification process were primary reasons that the agency was unable to fully complete the redesign. Further, SSA systems modification efforts in general will not meet their objectives until these weaknesses are corrected. Specifically, SSA did not: (1) adequately analyze costs and benefits of the redesign changes to ensure that their needs would be met by the modified system; (2) adequately analyze costs and benefits of the redesign; and (3) provide for consistent management of the redesign. GAO made several recommendations to the Secretary of Health and Human Services.

**Availability:** GAO
**Geographic Relevance:** County

*Program Objectives:* The Aid to Families with Dependent Children (AFDC) program, a joint Federal-State program, provides cash benefits to low-income mothers with children, and in some States to families headed by an unemployed father or to a pregnant woman.
*Abstract:* GAO analyzed over 1,000 active AFDC cases in 13 States to determine benefits actually received by those families. GAO also analyzed, through hypothetical situations, the effect that working would have on benefits received from certain groups of public assistance programs. In GAO's sample, about 80% of the cases had benefit income packages exceeding the poverty line. The cash component alone would generally not exceed poverty. Families that had earned income averaged about $2,600 per year more than their nonworking counterparts. AFDC clients were generally eligible for other welfare programs and, for the most part, participated in them. AFDC clients

generally did not take advantage of programs providing jobs, training, and higher educational opportunities, probably because most mothers in the GAO sample had very young children and were exempt by law from work requirements under current regulations or because they lacked the necessary secondary level of education required to take advantage of higher educational opportunities. GAO found that an AFDC mother, working even at a full-time minimum wage job, would improve her financial well-being. However, she would face the loss of significant welfare benefits as income is earned. These lost benefits can be construed as an additional tax on the income earned. The combined effort of employee taxes and lost benefits raises questions as to whether the client retains an adequate financial incentive to work.

**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The Supplemental Security Income program is a cash assistance program for the needy aged, blind, and disabled. It is financed through general funds and about 4.1 million recipients receive about $8 billion in cash benefits. *Abstract:* As many as 300,000 Supplemental Security Income checks totaling $40 million have been outstanding for 6 months or more. These checks are negotiable forever. About $10.4 million of these checks belong to States, which are concerned that these moneys have not been returned to them. Better followup actions by the Department of Health and Human Services are needed to (1) identify and cancel checks issued to ineligible recipients, (2) identify recipients who need check-cashing assistance, and (3) return the funds to the Social Security Administration and the States.

**Authority:** Social Security Act, as amended (P.L. 74-271, title IV, § 401, 402; 49 Stat. 627; 42 U.S.C. 601, 602).
**Availability:** GAO
**Geographic Relevance:** National; State; City

*Program Objectives:* The quality control system was established to identify and to measure incorrect payments for the purpose of giving management information for developing corrective actions to reduce errors. *Abstract:* Using the quality control system as the basis for sanctions limits the system's value as a means for improving payment processes. The Appropriations Committees should retract directives for Federal fiscal sanctions against States based on the system. System differences are recognized but the Social Security Administration does not know how this affects identifying incorrect payments; all payment errors and causes of errors are not reported and system data were not being adequately analyzed for developing corrective actions. The Department of Health and Human Services should assess regional quality control procedures to insure adequacy and consistency and establishing guidelines for reviewing State quality control cases. Other detailed recommendations were made for improving the system.

**Authority:** Social Security Act, as amended (P.L. 74-271, title II, § 201, as amended by; P.L. 94-202; 49 Stat. 622; 42 U.S.C. 401).
**Availability:** GAO

*Program Objectives:* The Disability Insurance program (DI), administered by the Social Security Administration (SSA), was established in 1954 to prevent the erosion of retirement benefits of wage earners who become disabled and are prevented from continuing payments into their social security account. The program was expanded in 1956 to authorize cash benefit payments to the disabled. *Abstract:* SSA has not adequately followed up on DI beneficiaries to verify that they remain disabled. As a result of the limited SSA followup activity and poor management of the DI process, as many as 548,000 beneficiaries who do not currently meet the SSA eligiblity criteria may be receiving disability benefits of as much as $2 billion annually. The Secretary of Health and Human Services should direct the Commissioner of Social Security to expedite efforts to reevaluate the DI rolls and to provide the necessary resources to support such efforts because of the potential savings.

**Availability:** GAO

*Program Objectives:* The program's primary purpose is to provide savings to the trust funds by returning as many disabled beneficiaries as possible to the work force, thereby terminating their Social

Security disability benefits. *Abstract:* The Social Security Administration (SSA) has neither collected all the necessary data nor established a management information system essential to assess the program's effectiveness. The eligibility of many beneficiaries who were served by the program was questionable because they were expected to medically recover at the time they were awarded disability benefits. The Secretary of Health and Human Services should require the SSA Commissioner to develop and implement a management information system for the Beneficiary Rehabilitation Program (BRP). The BRP selection criteria should be modified to clarify that trust fund moneys should not be used to finance rehabilitation services for temporarily disabled individuals.

**Authority:** Social Security Act, as amended (P.L. 74-271, title II, § 201as amended by; P.L. 95-216; 70 Stat. 833; 42 U.S.C. 401).
**Availability:** GAO

*Program Objectives:* The social security program is a social insurance program which provides benefits to retirees, survivors, and the disabled based on contributions made during the person's working lifetime. The purpose of the program is to insure a basic level of protection at the time when it may be needed most–at death, disability or old age. *Abstract:* Short-term workers have contributed a relatively small amount of social security tax because they have had little work in covered employment. However, they receive a higher return on their contribution than the average wage earner because of the benefit formula used to attain the program's social adequacy objectives. This advantage is created by spreading the worker's covered earnings over a lifetime and applying the resulting artifically low average wage to a benefit formula that is favorable for low wage earners. Stopping the short-term worker advantage could save as much as $15 billion over the next decade and end windfall social security benefits to retired government workers who also receive a pension from their noncovered employment. Because a social adequacy benefit seems inappropriate for the average or high wage earner, and in view of the concern about the financial stability of the social security program, Congress should consider revising the social security benefit formula to remove the advantage that it provides the short-term worker.

**Authority:** Social Security Act as amended (P.L. 74-271, title II, § 201; 70 Stat. 833; 42 U.S.C. 401).
**Availability:** GAO

*Program Objectives:* The social security program is a social insurance program which provides benefits to retirees, survivors, and the disabled based on contributions made during the person's working lifetime. The purpose of the program is to insure a basic level of protection at the time when it may be needed most–at death, disability, or old-age. *Abstract:* Social Security has paid more than $6 billion in lump-sum death benefits since 1940, the first year payments were made. The original concept of lump-sum death benefits was to provide a return on the social security contributions of wage earners. However, the concept has been changed to include a modest payment toward the costs associated with death. In a review of a random sample of death benefit claims, GAO found that, in 86% of the cases, average benefits exceeded average employee contributions. In over three-fourths of the cases, benefits received were about 15 times more than contributions. The lump-sum death benefit, however, was the only benefit received on behalf of about 14% of deceased workers because the primary beneficiary died before receiving any social security benefits and had no eligible survivors at the time of death. In terms of the program's original objective, a return on the workers' contributions in the system, an overwhelming majority of the beneficiaries or their survivors receive average benefits well in excess of the average contribution.

**Availability:** GAO

*Abstract:* The social security number has become a widespread means of identification in the United States. As its use as an identifier has grown, so has the opportunity for its misuse, often to fradulently obtain employment or monetary benefits. GAO found that reissuing the cards will not correct the underlying conditions contributing to social security number and card misuse. In order to improve the integrity of the social security number and abate social security number and card misuse, Congress should enact legislation making such acts felonies. The Secretary of Health and Human Services should direct the Commissioner of Social Security to further strengthen the integrity of the social security number system by: (1) providing training to Social Security Administration (SSA) field office personnel to enable them to more readily detect fraudulent evidentiary documents submitted with social security number applications; (2) placing the social security number application forms and cards under tighter control; and (3) flagging identified fraudulently-obtained social security numbers for SSA and other agency uses.

**Availability:** GAO

*Program Objectives:* The Social Security Administration (SSA) administers some of the largest income security programs, including Old-Age and Survivors Insurance, Disability Insurance, Supplemental Security Income (SSI), and Aid to Families with Dependent Children (AFDC). *Abstract:* In its review, GAO found that fully implementing its recommendations would save $1.3 billion in Fiscal Year (FY) 1982 and about $4.5 billion in FY 1983 and 1985. There would be similar savings in later years. Congress should amend the Social Security Act to: (1) discontinue student benefits for postsecondary students; (2) require States to deposit social security taxes semimonthly or biweekly; (3) compute benefit amounts to the nearest penny or to the nearest 10 cents; (4) eliminate the minimum benefit provision for new beneficiaries; (5) revoke section 224(d) of the Social Security Act and require that the social security offset be made effective when worker's compensation benefits are awarded; and (6) determine SSI benefit eligibility and payment amounts on a monthly retrospective basis.

**Geographic Relevance:** National; State; City; County

*Program Objectives:* The program's objective is to provide assistance to eligible households to offset the rising costs of home energy that are excessive to household income. *Abstract:* GAO found that in North Carolina about 86% of the State's $16.1 million energy assistance program was used to pay Aid to Families with Dependent Children (AFDC) recipients. Payments made to AFDC recipients were based on family size but did not consider responsibility for energy costs. Payments were made to Supplemental Security Income recipients without regard to their living arrangements or responsibilities for energy costs. Energy assistance payments were made to: (1) more than one individual living at the same residence; (2) individuals living in subsidized housing who were not responsible for home heating costs; and (3) individuals in certain group living facilities where the extent of increased energy costs for heating, or their responsibility for these costs, was not clear. The law was changed for 1981.

*Program Objectives:* The Supplemental Security Income program is a cash assistance program for the needy aged, blind, and disabled. It is financed through general funds and about 4.1 million recipients receive about $8 billion in cash benefits. *Abstract:* In Fiscal Year 1979 an estimated $125 million was overpaid to Supplemental Security Income recipients who owned assets, such as bank accounts and real property, valued in excess of the limitations allowed for program eligibility. Most overpayments occurred because assets were not detected through the eligibility interview process or because the Social Security Administration had not effectively monitored changes in ownership and values of identified assets. This report contains recommendations to the Secretary of Health and Human Services to improve the identification and monitoring of assets.

**Availability:** GAO
**Geographic Relevance:** State; City; County

*Abstract:* GAO found that over $12 million in private nonprofit agency foster family home administration costs, not eligible for Federal sharing, were incurred by New York City and federally reimbursed. The States of New York and California were also reimbursed an undetermined amount for costs attributable to ineligible foster care enrollees. Since 1978, GAO has unsuccessfully attempted to have the Department of Health and Human Services (HHS) take corrective action to recover amounts reimbursed to New York City for unallowable administrative costs. The longer HHS takes to correct the level of Fiscal Year (FY) 1978 Federal reimbursements, the larger the overpayments will be. Using FY 78 as a basis for allotments to New York and California without adjusting for incorrect Federal payments has resulted and will continue to result in reimbursements higher than those authorized. If there is a dispute between any State and HHS as to expenditures for a base year, the base amount may only be charged in the fiscal year after the one in which the dispute is resolved. The foster family home administrative services, in dispute in several New York City contracts with private nonprofit agencies, are normally provided by State social service agencies. The Secretary of HHS should: (1) require that all foster care reimbursements to the States for FY 78 be audited to identify any unallowable costs, determine the correct level of FY 78 Federal reimbursements, and act to recover unallowable costs; and (2) recover overpayments made to New York City for unallowable administrative costs.

## ADMINISTRATION ON AGING

### E00511-001

*Continuation of More Model Projects Could Increase the Delivery of Services to the Elderly.* (HRD-81-9).
10/23/80; 13 pp.
**OMB Funding Code/Title:** 75-1636-0-1-506 / Human Development Services
**Program:** Administration on Aging
**CFDA NO.:** 13.636
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Older Americans Act of 1965, as amended (P.L. 89-73, title IV, § 421; 42 U.S.C. 3035b).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the Administration on Aging (AOA) is to serve as a focal point and advocate for the Nation's elderly. AOA also manages training, research, and demonstration programs and promotes and helps develop State administered community-based systems of comprehensive services for the elderly. *Abstract:* In this review, GAO found that the projects were generally meeting AOA criteria, except for the agency's expectation that worthwhile model projects would form a basis for building a continuing program at the model project site after the agency withdrew financial support. Only 40% of the projects continued after AOA withdrew funding. When worthwhile projects continued to provide services with funds from other sources, the additional funds were substantially greater than the agency's original model project investments. GAO believes that AOA has opportunities to increase the services provided to the elderly with model project funds under the present program structure. The Secretary of the Department of Health and Human Services should direct the Commissioner of AOA to modify the selection process by placing more emphasis on continuation.

### E00511-002

*An Evaluation of the Organizational Relationship of the Office of Human Development Services and the Administration on Aging.* (FPCD-81-41).
4/10/81; 9 pp. + 2 app. (7 pp.)
**OMB Funding Code/Title:** 75-1636-0-1-506 / Human Development Services
**Program:** Administration on Aging
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Older Americans Act of 1965, as amended (P.L. 89-73, title II, § 201; 79 Stat. 220; 42 U.S.C. 3011 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to provide needed services to the elderly. *Abstract:* The Department of Health and Human Services (HHS), Office of Human Development Services (OHDS) supervises program agencies such as the Administration on Aging. The present organizational structure of OHDS violates provisions of the Older Americans Act which state that the Secretary shall not approve any delegation of the functions of the Commissioner on Aging to any other officer not directly responsible to the Commissioner. GAO did not identify any adverse effects associated with these violations or evidence of duplicate functions or excessive administrative burdens. However, because Congress intended for the functions to be carried out by persons directly responsible to the Commissioner on Aging, GAO recommends that the Secretary of HHS revise the organizational structure of OHDS to discontinue the delegation of the Commissioner on Aging's functions which allows: OHDS grant and contract officers to perform administrative functions regarding the Administration of Aging's discretionary grants and contracts, and OHDS regional offices of fiscal operations to handle financial management functions for the Administration on Aging's discretionary and formula grants. If the Secretary of HHS finds that complying with the Older Americans Act adversely affects the program, he should initiate legislation to amend the Act.

## REHABILITATION SERVICES ADMINISTRATION

### E00515-001

*Government-Wide Coordination Activities for Implementing Section 504 of the Rehabilitation Act of 1973.* (HRD-81-35).
12/5/80; 8 pp.
**OMB Funding Code/Title:** 75-0135-0-1-751 / Office for Civil Rights
**Program:** Office for Civil Rights
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Rehabilitation Act of 1973 (P.L. 93-112, title V, § 504; 87 Stat. 394; 29 U.S.C. 794); Executive Order 11914. Civil Rights Act of 1964, as amended (P.L. 88-352, title VI, § 601; 78 Stat. 252; 42 U.S.C. 2000d); Executive Order 12250.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Section 504 of the Rehabilitation Act of 1973 recognized the rights of handicapped individuals to participate in and benefit from federally funded programs and activities. *Abstract:* The Department of Health and Human Services (HHS) did not issue its guidelines until January 1978, almost 2 years after the Executive Order. HHS attributed the delay to a lack of congressional guidance on the complex issues raised by the far-reaching prohibition against discrimination. The HHS January 1978 guidelines did not provide direction for some of the situations that Federal agencies might encounter; instead, HHS advised the agencies to include specific provisions in their own regulations for the particular programs and activities they administered. Several inconsistencies were found between the HHS 1978 guidelines and the section 504 regulations issued by other Federal agencies. While HHS provided technical assistance to other Federal agencies, it often failed to advise them about available policy statements, and in one instance delayed the clarification of a court decision affecting the enforcement of section 504. Twenty-eight Federal agencies and offices were requested by HHS to issue regulations for implementing section 504, but as of April 1980, only six had done so. While agency officials gave a number of reasons for the delays, it was believed that a major cause was the low priority agencies gave to enforcing the requirements of section 504. The Director of the Office of Management and Budget should instruct the heads of Federal departments and agencies that have not yet issued section 504 regulations to do so as soon as possible. In preparing for the section 504 coordination responsibility, the Attorney General should establish priorities for: (1) revising the 1978 regulations to give other Federal agencies more clearly defined guidance on issues they view as not adequately covered in the 1978 regulations; (2) resolving inconsistencies between these regulations and those issued by other Federal agencies; and (3) increasing the technical assistance provided to other agencies.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This evaluation consists of a process and impact evaluation of the Child and Family Mental Health (CFMH) Project. The process evaluation describes the nature of the program and the services delivered, and the impact evaluation focuses on changes in the mental health status of children, parents, and teachers resulting from the primary prevention program. During the second year of the evaluation, pre- and post- measures of program implementation and structures will be taken. In addition, observational and standardized measures of impact will be pilot tested and refined for use in the third year.

**Program:** Administration for Children, Youth and Families: Head Start; Administration for Children, Youth, and Families: Research and Demonstration
**CFDA NO.:** 13.600; 13.608
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Economic Opportunity and Community Partnerships Act of 1974, as amended (P.L. 88-452, title V, § 524, as amended by; P.L. 95-568; 78 Stat. 513; 42 U.S.C. 2928m).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this evaluation is to determine the impact of Head Start health services on Head Start children, their families, and their communities. The 5 year evaluation will employ a comprehensive set of medical, dental, and nutritional assessment instruments which were pilot-tested during the second year of the evaluation. The health status of Head Start children will be compared to that of matched and randomly-assigned comparison children.

**Agency Contact:** Assistant Secretary for Human Development Services. (202) 755-7443.

**E00523-006**
*Federal and State Actions Needed To Overcome Problems in Administering the Title XX Program.* (HRD-81-8).
10/29/80; 26 pp. + 8 app. (14 pp.)
**OMB Funding Code/Title:** 75-1634-0-1-506 / Grants to States for Social Services
**Program:** Grants to States for Social Services
**CFDA NO.:** 13.642
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Social Security Act, as amended (P.L. 74-271, title XX, § 2002; 42 U.S.C. 1397); 45 C.F.R. § 228.58.
**Availability:** GAO
**Geographic Relevance:** State; City; County

*Abstract:* A determination was sought of the: (1) reasonableness of contract selection, pricing, and monitoring practices; (2) practices used to provide funds for matching purposes; and (3) message used to coordinate the delivery of social services. Most of the contracts awarded to purchase social services in the five States which GAO visited did not adequately define the units of service purchased. The States did not know what contractors were committed to deliver and whether they met their commitments. The States reimbursed contracts for the costs they billed, up to the contract price, regardless of the units of service delivered. Most of the certified expenditures used in New Mexico for matching purposes were questionable project costs. The Guide to Federal Financial Participation under title XX, coupled with indepth reviews of the State cost allocation plans, should help to preclude the improper charging of certified expenditures to the program. GAO interviewed 100 clients of California's in-home services for the elderly program. They were generally satisfied with the services received. Only one of the two counties which GAO visited monitored the quality of the services provided and neither had a formal method of recording the hours of service provided. The Secretary of Health and Human Services (HHS) should direct HHS regional offices to encourage States to use contracts based on unit prices or specific levels of services to purchase social services under the title XX program, and give the States whatever technical assistance is needed to develop reasonable units of measurement for the various services. He should direct HHS regional offices to encourage States that authorize persons to hire their own service providers to institute a system that monitors the quality of services and assures that the required hours of service are delivered.

*Guyana Tragedy Points to a Need for Better Care and Protection of Guardianship Children.* (HRD-81-7).
12/30/80; 42 pp. + 4 app. (20 pp.)
**OMB Funding Code/Title:** 75-1636-0-1-506 / Human Development Services
**Program:** Administration for Children, Youth, and Families: Foster Care
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Social Security Act, as amended (P.L. 74-271, title IV, § 408, 421; 42 U.S.C. 608, 621).
**Availability:** GAO
**Geographic Relevance:** State; City; County

*Abstract:* Objectives were to determine: (1) circumstances under which foster children were removed from the United States to Guyana, (2) whether any foster children died in Jonestown, (3) whether any Federal funds were diverted from their statutory purpose, (4) the extent and adequacy of reviews of potential nonrelative guardians by social services agencies, and (5) the extent of foster care payments to nonrelative guardians and the Federal portion thereof. GAO found that no children, while in foster care, died in Guyana. A few of the victims of the tragedy were wards of Peoples Temple members and were taken to Guyana without court approval. U.S. Passport Services should require that guardians obtain court approval to take their wards outside of the country. The Secretary of the Department of Health and Human Services (HHS) should direct the Office of Human Development Services to encourage California to: (1) reiterate to State court judges the importance of county social workers preparing suitability reports on petitioners for nonrelative guardianship children; (2) help the counties expand suitability report criteria to more fully address the physical well-being of guardianship children; and (3) reissue regulations specifically covering guardianships and require compliance by county social service agencies. He should also direct the Office to: (1) issue instructions to all the States notifying them that guardianship children are not eligible for Federal reimbursement for foster care maintenance payments when responsibility for such children is removed from the responsible State agency; (2) obtain retroactive adjustments for Federal overpayments that were made for California guardianship children; and (3) determine if other States are receiving Federal overpayments for ineligible guardianship children and act to identify and recover these overpayments.

*Methodology and Pilot Evaluation of the Maximum Allowable Cost for Drugs Program.* (1857).
12/80
A. James Lee
**Contractor:** Abt Associates, Inc.; 55 Wheeler Street, Cambridge, MA 02138
**OMB Funding Code/Title:** 75-0511-0-1-551 / Program Management
**Program:** Research Demonstrations, and Evaluation Projects
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Social Security Act, as amended (P.L. 74-271, title XI, XVIII, § 1110, 1115, 1875; 42 U.S.C. 1310, 1315, 1395).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This study relies on Medicaid data to identify program effects. A time series of Medicaid drug usage data is being collected from five States and examined for Maximum Allowable Cost (MAC) and Estimated Acquisition Cost (EAC) related changes in cost and prescription patterns. State data are also being sought for purposes of assessing MAC-EAC effects on administrative cost, provider participation, and physician behavior. In addition, a time series of more aggregate drug program data is being compiled by State for cross-section/time-series econometric analysis. This multivariate effort will be useful in generalizing results from the sample States to the Nation as a whole. The IMS America, Inc. invoice price data being provided to the Office of Pharmacy Reimbursement will also be examined for evidence of any manufacturer price response. In order to conduct these analyses it was necessary to survey the States and prepare a profile of State Medicaid drug program parameters and data availability. These data were used to identify those States maintaining requisite data and to ascertain other program criteria for purposes of sample selection. In addition, these program data will be used for econometric study purposes. The study is being conducted in two phases. In Phase I–the first 12 months–the profile of State programs was prepared. In addition, the evaluation methodology was developed and tested in one of the sample States, Massachusetts. In Phase II–the second 9 months–data were collected from an additional four States (Arkansas, Maine, Minnesota, and Tennessee) and all analyses were completed.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This project began as an in-house developmental study to prepare an integrated research plan, but it was expanded to include management-oriented program performance studies and policy-oriented program impact studies into the research plan. To assist in the development of the plan, the contractor is performing an evaluability assessment of the program. This activity includes a review of the legislative and administrative objectives of the program and selected interviews with representatives from End Stage Renal Disease (ESRD) focused components and organizations to identify program needs, problems, and activities. The results of the contractor's initial discussion of the evaluation issues will be expanded by internal staff and will undergo a prioritization process. The evaluation issues will be partitioned into a set of study modules for future implementation over the next 5 years. The first product of this developmental project will be the preparation of a formal ESRD evaluation plan. This document will present an overview of the program, a review of the current and completed research and evaluation studies, and a systematic analysis of the evaluation issues with a structured format that includes the possible evaluation designs, methodology, data requirements, feasibility, and policy relevance. The evaluation plan will include a prioritized list of research and evaluation studies with a proposed implementation schedule.

*Abstract:* The purpose of this study is to evaluate uniform billing. Uniform bills are being tested in Arizona, Connecticut, Florida, New York, and Ohio. The final analysis will aid the Health Care Financing Administration (HCFA) in the decision to promulgate or not to promulgate a uniform bill. It is hypothesized that uniform billing will reduce the burden of billing in the hospital and in the long run will save the hospitals, insurers, and beneficiaries money. SysteMetrics, Inc., was contracted by HCFA to collect the data necessary to evaluate uniform billing. The first phase was data collected via a questionnaire sent to 615 hospitals. The second phase included dissemination of a questionnaire to all major insurers. The third phase of data collection was via on-site group interviews with representatives from hospitals and major insurers. The final report was due to HCFA December 31, 1980. It includes analysis of uniform billing and case studies of each test site as well as recommendations for: implementation strategies, construction, and coding requirements for accounting purposes. Public Law 95-142, Section 19, requires a uniform system for reporting bill data by health care facilities. This law is the basis for evaluating uniform billing.

**Geographic Relevance:** National

*Abstract:* The purpose of this contract is the evaluation of the Health Care Financing Administration's (HCFA's) integrated data demonstration grants. HCFA has funded demonstration projects in seven States to test a variety of integrated data management systems models related to hospital data. This contract is a crosscutting evaluation of the seven hospital data integration demonstrations (IDD). Birch and Davis Associates, Inc., has been engaged to fulfill six specific objectives of this overall evaluation: (1) to identify the political and structural conditions necessary and sufficient to establish a self-sustaining statewide integrated hospital data system; (2) to determine the level of data element commonality in the data bases established by the IDDs and the eventual applicability to establishment of regional and national data bases; (3) to determine the extent to which the IDDs meet applicable confidentiality standards; (4) to evaluate the impact of the IDD's data accuracy and completeness and the value of these improvements to various data users; (5) to evaluate the impact of IDDs on the utility of available hospital data bases and the value of these improvements to various types of users; and (6) to evaluate the impact of the IDDs on the cost to each data user type and on net total system cost of generating, processing, and storing hospital billing discharge and cost data. The contractor will conduct a 3 year evaluation in two phases. Phase I will be devoted principally to to the study design and pretest. Phase II will involve extensive time series data collection.

**Availability:** Agency
**Geographic Relevance:** State

*Abstract:* Professional Standard Review Organizations (PSROs) were developed by the Federal Governmet as a means of containing costs of hospital care by examining the use of medical services. Alternative methods are being developed due to significant decreases in funding for the PSRO program. Oklahoma has developed a unique system of focused review as opposed to concurrent review which focuses on a subset of hospitals rather than on patients or physicians. The major objectives of evaluating this system are to determine: the effectiveness of the Oklahoma Utilization Review Systems (OURS) in reducing hospital utilization and controlling Medicaid and Medicare program expenditures; whether or not the OURS is more cost effective than traditional 100% concurrent review; and the feasibility of transferring the program or the model to other PSROs. The evaluation has five general components: a utilization analysis describing hospital utilization in Oklahoma and the comparison State, Arkansas; analysis of Medicaid and Medicare program expenditures in each State; analysis of administrative costs of the program in both States; a case study; and a systems evaluation combined findings from all components. This evaluation was specifically authorized under Section 1172 of the 1976 Amendments to the Social Security Administration, Public Law 95-142.

*Program Objectives:* The Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program is designed to detect and treat potentially progressive or debilitating conditions which interfere with normal learning and development among children eligible for Medicaid. *Abstract:* The purpose of this study is to identify factors which have general application for the development of child health service programs focused towards the best use of available resources. This is primarily a research study: to provide an analysis of client, program, provider, and geographic variables associated with utilization of EPSDT services and with specific screen results; to identify interrelationships among these variables; to develop a provider typology, the variables contributing to overall effectiveness of different provider types; to identify a baseline cost for the operation of the EPSDT program; and to measure the impact of variables on program costs. The study employs the use of an existing data base on the history of EPSDT screening records of over 4 years in Southeastern Pennsylvania. The data have been collected and stored by Philadelphia Health Management Corporation as part of the contractual obligations with the Commonwealth of Pennsylvania. The final report will be availble in late 1980.

**Geographic Relevance:** National

*Abstract:* The programs being studied in this evaluation are union health insurance programs which require that a second opinion be obtained by the patient before surgery is performed. The main objective of this evaluation is to determine whether or not presurgical screening (second surgical opinions) results in a reduction of surgery performed and in economic savings. Evaluation issues being examined are the rates of confirmation/nonconfirmation of second surgical opinions; surgical procedures most affected by second opinions; the costs associated with consultations and alternative medical treatment; and the feasibility of generalizing the results. Data are being collected from several security welfare plans in the New York City area representing approximately 660,000 individuals. A 2 year followup telephone survey is conducted on individuals not confirmed for surgery to determine whether or not the patient had surgery or other medical care. The economic analysis will consist of utilizing the claims and medical records of approximately 700 members, 350 nonconfirmed for surgery cases matched to 350 confirmed.

**Geographic Relevance:** State

*Abstract:* The Long Term Home Health Care Program (LTHHCP) is designed to provide aged and disabled individuals in need of long term care with an alternative to placement in a Skilled Nursing Facility or Health State. The LTHHCP offers a coordinated comprehensive program of home health care to institutional placement. Under a 3 year grant awarded in 1978, the Health Care Financing Administration provides 1,115 waivers for a variety of services not otherwise reimbursed under Medicaid, such as nutrition counseling, respiratory therapy, and medical/social services. The program is currently operating at nine sites in New York State. The major evaluation objective is whether or not home health care in the LTHHCP provides a viable alternative to institutional care in terms of cost, quality of care, and patient health status. The evaluation consists of two major components: a descriptive analysis of the development, organization, administration, and patient impacts of the LTHHCP; and a comparative analysis of the LTHHCP with traditional methods of care to determine cost, utilization, and patient aspects of the LTHHCP. In addition, the issue of whether the LTHHCP is providing substitute care for institutional services or an augmentation of services for people who would otherwise receive traditional home care services will be adressed.

**Availability:** Agency; NTIS (PB 81-151 344)
**Geographic Relevance:** State

*Abstract:* The Massachusetts Department of Public Welfare received a 1 year grant from the Health Care Financing Administration (HCFA) to study the mandatory second surgical opinion program operating in that State. Mandated by the Massachusetts State legislature in 1976, this program requires all Medicaid beneficiaries recommended for any one of eight designated elective procedures to get a second opinion before undergoing surgery. These procedures include tonsillectomy/adenoidectomy, menisectomy, hysterectomy, cholecystectomy, submucous resection, spinal fusion/disc surgery, hemorrhoidectomy, and excision of varicose veins. The analysis focuses on two objectives: to determine the impact of the mandatory second opinion program on the amount of surgery performed and to determine the program's cost effectiveness. Among the results in the statewide analysis are the following: analysis of monthly surgical rate data from all five areas indicated a 20% reduction in the number of SPES operations in the year following program implementation (based on less than 12 months of post-implementation data for three of the five HCF areas). The greatest reductions statewide were hysterectomies (26%), hemorrhoidectomies (23%), menisectomies (23%), and tonsillectomy/adenoidectomies (22%). Based on the surgery rate analysis of post-implementation data for three areas of the State, the report estimates the statewide net savings to Medicaid during the first year were $856,500, for a savings-cost ratio of 3.9:1. The project's best estimate of net program savings in Bay State and Central Massachusetts alone was $442,400, for a savings-cost ratio of 3.6:1.

**Availability:** Agency
**Geographic Relevance:** State

*Abstract:* The study measures and explains the impact of the Wisconsin Quality Assurance Project (QAP)–a demonstration project intended to modify the methods and effectiveness of nursing home quality of care using an alternative approach to 100% patient evaluation and facility survey. Two major modifications to the nursing home review process are made by QAP. The first modification is the nursing home survey process. Some of the key issues the study will address about the QAP process related to determining if quality of care using the new method is higher than the old method, if the new method is as effective in detecting less than adequate quality of care, and if the new method is as effective as the old in detecting incorrect level of care determinations. The primary goal of the QAH is to improve the quality of nursing home care in the demonstration areas without increasing the cost of the State's regulatory system. Issues associated with this goal are: (1) Will improvement in the quality of care in nursing homes surveyed with the new method be higher than in homes surveyed with the old method? (2) Will more time be spent in lower quality homes and will costs of quality assurance be distributed differently? and (3) Will there be a significant difference between old and new method homes in terms of the capital, personnel, and equipment expenditures identified in the survey/resident assessment process?

*Abstract:* The Health Care Financing Administration is sponsoring 15 demonstration projects which are providing long-term care services under special waivers in order to acquire services for clients that typically are not permitted under Medicare and Medicaid reimbursement procedures. The projects are seeking to test whether a comprehensive mix of community-based health and social services delivered on a timely basis and better tailored to a client's needs can avoid the movement by individuals out of the community and away from independent living to expensive institutional care. The demonstration projects are located in California, Oregon, Wisconsin, Texas, Connecticut, New York, Florida, and South Carolina.

*Abstract:* This study is an evaluation of an experimental ambulatory care project sponsored by Health Care Financing Administration and the Robert Wood Johnson Foundation to determine the impact of establishing free-standing clinics on the cost of ambulatory care services under Medicare and Medicaid. Major research questions are: (1) Is the cost of providing ambulatory care services at free-standing clinics lower than at hospital outpatient departments and emergency rooms? (2) Is there a shift in utilization patterns from the outpatient departments and emergency rooms of municipal hospitals to the free-standing clinic? (3) What is the effect of the waivers of the Medicare deductible and coinsurance requirements on the demand for ambulatory care services?

*Abstract:* The Rural Health Clinic Services Act of 1977 (P.L. 95-210) was signed into law in December 1977. The goals of the legislation were to improve health care for the 25 million Americans thought to live in health underserved rural areas, to improve the financial viability of remote, rural clinics, and to achieve these goals in a fashion which did not impose an undue strain on public funds. The project is to: (1) measure utilization of clinic facilities by Medicaid eligibles in the service areas of Rural Health Clinics and to determine if it is affected by certification status under P.L. 95-210; (2) determine whether or not the cost-based reimbursement formula of P.L. 95-210 more effectively contains the cost of medical care than a fee-for-service system using UCR rate estimates; and (3) establish an empirical basis for setting productivity standards which do not jeopardize the competing aim of enhancing the delivery of care by identifying those predictors of clinic productivity which can be affected by public policy.

*Abstract:* The Health Care Financing Administration is currently sponsoring demonstrations in Massachusetts and Oregon which permit Medicare beneficiaries to be directly admitted to a skilled nursing facility (SNF) without having met the 3-day prior hospitalization stay. Thus, under the demonstration Medicare patients can be admitted to a SNF directly from a home, as a transfer within the same nursing home or from another nursing home, or from a hospital after a stay of less than 3 days. The evaluation will study cost and utilization and patient outcome issues. A study has been completed which explores both factors in the environment and those inherent to the program which affect utilization of the demonstration.

*Abstract:* The Health Care Financing Administration is currently sponsoring a demonstration project which allows coverage and reimbursement for "hospice type" services provided to Medicare and, in some cases, Medicaid beneficiaries. There are 26 hospice organizations participating in this demonstration. A competitive grant was awarded to Boston University to study the following four fundamental questions: (1) How do costs of care provided to the terminally ill through hospices compare with that provided through the "traditional" care setting, and what is the likely demand for such hospice care? (2) Are hospice care and its costs additional to, or in lieu of, that provided the terminally ill outside of hospice–would total costs of serving the terminally ill through hospice care be more or less expensive than such service through traditional, nonhospice care? (3) How does the quality of, and satisfaction of, the patient, and his/her family with care provided in the hospice setting compare with that provided outside the hospice? and (4) What would be the likely consequences for hospices, hospice care, and demand for such care of a decision to reimburse for hospice services through Title XIIX and XIX or other third-party payors?

**Geographic Relevance:** National

*Abstract:* Three demonstration projects funded by the Health Care Financial Administration in the area of End Stage Renal Disease (ESRD) were evaluated. These demonstration projects provide two benefits that are intended to encourage patients to dialyze at home rather than in a dialysis center: reimbursement for a paid aide in the home (either a family member or a nonrelated individual); and lump sum reimbursement for purchase of dialysis equipment. It is generally agreed that home dialysis is less expensive than center dialysis, and there is a body of opinion to the effect that home dialysis is equal to center dialysis in terms of quality of care. This evaluation will attempt to determine: whether or not the availability of the benefits increase the number of patients who choose to dialyze at home; whether or not the overall savings to the Medicare program are reduced when all related costs, including payments for the aide, recruitment, training, administrative, and other costs are included; and whether or not the experimental benefits can be provided without adversely affecting the quality of care. The evaluation will also include a market study of ESRD equipment and supplies.

**Authority:** Social Security Act, as amended (P.L. 74-271, title XI, XVIII, § 1110, 1115, 1875; 42 U.S.C. 1310, 1315, 1395). Public Health Service Act, as amended (P.L. 78-410, title XV, § 1521; 42 U.S.C. 300m).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This evaluation of the Second Surgical Opinion Program (SSOP) asked the following questions: (1) Does getting a second opinion reduce the likelihood of surgical intervention? (2) Do SSOP users who are confirmed for surgery consent to have surgery? (Roughly 10% of persons recommended for surgery decline to have surgery, even in cases of potentially life threatening conditions such as early cancer.) (3) Do SSOPs reduce surgical utilization rates–through deterring some SSOP users (direct effect) and by inducing physicians to be more conservative in recommending surgery (sentinel effect)? (4) Do SSOPs have an impact on health status and/or health outcome? (5) Are SSOPs cost effective? and (6) Are the savings from surgery avoided greater than the sum of the costs of alternative medical or surgical treatments (including postponed surgery) and the costs of the program?

**Authority:** Social Security Act, as amended (P.L. 74-271, title XI, XVIII, § 1110, 1115, 1875; 42 U.S.C. 1310, 1315, 1395). Public Health Service Act, as amended (P.L. 78-410, title XV, § 1526; 42 U.S.C. 300m-5).
**Availability:** GAO

*Program Objectives:* Demonstrations and experiments (D&E) test the feasibility of new and innovative reimbursement and payment systems. *Abstract:* The results indicated that the D&E activities of the Health Care Financing Administration's Office of Research, Demonstrations, and Statistics have fallen short of expectations and requirements of the cognizant legislative committees of Congress. Reports to Congress have not been submitted by the dates specified by law nor have they met the specifications contained in the law or related committee reports. The Office of Research has not complied with the requirements or used the authority, in all cases, which it received in this legislation. The processes for carrying out the D&E activities often require long periods of time, which may partly explain the problem of meeting congressional expectations; the office needs to modify its processes for carrying out D&E activities to help improve the utilization of the results. GAO made several recommendations to the Secretary of Health and Human Services.

**Authority:** Social Security Act, as amended (P.L. 74-271, title XIX, § 1903, as amended by; P.L. 89-97, § 102(a); 42 U.S.C. 1395).
**Availability:** GAO

*Abstract:* GAO looked into the effectiveness of programs to control prescription drug costs in five States and obtained information on the effectiveness of State drug substitution laws. The Maximum Allowable Cost (MAC) program has resulted in savings of about $1.4 million a year under Medicaid for outpatient drugs in the five states; however, the savings could have been greater if: (1) States had implemented the MAC limits on a more timely basis and/or in accordance with regulations, had not claimed Federal sharing for savings lost due to delays in implementation; and (2) the Department of Health and Human Services (HHS) had a formal mechanism for systematically updating the limits. GAO made several recommendations to the Secretary of HHS. HHS established two programs to contain the costs of prescription drugs under Medicaid and Medicare by setting upper limits on the amounts that could be reimbursed. The MAC program pertains to multiple-source drugs and is applicable to Medicaid and Medicare. The Estimated Acquisition Cost program pertains to all drugs and is applicable only to Medicaid.

**Authority:** Social Security Act, as amended (P.L. 74-271, title XIX, § 1903, as amended by; P.L. 89-97, § 102(a); 42 U.S.C. 1395).
**Availability:** GAO

*Abstract:* GAO analyzed the impact of changes in nursing home quality of care standards included in a regulation proposal by the Department of Health and Human Services (HHS). The objectives of the new regulations include the elevation of patients' rights, the introduction of a patient management system, and the upgrading of the qualifications of key supervisors. Nursing home compliance with existing standards and individual requirements comprising these standards has been spotty. Many facilities are not complying with requirements which will be the key components of the proposed patient care management system. GAO has reservations about whether the regulations upgrading the quality of supervisory employees will have the desired impact in reducing noncompliance. There is a need for adequate oversight and enforcement of the regulations at Federal and State levels. GAO made several recommendations to the Health Care Financing Administration Administrator.

**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* GAO reviewed State systems for recovering Medicaid overpayments to providers and for returning the Federal share of these overpayments to the Department of Health and Human Services (HHS). GAO found that over $11 million in Medicaid and other program funds were in noninterest-bearing checking accounts in three States. Because the banks had use of this money, the Federal and State Governments lost and incurred interest of over $1.3 million. One of the banks involved reported earning $512,000 on the Medicaid funds it held for an 11-month period. Some States drew Federal funds in excess of current disbursement needs, invested the balances, and retained the interest earned. States had not returned the Federal share of $23 million in identified but uncollected overpayments. The long time that elapsed between States' cash collections and the return of the Federal share enabled States to earn substantial amounts of interest on Federal funds. GAO made several recommendations to the Secretary of HHS.

**Authority:** Social Security Act, as amended (P.L. 74-271, title XI, § 1152, as amended by; P.L. 95-142; 42 U.S.C. 1320c).
**Availability:** GAO

*Program Objectives:* Professional Standards Review Organizations (PSROs) are designed to make sure that health care services provided under Medicare and Medicaid are delivered as effectively, efficiently, and economically as possible. *Abstract:* PSRO monitoring of concurrent review functions being performed by hospitals does not appear to be adequate. Payments to physicians for medically unnecessary days of hospital care do not appear large; thus, the potential for savings by focusing reviews in this specific area is limited. The Department of Health and Human Services (HHS) plans to reduce the average cost of patient review primarily by not reviewing areas which do not appear to offer a potential for cost savings or improved care. Hospital discharge planning appears to be adequate and not a principal cause of the problem. GAO made several recommendations to the Secretary of HHS.

**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* State Medicaid fraud control units were established to help reduce the amount of Medicaid fraud. *Abstract:* Fraud units deter Medicaid providers from attempting fraud; they have had an impact on changing State legislation and Medicaid regulations to make it easier to identify fraud and to provide for more stringent penalties. If some type of continued Federal funding is not provided, many units will cease to exist or will operate at a reduced level of effectiveness. New fraud units in other States are not likely to be established. Congress should provide for funding State Medicaid fraud control units beyond September 1980. GAO also made recommendations to the Secretary of Health and Human Services.

**Authority:** Social Security Act, as amended (P.L. 74-271, title XI, XVIII, § 1110, 1115, 1875; 42 U.S.C. 1310, 1315, 1395). National Health Planning and Resources Development Act of 1974 (P.L. 93-641, § 3; 88 Stat. 2249; 42 U.S.C. 300m-5).
**Availability:** GAO
**Geographic Relevance:** State

*Abstract:* Twenty-six States currently have prospective ratesetting programs whereby hospitals are reimbursed based on rates determined before the services are provided. States with programs were more successful in controlling the growth rate in expenditures per case. Hospital officials in prospective ratesetting States believe they have been able to contain cost increases primarily as a result of improved hospital budgeting practices. The presence of an outside review authority forces hospital managers to closely review, and be prepared to justify, planned expenditures. Even though prospective ratesetting programs have restrained hospital expenditures and revenue increases, hospitals generally have not yet adopted cost containing management techniques. Congress should amend the Social Security Act to permit the full participation of the Health Care Financing Administration's Medicare program in existing prospective ratesetting programs. GAO also made recommendations to the Secretary of Health and Human Services.

**Availability:** Agency; NTIS (PB 81-115 248)
**Geographic Relevance:** National

*Abstract:* The study analyzes the nature and scope of some 46 service-conditional support programs for medical and dental students in 32 states. The programs provide for loan forgiveness in exchange for service in underserved areas. The study includes a description of state benefits; loans and service obligations for medical and dental students; provisions governing default and financial repayment of loans; and conditions and location of placement. The study also assesses the degree of compatibility and conflict between the state programs and the National Health Service Corps.

**Availability:** Agency; NTIS (PB 81-55 632)
**Geographic Relevance:** National

*Abstract:* The evaluability assessment of the Emergency Medical Services (EMS) program found that agreement existed on the intended EMS program. Varying degrees of emphasis both above and below the Division of Emergency Medical Services (DMES) were given to the perceived program objectives. In general, though, three objectives were articulated: the reduction of death and disability due to emergency medical episodes (outcome objective); development of a national network of financially viable EMS systems (outcome objective), and development through provision of federal "seed" moneys; and system development and implementation (operational objective). A program logic emerged which has as its foundation two primary causal assumptions: (1) developing EMS systems (operational objectives will lead to a reduction in death and disability and achievement of financial viability (outcome objective); and (2) certain system activities relate more directly to the reduction in death and disability. These activities include: manpower and training, communications, transportation, facilities categorization and designation, and development of protocols and agreements. A sizable portion of the program is ready for the evaluation of progress against agreed upon objectives. This study was cosponsored by the Health Services Administration.

**Program:** Health Initiatives: Health Promotion
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The objectives of this exploratory study are to: (1) develop an analytic framework for clearinghouse operations within the broader concept of information dissemination; (2) locate, synthesize, and categorize information on the basic characteristics of human services clearinghouses; (3) describe and compare the management of selected clearinghouses; (4) carry out case studies to determine how clearinghouses serve users and the strengths and limitations of their services and functions; and (4) develop criteria to evaluate the effectiveness and efficiency of clearinghouses. One of the interim products coming out of Phase I of the study was a Catalog of Human Services Information Resource Organizations. This Catalog is presently available through Project SHARE. It is expected that the results of this study will allow the Department to assure that existing clearinghouses operate in an effective and efficient manner and that new clearinghouse activity is initiated appropriately in response to needs which can be addressed through such operations.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The primary purpose of this study is to identify and analyze the advantages and disadvantages of alternative Federal policies with respect to the role of senior centers in the provision of health and human services to older persons. The study has three phases. Discussions were held with government officials and national experts in the senior center field, as well as with State and area agency directors, center directors, and other key informants in 12 States in different areas of the country, to determine their perceptions of senior center objectives, accomplishments, and future directions. Site visits will be made to 40 centers across the country to study actual center operations. Interviews will be conducted with senior center staff area agency directors, local officials, and other service providers. The scheduled completion date is February 1981. A policy options report will be prepared based on the findings of phases I and II. The report will discuss past, present, and potential Federal policies with respect to senior centers. Particular attention will be directed to the role of centers in serving frail older people.

**Availability:** Agency

**Geographic Relevance:** State

*Abstract:* This is a study of the court-ordered community placement of the severely retarded residents of Pennhurst Institution in Pennsylvania. Because other communities may seek legal alternatives to institutionalization of the mentally retarded and use the Pennhurst experience as a model, Department of Health and Human Services (HHS) has funded this study to measure the costs for establishing a comprehensive community service delivery system for large numbers of severely mentally retarded persons. Also studied is the impact that such a relocation has on the mentally retarded persons, their families, and the community. Major users of the resulting information are HHS long-term care programs channeling institutionalized persons into their communities and State, county, and other local governments responsible for providing medical and social services to the mentally retarded as well as providers of such services and the judicial system.

*The Effect of Fiscal Contraction on HHS Programs and Clients.* (1915).
8/81
**Contractor:** Urban Institute; 2100 M Street NW, Washington, DC 20037
**OMB Funding Code/Title:** 75-1101-0-1-551 / Assistant Secretary for Health: Salaries and Expenses
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Three major questions are addressed: (1) What is the degree of fiscal contraction faced by State and local governments? (2) What has been the effect of fiscal contraction on spending for human services and on the clients and programs of the Department of Health and Human Services (HHS)? (3) How effective has HHS grant policy been in targeting resources to department clients in this period of fiscal contraction? Over 2 years, seven States and at least one city/county area within each State are chosen as case studies. The States are New Jersey, New York, California, Michigan, Alabama, Colorado, and Ohio. Limitations have not been binding in most States because of the availability of surpluses and because of exemptions or override provisions. However, the rate of growth of the State local sector has been slowed considerably. The interest of the voters has clearly been to reduce spending for the poor. This preference has been reflected in greater cuts for the nondeserving poor. Overall, in the States studied, human service expenditure increases have been moderately above average. There are important variations across programs, however. Overall, grant policy has been highly effective in preventing decreases in federally subsidized programs. States have attempted to shift expenditures into categories which are federally subsidized or have more favorable matching rates.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this evaluation is to collect information from each of 50 States, the District of Columbia, and a subsequently selected sample of 100 communities in 15 States to determine where and how services are made available to victims of domestic violence and their families. Primary emphasis is on Department of Health and Human Services (HHS) funded programs; differences between States and communities which are providing services and States and communities which are not; differences among States and communities in eligibility criteria for services funded by the same Federal program; and barriers at the Federal, State, and community level which inhibit service delivery. It is expected that the results of this evaluation will: (1) provide HHS with information to provide technical assistance and to make appropriate policy clarifications, regulatory changes, and legislative modifications in order to increase the responsiveness of HHS funded programs; (2) allow for the dissemination of seemingly effective and efficient methods of service delivery to victims of domestic violence; and (3) identify barriers to services which can be eliminated only by action at the State or community level.

*Abstract:* The study will evalute the efforts of the Department of Health and Human Services (HHS) and the Department of Education (ED) to consolidate under the provision of Public Law 95-134 the administration of formula grants to the Insular Territories–Guam, Northern Marianas, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands. The purpose of this study is to describe HHS and ED implementation of the consolidation authority; assess the adequacy of the consolidation authority and identify options for improving HHS and ED use of the legislative authority as well as what kinds of consolidation could be used. The evaluation will assist in restructuring HHS and ED implementation activities and will provide a framework for subsequent evaluations of the effects of consolidation.

*Evaluation of the Baltimore Blueprint Demonstration Project.* (1919).
12/82
**Contractor:** Urban Systems Research and Engineering; 36 Boylston Street, Cambridge, MA 02138
**OMB Funding Code/Title:** 75-1101-0-1-551 / Assistant Secretary for Health: Salaries and Expenses
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** State; City; County

*Abstract:* This is a process evaluation of the Baltimore Blueprint Demonstration Project, an intergovernmental effort to identify practical reforms in the delivery of human services in the City of Baltimore and to test those reforms in a target neighborhood of about 50,000 persons. The primary mechanisms for identifying and promoting reform under the demonstration project are seven policy teams composed of City, State, and Federal representatives. The teams are organized around seven program areas: income maintenance, social services, education, juvenile services, employment, health, and housing services. Each team identifies reforms in the area of the service program and then works with relevant Federal, State, and city agencies to implement the reforms. The purpose of the evaluation is to assess the Baltimore Blueprint Program as a means of stimulating the reform of human services. The evaluators will: (1) develop a narrative chronology of significant project events and assumptions; (2) assess the resources management policies and organizational characteristics; and (3) assess the utility of the resulting reforms.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of the project is to develop a uniform evaluation system for the projects funded in Fiscal Year (FY) 1980 by the Office of Adolescent Pregnancy Programs, Department of Health and Human Services. The evaluation approach devises a common set of indicators which measure the programs' attainment of the following objectives: (1) to provide care for pregnant adolescents, especially those under 18; (2) to assist pregnant adolescents and adolescent parents to become productive and independent contributors to family and community life; (3) to prevent initial and repeat pregnancies; (4) to expand and improve the availability of and access to needed comprehensive services; (5) to establish better coordination, integration, and linkages among existing programs; and (6) to promote innovative, comprehensive, and integrated approaches to the delivery of such services. In the first year, a common data reporting format and optional internal recordkeeping system will be developed and pretested for eventual expansion to all funded projects. Potential additions to the contract include expansion of the evaluation system to projects funded in FY 81 and the design and implementation of an evaluation of the Office of Adolescent Pregnancy Programs' Management and Coordination.

**Authority:** Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963, as amended (P.L. 88-164, title II, § 201; 42 U.S.C. 2689).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This 3 year demonstration will assess the impact and benefits of cost related Medicare reimbursement for nonhospital operated Community Mental Health Centers, organized ambulatory mental health service settings, and partial hospitalization facilities. Approximately 45 facilities have been selected. Under the demonstrations, the range of services and types of providers covered will be expanded and reimbursement will be to the facility as a whole on a cost related basis rather than on a fee for service basis through a supervising physician. It is the objective of this mental health demonstration: (1) to establish standards for professionals providing services and to determine methods and rates of reimbursement congruent with the policy of the Medicare program; (2) to determine the effect of expanded coverage on utilization of services by the Medicare eligible population; (3) to document the cost to Medicare for this expanded range of reimbursement for ambulatory mental health services; and (4) to estimate the costs to Medicare if this range of reimbursement were established nationally.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Bedford Stuyvesant-Crown Heights demonstration project provides short term (3 year) improved reimbursement to three freestanding community health centers in this low income area of Brooklyn, New York. In return, facilities are required to improve fiscal and managerial performance, strengthen and reconfigure the delivery system, and plan on a community-wide interinstitution basis to better meet the needs of community residents. The evaluation will identify how well the demonstration achieves its objectives, the reasons for success or failure, and the implications for policy.

*Exploratory Evaluation of Head Start Training and Technical Assistance.* (1985).
9/80
Marilyn Rymer
**Contractor:** Urban Systems Research and Engineering; 36 Boylston Street, Cambridge, MA 02138
**OMB Funding Code/Title:** 75-1636-0-1-506 / Human Development Services
**Program:** Administration for Children, Youth, and Families: Head Start
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Economic Opportunity and Community Partnerships Act of 1974, as amended (P.L. 88-452, title V, § 524; 42 U.S.C. 2928m).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The exploratory evaluation was designed to determine the overall objectives of Head Start training (T) and technical assistance (TA) activities and to make recommendations, in the form of Management and Analysis Options, on how to improve the design, management, information systems, and decisionmaking of the program. Information was drawn primarily from program documents and interviews with Headquarters staff, staff of 3 regions, 6 grantees, and 21 T and TA providers. The study found that though T and TA appears to be an effective mechanism for improving the rate of grantee compliance with Head Start performance standards and for improving grantees and staff capabilities, weaknesses in the program's needs assessment, planning, resource allocation, and information collection functions impede the Administration for Children, Youth, and Families' ability to demonstrate effective, efficient management of T and TA funds. The Management Options recommend improvements in the needs assessment, planning, allocation, and information collection process while the Analysis Options are directed primarily towards developing information that will lead to conclusions about how to use the limited funds available for T and TA most efficiently and effectively and towards demonstrating systematically the impact of T and TA on Head Start services to children and their families.

**Availability:** Agency
**Geographic Relevance:** National; State; City; County; Congressional District; Standard Metro. Stat. Area (SMSA)

*Program Objectives:* Section 312 of the Housing Act of 1964, as amended; authorized the use of long-term (20 years), low interest (3%), Federal loans to finance rehabilitation of residential, non-residential, and mixed use commercial properties in areas designated by the local government for concentrated improvements under the Department of Housing and Urban Development's (HUD's) Community Development Program. Borrowers may use these funds to repair or rehabilitate these properties to meet local code requirements or to make the property safe, decent, and sanitary. While there are no income limitations for applicants, the program is intended to benefit low and moderate-income people. *Abstract:* Material differences existed between HUD and Federal National Mortgage Association (FNMA) records. As of October 31, 1979, HUD's records showed $60 million more than FNMA's in connection with the outstanding principal balance for Section 312 loans. Several recommendations were made to the Assistant Secretary for Community

Planning and Development to correct these discrepancies.

**Availability:** Agency

*Program Objectives:* The Federal Housing Administration Fund covers mortgage and loan insurance activities for about 40 active mortgage/loan insurance programs, including coinsurance, which are grouped into four separate insurance funds. Moneys in excess of those needed to fund current operations can be invested in U.S. Securities to provide additional income supporting the program. The Secretary of HUD is authorized to establish fees and charges that adequately cover the costs of inspections, project reviews and financing services, audits by Federal or federally authorized auditors, and other beneficial rights, privileges, licenses, and services. The fees and charges collected are to remain available for Departmental operating expenses in providing similar services. *Abstract:* The report discusses; (1) the prospect of obtaining additional investment authority for revolving funds where such authority does not now exist, (2) a need to revise the processing procedure for collection and disbursement data in the Federal Housing Administration FHA Fund, and (3) use of moneys collected by the Department for management, legal, and audit services. It was recommended that additional investment authority should be obtained and that the current procedures used to account for fees and charges collected should be revised. Regarding item 2, the Department is making an analysis of current procedures for the purpose of developing a solution to the problem.

*Program Objectives:* Contracts are let for such purposes as research and development, management studies, data processing, and general services. Between October 1, 1978, and August 31, 1980, 1,574 contract actions (basic contracts and contract modifications) valued at $151.7 million were let and administered. The Department of Housing and Urban Development's Office of Procurement and Contracts develops, coordinates, evaluates, and reviews acquisition policies, procedures, and operations and supervises procurement activities. The Department's program offices monitor contracts after they are let. *Abstract:* The report discusses: (1) procurement management controls and coding of consulting service contracts, (2) improvements needed in procurement planning by program offices, (3) actions needed to control and review contracts during the procurement process, and (4) improvements the program offices should make to upgrade the quality of contract files they maintain. The report contains several recommendations designed to improve management and control of procurement activities.

*Program Objectives:* The purpose of the program was to upgrade office furniture throughout all of the Department of Housing and Urban Development (HUD) Regions by correcting deficiencies in office furniture then existing in HUD field offices. *Abstract:* The first finding reported that HUD Regional and Field Offices have engaged in an office furniture upgrading program which does not comply with the Federal Property Management Regulations (FPMR). Furniture costing over $5.3 million was purchased from Fiscal Year (FY) 1977 through FY 1979. Another $3.8 million was scheduled for FY 1980 and 1981. It was recommended that the furniture upgrading be suspended and that any future purchases be justified in accordance with the FPMR. The second finding reported that the internal controls over furniture in the regional and field offices were poor. Furniture inventory records were not maintained on a current basis. Quarterly property reports were either not prepared or, if prepared, were not reconciled with the financial records maintained by the Regional Accounting Divisons. Furthermore, in two of the five Regions audited, reports relating to excess property were not prepared or were prepared incorrectly. No recommendation was made because corrective actions have been taken or are planned.

**Availability:** Agency

*Program Objectives:* Government National Mortgage Association (GNMA) was established as a Government corporation within the Department of Housing and Urban Development to administer mortgage support programs which could not be carried out in the private market. Federal National Mortgage Association (FNMA) was rechartered as a private corporation to provide secondary support for the private residential mortgage market. *Abstract:* The report contains two findings in the areas of handling of remittances and the separation of duties. Cash remittances received by GNMA are not put under accounting control until after the remittances are handled by two people. Duties and responsibilities of the Treasurer are not adequately separated to ensure adequate internal control over receipts and disbursements. GNMA has initiated actions that will partially correct the problems noted.

**Availability:** Agency

*Program Objectives:* The discretionary fund was established by the Congress to allow the Secretary of Housing and Urban Development to make grants for eight different activities. Assistance is provided for: (1) new communities, (2) areawide housing and community development grants, (3) community development for trust territories, (4) innovative grants for community development demonstration projects, (5) disaster recovery, (6) Community Development Block Grant inequities, (7) community development for Indian Tribes and Alaska Natives, and (8) technical assistance in planning, developing, and administering programs under Title I of the Housing and Community Development Act, as amended. *Abstract:* The review noted weaknesses in two areas: processing and approving innovative grant applications and allocating funds to the eight categories in the Secretary's Discretionary Fund. Recommendations were made and accepted to: (1) provide greater emphasis to innovation in the selection process, (2) develop specific guidance and examples that will enable application reviewers to make reliable consistent decisions on the innovative aspects of proposals, (3) issue a memorandum stressing adherence to requirements and regulations during the competitive selection process, and (4) prepare written procedures and require documentation showing the decisionmaking process.

**Availability:** Agency
**Geographic Relevance:** Region IV

*Program Objectives:* The Federal Property and Administrative Services Act of 1979 requires each Executive agency to maintain adequate inventory controls and accountability systems for property under its control. These systems are set forth in the Federal Property Management Regulations. In compliance with the cited regulations, the Department of Housing and Urban Development issued Handbook 2235.7, Personal Property Management, Inventory Control and Accountability System, dated April 1974. This Handbook established Department-wide system for the management of Government-owned property to include physical inventory methods and policies, and the requirements for the maintenance of personal property records. *Abstract:* The report concluded that there was: (1) unjustified replacement of office furniture, (2) inadequate accountability for personal property, (3) improvement needed for reporting and safeguarding furniture in storage, and (4) improvement was needed in internal controls.

*Program Objectives:* National energy conservation and savings in fuel and utility prices are priority goals for the Department of Housing and Urban Development (HUD). In furtherance of these goals, HUD issued regulations requiring, to the extent practicable, that all utilities consumed directly by tenants at PHAs be individually metered. PHAs are required to analyze all existing PHA owned projects not presently using individual utility metering, within 18 months after the effective date of regulations. Projects with a cost effective potential for conversion to individual meters should be converted within 30 months from effective date of regulations unless local office determines funds are not available for this purpose. *Abstract:* There is a need to update Utility Allowance Schedules and monitor excess utility consumption charges.

*Program Objectives:* The program aims to help finance construction or substantial rehabilitation of multifamily rental or cooperative housing for low and moderate income or displaced families. To assure that a project is built in accordance with the approved plans and specifications, the Department of Housing and Urban Development (HUD) performs inspections during project construction. This is accomplished by the use of HUD staff inspectors or independent inspectors engaged by the Atlanta Area Office on a fee basis. *Abstract:* The report discusses the need to improve the quality of the inspections of the insured projects and require more direct supervision of the inspectors' work and review of their reports by their supervisors. The report also discusses construction changes that are made without advance HUD approval. New procedures to correct these deficiencies are recommended.

*Program Objectives:* The objectives are to assure prompt and orderly disposition of properties which is essential to the continuous cash flow to the Treasury resulting from sales proceeds. *Abstract:* The report discusses the Atlanta Area Office (AO) need to improve its bid solicitation practices by soliciting the contractors more equitably, advertising the bids in the Commerce Business Daily, and allowing more time for contractors to prepare bids. The AO needs to justify why contracts are awarded when the cost exceeds its estimates by more than 10%. Also the AO needs to assure that bid specifications are complete before bidding and needs to improve monitoring of contractors' work to reduce the number of days needed to complete a job.

**Availability:** Agency
**Geographic Relevance:** State

*Program Objectives:* The Housing Counseling (HC) Program was authorized primarily to provide budget, debt management, and related counseling services. Subsequent amendments expanded the scope to provide counseling and advice to tenants and homeowners for property maintenance, financial management, and other matters to assist in improving housing conditions and in meeting responsibilities of tenancy and homeownership. *Abstract:* As a result of inadequate monitoring, 82% of the claims reviewed were found to be not valid for payments under the terms and conditions of the contracts. Housing Counseling Agencies' ratings for grant awards were inadequately documented. The AOs did not have written documentation to support their conclusions for 210 of 378 rating factors reviewed, 29 rating factor conclusions were contradicted by information obtained from other AO staff employees, and on-site reviews strongly contradicted rating conclusions that the HC agencies maintained acceptable client record systems. Housing Counseling agencies were approved by the Department of Housing and Urban Development (HUD) prior to meeting the minimum qualifying requirements, and HUD files lack adequate documentation that those requirements were met or contained information contradicting the conclusions that the requirements had been met. On-site monitoring visits were not made and/or adequately documented, and Handbook requirements and OPLAN goals were not met. The AOs did not have adequate controls to effectively monitor the submission of HC agencies' reports and invoices and to ensure that timely follow-up action was taken to obtain delinquent reports and invoices.

**Geographic Relevance:** State

*Program Objectives:* The objectives are to assure prompt and orderly disposition of properties which is essential to the continuous cash flow to the Treasury resulting from sales proceeds. *Abstract:* The report discusses the Boston Area Office Staff's need for more effective management control over negotiated contracts. The PD staff did not: (1) assure that a higher management review was made of proposed procurements in excess of $10,000; (2) require contractors to submit certified cost and pricing for noncompetitive procurements expected to exceed $100,000; and (3) prepare detailed contract negotiation memorandums supporting noncompetitive procurements. In addition, for SBA Section 8(a) Contractors PD staff did not prepare required in-house construction cost estimates for 3 of 20 contracts examined and made questionable upward revisions to estimates on 13 contracts.

**Availability:** Agency
**Geographic Relevance:** State

*Program Objectives:* Section 518(b) and (d) of the National Housing Act authorized the Secretary to make payments for the correction of structural or other major defects which so seriously affected the livability as to create a serious danger to the life or safety of the inhabitants of qualifying properties. Such properties were defined as any one, two, three, or four family dwellings covered by a mortgage insured under Section 235 of the Act or which is located in an older declining urban area and is covered by a mortgage insured under Section 203 or 221, either on or after August 1, 1968, but prior to January 1, 1973 [Section 518(b)] or, on or after January 1, 1973, but prior to August 3, 1973 [Section 518(d)], and was more than 1 year old at the date of the issuance of the insurance commitment. *Abstract:* The report discusses deficiencies in the Administration of the Structural Repair Program. The Complaint Officer disregarded established contracting procedures and abrogated eligibility decisions made under established processing and appeal procedures. As a result, selected contractors may have received an inordinate amount of work; excessive costs may have been incurred; and ineligible work may have been performed and paid for, as evidenced by this review wherein actual costs incurred for 25 claims exceeded the approved estimated costs by $329,492.

*Program Objectives:* The National Housing Act, as amended, authorized the Secretary to insure mortgage loans on new construction of multifamily housing projects. The mortgage shall be executed by a Mortgagor approved by the Secretary. Part of the insured mortgage loan is the Department of Housing and Urban Development's appraised value of the project's land. The valuation analysis is made for the purpose of valuing the property as security for a long-term insured mortgage. *Abstract:* The report discusses the need to improve the valuation process for multifamily sites in the Boston Area Office and the Manchester Service Office. Appraisers should more fully document their rationale in selecting comparable sales data, in making adjustments to comparable sales data, and in determining the last arms length sales transaction.

*Program Objectives:* The purpose of the program is to establish requirements for developing management controls to safeguard personal, proprietary, and other sensitive data in automated systems and to implement a computer security program and define a minimum set of controls to be incorporated into each agency computer security program. *Abstract:* The report discusses priorities and resources needed for computer security and improvements needed for safeguarding and managing magnetic tapes. The report recommends that Automatic Data Processing (ADP) operations: (1) be instructed to place additional emphasis on completing computer security tasks; (2) take the lead in gaining, through the other Assistant Secretaries, the active participation of other organizational components in conducting the risk analysis; (3) use the library to store all magnetic tapes that contain programs or data; (4) begin scratching tapes according to the inventory release dates in the event the tape management system's implementation is delayed; (5) place all off-site storage of magnetic tapes under the control of the tape librarian and require the tape librarian to track all off-site tape requests; (6) write and implement procedures to monitor user initiated expiration date extensions and to require approval of new expiration dates when data are transferred to another tape; (7) implement their plans to install software security features; (8) provide tools and techniques that will record access to automated systems and files and produce exception reports that will make unauthorized access to a specific system or file readily identifiable; and (9) provide documentation, training, and assistance in the use of these tools and techniques both to the office of ADP Systems Development and the users.

*Program Objectives:* The objectives are to assure prompt and orderly disposition of properties which is essential to the continuous cash flow to the treasury resulting from sales proceeds. *Abstract:* The report discusses the Hartford Area Office's need to increase competition and improve contract administration. Serious deficiencies were disclosed in virtually every aspect of the property disposition contracting process. Deficiencies were disclosed in preaward specifications and cost estimates; in assuring open and free competition by not maintaining an approved list of contractors, not soliciting the minimum number of contractors required, not opening all bids at the same time, not documenting reasons for negotiated vs. competitive contracts; and in not assuring work was completed on time and that inspections were made prior to final payment being processed.

*Program Objectives:* The program is intended to revitalize cities and urban counties experiencing a combination of characteristics used to measure physical and economic distress, as follows: loss of population and jobs; a stagnating or declining tax base; high percentage of poverty; low per capita income changes; high unemployment; and deteriorating housing. *Abstract:* HUD provides additional annual contributions (operating subsidy) required to help Public Housing Agencies (PHAs) maintain and operate projects, establish operating reserves, and offset operating deficit. No significant findings were developed.

*Program Objectives:* The objective is to provide decent, safe, and sanitary housing for low and moderate income people. *Abstract:* The rapidly rising costs of energy have had and will continue to have significant adverse impact on the financial condition of some 1400 federally assisted multifamily housing projects in New England, especially during 1980. Intensive energy conservation measures, to accompany reasonable rent increases, are needed to ward off financial insolvency and huge infusions of Federal subsidy.

*Program Objectives:* The objective is to provide Public Housing Authorities with financial and technical assistance in their development of decent, safe, and sanitary housing affordable by low income families. *Abstract:* The Field Offices (FOs) did not adequately monitor the construction of Turnkey public housing. The Construction Analysts did not make site inspections with required frequency, and they did not review payrolls and subcontractors' files or conduct employee wage interviews. As a result, the Department of Housing and Urban Development lacks assurance that the Turnkey projects are being built in accordance with approved plans and specifications and that contractors are complying with labor and equal opportunity requirements. The FOs attributed the deficiencies to insufficient staffing and reliance on Public Housing Authorities to monitor construction.

**Availability:** Agency
**Geographic Relevance:** Region V

*Program Objectives:* The program objective is to provide housing payments assistance to lower income families. ***Abstract:*** The purpose of the survey was to: (1) obtain and evaluate data and procedures relative to the establishment and application of Fair Market Rents (FMRs) to the Section 8 Program (Existing); and (2) identify areas for further audit. In July 1979, the Department of Housing and Urban Development (HUD) started using Annual Housing Survey data developed by the Department of Commerce for establishing the FMRs. Since that time, HUD has granted very few increases and exceptions to the published FMRs. The subject report closed the survey.

**Geographic Relevance:** Chicago Area Office

*Program Objectives:* The National Housing Act gives the Secretary the authority to manage, operate, renovate, and dispose of multifamily properties conveyed to the Department of Housing and Urban Development (HUD) under contracts of mortgage insurance. HUD Area Offices award contracts for on-site management of HUD-owned multifamily projects to individuals or firms (classified as Project Managers). Area Office Realty Specialists, under the supervision of the Chief Property Officer, provide day-to-day supervision of Project Managers. ***Abstract:*** The purpose of the review was to determine whether Project Managers were executing formal contracts for services on acquired properties. Services necessary for certain kinds of property maintenance, preventive maintenance, and sanitary work (i.e., elevator maintenance, security, garbage collection, etc.) are procured through service contracts. The service contracts can be entered into as separate procurements or under open-end procurement procedures. The Project Managers for 12 of the 17 projects reviewed had not obtained formal contracts for all services used. Formal contracts should be executed in accordance with the requirements of Handbook 4320.1 to assure the reasonableness of costs and provide noninterrupted service. The Realty Specialists offered various reasons for executing service contracts; most of the reasons were not valid. The Area Manager should require Project Managers to execute formal contracts for services used in the management of acquired properties. The remaining 11 multifamily projects should be reviewed for contract compliance.

**Availability:** Agency
**Geographic Relevance:** Standard Metro. Stat. Area (SMSA)

*Program Objectives:* Under the National Housing Act, as amended, the Department of Housing and Urban Development (HUD) insures mortgage loans made by private lending institutions on various types of housing, including multifamily rental housing. Multifamily properties are acquired by HUD when mortgagors default on a mortgage insured by the Secretary. The primary HUD objective is to dispose of all acquired multifamily properties at the earliest possible date and at the highest price obtainable in the current market. To accomplish this a program of operation including repairs and rehabilitation must be determined, whenever possible prior to acquisition, to be approved and initiated promptly after acquisition. The program, determined by the highest and best use of the project, should be formulated and implemented to place the property in a condition to obtain the highest occupancy ratio at maximum rental rates to provide the greatest possible return on the Secretary's investment. *Abstract:* The audit identified weaknesses in the Cincinnati HUD office administration of the repair program for HUD-acquired multifamily properties administered by contract project managers. It covered: (1) the need to develop repair programs; (2) noncompliance with procurement regulations; and (3) the need to improve monitoring of project manager activities.

*Program Objectives:* The objectives are to provide budget debt management and related counseling services to low-income families obtaining home loans insured under Sections 235 and 237 and Title II of the Housing Act and to provide counseling and advice to tenants and homebuyers for property maintenance and financial management. *Abstract:* The audit revealed that monitoring of Counseling Agencies needs improvement. Adequate monitoring would have prevented incorrect billings by agencies to the Department of Housing and Urban Development and provided better ratings of housing agencies. Counseling agencies' activity reports were not submitted timely or, when submitted, were not reviewed properly.

**Availability:** Agency
**Geographic Relevance:** Milwaukee Area Office

*Program Objectives:* The Area Office is the Department of Housing and Urban Development's (HUD's) principal point of contact for program participants. The Milwaukee Area Office is responsible for the day-to-day administration of HUD's programs in Wisconsin. The office had 171 employees as of November 29, 1980. The primary objective of the Property Disposition Program is to reduce the inventory of acquired properties in such a manner as to ensure maximum return to the mortgage insurance fund consistent with the need to preserve and maintain residential areas and communities. *Abstract:* The report contains the following three findings relating to the Area Office's property disposition activities: (1) data in Area Office files were not reviewed to determine whether Area Management Brokers (AMB) had identities of interest with contractors they used; (2) there was inadequate followup on apparent program abuse by an AMB; (3) a written justification for using negotiated methods of contracting for Project Managers was not prepared. It was recommended that the Area Manager: (1) take specific action against one AMB found to be using identity of interest contractors and establish procedures for review of file data to determine if other identities of interest exist; (2) establish specific followup procedures to be used when apparent program abuses are noted; and (3) prepare written justifications for negotiated Project Manager contracts awarded in the past and in the future.

**Program:** Rehabilitation Loans
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Housing Act of 1964, as amended (P.L. 88-560, title III, § 312; 78 Stat. 790; 42 U.S.C. 142b).
**Availability:** Agency
**Geographic Relevance:** Region V

*Program Objectives:* Under the Section 312 Rehabilitation Loan Program, the Department of Housing and Urban Development uses public agencies or grantees to process applications for loans to owners of properties to finance the rehabilitation of the properties. The maximum loan amount is $27,000 per dwelling unit. The term of the loan cannot exceed 20 years or three fourths of the remaining economic life of the structure after rehabilitation. Eligible multifamily properties may not have more than 100 units and must be located in low- or moderate-income neighborhoods or be occupied by low- or moderate-income tenants. *Abstract:* The memo notifies the Regional Administrator that the audit was terminated because the program was "frozen" effective March 4, 1981. The memo notes three potential weaknesses in the program: (1) no procedures were established to monitor compliance with the Rent Regulatory Agreement which is required by law on all multifamily properties given 312 Loans; (2) income from commercial rents was not considered when computing the maximum permissible rents used in the Rent Regulatory Agreement; and (3) one field office did not always perform the required compliance reviews prior to authorizing payments for repairs. It was recommended that the Regional Administrator instruct all Region V field offices on procedures to follow in order to assure compliance with the Rent Regulatory Agreement and perform all of the compliance as required prior to authorizing payments. Since no additional loans are being approved because of the freeze, no recommendation was made relating to the use of income from commercial rents when computing maximum permissible rents.

**Program:** Formula and Discretionary Grants
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Housing and Community Development Act of 1974 (P.L. 93-383, title I, § 101; 88 Stat. 633; 42 U.S.C. 5301 et seq.).
**Availability:** Agency
**Geographic Relevance:** Region 5

*Program Objectives:* The objective of the Community Development Block Grant (CDBG) program is to provide financial assistance to States and units of general local government for funding local community development programs. *Abstract:* The purpose of the pilot audit was to determine, in Region V: (1) the extent of the use of consultants; (2) if consultants received excessive fees; and (3) if the Department of Housing and Urban Development (HUD) adequately monitored grant recipients' use of consultants. Data for 6 HUD Area Offices in Region V showed that of 332 Fiscal Year (FY) 1979 discretionary grantees, 52% used consultants; however, only 2.5% of FY 1979 discretionary funds was committed to pay consultants' fees. On-site reviews of 10 grantees showed that only four used consultants to administer their CDBG programs. The consultants for the four grantees did not receive excessive fees for their services and did not engage in duplicate services. Also, the responsible HUD Area Office monitored the use of consultants while monitoring other grantee activities.

**Availability:** Agency

*Program Objectives:* Each executive agency is required to establish and maintain systems of accounting and internal control which must provide for prompt recording, physical safeguarding, proper accounting for, and prompt deposit of collections received by it. *Abstract:* The report discusses the Minneapolis-St. Paul Area Office's need to strengthen its internal controls over the receipt and deposit of funds. Specifically, the segregation of duties needs to be improved, the collections need to be reconciled to the deposits, mail should be opened in an area which is clearly visible to others, and joint verification of collections needs to be performed. The Area Office also needs to improve its controls over "official receipts" to assure that they are not misused. As a result of draft findings, the Minneapolis-St. Paul Area Office has begun to implement procedures which should eliminate many of the conditions noted in the findings.

**Availability:** Agency

*Program Objectives:* Each executive agency is required to establish and maintain systems of accounting and internal control, which must provide for prompt recording, physical safeguarding, proper accounting for, and prompt deposit of collections received by it. *Abstract:* The report discusses the need for the Department of Housing and Urban Development's Milwaukee Area Office to improve its controls over receipt and deposit of funds, official receipts, and multifamily housing fees. Deficiencies noted in the controls over receipt and deposit of funds included: funds received not being logged in, checks not being restrictively endorsed, duties not properly segregated, the Collection Register not reconciled to deposits, and the Administrative Division not telling program staff that it had received funds from program participants relating to their programs. The Area Office needed to improve its controls over official receipts by properly safeguarding the receipts, maintaining a control register, taking periodic inventories of the receipts, and voiding spoiled receipts. The Area Office also needed to improve communication between program branches in order to assure that fees due on early start projects were collected in a timely manner.

**Availability:** Agency
**Geographic Relevance:** City

*Program Objectives:* The imprest fund is the established amount of funds kept on hand in the Department of Housing and Urban Development (HUD) to pay small expenditures such as orders for supplies and local travel. *Abstract:* This report discusses the HUD Chicago Regional Office's management of its imprest fund. The report contains three findings. The first discusses corrective action not taken on deficiencies noted in a prior review conducted by the Office of Finance and Accounting. During this audit, the deficiencies were corrected. The second finding notes that subvouchers were improperly submitted to the imprest fund cashier for reimbursement purposes. The vouchers were paid without prior approval and/or necessary supporting documentation (receipts and invoices). In the draft finding, it was recommended that the Director of Administrative Services instruct the cashier not to disburse imprest funds without proper documentation supporting the expenditures and advance written approval. A memorandum dated 12/23/80, from the Acting Director, stated that the recommendations had been implemented.

**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* Requirements for Federal agency affirmative action programs (AAPs) were first established by Executive Order 11478 in 1969. In the 1972 amendments of Title VII of the Civil Rights Act, the Congress required agencies to maintain AAPs to ensure enforcement of Federal equal employment opportunity (EEO) policy; to apply the same legal standards of prohibited discrimination established for private employers to the Federal government; and to eliminate discrimination that Congress found existed throughout the Federal employment system. *Abstract:* Prior to formulating future AAPs, the Department of Housing and Urban Development's Indianapolis Area Office should conduct a comprehensive statistical assessment of its EEO "as is" condition, which at a minimum should include a workforce dispersion analysis for each race, national origin, and sex group within specific employment categories. The type of data reflected in this report represents a process which could be utilized for this purpose. The final AAP should include numeric hiring, promotion, and upward mobility goals for each underrepresented group. The goals should be based on limited opportunities identified by the statistical analysis and vacancy projections. The vacancy projections should include attrition, retirement, and changes in authorized employment ceilings.

**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The purpose of Fair Housing and Equal Opportunity (FHEO) Management Evaluations is to assist Department of Housing and Urban Development (HUD) Area Offices in the improvement of their overall FHEO programs. The results should help to improve the field office management functions, management services to HUD clients, and the impact and effectiveness of HUD programs administered by field offices. This evaluation of the Milwaukee Area Office found that the Minority Bank Deposit Program (MBDP) was successful in encouraging grantees and HUD recipients to support and/or increase their participation in the program, exceeding their Fiscal Year (FY) 1980 goal by 48%. The Affirmative Action program showed evidence of a systematic approach to affirmative action planning and program development. It appears as if this office has developed the mechanisms and resources necessary for effective affirmative action planning and implementation. Although a few minor refinements are needed in the planning process, it is believed that if personnel actions continue at the same committed level, the disparities identified in this report will be totally eliminated in the near future. Periodic reviews of FHEO's performance throughout FY 1980 and for the first quarter of FY 1981 indicate that the FHEO Director has performed in an exemplary manner in ensuring the efficient utilization of FHEO staff resources and management systems. Implementation of the Operating Plan (OPLAN) was promptly started in the first quarter and diligently pursued throughout the year, resulting in a 100% accomplishment level for all controllable activities.

*Abstract:* The purpose of Fair Housing and Equal Opportunity (FHEO) Management Evaluations is to assist Department of Housing and Urban Development (HUD) Area Offices in the improvement of their overall FHEO programs. The results should help to improve the field office management functions, management services to HUD clients, and the impact and effectiveness of HUD programs administered by field offices. This evaluation of FHEO management performance in the Indianapolis Area Office found that workload leveling objectives set forth in the "Narrative Advice and Guidance," which accompanied the Fiscal Year (FY) 1981 Operating Plan (OPLAN), had been met in only 2 of 12 program areas–monitoring of small cities recipients (single purpose) and section 3 plans. Only 63% of total non-leave FHEO direct staff years were spent on accomplishing OPLAN objectives, and 948 hours were charged to overhead-type activities–168 hours more than the FY 1981 allocation. Time recorded for completing a unit of work varied substantially from Central Office standards in all but six of the subprogram areas for which time was reported. As of February 1981, the office was underburning staff-years and, on the basis of the original FY 1981 allocation, was understaffed by one full-time position.

*Abstract:* The purpose of Fair Housing and Equal Opportunity (FHEO) Management Evaluations is to assist Department of Housing and Urban Development (HUD) Area Offices in the improvement of their overall FHEO programs. The results should help to improve the field office management functions, management services to HUD clients, and the impact and effectiveness of HUD programs administered by field offices. This evaluation of the Columbus Area Office's FHEO management performance found that workload leveling objectives set forth in the "Narrative Advice and Guidance," which accompanied the Fiscal Year (FY) 1981 Operating Plan (OPLAN), had been met in only 2 of 12 areas–the monitoring of UDAG projects and the reviewing of AFHM plan performance. Only 58% of total non-leave FHEO direct staff years were spent on accomplishing OPLAN objectives, and 2648 hours were charged to overhead-type activities–1087 more than the FY 1981 allocation. The time recorded for completing a unit of work varied substantially from Central Office standards in more than half of the subprogram areas for which time was reported. The Office was underburning staff years in all categories. Four of the EOSs were relatively new and had received very little, if any, formal training. In addition, the FHEO Director had not utilized available resources to either identify or address pervasive training needs. The Office's filing system did not provide for the prompt retrieval of information, since many materials were misfiled or not in chronological order.

Minority representation increased from 13 to 27 employees, and female representation increased from 50 to 93 employees. Current work force profiles do not illustrate the numbers and percentages of each race/ethnic/sex group in all occupations and grade levels, thereby obscuring the fact that Black males and Hispanic females are significantly underrepresented in the overall work force.

*Abstract:* The purpose of Fair Housing and Equal Opportunity (FHEO) Management Evaluations is to assist Department of Housing and Urban Development (HUD) Area Offices in the improvement of their overall FHEO programs. The expected results should improve field office management functions, management services to HUD clients, and the impact and effectiveness of HUD programs administered by field offices. The evaluation of the Detroit Area Office will be accomplished through a desk-analysis of TOPPS and Operating Plan (OPLAN) Automated Reports, Employees' RETS, and other data either available in the Regional OFfice or obtained during an on-site visit through interviews with key Area Office staff, file inspections, and/or empirical observations. The primary focus of the equal employment opportunity (EEO) evaluation is determination of whether or not patterns of exclusions or limitation of opportunity for minority groups and women exist in any discrete areas of the work force. The study will analyze the current EEO position, personnel actions affecting the work force, employment trends, and such other factors as affirmative action programs. The FHEO management operations evaluation will analyze OPLAN goal accomplishment, workload and human resource management, staff development and training, management control and information systems, liaison and technical assistance activities, and administrative services. Receipt of housing discrimination complaints will also be monitored.

**Availability:** Agency
**Geographic Relevance:** HUD Area Office, Little Rock, AR

*Program Objectives:* The Low-Income Housing Program was designed to provide decent, safe, and sanitary housing to low-income families at a rental rate they could afford. As part of the operations, utility checkmetering was conceived and implemented to support the national energy conservation goals. *Abstract:* The potential existed that utility allowances for public housing residents in the Little Rock, Arkansas, area were not equitable because the field office had not considered the number of tenants surcharged for excess utility usage, nor had they used current utility rates in establishing the dollar allowances. It was recommended that where 25% of the tenants are being surcharged, the field office review utility allowances, obtain current utility rates when establishing utility allowances, and ensure that Public Housing Authorities adopt and use the recommended allowances.

**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 207; 12 U.S.C. 1713).
**Availability:** Agency

*Program Objectives:* Pursuant to the provisions of the National Housing Act, as amended, the Department of Housing and Urban Development (HUD) insures mortgage loans made by private lending institutions on various types of housing, including multifamily rental housing for low- and moderate-income families. When a mortgagor defaults on the loan, HUD acquires the property. It is HUD's primary objective to dispose of all properties at the earliest possible date at the highest price obtainable in the current market. To accomplish this, a program of operation, including repairs and to assure the rehabilitation, shall be determined, approved, and initiated as promptly as possible after acquisition. *Abstract:* Based on a selective test of property disposition repair contracts, it was found that administrative controls over bidding and contract award processes were deficient and did not fully comply with prescribed procurement procedures. From the inspections of repair work and a review of inspection reports, instances in which HUD Field Office inspections were not sufficiently thorough or timely performed to assure the adequacy of repair work and to provide the necessary support for contract payments were found.

**Availability:** Agency
**Geographic Relevance:** HUD Area Office

*Program Objectives:* Section 223(f) of the National Housing Act authorizes the Secretary of the Department of Housing and Urban Development (HUD) to insure a mortgage executed in connection with the purchase or refinancing of an existing multifamily project. The infusion of new Federal Housing Administration-insured financing to existing rental projects is intended to assist in the conservation of existing housing resources. *Abstract:* The study examined the handling of the application for section 223(f) insurance submitted to the Fort Worth Area Office by the Delta Towers Apartments. The application and related data submitted, and upon which the Area Office relied in insuring the mortgage for $14,683,100, included significant understatements of expenses and overstatements of income, residential and commercial areas, and physical condition. Deficiencies were also noted in the processing and inspection procedures used by the Area Office personnel in determining the insured value. As a result of a review by the Fort Worth Area Office's Office of Audit, the HUD Control Office reviewed the processing of the project and determined that the project had been overinsured by $4,500,600. It is recommended that the mortgagor prepay the mortgage by the overinsured amount, that the matter be referred to the Multifamily Participation Review Committee for their use pursuant to 24 CFR, Section 200.210, and that the matter be referred to the Assistant Secretary for Administration for consideration of debarment pursuant to 24 CFR, Part 24.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Low-Income Housing Program provides financial and technical assistance to Public Housing Authorities (PHAs) for the development and operation of low-income housing projects. Under the turnkey method of construction, the PHA contracts with a developer to sell the PHA a completed project. *Abstract:* The report states that the turnkey program is successfully providing housing of an acceptable quality in a suitable environment, but the housing is not being provided in a timely and effective manner. The report discusses findings relating to the need for better processing controls to reduce processing time and costs, improvement of construction monitoring, and the need to obtain regional authorization before approving development programs requiring operating subsidy.

**Availability:** Agency
**Geographic Relevance:** Oklahoma City Area Office

*Program Objectives:* Under provisions of the National Housing Act, the Department of Housing and Urban Development (HUD) insures mortgage loans made by private lending institutions on various types of housing. When multifamily housing is acquired by HUD as a result of default by the mortgagor, it is HUD's objective to dispose of the properties as soon as possible at the highest price obtainable. This includes repair and rehabilitation of the rental properties, as necessary. *Abstract:* The potential existed for excessive repair costs because the HUD Area Office was not following HUD procedures in the areas of: (1) preparing a management and operating plan; (2) developing lists, with adequate descriptive coverage, of repairs needed at the projects requiring immediate correction to protect the health and safety of the tenants and general public, and those repairs needed to make the project marketable; and (3) controlling the cost of repairs. Existing HUD policies and procedures should be followed by the HUD office.

**Availability:** Agency
**Geographic Relevance:** Dallas Area Office

*Program Objectives:* Title I of the Housing and Community Development Act of 1974, Public Law 93-383, enacted August 22, 1974, established a program of grants to States and units of qeneral local government to aid in the development of viable urban communities. Community Development Block Grant (CDBG) funds received by the recipient became part of the recipient's general fund unless restricted by State or local law. Two types of grants are made under the Act, Entitlement and Discretionary grants. Discretionary grant funds are allocated to "Discretionary Communities" which have no guarantee of the amount of available funds and are made annually on the basis of competition among governmental units applying for such grants. Section 105(a) of the Act provides uses that can be made of CDBG funds. *Abstract:* Departmental requirements and guidelines pertaining to the waiving of CDBG audits were generally adequate. However, implementation of such requirements and guidelines by the Dallas Area Office (DAO) needs strengthening. The review of the CDBG programs administered by the four grantees visited indicated deficiencies totaling $236,209 which may have been detected had final audits of the program not been waived by the DAO.

**Availability:** Agency
**Geographic Relevance:** St. Louis Area Office

*Program Objectives:* The objective of the single family housing program is to facilitate homeownership and the construction and financing of housing. The objective of the multifamily housing program is to finance rental or cooperative housing for low- and moderate-income households. Objectives of Community Development Block Grants (CDBG) is to fund a wide range of community development activities. *Abstract:* The survey disclosed various deficiencies in both multifamily and single family operations. Appropriate followup action had not been taken by the St. Louis Area Office staff on questionable disbursements totaling $1.2 million at four projects. Processing of a multifamily project was performed in a questionable manner. Change orders were approved though not timely received. The Housing Division did not always know when a project received CDBG funds, possibly allowing windfall profits to sponsors. Funds required for escrow were not provided by mortgagors and security deposits were not fully funded. There was an inadequate number of field review of appraisers and inspectors and no documentation showing how fee inspectors were recruited and selected.

*Program Objectives:* The Low Income Public Housing (LIH) program is operated by Public Housing Agencies (PHAs) which are responsible for development, implementation, and management of housing programs. PHAs are authorized to engage independent public accountants or State and local auditors to conduct biennial audits of federally assisted LIH projects. *Abstract:* The report concludes that: (1) PHAs have complied with Department of Housing and Urban Development (HUD) requirements for contracting Independent Public Accountants (IPAs); (2) preferential treatment was not given to individual IPAs; (3) IPA audit reports were timely; and (4) HUD's monitoring of PHA contracting was adequate.

*Program Objectives:* The objective of the multifamily insured and direct loan programs is to make available to owners profit and nonprofit funds for construction of dwelling units. The Public Facility Loan program provided direct government loans to local governments to construct various local public facilities. *Abstract:* This report cites that control and review of independent public accountant audit reports were adequate in the Des Moines field office but reviews were inadequate in the St. Louis field office. The reports pertained to multifamily insurance and direct loan programs. Minor deficiencies were found in the Kansas City Regional Office handling of audit reports under the Public Facilities Loan program.

*Program Objectives:* The section 8 Existinq Housing Program's primary objective is to enable lower income families, by means of Housing Assistance Payments, to obtain modest housing in the private sector that is decent, safe, and sanitary. ***Abstract:*** The report states that the Department of Community Affairs (DCA), in many instances, was deficient in computing participants' contributions, rent credits, and Housing Assistance Payments (HAPs). As a result, some participants are paying more than their required portions of gross rent while others are paying less. Also, the DCA's method of allocating administrative costs among projects, and administrative categories within projects, was not supported. It is recommended that the DCA be instructed to recompute all HAPs for a certain time period and adjust accordingly. Also, a method of allocating administrative costs should be developed supported by acceptable documentation.

*Program Objectives:* Local Public Housing Agencies (PHAs) develop, own, and operate low-income public housing projects, financing them through the sale of tax-exempt obligations. The Department of Housing and Urban Development furnishes technical and professional assistance in planning, developing, and managing the projects and gives financial assistance. *Abstract:* The reports discuss: (1) PHA compliance with benefit/cost analyses provisions of the regulation; (2) unreasonable utility allowances that resulted in more than 25% of tenants being surcharged for gas consumption and electric usage; (3) utility allowances not updated and not established; and (4) area offices' utility reviews not completed. Recommendations were directed to the area offices to initiate utility allowance reviews and assure that PHAs update their established utility allowances and establish utility allowances that are adequate and will not result in surcharges to tenants in excess of 25% of all tenants.

*Program Objectives:* The U.S. Housing Act of 1937, as amended, authorizes the Department of Housing and Urban Development (HUD) to provide financial and technical assistance to Public Housing Agencies (PHAs) for the development and operation of low-income projects. The Turnkey Program was intended to expedite the development of such low-income housing projects and thereby fulfill HUD's primary goal of providing decent, safe, and sanitary housing affordable by families of low income. *Abstract:* The report discusses: (1) the need for better controls to reduce processing time and costs; (2) the fact that public housing sites were not adequately evaluated; (3) the need to improve construction monitoring; (4) the inadequate review by HUD field offices of PHA's solicitation and evaluation of proposals; and (5) the fact that field offices approved projects requiring operating subsidy prior to obtaining the Regional Administrator's approval.

*Program Objectives:* Program objectives are to dispose of all properties acquired through mortgagor default on Department of Housing and Urban Development (HUD)-insured mortgage loans at the earliest possible date at the highest price obtainable in the current market. To accomplish this, a program of operation, including repairs and rehabilitation, shall be implemented with a view toward placing the property in a condition to obtain the highest occupancy ratio at maximum rental rates so as to provide the greatest possible return on the Secretary's investment. *Abstract:* Philadelphia Area Office contracting activities were audited to determine whether contracted work had been satisfactorily performed and competition had been maximum, open, and free. It was determined that the Area Office needs to improve its efforts to comply with HUD regulations and guidelines on repair contracting. Recommendations included correcting repair deficiencies identified, considering not renewing the contract for the contractor involved, charging the specification contractor for time spent to change bid estimates, and establishing a recruiting program to attract new contractors.

**Geographic Relevance:** Region III, Philadelphia

*Program Objectives:* The Department of Housing and Urban Development's claims collection procedures are means by which the Department can record and follow up on moneys owed to the Federal Government by grantees, etc. *Abstract:* Claims Collection Procedures over Sustained Monetary Audit Findings were not adequately implemented. Claims Collection Officers and alternates were not designated in writing, and were not maintaining and submitting proper documentation for reporting sustained monetary audit findings. Claims Collection Officers' collecting and monitoring efforts over claims were inadequate. The recommendations of the study were that the Area Manager designate in writing the Claims Collection Officer and alternate, and the Claims Collection Officer schedule a training session for all staff involved with the processing and control of sustained audit findings to provide guidance in the proper implementation of related procedures.

**Availability:** Agency
**Geographic Relevance:** State

*Program Objectives:* The Department of Housing and Urban Development's (HUD's) primary objective is to dispose of all acquired multifamily properties at the earliest possible date at the highest price obtainable in the current market. To accomplish this, a program of operation including repairs and rehabilitation shall be determined, whenever possible prior to acquisition, to be approved and initiated promptly after acquisition. The program, determined by the highest and best use of the project, will be formulated and implemented with a view toward placing the property in a condition to obtain the highest occupancy ratio at maximum rental rates so as to provide the greatest possible return on the Secretary's investment. *Abstract:* The report states that the failure of the Newark area Office (NAO) to administer the repair program in an organized manner resulted in ineffective and inefficient control over repair program activities and expenditures. Thus, HUD's interests have not been adequately safeguarded. Moreover, it points out that the overall site inspection program maintained by the NAO has been inadequate and ineffective. This has resulted in increased costs to HUD and only prolongs the time period before acquired properties are ready for sale and ultimate disposition.

*Program Objectives:* The program objective is to provide loans to build elderly housing. *Abstract:* An elderly housing project was approved even though there were strong warning signals that it should not be approved. The measures taken to ensure feasibility were inadequate to project the Department of Housing and Urban Development interest. As a result, the project is unable to meet its expenses and foreclosure action has been initiated. Recommendations were made to the field office for improving procedures and issuing instructions so that the deficiencies disclosed in the report can be prevented in the future.

*Program Objectives:* The program provides for the drawdown of Community Development Block Grant rehabilitation funds in one lump sum and in advance for the purpose of obtaining benefits from private lenders. *Abstract:* Grantees who had lump sum drawdowns were frequently not realizing the benefits for which the drawdowns were approved. Grantees lacked the capacity to implement an effective program that could utilize all rehabilitation funds available to them as well as an adequate outreach program that would attract eligible persons for private lender loans. It was recommended that the area offices formalize procedures for approving lump sum drawdown agreements and document their analysis of grantee's capacity to use all funds during the period of the agreement. The area offices' monitoring should include an evaluation on whether the benefits upon which the lump sum drawdown agreements were justified are or will be realized during the period of the agreement.

**Authority:** Housing and Urban Development Act of 1968, as amended (P.L. 90-448, title I, § 106; 82 Stat. 490; 12 U.S.C. 1701x).

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Region IX

*Program Objectives:* The Housing Counseling Program was authorized primarily to provide budget, debt management, and related counseling services. Subsequent amendments expanded the scope to provide counseling and advice to tenants and homeowners for property maintenance, financial management, and other matters to assist in improving housing conditions and in meeting responsibilities of tenancy and homeownership. *Abstract:* As a result of inadequate monitoring 77% of the claims reviewed were found to be not valid for payments under the terms and conditions of the contracts. The Housing and Urban Development (HUD) Neighborhood and Consumer Affairs staff had no control over timely receipts of reports from housing counseling agencies and, therefore, could not check housing counseling agencies' invoices against them. Housing counseling agencies were approved by HUD prior to meeting minimum qualifying requirements and/or HUD files lacked adequate documentation that those requirements were met. Further deficiences in HUD program administration were cited in the report: (1) required site visits were not made or not adequately documented; (2) there was no follow-up system for annual performance review findings, and excess time was allowed for the clearance of findings; (3) HUD area offices did not have documentation to support 184 of their conclusions; (4) 111 rating conclusions were contradicted by written documentation in the files; and (5) the onsite review contradicted rating conclusions that the agencies maintained acceptable client record systems. The report contains specific housing counseling detail recommendations to correct the deficiencies disclosed.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Region IX

*Program Objectives:* The program subsidizes locally operated low-income public housing programs in which housing agencies engage or assist in the development and operation of public housing projects, new, existing, and rehabilitation. *Abstract:* Neither the San Francisco nor the Los Angeles Area Office had taken action to obtain or issue Actual Development Cost Certificates which are necessary to close out development costs of low-income conventional housing projects; lack of this action was mainly due to dealys in receiving IPA audit reports, low priority assigned, lack of control records, reluctance to use available countermeasures for noncompliance, and acquiescence on the part of the Area Offices to hold projects open as requested by housing authorities. The report recommends that the area offices determine which projects should be closed and assure their closure, establish controls over closing procedures, and assign responsibility for the closing process. The report also disclosed that the San Francisco Area Office did not exercise effective monitoring procedures in reviewing fund requisitions and assuring closeout of modernization phases on a timely basis. Also, both area offices did not properly control and expedite the required IPA audits, which must be performed before a project can be closed out. The timely closure of projects is important because undue delays cause excess development funds to remain unidentified and thus can not be applied to debt retirement, thus unnecessarily increasing total subsidy payments for debt servicing.

*Property Disposition Branch in the Field Offices.* (81-SF-108-0003).
1/15/81; 35 pp.
Patrick J. Collins
**OMB Funding Code/Title:** 86-4070-0-3-371 / Federal Housing Administration Fund
**Program:** Home Mortgage Insurance Programs
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 203; 12 U.S.C. 1709).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Region IX

*Program Objectives:* In the Department of Housing and Urban Development (HUD) field offices, the Property Disposition Branch (PDB) administers the property disposition activities of properties which have been conveyed to HUD under its mortgage insurance program. The PDB, under the Chief Property Officer, is responsible for administering the activities related to the acquired properties, from the time of acquisition to the ultimate sale. During the 2-year period ended June 30, 1980, the PDB of Region IX processed 442 single family and 10 multifamily projects acquired during that period, in addition to reducing the single family inventory by 704 projects. *Abstract:* The report concludes that the administration of the operation of the PDB is not satisfactory, primarily because the PDB has not placed sufficient emphasis on the hiring, training, and supervision of its staff to assure that the PDB programs are carried out in an economical, efficient, effective, and timely manner, but also because the Branch has not assured that the staff complied with the provisions of HUD policies and procedures and with applicable Federal Procurement Regulations. Consequently, the PDB has not adequately protected the interest of the Government in its efforts to rehabilitate, manage, procure, and sell properties under the mortgage insurance program. The report recommends specific steps which will aid the PDB management in fulfilling its responsibilities and duties, thereby reducing the incidence of abuses of the PDB program.

Patrick J. Collins
**OMB Funding Code/Title:** 86-4070-0-3-371 / Federal Housing Administration Fund
**Program:** Home Mortgage Insurance Programs
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 203; 48 Stat. 1248; 12 U.S.C. 1709).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** San Francisco Area Office

*Program Objectives:* The National Housing Act, as amended, confers upon the Secretary of Housing and Urban Development (HUD) the authority to rent, renovate, modernize, insure and sell for cash or credit any properties conveyed to him under contracts of mortgage insurance. The Property Disposition Branches in the HUD Area Offices are the principal centers for the property disposition activities necessary to preserve the interest of the Government until the acquired properties are resold. *Abstract:* The report disclosed that the Property Disposition Branch's compliance with HUD's policies and procedures and the Federal Procurement Regulations relating to contracting for the repair of HUD-owned single and multi-unit properties was not satisfactory, and that there was insufficient documentation of procurement actions and insufficient supervision of contracting personnel. As a consequence, HUD did not have assurances that supplies, equipment, and services were procured at the most advantageous prices. These deficiencies could be traced to lack of the Branch's efforts to maximize competition by requiring too few bids, insufficient circularization of invitations to bid, and insuffīceint bidding time. The report includes recommendations to eliminate all of the deficiencies cited therein.

*Repair Program for Acquired Multifamily Properties Administrated by Project Managers.* (81-SF-113-0001).
10/80; 37 pp.
Patrick J. Collins
**OMB Funding Code/Title:** 86-4070-0-3-371 / Federal Housing Administration Fund
**Program:** Administrative
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 235; 82 Stat. 477; 12 U.S.C. 1715z).
**Availability:** Los Angeles Area Office
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to dispose of all Department of Housing and Urban Development (HUD) acquired multifamily properties at the earliest possible date and at the highest obtainable price. To accomplish this, the program of operation includes repairs and rehabilitation plans prior to acquisition whenever possible, based on a determination of the best use of the project. During the HUD holding period of the property, it is managed by a project manager in accordance with recommendations developed by a management survey. *Abstract:* The report discloses that the administration of the repair program for acquired multifamily properties by HUD's Property Disposition Branch (PDB) is not satisfactory. Moreover, the PDBs and the project managers contracting for the repair of multifamily properties was found to be ineffective and the PDB's monitoring of the project managers has been inadequate. As a consequence, HUD's interest has not been adequately safeguarded. These conditions are, according to the report, primarily attributable to management's ineffective use and monitoring of available resources. The report recommends that the PDB strictly comply with HUD Handbook requirements, that its realty specialists increase the scope and depth of their inspections, that PDB's staff be more alert in its review of project managers' operations, specifically with regrad to solicitation of repair work, and that prompt disciplinary action be taken against contractors who have performed substandard work.

*Councils of Governments, Comprehensive Planning Assistance and Areawide Housing Opportunity Plan Program: Region IX.* (81-SF-151-0008).
5/29/81
**OMB Funding Code/Title:** 86-0104-0-1-451 / Comprehensive Planning Grants
**Program:** Grants to States and Other Bodies
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Housing Act of 1954, as amended (P.L. 83-560, title VII, § 701; 68 Stat. 640; 40 U.S.C. 461).

*Program Objectives:* The Comprehensive Planning Program is divided into two sub-programs: Comprehensive Planning Assistance Program is a planning assistance program established to encourage and financially support State and local governments and regional combinations of governments, or Councils of Governments, in upgrading their comprehensive planning and management capabilities. Areawide Housing Opportunity Program (AHOP) is a cooperative effort between an Areawide Planning Organization and participating jurisdictions within the AHOP area for the development and implementation of a coordinated areawide strategy for the distribution of housing assistance in such a manner as to promote the program objectives of increasing housing opportunities for low and moderate income and minority persons outside areas and jurisdictions containing undue concentration of such persons. *Abstract:* Controls by the Los Angeles Area Office (LAAO) over the AHOP awarded to the Southern California Association of Governments (SCAG) were not sufficiently adequate to assure that the program objective of facilitating the movement of low and moderate income and minority persons was met. As a result, SCAG procedures did not provide control to carry out this purpose and a number of physical projects were approved that were to be located in impacted, rather than non-impacted areas. Furthermore, the LAAO did not restrict counseling, referral, and relocation assistance to those persons moving to non-impacted areas. As a result, the approved projects were weakened to provide only for encouraging rather than requiring that persons receiving the assistance move to non-impacted areas.

**Geographic Relevance:** State

*Program Objectives:* The mortgage insurance program under the Federal Housing Administration (FHA) Fund is a system of mortgage and loan insurance programs to help finance the production, purchase, repair, and improvement of residential properties. *Abstract:* The survey disclosed that during valuation processing of multifamily projects, rental income was being overestimated, operating expenses were being underestimated, land valuations were inflated, and one project's environmental review rating was changed to show no noise exposure problems without adequate documentation to justify the rating change. In addition, the survey disclosed: (1) construction time extensions without adequate documentary support; (2) inadequate monitoring of the escrowing of mortgagor's funds for increase of construction costs by Department of Housing and Urban Development (HUD)-approved change orders; (3) possible excessive architectural design fees; and (4) inadequate review by the Loan Management Branch of project annual financial statements and monthly accounting reports. As a result of the foregoing deficiencies, projects were being insured at mortgage amounts in excess of the available net income to service the mortgage, sponsors were realizing windfall profits on land, final closings of mortgage for insurance purposes were inadequate, and questionable items disclosed in project annual financial statements and monthly accounting reports were not adequately followed up. Other findings disclosed: (1) single family examiners were not performing adequate mortgage credit reviews for single-family Mortgage Insurance Program purposes, (2) Single Family Servicing and Property Disposition Branch was not effectively using the Single-Family Mortgages in Default Report to detect possible indications of fraud and abuse, (3) the Sacramento Service Office approved excessive reimbursments to two employees for using privately owned vehicles, and (4) the Sacramento Service Office did not adequately control the use of General Services Administration (GSA) vehicles and HUD parking permits for GSA vehicles.

*Program Objectives:* The Assistant Secretary for Administration is required to establish a system within Headquarters which assures that closed internal audit recommendations have been satisfactorily implemented by the appropriate Headquarters managers. Each Regional Administrator must do the same for the Regional Offices and assure that Area Managers have similar systems for both internal and external audit recommendations. *Abstract:* The review was to determine if auditees were taking the actions agreed to as a result of Office of Inspector General/IPA audits. The review covered 23 findings in five reports with 50 recommendations. It disclosed that although most recommendations had been properly implemented, adequate action had not been taken on 18 of the 50 recommendations. The Office of the Inspector General recommended that the Regional Administrator for Region X expand post-audit verification procedures.

*Abstract:* In accordance with an out-of-court settlement agreement between the Department of Housing and Urban Development (HUD) and tenants residing in Section 236 projects, HUD agreed to provide $60 million for distribution to such tenants who paid increased costs of property taxes and utilities. There is a need to perform additional reviews of Section 236 Tax and Utility claims to assure that only eligible claism are approved for rebates. The Office of Inspector General recommended that additional tests of claims be made on a sample basis to determine the need for further reviews of claims. There is also a need to improve reports on and the review of investments of settlement funds to assure they are properly invested.

**Availability:** Agency

*Program Objectives:* The mortgagor of a multifamily housing project agrees to various controls over its operation by the Department of Housing and Urban Development (HUD). This includes the submission of financial statements which are reviewed by HUD for potential problems. *Abstract:* Inadequate reviews of financial statements permitted $2.7 million to be diverted from multifamily projects. Improvements were recommended in procedures, supervision, and training for loan servicers who are responsible for reviewing financial statements. There was ineffective use of the computerized system for reviewing financial statements. The system should be brought current and enhanced to identify diversions of funds. Unrecovered diversions were not referred for legal recovery. Handbook instructions need to be issued to require such action. Surplus cash statements were not properly prepared and reviewed which could result in unauthorized distribution of project funds. Handbook procedures should be revised to prevent such occurrences.

**Availability:** Agency

*Program Objectives:* The objective of the Section 8 Program is to help lower-income families afford decent, safe, and sanitary housing in the private market through rent subsidies. The Department of Housing and Urban Development (HUD) makes up the difference between what a lower-income household can afford and the fair market rent for an adequate housing unit. The objective of the Section 236 Program is to reduce rents for lower-income households through interest reduction payments. HUD pays interest subsidies to lenders which allows the mortgage to be paid off by the project owner at an interest rate as low as 1%. *Abstract:* Serious problems were found pertaining to the computation of Federal subsidies for Housing Finance Agency (HFA) projects under both the Section 8 and Section 236 programs. The failure of the HFA to reflect savings in subsidy requests based on reduced mortgages for converted projects, unused mortgage proceeds at completed projects, and unsupported expenses and/or development costs at certain Section 8 projects will result in annual excess subsidies of $1,453,373. Over the life of the projects, these excess subsidies will equal $44,871,285, and when an annual admustment factor of 5% is applied, the excess subsidies over the life of the projects will increase to $84, 491,737.

**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 244; 48 Stat. 1246; 12 U.S.C. 1715z-9).
**Availability:** Agency

*Program Objectives:* The home mortgage assignment program is designed to give financially distressed mortgagors an opportunity to avoid foreclosure and retain their homes. *Abstract:* Improvements are needed in the assignment program to reduce delinquencies. High delinquency rates are attributed to inadequate eligibility reviews, imposition of unreasonable payment plans, and inadequate servicing. Complete and accurate servicing records are not maintained by the Department of Housing and Urban Development field offices which may adversely effect the accuracy of reporting, control over workload, and meeting processing time-frame requirements. There is a need for improvement in the system for monitoring mortgagees by improving the procedures for selection, review, and followup with mortgagees.

**Availability:** Agency

*Program Objectives:* The objectives of the 223(f) program are to: (1) provide the funds to be used to enable existing multifamily housing to be physically maintained, (2) reduce upward pressure on rents, (3) liquidate troublesome balloon payment obligations, (4) permit developers to reinvest proceeds in new projects, and (5) contribute to the development of a national capital market for financing existing projects. *Abstract:* The stated objectives of the 223(f) program have not been consistently met because the program's requirements are not structured to assure their attainment. The lack of an ongoing system to measure the accomplishment of program's objectives has deprived Department officials of information needed to assess program effectiveness. It was recommended that the Department define the future role of the 223(f) program. If the program is to be continued, the objectives should be studied and either reaffirmed or redefined and program requirements should be modified to ensure that defined objectives are met. To enable the Department to continually assess the effectiveness of the 223(f) program, a system for evaluating the attainment of established objectives should be designed and adopted.

**Availability:** Agency

*Program Objectives:* The objective of the Section 8 Program is to help lower-income families afford decent, safe, and sanitary housing in the private market through rent subsidies. The Department of Housing and Urban Development (HUD) makes up the difference between what a lower-income household can afford and the fair market rent for an adequate housing unit. The objective of the Section 236 Program is to reduce rents for lower-income households through interest reduction payments. HUD pays interest subsidies to lenders which allows the mortgage to be paid off by the project owner at an interest rate as low as 1%. *Abstract:* The Housing Developmet Authority required that part of each project's mortgage fund a contingency reserve. The purpose of the reserve was to provide funding for future project operating costs. Since the reserve did not represent a project development cost, it would not have been included when computing the HUD subsidy. Because the reserve was included, excessive HUD subsidies of the $2.4 million have been paid as of December 31, 1979. It is estimated that over $60 million in excess subsidies could be paid over the life of the projects.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective is the development of viable urban communities by providing decent housing and a suitable living environment and expanding economic opportunities. Section 105(a) of the Housing and Community Development Act authorized the expenditure of funds for rehabilitation of buildings and improvements. *Abstract:* The special operational survey disclosed indications of irregularities, abuses, and administrative deficiencies among grantees and operating rehabilitation programs. Over $106 million, or one-third of the total costs contracted by entitlement grantees nationwide, was spent to rehabilitate properties. Yet, after completion of the rehabilitation work, such properties were found to have at least one serious violation of the Department of Housing and Urban Development's (HUD's) housing quality standards which affected the health and safety of the occupants and/or the livability of the dwelling. Additonally, grantees failed to follow good administrative practices in that property inspections were not always performed or were inadequately performed and documented, and sound contracting procedures were not followed. Because of the deficiencies: $85 million was spent on rehabilitating properties by grantees, yet 70% of the grantees failed to meet their rehabilitation goals; $4.5 million was paid for contracted work which was not done (18% of properties); $4.1 million was paid for contracted work which was poorly done (19% of properties); and over $19 million in excessive repair costs were incurred by 45% of the grantees. Nearly $17 million was spent on unneeded repairs. Moreover, data used by HUD to evaluate the grantees' Housing Assistance Plan (HAP) accomplishments are unreliable. It was recommended to the Assistant Secretary that: (1) grantees be limited as to the percentage of their rehabilitation budgets which can be used for repairing properties that will not meet Section 8 Exisitng Housing Quality Standards after rehabilitation; (2) he develop and publish specific administrative requirements which grantees must meet; and (3) he issue a notice to all grantees and HUD field offices reiterating the requirements for reporting rehabilitation properties as HAP accomplishments.

**Geographic Relevance:** National

*Program Objectives:* Objectives are to provide Federal mortgage insurance to facilitate construction and financing of a broad cross-section of rental housing and to improve housing and related facilities for the elderly. *Abstract:* Results of the review showed a slight improvement over the results from the previous audit dated April 16, 1980. However, the field offices were still not effectively obtaining Independent Public Accountant audit reports, reviewing the reports, and resolving regulatory violations or other problems. This was primarily due to the low priority assigned to this function by the field office management. Thus the field offices were not taking advantage of an important management device to identify and resolve problems promptly before they affect the viability of the projects and ultimately result in foreclosure and monetary loss to the Department of Housing and Urban Development.

**Availability:** Agency

*Program Objectives:* The Working Capital Fund (WCF) finances administrative services which can be performed more efficiently on a centralized basis. The Fund is financed from fees charged for services performed. *Abstract:* The audit was terminated because the WCF's staff was in the process of reconciling Accounts Payable, Accounts Receivable, and Personal Property and Equipment. In addition, the review indicated the WCF staff needed to correct the WCF accounts as follows: improve their collection procedures on outstanding receivables with the Federal Emergency Management Agency; modify the method used to account for contracts awarded near the end of the fiscal year; improve the procedures used in establishing year-end cutoffs for payables; change procedures used to record personal property and equipment accounts; and record property and equipment depreciation on a monthly basis. After the above corrections are made to the Working Capital Fund accounts, a follow-up audit will be performed.

**Geographic Relevance:** Region V

*Program Objectives:* To facilitate the insurance of home mortgages before completion of on-site improvements the Department of Housing and Urban Development (HUD) recognizes mortgagees' assurances of completion agreements. The Assurance of Completion is an agreement between HUD and the mortgagee that property repairs will be completed by a specified date. Funds for the repairs are placed in an escrow account. In order to assure that mortgagees comply with the terms of the Assurance of Completion, specific procedures have been established in a HUD Handbook for follow-up when repairs are not completed on time. *Abstract:* The audit was conducted at four field offices in Region 5. None of the offices followed established procedures to assure the timely close-out of the escrows. As a result, 1071 overdue escrows totalling $1,364,678 were open at the time of the audit. The offices cited higher priorities and lack of staff for not following the procedures. The offices can significantly reduce the time needed to monitor the escrows and assure their timely closeout by following the established procedures on a regular basis. The Regional Administrator should instruct all field offices in Region 5 to follow the established procedures on a regular basis.

**Availability:** Agency
**Geographic Relevance:** City

*Abstract:* The report contains three findings. The first discusses corrective action not taken on deficiencies noted in a prior review conducted by the Office of Finance and Accounting. During the audit, the deficiencies were corrected. The second finding is that subvouchers were improperly submitted to the imprest fund cashier for reimbursement purposes. The vouchers were paid without prior approval and/or necessary supporting documentation (receipts and invoices). In the draft finding, it was recommended that the Director of Administrative Services instruct the cashier not to disburse imprest funds without proper documentation supporting the expenditures and advance written approval. In a memorandum dated 12/23/80, from the Acting Director, the Audit Office was informed that the recommendations had been implemented. The deficiencies are considered corrected. The third finding discusses the imprest fund cashier's noncompliance with HUD Handbooks 1925.2 (Rev. 1), (Section 4-1), and 2300.2 (Section 10-7(B)). The Handbooks address the requirements to be met before imprest funds are advanced for travel pruposes. The draft finding recommended that the Director of Administrative Services instruct the cashier to indicate on SF-1038 that authorization was received from the accounting office to disburse imprest funds. In a memo dated 12/23/80, the Acting Director, Office of Administration, informed the Audit Office that the requirements for advancement of imprest funds for travel purposes were not observed. The Director of Administrative Services has instructed the cashier to indicate on SF-1038 that the authorization was received from the accounting office to disburse imprest funds for travel advances. The deficiency is considered corrected.

**Geographic Relevance:** HUD Area Office, San Antonio, TX

*Program Objectives:* The Low-Income Housing program was designed to provide decent, safe, and sanitary housing to low-income families at a rental rate they could afford. As part of the operations, utility checkmetering was conceived and implemented to support the national energy conservation goals. *Abstract:* The potential existed that Public Housing Authorities (PHAs) were not meeting the national goal to conserve energy because the field office had not identified PHAs requiring benefit/cost analyses and ensured that the analyses were made and, where cost effective, implemented. Field office utility reviews did not follow guidelines; therefore, there was no assurance that utility allowances provided tenants were reasonable. This could result in tenants paying more for rent than maximum percentage established by law.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** jurisdiction of Los Angeles Area Office

*Program Objectives:* The National Housing Act, as amended, confers upon the Secretary of the Department of Housing and Urban Development (HUD) the authority to rent, renovate, modernize, insure, and sell for cash or credit any properties conveyed to him under contracts of mortgage insurance. The Property Disposition Branches in the HUD Area Offices are the principal centers for the property disposition activities necessary to preserve the interest of the Government until the acquired properties are resold. *Abstract:* The report disclosed that the Property Disposition Branch's compliance with HUD policies and procedures and with the Federal Procurement Regulations relating to contracting for the repair of HUD owned single family and multifamily properties was not satisfactory. Also, the audit showed that the Property Disposition Branch did not adequately understand procurement instructions or adequately document what contracting actions had been taken. Because of the Property Disposition Branch's procedures, actions, and decisions, there was little assurance that contracts were awarded at the most advantageous price. The audit comments on the fact that the Property Disposition Branch's efforts to maximize competition on formally advertised contracts were ineffective, and the procedures used to award negotiated contracts were inadequate. Specifically, acquisition of appliances was found to be an estimated $25,000 above reasonable cost. The report attributes cited deficiencies to the fact that the Property Disposition Branch had not: made a concerted effort to promote greater volume for bidding on repair work, prepared cost estimates in all cases, reviewed cost estimates, prepared adequate repair specifications, and adequately and frequently inspected repair work. Appropriate recommendations are included in the report to eliminate cited deficiencies.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Department of Housing and Urban Development (HUD) employees complained that they had not been paid promptly and accurately under the new Terminally Operated Personnel/-Payroll System (TOPPS). They alleged that they received paychecks for wrong amounts due to incorrect withholding and overtime computations. Others complained about system delays in changing personnel status. Most complaints were attributed to four basic problems: (1) the system contained some design weaknesses; (2) the system was implemented before operating personnel were adequately trained; (3) there was no adequate means of resolving complaints; and (4) emergency salary payments were improperly treated. The TOPPS system design had not been submitted to GAO for approval because HUD had been unable to devote adequate staff to the system's documentation. Although the system contained procedures to control the accuracy of data inputs concerning pay and related records, it was not designed to deal with inaccurate data carried over from the old payroll system, completely process all transactions affecting summary pay records, or reject automated processing of pay for excessive amounts. The Secretary of HUD should revise the emergency salary procedures to comply with pertinent laws and Treasury requirements and start to collect the outstanding balances.

**Availability:** Agency; GPO
**Geographic Relevance:** National

*Program Objectives:* The purpose of the Section 810 urban homesteading program is to utilize existing housing stock to provide homeownership, thereby encouraging public and private investment in selected neighborhoods and assisting in their preservation and revitalization. The program provides for the transfer (without payment to States or units of general local government or their designated public agencies) of Secretary-owned, unoccupied, one- to four-family residences requested by such unit, State, or agency for use in an approved urban homesteading program. *Abstract:* This report contains narrative and tabular information on the administration of the Urban Homesteading Program including legal issues associated with the program, description of property and recipient characteristics, methods of financing rehabilitation, and program recommendations.

**Availability:** GPO
**Geographic Relevance:** National

*Program Objectives:* The purpose of the Section 312 Rehabilitation Loan Program is to provide direct, low-interest loans to eligible property owners to enable them to finance the rehabilitation of their properties. The program's rehabilitation activities are directed toward three national community development objectives: (1) elimination of slums and blights; (2) conservation or renewal of areas; and (3) improvement of housing conditions of low- and moderate-income persons. *Abstract:* This report includes an overview of program funding and loan characteristics, an analysis of program beneficiaries, and an assessment of program accomplishments. The report also examines important management issues including loan delinquency rates, technical assistance provided to localities participating, future needs, and administrative costs.

**Availability:** Agency; GPO
**Geographic Relevance:** National

*Program Objectives:* The Community Development Block Grant (CDBG) program is the Department of Housing and Urban Development's principal program to assist local governments in addressing their major community development needs and problems. The CDBG program was created by the Housing and Community Development Act of 1974. This Act consolidated seven major community development-related, categorical grant-in-aid programs. Rather than relying on a competitive grant approval process, a major feature of the new program provided entitlement funds to localities based upon objective need factors. *Abstract:* The Sixth Annual Report is comprised of two major parts. The first part discusses the CDBG program in 1980 and the patterns of program development over 6 years. The second part contains CDBG program data organized for use as a resource and as a supplement to the discussion in the first part.

**Authority:** Housing and Community Development Act of 1974 (P.L. 93-383, title I, § 119; 42 U.S.C. 5318).

**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The Small Cities Program is a competitive program in which communities ranging in size from the smallest incorporated village in the six States compete with cities up to 50,000 in population. *Abstract:* The purpose of this study was to determine if funds have been distributed in a manner which benefits one community size more than another. The study did not reach any firm conclusions on the funding patterns resulting from the competitive Small Cities Program during the first 4 years because of the impact of the hold harmless funds. In the first 4 years, 42% of the funds granted to communities under 50,000 was provided through the hold harmless provisions of the Act. In Fiscal Years 1979 and 1980, the hold harmless funding was totally phased out. An analysis of these years will more accurately reveal any funding patterns. Such a study is planned for the future.

**Program:** Formula and Discretionary Grants
**CFDA NO.:** 14.218
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Housing and Community Development Act of 1974 (P.L. 93-383, title I, § 101; 42 U.S.C. 5301).
**Availability:** GAO
**Geographic Relevance:** National; City

*Program Objectives:* The objective of the program is to develop viable urban communities, including decent housing and a suitable living environment, and expand economic opportunities principally for persons of low and moderate income. *Abstract:* The revitalization needs of the Nation's cities far outstrip the Federal Government's ability to provide funds to help provide decent housing, jobs, and neighborhoods. The Department of Housing and Urban Development's (HUD's) Community Development Block Grants allow cities to use Federal funds to finance a broad range of activities and services. However, GAO found that the lack of limitations on how funds may be used is diluting the program's impact. Furthermore, grantees need to focus block-grant funds where they can achieve visible long-term results. The Congress should examine the need for limitations in the block-grant program. Congressional examination of this program would be useful in evaluating the administration's proposal to restructure HUD's community development assistance programs so that limited funds can be used more effectively without excessive Federal intervention in the program's day-to-day operations.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to assist local communities in rehabilitating housing. *Abstract:* This report addresses the status of actions taken by the Department of Housing and Urban Development (HUD) on recommendations GAO made in a prior report on housing rehabilitation assistance provided under the Community Development Block Grant Program and the Section 312 Rehabilitation Loan Program. The report recognizes changes HUD made in response to the prior report and concludes that while these changes should save or permit better use of millions of dollars annually, HUD does not have reliable information on the effects achieved by the changes. Accordingly, the report recommends that HUD set performance standards and compare them with reliable management data for measuring how successful its actions have been and for determining what, if any, additional actions are needed to fully implement the changes GAO had recommended in the prior report.

**Authority:** Housing and Community Development Act of 1974 (P.L. 93-383, title I, § 101; 88 Stat. 739; 42 U.S.C. 5301 et seq.).
**Availability:** GAO
**Geographic Relevance:** National; City

*Program Objectives:* The objectives of the program are to develop viable urban communities, including decent housing and a suitable living environment; and to expand economic opportunities, principally for persons of low and moderate incomes. *Abstract:* There was a backlog of about $3.4 billion in unspent block-grant funds for formula entitlement grantees as of April 30, 1980. It could take grantees a number of years to use these funds at current and anticipated drawdown rates since new funds are being appropriated each year. HUD has taken a number of actions, both internally and with grantees, to promote faster spending of block-grant funds. The emphasis HUD is putting on spending block-grant funds in directives and guidance to its administrators and to entitlement communities creates the potential for ineffective and inappropriate use of such funds.

## HOUSING PRODUCTION AND MORTGAGE CREDIT

**E00603-001**
*HUD Should Strengthen Mortgagee Monitoring to Reduce Losses.* (CED-81-108).
6/9/81; 17 pp.
**OMB Funding Code/Title:** 86-4070-0-3-371 / Federal Housing Administration Fund
**Program:** Home Mortgage Insurance Programs
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 235; 48 Stat. 1248; 12 U.S.C. 1715z).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objectives of the evaluation are to assess the Department of Housing and Urban Development's (HUD's) (1) mortgagee review goal-setting processes, (2) the process of selecting morgagees to review, (3) the adequacy of review coverage, and (4) comprehensiveness in conducting the reviews. HUD-approved mortgage lenders (mortgagees) are responsible for originating and servicing HUD-insured single-family loans. If a mortgagee does not adequately assess the prospective home buyer's ability to repay a loan and/or does not provide proper servicing of the loan, defaults, foreclosures, and substantial losses to the Federal Government can occur. In fiscal year 1980, HUD sold 13,698 single-family homes that it had acquired after foreclosures at a loss of about $183 million (about $13,400 on the average for every property sold). Improved loan origination and servicing would reduce foreclosures and the Federal Government's losses. GAO found that HUD needs to improve morgagee monitoring by: (1) establishing more realistic mortgagee review goals; (2) concentrating on mortgagees who need monitoring the most; (3) providing more extensive review coverage; and (4) improving the quality and comprehensiveness of reviews.

## HOUSING MANAGEMENT

**E00604-001**
*Administrative Procedures and Controls Need Strengthening To Reduce Losses to HUD's Mortgage Insurance Fund.* (CED-81-29).
12/18/80; 17 pp.
**OMB Funding Code/Title:** 86-4070-0-3-371 / Federal Housing Administration Fund
**Program:** Home Mortgage Insurance Programs
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, title II, § 203; 48 Stat. 1248; 12 U.S.C. 1709).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to insure commercial lenders against loss in order to facilitate homeownership and the construction and financing of housing. The Federal Housing Administration (FHA) Fund covers about 40 active mortgage/loan insurance programs. *Abstract:* This report addresses opportunities for the Department of Housing and Urban Development (HUD) to reduce losses to its single-family morgage insurance program. The report points out that HUD was paying interest on morgagees' reimbursable expenditures from the date of default rather than from the date such expenditures were made. This practice unnecessarily cost the Government up to $2.5 million a year. In addition, HUD was: paying unreasonable costs to preserve and secure HUD-insured vacant properties, erroneously paying mortgagees for fees to inspect properties, and making duplicative property tax payments on HUD-acquired properties. The report recommends, among other things, that the Secretary of HUD: (1) require that interest paid on insurance claims be calculated from the date the expenditures are actually made; (2) establish a minimum dollar amount for preservation and security work that, if exceeded, would require additional justification; and (3) require mortgagees to submit documentation that provides assurance that fees claimed are for allowable expenses.

**Agency Contact:** General Accounting Office (202) 426-1780.

**E00604-002**
*Evaluation of Alternatives for Financing Low and Moderate Income Rental Housing.* (PAD-80-13).

**OMB Funding Code/Title:** 86-4070-0-3-371 / Federal Housing Administration Fund
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Housing Act, as amended (P.L. 73-479, § 8, 11; 48 Stat. 1246; 12 U.S.C. 1701 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* New and old alternatives for financing subsidized multifamily housing were compared in terms of: total costs over the lives of projects; operating lives of subsidized units; risk of financial failure; adequacy of incentives to lenders, builders, and investors; and tenant group served. The alternatives studied included the conventional public housing program; private lending insured by the Federal Housing Administration (FHA); State housing agency financing using tax-exempt bonds and private ownership; financing by public bodies who issue tax-exempt bonds under section 11 of the National Housing Act; and certain subalternatives and combinations of these methods. The long-term costs of providing housing through public housing and FHA insurance alternatives are much lower than the

State housing and section 11 options. While the financing alternatives studied provided the necessary enticements to encourage housing production, shortcomings still exist. FHA insured financing is much less costly than State agency financing, even when the cost of more expected failures is considered. Congress should: require the Department of Housing and Urban Development (HUD) to report periodically to the housing oversight Committees during the next 2 years on how well the needs of families and nonpoverty lower income households are being met by the various housing programs and enact legislation requiring that some percentage of housing assistance funds go to nonelderly households and particularly to larger eligible households above the poverty threshold. HUD should: provide budget estimates to Congress which show all major costs over an expected subsidy life, develop a strategy to overcome some of the problems of producing family housing, take steps to target some housing at the working poor, require state agencies to produce full rent comparability tests which should be subject to HUD review and approval, and avoid granting mortgage insurance to projects financed by State agencies.

**Availability:** Agency; NTIS; HUD User
**Geographic Relevance:** State

*Abstract:* Neighborhood Preservation Projects funded under the Innovative Projects Program were evaluated, focusing on Fiscal Years 1975-1976, the first two years of the program. In addition to an overview of the program and a brief analysis and compilation of activity under the 27 projects evaluated, six projects were selected for in-depth case studies. Each case study described the innovative approach tested, the project's successful aspects and its problems, benefits and costs of the project, and possible alternatives that could be made in the approach examined. The studies provided information to the Department of Housing and Urban Development, State and local governments, and others on the results of solutions applied to neighborhood problems in order to facilitate understanding and possible replication and adoption.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National; Standard Metro. Stat. Area (SMSA)

*Program Objectives:* The primary objectives of the Section 8 Housing Assistance Payments Program are to provide decent, safe, and sanitary housing to low income families and to promote the racial and economic integration of these families into their communities. *Abstract:* Findings show that the Section 8 New Construction Program recipients are primarily elderly and that there are relatively few minorities. A relatively high proportion of recipients move from deficient housing compared with the housing situation of eligibles. Participants in the Section 8 Existing Housing Program, in contrast, are generally representative of the eligibles. Both programs have high proportions (75% in New and 95% in Existing) of households with very low incomes–less than 50% of the local median. The units provided by the New Construction program provide substantial housing benefits to those in the program, but indications are that the program pays a premium above the market value of these units. Participants in the Existing program experienced some housing improvement as indicated by the reductions in housing deficiencies. Both programs enable black households, particularly the elderly, to move to neighborhoods of markedly lower minority concentrations.

**Geographic Relevance:** National

*Program Objectives:* The objective is to serve as a catalyst for the utilization of major data sets previously gathered by the Department of Housing and Urban Development. The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* The purpose of this research is to analyze the behavior of one sub-group, the elderly, within the EHAP. The goal of the analysis is to discover how the housing allowance experiment can help to better understand what kind of housing assistance is more appropriate for elderly-headed families with diverse characteristics and needs.

*Program Objectives:* The objective is to serve as a catalyst for the utilization of major data sets previously gathered by the Department of Housing and Urban Development. The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* The purposes of this research are to estimate and test the validity of structural economics models based on utility maximization of family decisions to move or rehabilitate their current dwellings to meet Department of Housing and Urban Development (HUD)-specified housing standards in the EHAP. A discrete choice model of the decision among four alternatives will be used: (1) reject HUD subsidy; (2) accept HUD subsidy and do not move or rehabilitate because housing already meets standards; (3) accept HUD subsidy and move to standard housing; and (4) accept HUD subsidy and rehabilitate the current dwelling to meet standards.

The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* Housing programs offer an income transfer that is earmarked for expenditures on housing; however, the form of the earmarked transfer varies among housing programs. For example, a conventional public housing transfer restricts the recipients' housing choice to public housing units for which the recipient is not responsible for maintenance of the unit. Under a housing allowance program, recipients' housing units are required to meet housing standards, but the recipients are not responsible for maintenance of their units. The purpose of this research is to estimate and compare the benefits of each housing program in terms of the value of the transfers to the recipients.

The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* An emerging group of housing consumers–households headed by women–are likely to have different housing needs, expectations, and opportunities than the traditional two-parent household due to their limited economic, social, and political resources. The purpose of this study is to examine this group of lower-income consumers in comparison with other lower income households in terms of: (1) the extent to which they experience dissatisfaction with their housing environments; (2) the frequency and effectiveness of different household response to remedy this dissatisfaction; and (3) whether housing allowances effectively lessen this dissatisfaction.

The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* Hedonic prices are used in a number of contexts such as in ex post evaluation of public policy programs, or in determining consumer behavior, etc. The theoretical basis for hedonic prices has not been fully developed. Indeed, there are two theoretical approaches typically cited. With two theories being used and different interpretations being attributed to hedonic prices due to different perspectives, one can question the validity of any study involving revelation of hedonic prices. Therefore, the purpose of this research is to review, modify, and extend these two approaches to narrow the gap between them. The results will be a more unified theory of hedonic measurement.

The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* The purpose of this study is to provide an empirical basis for evaluating policies to preserve or upgrade urban residential neighborhoods. Benefits from neighborhood change are related to households' willingness to pay for the changes in neighborhood public goods (goods such as neighborhood housing quality, ethnic composition, crime risk, and public service). This study will estimate the willingness to pay for neighborhood good changes in two ways: by looking at the effects of neighborhood good levels on households' residential choices and by looking at how neighborhood changes affect households' moving behavior.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Housing Assistance Supply Experiment examines the impact of housing allowances (vouchers) on housing markets, addressing questions about what happens to the price of housing when all income eligible renters and homeowners are offered allowance payments; the extent to which repairs, substantial rehabilitation, or construction of new units occur; the degree to which landlords, developers, mortgage lenders, and others get involved in the program; and the effect on neighborhoods within the metropolitan area resulting from the actions taken by eligible households. Findings show that allowances have virtually no effect on the price of housing, do little to stimulate new construction or major rehabilitation, but do help to preserve the supply of the existing stock of standard housing by stimulating repairs and continuing maintenance of units which do not meet housing standards.

*Program Objectives:* The purpose of the Housing Research Data Center is to serve as a catalyst for the utilization of major data sets previously gathered by the Department of Housing and Urban Development. The first data set ready for use results from the conduct of the Experimental Housing Allowance Program (EHAP); therefore, grants awarded under this project must use EHAP data. *Abstract:* The research proposed here will use standards of adequate housing to predict housing quality at one Experimental Housing Allowance Program site and at some Standard Metropolitan Statistical Areas surveyed by the Annual Housing Survey. One of several issues involves the housing condition of low income households which are eligible to participate in the allowance program but choose not to. If the allowance program selects households which live in units having a higher chance of passing the adequate housing standards, a comparison of the units occupied by allowance participants should reveal this difference.

**Authority:** Housing and Urban Development Act of 1970, as amended (P.L. 91-609, title V, § 504; 84 Stat. 1786; 12 U.S.C. 1701z).
**Availability:** NTIS
**Geographic Relevance:** National

*Program Objectives:* The primary objectives of the Section 8 Housing Assistance Payments Program are to provide decent, safe, and sanitary housing to low income families and to promote the racial and economic integration of these families into their communities. *Abstract:* The report evaluates the administrative fee paid to public housing authorities (PHAs) which administer the Section 8 Existing Housing Program. The study shows that the average PHA in the study spends $30 per unit month to run the program, of which 60% is for intake functions and the balance for ongoing program costs. PHAs in high cost areas, in rural areas, or with high intake rates face high costs. The percentage of elderly households served and local vacancy rates do not affect costs.

**Geographic Relevance:** National; City; County

*Program Objectives:* The purpose of the Community Development Block Grant (CDBG) program is to develop viable urban communities, including decent housing, a suitable living environment, and expanded economic opportunities, principally for persons of low and moderate incomes. *Abstract:* Contractor field associates are monitoring the first 6 years of the CDBG program in approximately 6 entitlement jurisdictions to determine how local CDBG programs and decision-making processes evolve in this time period. The field associate network is similar to that employed in the Brookings study of General Revenue Sharing. Central cities, satellite cities, and urban counties are included in the group. The first and second year reports on the project have addressed this theme. In addition, the first year report analyzed the distribution of funds nationally through the Block Grant funding mechanism. A third report on the third and fourth years of the CDBG focuses on local decision-making processes, with an emphasis on how intergovernmental interactions affect this process. A fourth report covering the fifth and sixth program years and focusing on program implementation is currently in process. Other research areas include benefit distribution, housing rehabilitations strategies, and indepth case studies of six communities.

**Availability:** Agency
**Geographic Relevance:** City

*Program Objectives:* The purpose of the Community Development Block Grant (CDBG) program is to develop viable urban communities, including decent housing, a suitable living environment, and expanded economic opportunities, principally for persons of low and moderate income. *Abstract:* This research will identify the impact of local community development activities financed with CDBG funds, estimate their magnitudes in quantitative and nonquantitative terms, and determine the distribution of the associated benefits among income groups and areas of cities. Of particular interest is the impact of CDBG programs on the quality of low-income housing, the location of residences affordable by low-income persons, the availability of public services, and the level and types of private investment decisions. The study also examines the role and influence of neighborhood organizations on the nature and effectiveness of Community Development (CD) activities. Those CDBG activities analyzed include housing rehabilitation, site clearance and redevelopment, and federally assisted municipal services and facilities. Emphasis is placed on the extent to which these are provided in and affect residential neighborhoods. Data are to be gathered from a sample of entitlement cities over a 4-year period with a variety of CD activities sponsored under the CDBG program sampled in each city. Both on-site impacts and induced effects on adjoining and other properties are estimated; direct or short-run effects along with indirect or long-run effects are measured.

**Geographic Relevance:** National

*Program Objectives:* The purpose of the Congregate Housing Services Program is to fund Public Housing Authorities and nonprofit Section 202 housing projects to provide nonmedical support services to their semi-independent elderly and handicapped tenants. *Abstract:* This study is an evaluation of the Department of Housing and Urban Development's congregate housing program. Current funding is on a demonstration basis only. The evaluation has two purposes. The first is to determine whether congregate housing services prevent the premature institutionalization of the semi-independent elderly and the handicapped. The second is to ascertain whether there are major differences in program administration and cost between congregate services provided through this demonstration and those funded by other services.

*Program Objectives:* The Department of Housing and Urban Development's (HUD's) Fair Housing Assistance Program (FHAP) is intended to effectively enhance the fair housing enforcement capabilities of State and local civil rights agencies. *Abstract:* This evaluation will study the extent to which FHAP has helped State and local governments with fair housing laws substantially equivalent to Title VIII in building capacity to process housing discrimination complaints. Comparisons will be made of processing by State and local governments before and after FHAP and between HUD processing and State and local procedures. The evaluation will also examine the development of data and management support systems and in the innovation projects component of FHAP, in which State and local governments compete for funds for proposals to strengthen their enforcement capacity.

**Availability:** Agency
**Geographic Relevance:** National; City

*Program Objectives:* The purposes of the Section 8 Neighborhood Strategy Areas (NSAs) Demonstration Program are to improve assisted housing delivery system by giving local governments a major role; to improve local neighborhood revitalization activities; and to minimize the negative effects of revitalization on the lower income residents of NSAs. *Abstract:* This research will assess the value to local government of the NSA approach to revitalizing neighborhoods and rehabilitating housing. The NSA approach is important because, in contrast to prior programs, it greatly expands local governments' responsibility for designing and administering their own housing rehabilitation programs. Furthermore, NSA enables cities to devise tailored strategies for combining development funds. These issues of local capacity and the opportunities inherent in local control are central to national discussions of extending the block grant approach to Federal housing programs.

**Geographic Relevance:** National

*Program Objectives:* The purpose of the Urban Initiatives Anti-Crime Demonstration Program is to develop, demonstrate, and evaluate improved, innovative community anticrime and security methods, concepts, and techniques to mitigate the level of crime in public housing projects and their secondary neighborhoods. *Abstract:* Through site-specific studies of 10 to 16 of the 39 demonstration projects, this evaluation will provide process and impact assessments of the Urban Initiatives Anti-Crime Demonstration Program in Public Housing. Included will be pre-post impact assessments of crime and victimization rates, vandalism costs, youth employment, residents' fear of crime, and related behavior and attitudes. The process assessments will include documentation of anticrime activities actually undertaken, when they are initiated, difficulties and problems in their implementation, when they are fully functional, and documentation and analysis of any immediate impacts of these activities. For both impact and process assessments, specific attention will be paid to the youth employment component (funded by the Department of Labor). The project will produce interim and final reports which, along with two conferences, are expected to provide guidance for future anticrime program and policy development and to assist public housing authorities to design and manage effective anticrime programs.

*Program Objectives:* The purpose of the Urban Development Action Grant Program is to assist severely distressed cities and urban counties in alleviating physical and economic deterioration by encouraging private investment in economic development and neighborhood revitalization projects, thereby creating or retaining jobs and strengthening the local tax base. The program is intended to stimulate private investment which would not otherwise have occurred. *Abstract:* The purpose of the evaluation is to assess the Urban Development Action Grant Program's impacts (such as job generation, revenue generation, and the simulation of private investment) and to assess the extent to which the grants are necessary for the kinds of economic development projects that they fund. Impact data are being gathered at the sites of 80 randomly selected Urban Development Action Grant projects located in 70 cities. A panel of real estate finance experts is also assisting in determining whether program funds, as opposed to private or other public funds, were necessary to initiate the projects funded by the program between the years 1978 and 1980. The evaluation began in April 1981 and will be completed in October 1981.

**Availability:** Agency

*Program Objectives:* The program seeks to restore and construct the facilities needed in National Park System areas to meet the objectives of resource preservation and visitor use programs. The construction program provides for: (1) rehabilitation and restoration of historic and cultural resources; (2) rehabilitation of operational structures such as visitor use and maintenance facilities, roads, bridges, trails, and utility systems; and (3) construction of new visitor use and operational facilities where the need exists. *Abstract:* The problems the National Park Service had been experiencing in carrying out its construction program according to the plan were partly due to factors beyond its control. Large fluctuations in funding for the program, unexpectedly high rates of inflation in the construction industry, large variations in bidder interest among construction projects, and a major increase in laws and regulations which complicate the planning for construction projects were all to blame. Nevertheless, the National Park Service needs to do some things better in order to have a more effective construction program. It needs to be more careful in preparing its cost estimates for construction projects, it needs to pay more attention to staying on schedule in the planning phases of its construction projects, and it needs to avoid unnecessary changes in the design of projects. It is recommended that the National Park Service use project managers to oversee the work on construction projects to assure clear responsibility for making sure the work on projects is carried out on time.

*Review of Office of Surface Mining Abandoned Mine Lands Program.*
6/18/81; 29 pp.
Bill Sinclair; Paul Balserak
**OMB Funding Code/Title:** 14-5015-0-2-302 / Abandoned Mine Reclamation Fund
**Program:** State Reclamation Program Grants; Federal Reclamation Program
**CFDA NO.:** 15.252
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Surface Mining Control and Reclamation Act of 1977 (P.L. 95-87, title IV, § 401-410; 91 Stat. 456; 30 U.S.C. 1231, 1232, 1235-1240).
**Availability:** Agency
**Geographic Relevance:** National; State

*Program Objectives:* State Reclamation Program Grants provide grants to States to reclaim lands damaged by past mining practices. The Federal Reclamation Program includes fee collection and assistance to States in developing their reclamation programs as well as abandoned mine lands reclamation projects undertaken by the Office of Surface Mining (OSM) Reclamation and Enforcement, the Bureau of Mines, and the Soil Conservation Service. The Department of Interior program will be aimed at correcting immediate hazards to public health and safety from past mining practices and performing reclamation work on large multi-State projects and projects in States without approved reclamation plans. *Abstract:* The review resulted in the following recommendations: OSM should facilitate and support the development of a single reclamation program in each State to be managed and administered by the State government; (2) OSM and the Bureau of Mines need to establish a better working relationship on the Abandoned Mine Land Reclamation (AMLR) program; (3) OSM should plan to transfer the emergency program to those States that want an emergency capability and have the necessary State legislation; (4) OSM should revise its Fiscal Year 1982 Federal AMLR staff request, basing its new request on a standard of $1 million of anticipated obligations per staff-year. For the State grant program, OSM should base its staff request on the standard of $2 million of awarded State grants per staff-year or a lower staffing configuration based on examining State programs twice a year and sampling projects during such examinations; and (5) OSM should plan to identify the Federal AMLR projects and their costs, and to obtain the necessary clearances and approvals in advance of the fiscal year that funds will be obligated.

**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Department of the Interior Organic Act of March 3, 1849 (43 U.S.C. 1451, 1457). Paperwork Reduction Act of 1980 (P.L. 96-511; 94 Stat. 2819; 44 U.S.C. 3506).
**Availability:** Agency
**Geographic Relevance:** National; State; City; County

*Abstract:* Findings were that costs for dedicated lines, WATS/800 service, FTS calls, and commercial toll calls have increased by $11 million in Fiscal Year (FY) 1981 for the Department of the Interior. In addition, costs for PBX telephone equipment leases have increased by $5 million in FY 81. The recommendation was that the Department can control and reduce costs by (1) improving the management of existing services, (2) reducing the redundancy of parallel lines by consolidating data transmissions, (3) converting voice to digital form and merging this form with compressed data transmissions, and (4) replacing obsolete PBX telephone systems with cost effective computer driven systems.

**Availability:** Agency
**Geographic Relevance:** National; State

*Abstract:* A study was conducted to determine the cost-effectiveness of old, outmoded computer equipment located at the Bureau of Reclamation. The study resulted in the findings that operational computer equipment located at the Denver Computer Center was obsolete. The study further revealed that a replacement of this equipment would result in a higher technology system and would result in a total annual savings of $310,248. The savings are derived from decreases in operating cost, maintenance cost, energy consumption, and personnel. In addition, by replacing the old equipment, greater system availability and less physical space will be necessary.

**Authority:** Federal Land Policy and Management Act of 1976, as amended (P.L. 94-579, title III, § 302; 43 U.S.C. 1732).

**Availability:** Agency

**Geographic Relevance:** National

*Abstract:* The purpose of the study is to improve analysis in the Office of the Secretary related to the Western coal industry. Today the Western coal industry is dominated by large scale operations. Western steam coal is sold almost exclusively under long-term contract. Many utilities committed to Western coal have developed their own captive operations. Prior to the 1970 Clean Air Act, interest by electric utilities in Northern Great Plains and other Western coal resources was limited to localized areas. New flexible boiler systems should aid the penetration of Western coal into nontraditional market areas. Currently, Western mines could increase capacity by 25% over production levels. Thirty-three million tons of long-term excess capacity is present.

**Availability:** Agency

**Geographic Relevance:** National

*Program Objectives:* The Federal Coal Management Program exists to lease Federal coal as needed for industrial and utility processes (including demand for synthetic fuels). Development of Federal coal resources must be conducted in a manner which considers the integrity of the physical and socioeconomic environment of the area concerned. *Abstract:* The study looks at the social benefits and costs of locating coal liquefaction plants away from the mine-mouth for three major coal regions. Specifically examined are intermediate urban and remote metropolitan sites for synthetic fuel plants using coal from the Powder River, Fort Union, and Four Corners coal regions. The study also looks at possible differences that may result if first generation or second generation liquefaction technologies are employed. The conclusions are that, in most circumstances, the mine-mouth location is to be preferred over the metropolitan and intermediate locations. There are circumstances, however, where the metropolitan location is preferred. This will be the case when the Fischer-Tropsch technology is used. The number of unemployed persons at the mine-mouth is relatively small, the mines are located in a water-scarce area, and expensive water conserving technology would be required at the mine-mouth but not the metropolitan location.

*Program Objectives:* The program aims at improved selection of Federal levels of leasing for Western coal. *Abstract:* The times to process a coal lease into an operating mine are: large mine–65 months to 80 months; small mine–38 months to 52 months. Of this amount, the average processing time for the Office of Surface Mining is 7.23 months for small mines and 23.64 months for large mines. A computer simulation of this process was built that allows prediction of production over time from any mix of lease sizes.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective is to discourage owners from destroying historic buildings by reducing tax incentives both for demolition of historic structures and new construction on their sites. *Abstract:* Tax incentives for the preservation and rehabilitation of historic structures were established by section 2124 of the Tax Reform Act of 1976 (P.L. 95-455). These provisions allow owners or lessees of certain depreciable properties to amortize the costs of rehabilitation over a 5-year period or to depreciate the costs at an accelerated rate. Lending practices affect the choice between new construction and rehabilitation because of their role in determining the availability and cost of capital and credit for rehabilitation projects. For a variety of reasons, the risk of rehabilitation is overestimated by the lending industry. This study identifies several steps in the lending process which result in this outcome. The use of traditional zoning mechanisms tends to discourage historic preservation. Examples include the widespread urban practice of overzoning, uncertainties in the process of obtaining changes in existing zoning (which discourages adaptive reuse projects), and the lack of clarity on the issues of downzoning. The last chapter compares the effectiveness of different types of historic preservation programs (e.g., grants, loans, and tax incentives).

**Authority:** Endangered Species Act of 1973, as amended (P.L. 93-205, § 7(c); 16 U.S.C. 1536).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Endangered Species Program was designed to protect endangered (in imminent danger of becoming extinct) and threatened (likely to become endangered) animals and plants. The long-term goal of the program is to restore these species to a state of being neither threatened nor endangered. *Abstract:* A reformulation was performed on a goal programing model which was developed for the Office of Endangered Species program for use in budget planning. The reformulation narrowed the coverage of the original goal programing model to just the recovery program (activities directly related to improving the condition of species already declared endangered). This new model defined classes of species improving actions and the associated relative costs and effect magnitudes of each action. As a management tool, this model can add to improvements in the program resource allocation process and to the overall understanding of the recovery program process.

## NATIONAL PARK SERVICE

**E00710-001**
*External Historic Preservation Program Review.*
2/82; In process
Russell K. Olsen
**OMB Funding Code/Title:** 14-0700-0-1-303 / Salaries and Expenses
**Program:** Administrative Programs
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Act of October 15, 1966 (P.L. 89-665, title I, § 101; 80 Stat. 915; 16 U.S.C. 470a). Historic Sites, Buildings and Antiquities Act, as amended (P.L. 74-292, § 2, as amended by; P.L. 93-291; 49 Stat. 666; 16 U.S.C. 462).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The External Historic Preservation Program provides assistance to States and private groups involved in preserving historic and pre-historic places. *Abstract:* This program review will assess the technical assistance efforts to States and private groups. It will evaluate the effectiveness of the integration of the program into the National Park Service. Also, it will identify the most effective organizational methods for operating the program, including the appropriate funding to support the necessary personnel to operate the program efficiently.

**Agency Contact:** National Park Service. (202) 523-5092.

**E00710-002**
*Better Management of National Park Concessions Can Improve Services Provided to the Public.* (CED-80-102).
7/31/80; 94 pp. + 8 app. (36 pp.)
**OMB Funding Code/Title:** 14-1036-0-1-303 / Operation of the National Park System
**Program:** Park Management
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Act of August 18, 1970 (P.L. 91-383, § 1, 3; 84 Stat. 825; 16 U.S.C. 1a-1, 1a-2).
**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* The Park Service contracts with concessions operators to provide visitors to National Parks with lodging, food, transportation and other services. Concessioners have been allowed to operate facilities with major safety deficiencies without adequate steps to correct the deficiencies. Evaluations and follow-up inspections of concessioners' performance are not made as required. Without inspections, the Park Service cannot be certain that visitors are receiving satisfactory service and does not have a firm basis for giving an annual performance rating to concessioners which is used for determining if the concessioners' contract should be renewed. Legislation also requires that rates concessioners charge the public be comparable to those charged for similar services outside the national parks. However, the Park Service has not established the proper criteria to ensure that the rates are proper. Congress should finance construction of needed facilities to accommodate park visitors whenever possible. Congress should amend the Concessions Policy Act to allow possessory interest only in those instances where no other alternative is available and then only if possessory interest is valued by the Government at no more than the original cost to construct or improve the facility less amortization over a period no longer than the estimated useful life of the facility or the term of the contract, whichever is shorter. If the contract is terminated by the National Park Service or the concessioner and the facility has not been fully amortized satisfactory concessioners should be permitted to sell their possessory interest to third parties at the best price obtainable, provided the operation is to be continued; however, the original cost should continue to be amortized and at the end of the amortization period the possessory interest would be extinguished and the Government would have total ownership. Unsatisfactory concessioners should be required to sell their remaining possessory interest to the Government at no more than its unamortized value.

**Program:** Federal Programs
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Land and Water Conservation Fund Act of 1965, as amended (P.L. 88-578, title I, § 1; 78 Stat. 897; 16 U.S.C. 4601-4).
**Availability:** GAO
**Geographic Relevance:** National; State; County

*Abstract:* GAO was requested to examine the land acquisition and management practices of the National Park Service at Lake Chelan National Recreation Area. Through the law which established this area, it was congressional intent that land acquisition costs be minimal, that a private community in the recreation area continue to exist, that commercial development not be eliminated, and that additional compatible development be permitted to accomodate increased visitor use. The Secretary of the Interior should require the Director, National Park Service, to develop a land acquisition plan for the Lake Chelan National Recreation Area. The plan should: (1) define compatible and incompatible uses based on the legislative history; (2) clarify the criteria for condemnation; (3) identify the reasons for acquisition versus alternative land protection and management strategies, such as scenic easements and zoning; (4) address recreational development plans for the area; and (5) establish acquisition priorities. The Director should also be required to sell back to the highest bidder, including previous owners or other private individuals, all land compatable with the recreation area. The Service could attach scenic or developmental restrictions to the deeds before the properties are resold to assure that their use will be consistent with the enabling legislation.

**E00711-006**
*Evaluation of a Project To Recover Tungsten from Searles Lake Brines.* (E-817).
2/9/81
**OMB Funding Code/Title:** 14-0959-0-1-306 / Mines and Minerals
**Program:** Minerals Research: Mineral Resources Technology
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Bureau of Mines Organic Act, as amended (P.L. 61-179, § 2; 30 U.S.C. 3).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** State

*Abstract:* A review was performed of funding and staffing levels, significant accomplishments, current work status, potential benefits to government and industry, and other potential uses for the technology developed. Portions of the research were found to be ready for technology transfer. Commercial application of the developed technology will increase tungsten reserves by approximately 50%. Much of this potential reserve is federally owned and leased. As a result, commercial production will result in royalty payments to the government. Other potential uses of the technology developed in this project were identified.

**Agency Contact:** Bureau of Mines. (202) 634-1040.

**E00711-007**
*Domestic Aluminum Resources: Dilemmas of Development.* (EMD-80-63).
7/17/80; 81 pp. + app. (37 pp.)
**OMB Funding Code/Title:** 14-0959-0-1-306 / Mines and Minerals
**Program:** Minerals Research: Mineral Resources Technology
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Bureau of Mines Organic Act, as amended (P.L. 61-179, § 2; 30 U.S.C. 3).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose is to develop domestic resources for critical and strategic minerals. *Abstract:* GAO concluded that the Bureau of Mines' nonbauxitic research effort is fundamentally misdirected. It has ignored the fact that the primary obstacles to the use of domestic aluminous resources are the rapidly rising energy and capital costs of aluminum smelting. Nonbauxitic alumina processing technology presently preferred by the Bureau of Mines is not economically competitive with conventional bauxitic alumina technology and the competitive gap is steadily widening. The Bureau of Mines' program has persisted in trying to develop a nonproprietary technology, disregarding proprietary research of both the Department of Energy and the private sector. Congress should: (1) refuse any requests for pilot-plant until the Secretary of the Interior publishes the essential comparative economic assessment of all public and proprietary nonbauxitic technology processes; and (2) direct the Office of Science and Technology Policy to review and coordinate Government nonbauxitic alumina and aluminum research programs. The Secretary of the Interior should: (1) identify and assist development of those technologies which offer promise of substantially reducing the energy and capital costs of making primary aluminum; (2) recalculate the operating and capital costs for each of the six nonbauxitic alumina processes reviewed in the miniplant program and the pilot-plant feasibility study; (3) conduct an analysis which specifies and evaluates technical unknowns of proprietary processes, and estimates the probable capital and operating cost implications for each process; and (4) re-examine the economic feasibility of developing alumina from alunite, dawsonite, and clay/carbo-chlorination. Finally the Director of the Office of Science and Technology Policy should review the programs of the Departments of the Interior and Energy to assure compatibility of objectives and research and support and implement a joint aluminum research program.

### E00712-012

*Evaluation of the Map Distribution Program.*
2/19/81; 27 pp.
Paul Beachemin
**OMB Funding Code/Title:** 14-0304-2-1-306 / Surveys, Investigations, and Research
**Program:** National Mapping, Geography and Surveys
**CFDA NO.:** 15.803
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Act of March 3, 1879 (20 Stat. 394; 43 U.S.C. 31).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The objective of the program is to effectively distribute Geological Survey mapped products to users. *Abstract:* The current map distribution system appears to be functioning reasonably well. Effectiveness is nearly impossible to assess because objectives have never been clearly spelled out. The current program has evolved without incorporating a strong market orientation. The dismemberment of functions could present difficulties in assuring the essential level of coordination required to effectively execute an accelerated market development effort.

**Agency Contact:** Geological Survey. (703) 860-7217.

### E00712-013

*Evaluation of the Environmental Study/Documentation Process within USGS.*

Richard Bernknopf
**OMB Funding Code/Title:** 14-0804-2-1-306 / Surveys, Investigations, and Research
**Program:** Earth Sciences Applications
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Act of March 3, 1879 (20 Stat. 394; 43 U.S.C. 31).
**Availability:** Agency

*Abstract:* This report is an examination of past work load and staffing for the Geological Survey's Environmental Impact Statement activities.

**Agency Contact:** Geological Survey. (703) 860-7217.

### E00712-014

*Evaluation of the High-Level Radioactive Waste Program.*
7/6/81; 44 pp.
Robert Ryder
**OMB Funding Code/Title:** 14-0804-2-1-306 / Surveys, Investigations, and Research
**Program:** Earth Sciences Applications
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Act of March 3, 1879 (20 Stat. 394; 43 U.S.C. 31).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The objective of the program is to provide sound earth science data to the process of selection of sites for the disposal and containment of hig-level radioactive wastes. *Abstract:* Program/policy oversight at the Director's Office level is not adequate, and there is no strong Bureau-level focus/voice for the program. The role of the direct-funded program in the national program is not clear. The management structure is adequate except that there is no interdivisional program coordinator officially designated by the Director. A clear and complete statement of policy should be developed. A consolidated program should be developed that integrates the direct and reimbursable funded programs. The upper management structure of the integrated program should be changed. The existing matrix management should not be changed.

**Agency Contact:** Geological Survey. (703) 860-7217.

### E00712-015

*Program Objectives:* The Computer Center Division provides systems analysis, programing, and computer operational support for the U.S. Geological Survey and in Washington for the headquarters of the Department of the Interior and its bureaus. *Abstract:* The reorganization of the Computer Center Division is necessary because of the placing of the Department's Washington Computer Center under the Geological Survey's management. This is part of a Department of the Interior initiative to collacate general purpose computers.

*Abstract:* In summary, this evaluation found the situation in Oregon to be in good shape and on an improving trend. The evaluation disclosed one OSO policy/practice which the team felt is in error and will be highly counterproductive if continued (extra steps in decision process). Two problem areas include line managers role in managing the planning process and filling the gap in National and OSO guidance for the NEPA process which illustrate bureauwide problems. Public participation and consistency at the State Office were other areas studied. The evaluation identified some areas of confusion and inefficiency due to gaps in SO activities.

**Availability:** Agency
**Geographic Relevance:** State

*Abstract:* This evaluation looked at the management of the resource programs in Colorado. Overall, it was found that the resource programs are managed very well. The resource programs that were found to have no major management problems included rights of way, forestry, rangeland management, wilderness, wildlife, coal and soil, and air and water. Four resource programs had some problems: (1) the air resources effort is in need of technical assistance, (2) the recreation and natural history management programs are suffering from a lack of funding, (3) the visual resource management program has been deemphasized to a status less than that of a separate program, and (4) the cultural resource management program is in extreme turmoil with a high degree of mutual distrust and suspicion between cultural resource specialists and managers.

**Authority:** Federal Land Policy and Management Act of 1976 (P.L. 94-579, title III, § 301; P.L. 95-352; 90 Stat. 2762; 43 U.S.C. 1731).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This evaluation examined management and policy of the following areas: (1) ADP policy and ADP management and communication; (2) training and skills; (3) hardware capability; and (4) role of the State Office ADP Coordinator. The evaluation found that there are gaps in policy guidance. The causes for these gaps include: (1) policy needs are not surfaced by managers; (2) senior management lacks sufficient knowledge and devotes inadequate time to understanding ADP; and (3) the necessary policy guidance to the field has not been issued. While past vacancies have caused problems in communication regarding ADP, actions are now being taken to improve ADP leadership and responsiveness to field needs. Training is at a low level from the Washington Office Directorate to the Area Manager level, and training is needed to raise the skill level in the Bureau and to facilitate the transition from manual systems to automated systems. The role of the State Office coordinator is not clearly understood, although most of the coordinators could communicate their duties and responsibilities very concisely.

**Availability:** Agency
**Geographic Relevance:** State

*Abstract:* This evaluation looked at the overall management of all programs in New Mexico. The effectiveness of the entire spectrum of New Mexico activities, programs, and resources were evaluated. In general, the management systems were found to be well conceived and well implemented. Recommendations to help the State Office provide better coordination and communication include: (1) house the entire State Office staff in one building; (2) ensure that goals and priorities are clearly stated and effectively communicated; (3) clarify roles where more than one management level is involved; (4) ensure that Resource Areas have operational responsibilities for all program areas within their boundaries; and (5) provide better coordination between various units and better communication to individual employees.

**Authority:** Federal Land Policy and Management Act of 1976 (P.L. 94-579, title II, § 201; P.L. 95-352; 90 Stat. 2762; 43 U.S.C. 1711).
**Availability:** Agency
**Geographic Relevance:** State

*Abstract:* This evaluation determined Montana's management effectiveness in implementing and coordinating the Bureau directives, policy, and guidance related land use planning, and the coal program. The majority of the professional staff believe that sound land use planning is essential and must be based upon accurate inventory and field data that have undergone professional analysis and interpretation. The Miles City District was emphasized in the evaluation because of its heavy workload, the national attention to their coal program, and their management style. The evaluation found that in this District there was no obvious sense of management commitment nor a clear understanding of the responsibility of management in the land use planning process. Overall, in Montana the evaluation focused on the procedures, working relationships, and coordination requirements of the three programs.

**Geographic Relevance:** National; State; County

*Abstract:* The goal of the study was to review the energy facility permitting program and to identify potential changes which the Bureau of Land Management can readily influence and/or implement to improve the program. The report identified 30 possible areas for improvement in the energy facility permitting process. Some of the findings dealt with improved paperwork systems and others with management structure and techniques. Some of the recommendations were aimed at improved relations with other Federal agencies or with State governments.

**Geographic Relevance:** National; State; County

*Abstract:* The District Office/Resource Area (DO/RA) Study team concluded that: (1) DO/RAs are an integral part of the Bureau of Land Management (BLM) organization and should be maintained; (2) there is no strategy and concept for guiding field office organization and management, and the Bureau should adapt a set of policies and practices as guidance to the field; (3) there is considerable role confusion between DO/RAs, and a new set should be adopted; (4) detached Resource Areas (RA) operate more effectively and should be detached whenever economically possible; (5) RAs require adequate support and should be given capabilities and authorities to carry out their programs; (6) span-of-control within District Offices and RAs is excessive and the Offices should be allowed to substructure; and (7) the Bureau's operating systems are having unintended effects on the field organization, and systems should be fully analyzed before approval and subsequent implementation. This report addresses the future role, mission, and functions to be assigned to the Bureaus's 218 DO and RA Office and the policy direction which BLM will take toward managing those offices. The purpose of the study and subsequent report was to analyze and recommend the most effective and cost efficient means of administering the lands and resources which GLM currently administers through its District and Resource Area Offices.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* A review was made of contract management practices with respect to the purchase of maps at the U.S. Geological Survey. Shortcomings included a questionable basis for awarding and amending contracts, vague contract provisions, lack of other guidance for contract administration, and inadequate cost estimating and contract monitoring. In addition to the award of a sole-source contract without adequate justification and modification of two contracts without seeking outside competition, ten contractors were orally requested to make major changes in the scope of their contracts which later resulted in significant cost increases. Contract monitors and program officials were not adequately trained, and there were no written guidelines for contract administration. The statements of work were not adequate, resulting in variable standards, delays, and reduced map quality. A program manual was not published until work on all the contracts was nearly completed. Cost overruns resulted from improper estimations of cost, delays caused by agency planning, and frequent changes in the basic format of the maps. The Secretary of the Interior should: (1) train contracting personnel, including designated contract monitors, prior to their appointments; (2) require personnel to organize, assemble, and manage available resource data prior to contracting; (3) devise specific contract provisions; (4) assure that sufficient efforts are made to comply with Federal procurement regulations in securing competition on all contracts and major contract changes; (5) assure that contracts are properly monitored; and (6) use fixed-price contracts rather than cost-plus-fixed-fee contracts.

*Followup on Actions Taken in Response to GAO Recommendations concerning Interior's March 1979 Shut-In and Flaring Wells Report.*
(EMD-81-23).
11/25/80; 15 pp.
**OMB Funding Code/Title:** 14-0804-0-1-306 / Surveys, Investigations, and Research; 14-1109-0-1-302 / Management of Lands and Resources
**Program:** Conservation of Lands and Minerals; Energy and Minerals Management
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Act of March 3, 1879 (P.L. 45-82, § 1; 20 Stat. 394; 43 U.S.C. 31). Minerals Act of 1947, as amended (P.L. 80-291, as amended by; P.L. 95-352; 30 U.S.C. 601). Outer Continental Shelf Lands Act of 1953, as amended (P.L. 83-212, § 2; 67 Stat. 462; 43 U.S.C. 1331-1343).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The U.S. Geological Survey is responsible for leasing, regulating, and supervising prospecting on outer continental shelf (OCS) lands. *Abstract:* In its review, GAO found that the U.S. Geological Survey's monitoring efforts regarding OCS shut-in well problems and restoration dates do not provide an independent assessment or periodic questioning of the validity of operator-reported conditions and estimates. In the area of natural gas flaring, the Survey's monitoring efforts are unsystematic and undocumented. The Survey needs more information to decide whether to approve operators' requests for long-term gas flaring and to determine whether unreported emergency flaring is occurring. The survey also needs to follow up to ensure that operators suspected of excessive flaring have actually ceased such flaring. The Department of the Interior has not complied with its legislated mandate because the report was not issued in the required timeframe, and the actions taken to prepare it leave much to be desired. Based on the manner in which shut-in and flaring data are gathered, monitored, and reported by the Department, the oversight needs of Congress are not being met. The Secretary of Interior should instruct the Director of the U.S. Geological Survey to: (1) review supporting data used by OCS operators so as to assess the reasonableness and validity of such decisions; (2) obtain justification from operators who continually extend planned restoration dates; (3) require operators desiring approval of long-term gas flaring to submit all of the information required by OCS Order No. 11 as necessary for deciding whether to grant such approval; (4) establish a more systematic and documented approach to monitoring long-term approvals for compliance with approval conditions; (5) follow up on operators suspected of excessive flaring to ensure that such flaring ceases; and (6) implement a followup program to ensure that no future utility wells that can be plugged and abandoned are reviewed and, where appropriate, plugged and abandoned, or modify existing regulations if it is believed enforcement of the regulation is inappropriate.

**Availability:** Agency
**Geographic Relevance:** Minnesota; Wisconsin; Michigan

*Program Objectives:* The Bureau of Indian Affairs Housing Improvement Program (HIP) is a repair and renovation program of existing housing on Indian reservations and in Indian communities. The HIP also provides for the construction of some new homes and assists qualified families in making down payments for the purchase of new houses. This program is aimed at improving the standards of housing for those Indian people who are not qualified to receive this assistance from any other source. *Abstract:* A Housing Program review was conducted in the Bureau's Minneapolis Area, which covers the states of Minnesota, Michigan, and Wisconsin. It was found that the program in this area is being administered well, with care and professionalism. However, a few places need improved documentation of applicant eligibility data. It also appears that the program and its objectives need to be explained further both to tribes and to participating families by the Bureau field housing staff. The Bureau's role in the inspection of construction projects should be defined more clearly.

**CFDA NO.:** 15.141
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Select Committee on Indian Affairs. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Snyder Act (P.L. 67-85; 42 Stat. 208; 25 U.S.C. 13).
**Availability:** Agency
**Geographic Relevance:** Montana; Wyoming

*Program Objectives:* The Bureau of Indian Affairs' Housing Improvement Program (HIP) is a repair and renovation program of existing housing on Indian reservations and in Indian communities. The HIP also provides for the construction of some new homes and assists qualified families in making down payments for the purchase of new houses. This program is aimed at improving the standards of housing for those Indian people who are not qualified to receive this assistance from any other source. *Abstract:* A housing program review was conducted in the Bureau's Billings Area, which covers the states of Montana and Wyoming. With the exception of a serious funding problem in one of the Agencies, the Billings Area housing program is well administered.

**Agency Contact:** Bureau of Indian Affairs. (202) 343-4876.

**E00713-010**
*Inappropriate Use of an Indian Trust Fund To Subsidize BIA Activities.* (FGMSD-80-78).
10/7/80; 21 pp. + app. (4 pp.)
**OMB Funding Code/Title:** 14-9973-0-7-452 / Miscellaneous Trust Funds: Tribal Trust Funds
**Program:** Miscellaneous Permanent
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Select Committee on Indian Affairs. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Bureau of Indian Affairs Appropriation Act (P.L. 64-80; 25 U.S.C. 123). Indian Appropriation Act (25 U.S.C. 155).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Indian Moneys, Proceeds of Labor Trust Fund is supposed to finance the Bureau of Indian Affairs' operation of Indian schools and agencies which should generate the trust fund's revenue. *Abstract:* The Bureau uses the fund to support other administrative activities that are funded directly by appropriations. Contrary to law, trust fund revenue is generated from sources unrelated to authorized trust fund activities. Although the fund should not finance the Bureau's operating expenses, it was used for such purposes. It was also used as a revolving fund to finance activities that support the Bureau's operations, other Federal agencies, and/or private organizations. Bureau officials told GAO that the trust fund was used for administrative expenses when appropriated funds ran out. By doing so, the Bureau used the fund to circumvent attempts by Congress to reduce the Bureau's administrative costs. The Bureau's appropriations accounting structure has procedures for handling reimbursements for goods and services. The trust fund is no longer needed to account for expenses and revenue of Indian agencies and schools operated by the Bureau. Congress should repeal legilation which authorizes the Indian Moneys, Proceeds of Labor Trust Fund and then, in consultation with the Bureau of Indian Affairs, it should transfer moneys to appropriate sources, such as other Indian trust funds, or to the Treasury as miscellaneous receipts. The Secretary of the Interior should require the Bureau to follow applicable laws and regulations to manage the types of revenue that have been placed in the trust fund and make sure the amounts of revenues from such sources are fully disclosed to Congress. The Secretary should also make certain the Bureau's revised accounting system, to be submitted to GAO for approval, includes adequate fund controls to keep its organizational costs within the amounts budgeted.

## BUREAU OF LAND MANAGEMENT

**E00714-001**
*Environmental and Other Problems Along the Alaska Pipeline Corridor.* (EMD-81-69).
4/8/81; 9 pp.
**OMB Funding Code/Title:** 14-1109-0-1-302 / Management of Lands and Resources
**Program:** Energy and Minerals Management
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Federal Land Policy and Management Act of 1976, as amended (P.L. 94-579, title III, § 302; 90 Stat. 2762; 43 U.S.C. 1732). Trans-Alaska Pipeline Authorization Act (P.L. 93-153; 87 Stat. 594; 43 U.S.C. 1651).
**Availability:** GAO
**Geographic Relevance:** State

*Abstract:* Stipulations incorporated in the grant of the right-of-way issued to the State of Alaska for the haul road of the pipeline require that all operations be conducted to minimize environmental damage and to protect wildlife and human beings. However, GAO found that: (1) fish passage has been blocked; (2) erosion has threatened haul road integrity; and (3) the road is sinking as underlying permafrost melts. Improper road maintenance and inadequate culverts have contributed to these problems, some of which have gone unresolved for more than 6 years. The Bureau of Land Management (BLM) is responsible for monitoring adherence to the haul road right-of-way grant and has worked with the State of Alaska to resolve some of the environmental problems. The State of Alaska developed a remedial action plan to correct some of the problems. However, the plan does not address all haul road deficiencies, and action on those which it does address has not been taken in a timely manner. The BLM land use plan for Federal lands adjacent to the haul road is based on the short-term assumption that the haul road north of the Yukon River will not be open to the general public until completion of the gas pipeline construction. Yet, a recent court decision may result in the haul road opening as early as this summer. Under the present land use plan, few haul road facilities or services will be available when the road is opened, with consequent environmental damage. The Secretary of the Interior should direct BLM to work with the State of Alaska in developing a plan which provides for the correction of haul road deficiencies. The plan should prioritize the improvements needed with preferred start and completion dates for each. In addition, the Secretary should direct BLM to revise its land use plan for Federal lands adjacent to the haul road and take into consideration State plans for public travel in the near future.

**E00714-002**
*The Impact of Geothermal Development on Stockraising Homestead Landowners.* (EMD-81-39).
4/16/81; 43 pp. + app. (9 pp.)
**OMB Funding Code/Title:** 14-1109-1-2-302 / Management of Lands and Resources
**Program:** Energy and Minerals Management
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Geothermal Steam Act of 1970, as amended (P.L. 91-581, § 2-27; 84 Stat. 1566; 30 U.S.C. 1001-1025). Geothermal Energy Research, Development and Demonstration Act of 1974 (P.L. 93-410, § 103; 88 Stat. 1082; 30 U.S.C. 1123, 1161).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program aims to reduce economic impediments inhibiting development of geothermal energy. *Abstract:* The Federal Government does not have the responsibility to negotiate what, if any, compensation is appropriate for owners of stockraising lands because geothermal development takes place on their lands. Whether or not Federal leasing takes place on their lands, owners of stockraising lands could be adversely affected by geothermal development activity taking place on the surrounding private, State, and Federal lands. The impacts could be greater if their land is leased. While protection bonds have been obtained, compensation agreements have been worked out between surface owners and lessees for only five of the nine leases issued so far. The landowners are concerned that their interests are adequately protected, and even profitable, as a result of geothermal development on and around their lands. It is doubtful that they will be satisfied with compensation that is less than the annual rentals and royalties they were to receive before the decision. The rents and royalties now go to the Federal Government. The landowners, under existing legislation, are entitled to compensation only for damages to their crops and tangible improvements. The Secretary of the Interior should: (1) require that the Bureau of Land Management (BLM) develop specific procedures for notifying surface owners of lease sales and the issuance of leases involving their land for geothermal as well as other mineral development; (2) take what steps he can to encourage lessees/developers and surface owners to enter into agreements concerning payment for damages to crops and other tangible improvements; (3) consider the BLM interpretation of the term tangible improvement as set out in the BLM memorandum of December 21, 1979; and (4) consider the extent to which compensation for indirect damages to tangible improvements should be allowed and whether the Stockraising Homestead Act should provide compensation for a decrease in the value of land and interference with its use and enjoyment.

## HERITAGE CONSERVATION AND RECREATION SERVICE

**E00715-001**
*Need To Reexamine the Federal Role in Planning, Selecting, and Funding State and Local Parks.* (CED-81-32).
4/22/81; 44 pp. + app. (77 pp.)
**OMB Funding Code/Title:** 14-5005-0-2-303 / Land and Water Conservation Fund
**Program:** Assistance to States
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Select Committee on Indian Affairs. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Land and Water Conservation Fund Act of 1965, as amended (P.L. 88-578, title I, § 6; 78 Stat. 897; 16 U.S.C. 4601-8).
**Availability:** GAO
**Geographic Relevance:** State

*Abstract:* GAO assessed how well the Heritage Conservation and Recreation Service (HCRS) has administered the share of a fund established under the Land and Water Conservation Fund Act of 1965 which was spent for State and local outdoor recreation to evaluate the basis for making grants from the fund and to provide recommendations to help guide future public funding of park and recreational land facilities. Under the Act, these plans must establish a framework for identifying recreational demands and needs and provide a basis for funding projects. Improvements are needed in State planning methods and in project selection, approval, and funding. HCRS and States also need to develop methods to evaluate the effectiveness of projects financed through the fund as a basis for subsequent planning. Congress should accept the President's proposed elimination of funding to States for recreational projects from the Land and Water Conservation Fund because States are becoming dependent on Federal funding sources for their outdoor recreation facilities. Should the fund continue, Congress should review the Land and Water Conservation Fund Act's matching requirement and the Act's corollary restriction against using Federal funding sources to satisfy the match. As part of this review, Congress should decide whether the matching requirement should be eliminated or modified so that the match must be satisfied by State or local origin funds and resources, exclusive of funds available under other Federal grant-in-aid programs. If the matching requirement is retained or modified, Congress should authorize the Secretary of the Interior to waive all or part of the required match for fiscally stressed grantees. Should the fund continue, Congress should amend the Land and Water Conservation Fund Act to provide the Secretary with explicit authority to discontinue funding projects in whole or in part in States where it is determined that existing projects are not adequately operated and maintained.

**E00716-004**
*Colorado River Salinity Control Program Effectiveness Study.*
5/22/81; 35 pp.
Brent Paul
**OMB Funding Code/Title:** 14-0684-2-1-301 / Construction Program
**Program:** Construction (Water Quality Improvement)
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Colorado River Basin Salinity Control Act (P.L. 93-320, title I, § 101; 88 Stat. 266; 43 U.S.C. 1571).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Colorado River Basin

*Abstract:* This report was initiated in response to concerns that the Colorado River Salinity Control Program was ineffective in meeting its defined requirements and that the management and organizational structure were primary causes. This program which affects seven Western States and is integrally intertwined with other water development of the region is responsible for planning and implementing salinity control projects in the Colorado River Basin. Findings included past problems in priorities, resource allocation, new technology development, and management authority and accountability. Conclusions include that recent progress is markedly improved over earlier times and that decisions, priorities, and actions were not always communicated well and therefore not in concert. Recommendations centered around "non-structural" alternatives which tightened up priorities, communications, resource allocations, and some procedural aspects of the program. It was felt that reorganization or personnel change was not in order.

**Agency Contact:** Bureau of Reclamation. (202) 343-6833.

**E00716-005**
*Federal Charges for Irrigation Projects Reviewed Do Not Cover Costs.*
(PAD-81-07).
3/3/81; 45 pp. + 2 app. (108 pp.)
**OMB Funding Code/Title:** 14-0684-0-1-301 / Construction Program
**Program:** Construction
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Reclamation Act of 1902 (P.L. 57-161, § 1; 32 Stat. 388; 43 U.S.C. 391).
**Availability:** GAO
**Geographic Relevance:** National; State; Congressional District

*Program Objectives:* The Bureau of Reclamation plans, constructs, and operates facilities to irrigate lands, furnish municipal and industrial or other water supplies, and develop related hydroelectric power and flood control in the 17 Western States and Hawaii. *Abstract:* The Water and Power Resources Service (WPRS) is responsible for most Federal irrigation projects and charges beneficiaries for the use of water. GAO reviewed several WPRS projects under construction to determine: (1) what charges will be made for the water; (2) to what extent the charges will cover the costs to the Federal Government for providing the water; and (3) whether farmers could pay more for the water without impairing their operations or seriously damaging their profits. Legislation originally stipulated that the charges for Federal water should return all the costs of building the irrigation projects; however, subsequent laws have not required certain beneficiaries to repay their share in full. WPRS fixes a price for its irrigation water according to the farmer's ability to pay for the water. This is the amount left over from an average farmer's gross income after deducting all production costs. This amount is much less than the Federal Government's cost of producing the water. A GAO economic analysis indicated that charging full cost for the water at a 7.5% interest level would be too expensive for farmers to afford Federal water. GAO found that charging a full-cost price without the interest charge, called the interest-subsidy price, would lower the cost of irrigated agriculture and increase yield enough so that farmers could probably increase their net income by buying Federal water. The Secretary of the Interior should direct the Commissioner of WPRS to perform an economic analysis of water projects not yet under construction that includes estimates: (1) based on the full cost of water to the potential irrigators, including interest, of constructing the irrigation facilities at WPRS projects; (2) of the increases in yields from only the acres that will actually receive project water; and (3) of the potential change in the project farmers' net incomes if they use Federal water to increase production.

## OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

### E00722-001

*Evaluation of the Office of Surface Mining's Mining and Reclamation Review Process.* (PE-80-6).
8/80; 12 pp.
Joseph Chesser
**OMB Funding Code/Title:** 14-1801-0-1-302 / Regulation and Technology
**Program:** Federal Regulatory Programs
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Surface Mining Control and Reclamation Act of 1977, as amended (P.L. 95-87, title V, § 502-504; P.L. 95-343; 91 Stat. 472, 510; 30 U.S.C. 1252-1254, 1272-1273, 1281).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Office of Surface Mining's (OSM's) responsibilities include the approval of coal mining activities on Federal lands or involving Federal coal under private land for which a mining operator has a valid lease. Following lease acquisition, the operator develops and submits a detailed mining and reclamation plan (MRP) that serves as the permit application. OSM reviews the MRP permit application for technical and legal adequacy and conducts the NEPA compliance. *Abstract:* The evaluation is to identify management problems and areas where OSM is not meeting its responsibilities of the mine plan review process. The principal deficiencies resulted from a failure of regional management to establish consistent schedules, to provide adequate direction to contractors, to assign experienced project scientists/managers to reviews, and to delegate sufficient authority. To increase regional efficiency, it was recommended that steps be taken to alleviate the problems cited.

**Agency Contact:** Office of Surface Mining Reclamation and Enforcement. (202) 343-5401.

### E00722-002

*Evaluation of OSM's Grants Management.* (PE-81-2).
9/80; 37 pp.
Delleane Tolliver
**OMB Funding Code/Title:** 14-1801-0-1-302 / Regulation and Technology; 14-5015-0-2-302 / Abandoned Mine Reclamation Fund
**Program:** State Regulatory Program Grants; Mineral Institutes; State Reclamation Program Grants
**CFDA NO.:** 15.250; 15.251; 15.252
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Surface Mining Control and Reclamation Act of 1977, as amended (P.L. 95-87, title VII, § 705; 91 Stat. 520; 30 U.S.C. 1295, 1298). (P.L. 95-87, title III, § 306; 91 Stat. 451, 452; 30 U.S.C. 1226). (P.L. 95-87, title IV, § 402; 91 Stat. 457; 30 U.S.C. 1232, 1235).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Office of Surface Mining (OSM) is responsible for fostering and supporting State governments and mineral resources/research institutes in the development of State regulatory programs and research projects concerning mining and reclamation. These programs represent OSM Federal assistance activity in grants and cooperative agreements with State regulatory agencies, colleges, and universities. *Abstract:* The evaluation found that OSM's grants management process was ineffective due to inadequate guidance and direction from OSM headquarters. Agency-wide policy guidance was needed because inconsistencies existed across OSM regional and headquarters offices in grant program administration and in policy interpretation. To alleviate these problems, it was recommended that grant policy and administration be centralized in headquarters.

**Agency Contact:** Office of Surface Mining Reclamation and Enforcement. (202) 343-5401.

### E00722-003

*Organizational Analysis of the Office of Surface Mining.* (PE-81-1).
3/81
Victor Christiansen
**OMB Funding Code/Title:** 14-1801-0-1-302 / Regulation and Technology; 14-5015-0-2-302 / Abandoned Mine Reclamation Fund
**Program:** All Programs
**CFDA NO.:** 15.250; 15.251; 15.252
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Surface Mining Control and Reclamation Act of 1977, as amended (P.L. 95-87, title II, § 201; 91 Stat. 449; 30 U.S.C. 1211 et seq.). (P.L. 95-87, title IV, § 401; 91 Stat. 456; 30 U.S.C. 1231 et seq.).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Office of Surface Mining (OSM) was created to assist States to develop and implement their own regulatory programs and to promote reclamation of previously mined areas. OSM will implement a Federal program in a State only when the State has failed to submit an acceptable program. OSM also has responsibility for regulating surface coal mining on Indian and Federal lands. *Abstract:* The study is to evaluate OSM's existing organization and relate it to future roles and responsibilities under the permanent program, to suggest appropriate change options in light of OSM's evolving mission, and to submit recommendations, if appropriate, to the Director for restructuring the agency. The study recommended realignment of headquarters functions to provide for three assistant directorates rather than five and to strengthen the Office of the Director in the areas of regulatory control, correspondence control, and program evaluation. The study recommended abolishing the existing five regional offices and replacing them with six field offices and two technical service centers.

**Agency Contact:** Office of Surface Mining Reclamation and Enforcement. (202) 343-5401.

### E00722-004

*Proposed Survey of State Enforcement Procedures.*
Victor Christiansen
**OMB Funding Code/Title:** 14-1801-0-1-302 / Regulation and Technology

**Department of the Interior: Office of Surface Mining Reclamation and Enforcement**

**Program:** State Regulatory Program Grants
**CFDA NO.:** 15.250
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Surface Mining Control and Reclamation Act of 1977, as amended (P.L. 95-87, title VII, § 703; 91 Stat. 520; 30 U.S.C. 1295).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* Under the interim regulatory program, the Office of Surface Mining (OSM) was responsible for assessing civil penalties for violations by permittees of permit conditions and for enforcing other provisions contained in Public Law (P.L.) 95-87 and the implementing regulations. However, as States obtain primacy under the permanent regulatory orogram, the States will assume primary responsibilities for administering P.L. 95-87. Therefore, OSM should be in a position to assist States in planning and implementing their enforcement programs. *Abstract:* The overall objective in performing this survey is to assist the Inspection and Enforcement Division in developing and disseminating information to States to assist them in developing and modifying their enforcement procedures and in instituting civil penalty assessment programs. The survey will make recommendations for improving the process.

**Agency Contact:** Office of Surface Mining Reclamation and Enforcement. (202) 343-5401.

*Abstract:* Unsafe, unsanitary conditions in many State prisons and local jails endanger the health and well-being of inmates, correctional staff, and visitors. Correctional institutions need adequate maintenance programs, trained personnel, and inspection programs which can detect deficiencies and ensure that they are corrected. The Attorney General should: (1) expand the role of the Civil Rights Division so that it assists troubled institutions desiring assistance in solving environmental health problems; (2) upgrade the Marshals Service's jail inspection services program by including better training, using its resources and expertise to assist jail administrators and inspectors in improving their effectiveness, and exploring the possibilities of increased coordination and cooperation with State and local inspection agencies; (3) direct the Bureau of Prisons to work with the National Institute of Corrections to set up a mechanism for disseminating information on its environmental health experience to correctional officers at all types of institutions, and for opening more Bureau training to State and local officials; (4) encourage and assist State and local officials to develop maintenance programs by directing Law Enforcement Assistance Administration to support the development of maintenance standards to be used as models by correctional officials and of detailed guidelines which will assist administrators in implementing plans to meet the standards; (5) establish a program within the National Institute of Corrections for disseminating information regarding equipment and materials suitable for correctional facilities; and (6) encourage the National Institute of Corrections to expand its environmental health training programs to reach a larger number of correctional officials and include a wider range of safety and sanitation programs.

## CRIMINAL DIVISION

**E00804-001**
*Automated Litigation Support Project Assessment: Central States Pension Fund Case.*
12/80; 32 pp.
Merle Frank
**OMB Funding Code/Title:** 15-0128-0-1-752 / Salaries and Expenses, General Legal Activities
**Program:** Criminal Matters
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-773; 15 U.S.C. 1171 et seq.). Requested by Criminal Division Management.
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The objectives of the program are to: provide computer printouts which illustrate the movement of funds between the principals of the investigation and their organizations; provide an on-line hypothesis testing capability for use in reconstructing transactions between the principals of the investigation and their organizations; and provide prosecutors with demonstrative exhibits of computer-detected evidence correlations for use in grand jury and trial presentations. *Abstract:* The report assesses the computer support provided to Federal prosecutors in the Central States Pension Fund case. Covered is the genesis of the project, an overview of the system and its operation, a summary of the system's development and funding, the status of the case, a description of the project's objectives, and a discussion of the various problems which were encountered by personnel working on the project.

**Agency Contact:** Criminal Division. (202) 633-5745.

**E00804-002**
*Automated Litigation Support Project Assessment: Georgia Bank Fraud Case.*
1/81; 20 pp.
Merle Frank
**OMB Funding Code/Title:** 15-0128-0-1-752 / Salaries and Expenses, General Legal Activities
**Program:** Criminal Matters
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 611; 31 U.S.C. 501-526). Requested by Criminal Division Management.
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The objectives of the program are to: provide agents, auditors, prosecutors, and the grand jury with printouts showing bank account deposits, withdrawals, and loan transactions by person and date (this information enabled the investigation team to trace the flow of funds and identify possible cause and effect relationships which indicate potential criminal activity); and provide prosecutors with demonstrative exhibits for use as evidence in court proceeds after the indictment is returned. *Abstract:* The report assesses the computer support provided to Federal prosecutors in the Georgia Bank Fraud case. Covered is the genesis of the project, an explanation of the computer system's development and operation, and a summary of the system's procedures, objectives, and costs. The outcome of the case is also discussed, as are the various problems which were encountered by personnel working on the project.

**E00804-003**
*Justice Needs To Better Manage Its Fight against Public Corruption.* (GGD-80-38).
7/24/80; 37 pp. + 4 app. (29 pp.)
**OMB Funding Code/Title:** 15-0200-0-1-751 / Salaries and Expenses
**Program:** Coordination of Investigations
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 28 U.S.C. 533).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County; Congressional District

*Program Objectives:* In 1977, the Department of Justice designated public corruption, which is crimes by public officials, as one of the priorities among its law enforcement activities. Justice had already established the Public Integrity Section (PIS) as a focal point for coordinating its attack on public corruption. *Abstract:* GAO found that management and coordination of public corruption activities by PIS need to be improved. PIS needs to effectively plan public corruption efforts and develop accurate and comparable data on these efforts. To insure that public corruption activities are adequately coordinated and managed, the Attorney General should require that: (1) a definition of public corruption be delineated to enable consistent reporting of cases by the U.S. attorneys; (2) a system be developed and implemented to identify and classify public corruption cases to enable future evaluation of the cases handled; and (3) PIS take a more active role in managing the public corruption effort. With regard to the Economic Crime Enforcement Program, the Attorney General should require the development of a plan that will enable Justice to fully evaluate the success of this new program and identify areas where improvements could enhance its efforts. The Attorney General also needs to clarify the roles of this program and its relationship to the responsibilities of PIS.

*Special Agents Should Be Phased Out as FBI Crime Laboratory Examiners.* (GGD-80-60).
7/18/80; 56 pp. + app. (15 pp.)
**OMB Funding Code/Title:** 15-0200-0-1-751 / Salaries and Expenses
**Program:** Investigative Support
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 28 U.S.C. 533, 534).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Within the criminal justice community, the high costs of the special pay and retirement benefits granted to law enforcement officers have prompted analysis of the need for officers to staff support positions. Of the four major Federal crime laboratories, only the Federal Bureau of Investigation (FBI) uses special agents as laboratory examiners. The FBI believes that special agent examiners bring an extra dimension to the analysis of physical evidence. It claims that agent/examiners provide superior examination services, make better court witnesses, and perform better field support functions. While having special agents as examiners has some benefits, the benefits are largely intangible and infrequent and, therefore, do not outweigh the added costs. The FBI laboratory is concerned that civilian staffing would lead to personnel turnover, resulting in an unstable workforce and high training costs. However, other Federal crime laboratories report no problems in retaining personnel. The use of special agent personnel impose significant additional costs compared to civilian personnel. These costs arise because criminal investigators are usually higher graded and receive special retirement benefits. GAO estimates that annual cost savings of over $.5 million are possible. GAO recommends that the Attorney General direct the FBI to develop and implement a plan leading to the orderly transition to a civilian workforce in the FBI crime laboratory.

*Women in Prison: Inequitable Treatment Requires Action.* (GGD-81-6).
12/10/80; 38 pp. + app. (12 pp.)
**OMB Funding Code/Title:** 15-1060-0-1-753 / Salaries and Expenses
**Program:** Inmate Care and Custody
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 18 U.S.C. 4082).
**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* Women in correctional institutions do not have access to the same types of facilities, job training, jobs in prison industries, and other services as men prisoners. Inequitable treatment is most prevalent at the State level, but it also exists at the Federal and local levels. Alternatives exist which would provide for more equitable treatment for female offenders without duplicating existing programs and services. These alternatives include sharing facilities and other resources with males and females and involving private industry to provide training and jobs in the institutions. Because of the nonviolent nature of the female offender and the small numbers, community corrections is a possible approach which would draw on existing resources and provide for an environment for greater opportunities for training and jobs which would permit payment of restitution and community service work. The Attorney General should provide the same level of resources and opportunities to females as provided to males. The Bureau of Prisons should develop a strategy for dealing with inequities in the Federal systems and coordinate the strategy with State and local governments on a regional or metropolitan basis. The Attorney General should also require the National Institute of Corrections to perform research and evaluations of innovative approaches to achieve improved services and serve as a clearinghouse for disseminating successful approaches.

## IMMIGRATION AND NATURALIZATION SERVICE

**E00809-001**
*Border Patrol Resource Allocation: Aircraft Cost Analysis.*
20 pp.
Gary Messina
**OMB Funding Code/Title:** 15-1217-0-1-751 / Salaries and Expenses
**Program:** Border Enforcement
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title II, § 287; 8 U.S.C. 1357).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The objective is to determine the cost effectiveness and efficiency of the Border Patrol air units. *Abstract:* Rotary and fixed wing costs were analyzed as well as pilot costs, contingent liabilities, and improved cost effective maintenance procedures. Safety parameters, contractual parameters, and the reallocation of resources were also addressed. Alien apprehension assists by the air division were determined in the above mentioned regions. This study, however, is the first part of a much larger overall resource effectiveness study of Border Patrol air operations which will be released at a later date.

**E00809-002**
*Evaluation of ADIT Card Feature Costs.*
12/17/80; 24 pp.
Wayne McKenna
**OMB Funding Code/Title:** 15-1217-0-1-751 / Salaries and Expenses
**Program:** Border Enforcement (ADIT-Alien Documentation Program)
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title I, § 101; 8 U.S.C. 1101).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* Some general conclusions can be drawn from the study. Although the ADIT card manufacturing process is complex, card feature costs can be reasonably identified. Several features should be eliminated. Elimination of fingerprint coding and personal biographical data would save a considerable amount of money and would not adversely affect the appearance or security of the card. Elimination of these card features coupled with the elimination of card readers in primary would reduce ADIT program costs. If the immigrant visa processing and data entry redundancy are also eliminated, the Immigration and Naturalization Service (INS) could show further cost savings. With fewer card features contract costs could be lowered, fewer INS personnel would be needed, and total ADIT program costs would be substantially reduced.

**Agency Contact:** Immigration and Naturalization Service. (202) 633-4097.

**E00809-003**
*Evaluation of the Up-Front Adjudication Program.*
4/9/81; 26 pp.
Wayne McKenna
**OMB Funding Code/Title:** 15-1217-0-1-751 / Salaries and Expenses
**Program:** Service to Public (Adjudication Operations)
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title II, § 240; 8 U.S.C. 1230).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The evaluation aims to determine if the Up-Front Adjudication (UFA) program is an effective means of expediting adjudication processing without reducing the quality of the work. UFA is timely since the Immigration and Naturalization Service faces severe budget cutbacks in the foreseeable future. Cutbacks would result in increased backlogs unless new ways of providing service to the public are developed. The UFA experiment proved that using contact representatives, immigration inspectors, and immigration examiners to adjudicate readily approvable cases saves much time and better serves the public. This study indicates that the use of immigration examiners to adjudicate readily approvable cases in Boston and Houston would be premature. Although the concept is sound, the UFA Program should be developed first at the contact representative level, then at the immigration inspector level, and perhaps finally at the immigration examiner level. Job refinements and responsibilities must also be redefined and appropriate training for participants in the UFA Program must be developed.

**Agency Contact:** Immigration and Naturalization Service. (202) 633-4097.

*Reevaluation of the Effectiveness of Interior Repatriation.*
3/81; 4 pp.
Frank Mahoney
**OMB Funding Code/Title:** 15-1217-0-1-751 / Salaries and Expenses
**Program:** Detention and Deportation
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title I, § 101; 8 U.S.C. 1101).
**Availability:** Not Publicly Available (Internal Use Only)

**Geographic Relevance:** National

*Abstract:* The objective is to review the earlier interior repatriation study and determine if its findings still remain valid. Interior repatriation is known to be feasible provided it is possible to reach the necessary agreements with the Mexican Government. The previous interior repatriation experiment showed that interior repatriation is an effective deterrent to illegal reentry in that aliens repatriated to the border area reenter illegally about 4.5 times more frequently than those repatriated to the interior. However, while interior repatriation is both feasible and effective, it should probably not be carried out on more than a limited scale because of some practical considerations discussed in the report.

**OMB Funding Code/Title:** 15-1217-0-1-751 / Salaries and Expenses
**Program:** Service to the Public (Naturalization Operation)
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title II, § 301-360; 8 U.S.C. 1401-1503).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The objective is to identify improvements in the Inspections program. An orderly procedure was developed for the staffing and scheduling of Immigration Inspectors at ports of entry so as to make the best use of limited available inspector positions with least cost. The procedure is presented along with a numerical example taken from actual staffing and scheduling data. A review of preclearance inspection at foreign locations indicated that preclearance is desirable from a facilitation standpoint at selected locations where the necessary agreements can be reached and where the additional expense to Immigration and Naturalization Service can be offset by appropriate payment by the air lines.

*Abstract:* Immigration and Naturalization Service (INS) does not have the capability to monitor nonimmigrant aliens such as foreign students, diplomats, and tourists. Recent efforts to improve recordkeeping have resulted in little progress. INS is trying to improve information systems, but efforts have been hindered by inability to specify objectives and the absence of a plan to guide automation efforts. GAO recommends that the Attorney General direct INS to delay requiring foreign students to report to INS until monitoring efforts are improved.

## DRUG ENFORCEMENT ADMINISTRATION

**E00810-001**

*Drug Enforcement Administration Laboratory Support Services for States and Localities.*
**OMB Funding Code/Title:** 15-1100-0-1-751 / Salaries and Expenses
**Program:** Enforcement of Federal Law and Investigations: State and Local Assistance
**CFDA NO.:** 16.001
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Controlled Substances Act, as amended (P.L. 91-513, title II, § 503; 84 Stat. 1271; 21 U.S.C. 873); Reorganization Plan 2 of 1973.
**Availability:** Agency
**Geographic Relevance:** National

***Program Objectives:*** The objective is to provide forensic drug analysis, technical assistance, training, and analytical services to State and local law enforcement agencies and to reduce the State and local need for routine analytical services from the Federal Government by providing appropriate technical assistance and training to increase the capability of State and local laboratories. ***Abstract:*** The Drug Enforcement Administration (DEA) expends approximately 4% of its chemist resources to provide forensic drug analytical services to State and local law enforcement. There has been a steady decline in service to States and localities for the past 5 years, while there has been a steady and commensurate increase in State and local laboratory capability. DEA has been effectively meeting its program objectives in this area.

*DEA Recurring Reports Calendar Listing.*
6/81; 103 pp.
Michael Gutierrez
**OMB Funding Code/Title:** 15-1100-0-1-751 / Salaries and Expenses
**Program:** Support Operations
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Controlled Substances Act, as amended (P.L. 91-513, title II, § 501, 503, 508; 84 Stat. 1270-1272; 21 U.S.C. 871, 873, 878); Reorganization Plan 2 of 1973.
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The program objectives are development of an accurate and complete listing which categorizes reports by originator, calendar due date, and functional area; development of individual profiles which identify reports for elimination, consolidation, or simplification and improvement in the effectiveness of the Drug Enforcement Administration (DEA) recurring reports management system. *Abstract:* The DEA Recurring Reports Calendar Listing, dated June 1981, contains a total of 248 recurring reports. In the process of conducting the detailed review, a total of 40 reports (19%) were identified for elimination or consolidation. Seven percent of the total were obsolete, but in the absence of current manual issuances or other instructions, many of these reports continued to be prepared and submitted by various organizational elements. These obsolete reports have now been eliminated from the listing. Of the remaining 12%, one-third have been identified as unnecessary and will be eliminated with the publication of this calendar listing. The remainder are in the process of being consolidated with other existing reports. Recommendations are as follows: (1) a task force consisting of representatives from DEA, Department of Justice (DOJ) and external organizations should review the reporting requirements placed on DEA/DOJ; (2) legitimate recurring reports should be incorporated into the manual system which will provide management with an opportunity to review and concur on reporting burdens being levied; and (3) agency publications should be reviewed for possible consolidation/elimination potential and reduction in the distribution.

**Authority:** Controlled Substances Act, as amended (P.L. 91-513, title II, § 401-411; 84 Stat. 1242; 21 U.S.C. 841-851, 873, 878); Reorganization Plan 2 of 1973.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Department of Justice has an asset forfeiture program to help combat narcotics trafficking. The purpose of the program is to attack the economic base of drug organizations to eliminate their primary motive of monetary gain. *Abstract:* Illicit profits and the assets acquired with them were the target of legislation passed to combat organized crime through forfeiture of assets. Assets obtained through forfeiture have been miniscule. More forfeitures have not been realized because of ambiguities in the statutes. The Justice Department lacks guidance and incentive for pursuing forfeiture, and access to financial information may be limited. GAO recommends that Congress amend criminal forfeiture provisions of the Racketeer Influenced and Corrupt Organizations statute. GAO also recommends that the Attorney General monitor the use of forfeiture in cases and determine the reasons for success or failure.

**Availability:** NCJRS
**Geographic Relevance:** National

*Program Objectives:* The purpose of the projects was to stimulate private youth-serving agencies to explore ways in which they could expand and modify their existing services to help prevent delinquency. This was to be accomplished through direct services, community development, and capacity building. *Abstract:* The major finding of the evaluation was that private youth agencies are capable of attracting large numbers of youth to participate in their activities. However, they have limited capacity to develop appropriate strategies to prevent youth crime. These agencies require theory development, staff training, and technical assistance to direct their efforts toward reducing delinquency. The evaluation recommended that future prevention efforts be tied to the goal of reducing rates of official delinquency in clearly defined target populations. Direct service prevention efforts should focus on youth already enmeshed in the juvenile justice system.

**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 103; 42 U.S.C. 3713).
**Availability:** NCJRS
**Geographic Relevance:** National

*Program Objectives:* The program's objective was to deinstitutionalize status offenders through precluding their placement in detention and correctional institutions and through the development of alternative programs. *Abstract:* Overall, the use of community-based alternatives for status offenders did not result in an increase in recidivism. Community-based services can be provided for status offenders at about 20% less than the cost of juvenile justice system processing. These findings suggest that status offenders can be deinstitutionalized and placed in less costly alternatives without increases in recidivism.

**Agency Contact:** Office of Justice Assistance, Research, and Statistics. (202) 724-7560.

**Availability:** NCJRS
**Geographic Relevance:** National

*Program Objectives:* The objective is to divert juvenile offenders from processing through the juvenile justice system into alternative programs and services. *Abstract:* Within the mandates of the Juvenile Justice and Delinquency Prevention Act, the evaluation supported the feasibility of using alternatives for juveniles who without diversion would be processed through the traditional juvenile justice system. The evaluation indicated that diversion may expose more juveniles to youth services than would be the case without diversionary alternatives. The evaluation also showed that there were no significant differences in terms of recidivism and other social adjustment measures between juveniles diverted without services, those diverted to services, and those processed through the traditional system.

**OMB Funding Code/Title:** 15-1100-0-1-751 / Salaries and Expenses
**Program:** Intelligence
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Controlled Substances Act, as amended (P.L. 91-513, title II, § 501; 21 U.S.C. 871, 876, 878-880); Reorganization Plan 2 of 1973.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Law Enforcement Assistance Administration (LEAA) was responsible for overseeing grants provided to seven regional intelligence networks. Since LEAA is being phased out, it is uncertain which Department of Justice agency should provide oversight of funds that continue to be appropriated. *Abstract:* GAO found that Justice Department oversight of funds provided for regional intelligence networks is needed. The Drug Enforcement Administration (DEA) has plans to assume oversight, but some regional project officials are concerned because DEA is drug oriented and some of the networks focus on other types of crimes. GAO found that a clearly defined role for the networks is needed to enhance their relationship with Federal law enforcement agencies. GAO recommends that the Attorney General define the role for regional intelligence networks and determine how oversight functions should be structured.

**Authority:** Department of Justice Appropriation Authorization Act, Fiscal Year 1979 (P.L. 95-624; 92 Stat. 3463; 18 U.S.C. 4002).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The primary mission of the program is to confine, clothe, and provide medical care for Federal prisoners in non-Federal facilities. In addition, the program has the responsibility for making maximum utilization of funds to provide for the safe, sanitary, and humane detention of Federal prisoners. *Abstract:* The study consists of two published reports. The first, published in March 1981, described the problems of housing Federal short-term detainees in the Judicial District of Western Washington. The second report (to be published in September 1981) described the scope and magnitude of Federal short-term detention problems nationwide and recommended several management initiatives that should be implemented to assist the Department of Justice in more effectively coping with the problems.

Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 28 U.S.C. 561-566, 569, 575).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Federal Judicial Districts

*Program Objectives:* The directives system of the U.S. Marshals Service (USMS) is the means by which Service policies and procedures are disseminated to affected components of the Service. The provision of overall policy guidance to the Headquarters and District Office staffs is fundamental in ensuring that the Service is operating in the most efficient and effective manner possible. *Abstract:* This study, conducted at the request of the Director of the USMS, reviewed and evaluated the existing system of disseminating the policies and procedures of the Service to its personnel. This effort resulted in a proposal and implementation plan for a return to the U.S. Marshals Manual system, with significant improvements suggested. Major conclusions of the study include the recommendation that an automated text data base be established; that program managers be directed to carefully review their existing policy and procedure documents to eliminate unnecessary or duplicative text; that program managers be held responsible for conversion of their respective policies and procedures within a centrally coordinated framework; that conversion goals be tied to the Merit Pay System for performance appraisals; and that the entire Manual be published at one time, canceling all other directive material en masse.

**Availability:** Agency
**Geographic Relevance:** Federal Judicial Districts

*Program Objectives:* This program is intended to ensure that the resources of the U.S. Marshals Service (USMS) are utilized in the most efficient and effective manner possible; that statutory requirements are being met; and that the highest standards of performance are maintained within the Service. *Abstract:* This study identified the legal requirements for the transfer of responsibility and accountability to incoming U.S. Marshals and developed standardized procedures to effect this transfer. The study focused on Federal regulations pertaining to the transfer of accountability for government-owned property, outstanding court orders, Federal prisoners in USMS custody, and Federal fund accounts. The documents developed as a result of this study will facilitate the mechanics of the transfer of responsibility as well as meeting the orientation needs of those new U.S. Marshals who may not be familiar with the mission, policies, or procedures of the USMS.

**E00814-004**
*Analysis of the U.S.M.S. National Prisoner Transportation System.*
11/80; 83 pp.
S. Laniewski
**OMB Funding Code/Title:** 15-0322-0-1-752 / Salaries and Expenses, United States Attorneys and Marshals
**Program:** U. S. Marshals (Handling of Federal Prisoners); U.S. Marshals (Handling of Federal Prisoners)
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 18 U.S.C. 4008, 4086, 4206, 4283). Act of September 6, 1966 (P.L. 89-554, § 4(c); 28 U.S.C. 567, 568, 573).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Federal Judicial Districts

*Program Objectives:* This program supports the activities of the U.S. Marshals Service (USMS) in its responsibility for the timely production of Federal prisoners for legal hearings or meetings with counsel; the production of prisoners at trial; the movement of sentenced prisoners to designated institutions for service of sentence; and the transfer of sentenced prisoners between institutions. *Abstract:* This analysis of the operational activity of the USMS Marshals Service National Prisoner Transportation System involved the development of a descriptive profile of prisoner transportation; an evaluation of the effectiveness of the system in transportating prisoners routinely, cost-effectively, and in a timely manner; and the development of a base for future research designs and intensive cost-analysis justification of the existing system for future expansion or modification. The study identified several data elements which must be captured on a recurring basis in order to project workload requirements, including average distances traveled, actual origins and final destinations of prisoners transported, time deadlines (generally determined by court order), lag periods, prisoner populations, and uncontrollable factors which affect transportation requirements.

**E00814-005**
*Audits of U.S. Marshals Service District Offices and Headquarters.*
8/81; 47 vols./188 pp.
A. Daniels; J. Arendash; S. Barr; T. Castellano; B. Grose; M. Urenko
**OMB Funding Code/Title:** 15-0322-0-1-752 / Salaries and Expenses, United States Attorneys and Marshals
**Program:** U. S. Marshals (Executive Direction and Control)
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 28 U.S.C. 561-566, 569, 575).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** Federal Judicial Districts

*Program Objectives:* Internal audits are designed to ascertain compliance with directives, determine the quality of management, assess effectiveness of procedures and practices, foster better relations between headquarters and district offices, and provide assistance in the interpretation of U.S. Marshals Service (USMS) policies. *Abstract:* The 47 USMS offices audited were generally well managed and operating efficiently and effectively. Matters needing attention were in the areas of: excess travel advances, inadequate voucher processing procedures, firearms qualifications, maintenance of unauthorized personnel files, improper use of government-owned vehicles, management and control of evidence, seized property and accountable property, proper securing of sensitive items/records, lack of written procedures for operation of USMS detention cells, inadequate written procedures to respond to threats against the judiciary, inadequate monitoring of the use of compensatory time and overtime, and improper fund advance procedures.

## COMMUNITY RELATIONS SERVICE

**E00816-001**
*A Statistical Review and Evaluation of Productivity, Effectiveness, and Efficiency.* (CRS E-01-81).
2/26/81; 127 pp.
Marc Nerenstone
**OMB Funding Code/Title:** 15-0500-0-1-752 / Salaries and Expenses, Community Relations Service
**Program:** Prevention and Conciliation of Community Disputes
**CFDA NO.:** 16.200
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Civil Rights Act of 1964, as amended (P.L. 88-352, title X, § 1001(a); 78 Stat. 267; 42 U.S.C. 2000g).
**Availability:** Agency
**Geographic Relevance:** National; Federal Regions

*Program Objectives:* Objectives are to compare performances and productivity accomplishments with planned levels, with standard levels, and with the accomplishments of prior years. *Abstract:* This report indicated that in Fiscal Year (FY) 1980 the number of cases the Community Relations Service (CRS) worked on increased by 23%. Five of the 10 regions exceeded their own forecast; five fell below. Even though CRS improved its efficiency by closing 15% more cases in 1980 than in 1979, its backlog grew because the number of new cases increased at a faster rate than case closures. The fastest growing types of cases involved allegations of excessive use of force by police, hate groups activities, and Southeast Asian refugees; they amounted to 22% of the FY 80 caseload. The increased demand was also illustrated by the rise in alerts over the previous year; the regions also converted alerts to cases at a much higher rate.

**E00816-002**
*Evaluation of the Pilot Project on Court-Referred Mediation.* (CRS E-02-81).
2/23/81; 61 pp.
Marc Nerenstone
**OMB Funding Code/Title:** 15-0500-0-1-752 / Salaries and Expenses, Community Relations Service
**Program:** Prevention and Conciliation of Community Disputes
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Civil Rights Act of 1964, as amended (P.L. 88-352, title X, § 1001(a); 78 Stat. 267; 42 U.S.C. 2000g).
**Availability:** Agency
**Geographic Relevance:** Federal Regions IV, V

*Program Objectives:* This pilot program was conducted and evaluated in order to help the Community Relations Service (CRS) determine: what benefits and what costs to expect from an expanded program of mediating court-referred civil rights cases; whether the comparison of benefits to costs is sufficiently favorable to justify expanding the program; and how to maximize the utility of such a program if it is expanded to all CRS regions across the country. *Abstract:* Formal agreements were successfully negotiated in seven cases that Federal district court judges had referred to the CRS for mediation as an alternative to litigation. The cases involved racial disputes over representation on a city council, prison conditions, and the personnel practices of police departments. The mediation process appears to have accelerated the resolution of these disputes. The parties themselves may have developed solutions that differed from what a court might have imposed in some cases. While social benefits were not quantified, the monetary savings due to avoidance of protracted litigation were several times larger than the full costs of CRS involvement.

**Agency Contact:** Community Relations Service. (301) 492-5900.

## JUSTICE MANAGEMENT DIVISION

**E00818-001**
*An Evaluation of Department of Justice Law Enforcement Training Provided to State and Local Police.*
3/25/81; 112 pp.
Robert Comiskey
**OMB Funding Code/Title:** 15-0200-0-1-751 / Salaries and Expenses; 15-1100-0-1-751 / Salaries and Expenses; 15-0400-0-1-754 / Law Enforcement Assistance
**Program:** State and Local Assistance; Enforcement of Federal Law and Investigations: State and Local Assistance; Crime Control Programs
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 616; 28 U.S.C. 533, 534). Controlled Substances Act, as amended (P.L. 91-513, title II, § 502, 503; 84 Stat. 1271; 21 U.S.C. 872, 873); Reorganization Plan 2 of 1973. Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 701-705; 82 Stat. 210; 42 U.S.C. 3771-3775).
**Geographic Relevance:** National; State; City; County

*Program Objectives:* Objectives are to provide training to State and local law enforcement officers to assist in their development as administrators, executives, or specialists; and to expand significantly and economically the personnel resources available nationwide at all levels of government for the control of drug abuse and trafficking. *Abstract:* The study team identified four principal perceived values of the departmental training programs provided to State and local police. They were that these programs: (1) are provided cost-free or at low cost; (2) are of similar or superior quality in terms of both content and level of instruction to non-Federal programs; (3) foster cooperative working relationships among Federal, State, and local law enforcement agencies; and (4) provide participants with a national or international perspective on law enforcement issues. The study team recommended that major issues related to these values, especially cost-reduction suggestions, be examined more thoroughly so as to provide senior Department of Justice officials with a broad base upon which to make decisions regarding the continuation, expansion, or curtailment of these programs.

**Agency Contact:** Justice Management Division. (202) 724-6261.

**E00818-002**
*Central Payroll System.* (727).
4/7/81; 144 pp.
Peter J. Ritenburg
**OMB Funding Code/Title:** 15-0129-0-1-751 / Salaries and Expenses
**Program:** Program Direction and Policy Coordination (Justice Management Division)
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, §4(c); 80 Stat. 611; 28 U.S.C. 507(a), 510, 525(a), 527). Budget and Accounting Procedures Act of 1950, as amended (64 Stat. 836; 31 U.S.C. 66a).

**Availability:** Agency

*Abstract:* This audit was made to review the management and internal controls placed on the payroll operation and determine their reliability. This audit found: controls over payroll operations need to be strengthened; procedures need to be updated and more training is needed for timekeepers; the payroll accounting operation needs to be automated in conjunction with a thorough review of the reports generated from the payroll system to determine their usefulness; an ad hoc evaluation of the entire automated payroll system needs to be undertaken to develop plans and specifications for making necessary improvements; and Automated Data Processing (ADP) system documentation is inaccurate, payroll production programs are modified with no independent certification, and better controls are needed over the ADP operational support.

*Compliance Review of the United States National Central Bureau (INTERPOL).*
6/81; 51 pp.
Arthur R. Greenberg
**OMB Funding Code/Title:** 15-0129-0-1-751 / Salaries and Expenses
**Program:** Program Direction and Policy Coordination
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 612; 28 U.S.C. 504, 508(a), 510).
**Availability:** Agency

*Program Objectives:* INTERPOL is a private intergovernmental organization currently consisting of about 130 member countries. INTERPOL's role is to facilitate law enforcement communications among these countries which represent all ends of the political spectrum. The United States National Central Bureau (USNCB) performs the liaison function of sending and reviewing messages through INTERPOL channels. *Abstract:* The study examined the degree to which the practices of the USNCB of INTERPOL comply with the policies and standards of the USNCB and the Department of Justice. The report provides specific recommendations to enhance compliance, increase the USNCB's law enforcement impact, and clarify the role of the USNCB.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of the report is to evaluate the effectiveness of the personal property management systems of the Department of Justice's bureaus, primarily at the headquarters level, and to examine in detail bureau compliance to existing Federal and departmental personal property management regulations. Several bureaus will be scheduled for review each year. The reviews will disclose system weaknesses and shortcomings and will result in suggestions for correction. Alternatively, if a successful property management practice is identified, this information will be disseminated to other bureaus. The evaluation is expected to increase cooperation and strengthen lines of communication between this office and bureau property management officers.

*Evaluation of the Effectiveness of the Economic Crime Unit.*
1/5/81; 117 pp.
Phillip B. Cover
**OMB Funding Code/Title:** 15-0128-0-1-752 / Salaries and Expenses, General Legal Activities
**Program:** Criminal Matters
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 618; 28 U.S.C. 543).
**Availability:** Agency
**Geographic Relevance:** State; City; County; Congressional District

*Program Objectives:* The objective of the program is the enhancement of the Department of Justice's capability to combat white-collar crime through the efficient utilization of personnel in the prevention, detection, investigation, and prosecution of white-collar crime offenders. *Abstract:* The report concludes that: the goals and objectives of the Economic Crime Enforcement (ECE) program provide an adequate rationale for the structure of the program and the function of the ECE units; the achievement of program goals and objectives are affected, in large part, by the organizational relationship of the Specialist to the ECE unit and by the acceptance of the role and function of the Specialist by the U.S. Attorney. The report recommends that: Criminal Division define the relationship of the Specialist to the Office of the U.S. Attorney (OUSA) in nonunit districts, conduct a needs assessment to determine how a second Specialist could be used in an ECE region, and ensure that the Specialist be organizationally and functionally structured into the OUSA as an integral member of the ECE unit.

### E00818-012

*Evaluation of the Special Investigative Techniques of the Office of Enforcement Operations Including the Protected Witness Program.*
85 pp.
Joan P. Fegan
**OMB Funding Code/Title:** 15-0128-0-1-752 / Salaries and Expenses, General Legal Activities; 15-0311-0-0-752 / Fees and Expenses of Witnesses
**Program:** Criminal Matters; Protection of Witnesses
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 612, 615; 28 U.S.C. 524); Executive Order 11396. Act of June 25, 1948 (P.L. 80-772; 62 Stat. 833; 18 U.S.C. 3481). Omnibus Crime Control and Safe Streets Act of 1968 (P.L. 90-351, title III, § 802; 82 Stat. 216; 18 U.S.C. 2516). Organized Crime Control Act of 1970 (P.L. 91-452).
**Availability:** Agency

*Program Objectives:* The objective of the program is to supervise the use of special investigative techniques which support Federal efforts in organized crime, drug trafficking, and other major prosecution target areas. *Abstract:* The study developed and planned implementation of an integrated management information system to monitor, measure performance of, and assess the impact of using the special investigative techniques under the jurisdiction of the Office of Enforcement Operations. These techniques include witness protection, electronic surveillance, hypnosis in the interrogation of witnesses, and use of the Criminal Division's confidential funds. The study team identified the objectives of the Department of Justice in using these techniques and the uncontrollable variables which affect their use in Federal investigations and prosecutions. The Office of Enforcement Operations plans to implement a tracking system to collect and analyze information which was recommended in the study report.

**Program:** Industrial Manufacturing Program: Cost of Production
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 62 Stat. 853; 18 U.S.C. 4121-4128).
**Availability:** Agency

*Abstract:* Improvements are needed in technology for forecasting inmate population and in planning techniques to incorporate more flexibility to provide for fluctuations in inmate population. Corporate Headquarters needs to provide more explicit policy direction for the benefit of division managers and must assure that evaluation and monitoring of operations are done in accord with OMB-A-117.

**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 612, 615; 28 U.S.C. 507(a)).
**Availability:** Agency

*Program Objectives:* The program is responsible for the Equal Employment Opportunity (EEO) program for the Department of Justice, including planning for affirmative action and investigating complaints of discrimination within the Department. *Abstract:* Excessive time periods are required to process EEO complaints within the Department. The EEO complaint processing system in the Department is decentralized among the Bureaus, although responsibility for policy direction and overall program management remains with the Assistant Attorney General for Administration. For this type of system to work effectively, it is essential that the roles and responsibilities of the three key elements–policy, management, and program operation–be clearly defined and fit cohesively. The present system lacks, to some extent, clear definition and cohesiveness. Recommendations deal with the elements which are essential to the management of any program, i.e., authority, responsibility, policy, and staffing. Additional recommendations deal with procedures and techniques which can be employed by management to provide effective control over the program.

**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 612, 615; 28 U.S.C. 507(a), 510, 525(a)). Budget and Accounting Procedures Act of 1950 (64 Stat. 836; 31 U.S.C. 66a).
**Availability:** Agency

*Program Objectives:* The objective of the program is to determine if there were any unauthorized manipulations, innocent or otherwise, in the Department of Justice's payroll system. *Abstract:* Some minor procedural problems regarding exemption of Federal withholding taxes and filing of payroll-related documentation were found. Further, a payroll system edit that limits compensation to the statutory amount is ineffective for pay periods prior to the immediately preceding one. In addition, it was found that payroll processing procedures are not adquately documented, no regular independent review of payroll-related transactions is being made for personnel having access to pay records, no Master File plan exists to insure systematic filing and retrieval of documents, and controls over documents used for obtaining reimbursement from Government agencies for automated data processing services and technical support need to be strengthened.

**Program:** Interior Enforcement; Border Enforcement
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title II, § 287; 66 Stat. 233; 8 U.S.C. 1357).
**Availability:** Agency

*Program Objectives:* The mission of the Border Patrol is to protect and defend the rights of all citizens and legal entrants through preventing entry of all undocumented aliens along land borders (Immediate Border Patrol) and detecting and apprehending undocumented aliens currently in the country (Other than Border Program). *Abstract:* The Border Patrol is efficient in terms of the total number of illegal aliens apprehended, but it has been largely ineffective in stopping the flow of illegal aliens. The Border Patrol can become effective with additional up-to-date equipment and more support and clerical staff. Immigration and Naturalization Service (INS) officials need to determine if the Linewatch Simulation Study is a viable tool for analyzing Border Patrol operations and to determine if the study should continue or terminate. The Border Patrol needs to commit itself to one strategy for preventing illegal entry in order to use its resources effectively. Studies concerning the characteristics of illegal aliens need to be completed so that realistic goals can be determined for the Border Patrol. The vehicle seizure law and INS policy need to be revised to make this method of enforcement productive.

*U.S. Marshal's Service of Private Civil Process Alternatives to Their Traditional Role.*
In process
Vickie Sloan
**OMB Funding Code/Title:** 15-0322-0-1-752 / Salaries and Expenses, United States Attorneys and Marshals

**Program:** U.S. Marshals
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, § 4(c); 80 Stat. 620; 28 U.S.C. 569(b), 570, 574).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to serve all process emanating from the Federal courts. *Abstract:* The evaluation concluded that the U.S. Marshal Service's (USMS's) role in the service of private civil process should be redefined since, in many instances, presence of the Marshals is not necessary to effectuate service. However, statutorily reducing the USMS function in serving private civil process without increasing the availability of alternative methods of service will not provide for continued service of process in those districts which do not sanction or do not utilize alternative methods of service. Thus, expansion of the availability or facility of using alternative methods (i.e., court appointments, sheriffs, and private process servers) through the development of local rules should be encouraged.

**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 201-204, 301-304; 42 U.S.C. 3721-3724, 3731-3735).
**Availability:** Agency
**Geographic Relevance:** test sites

*Abstract:* The objective of this project is to evaluate the demonstration by the National Institute of Justice to determine the impact of model pre-release centers on their clients and the community and to identify the effectiveness and economic utility of the centers to the criminal justice system. This project is designed to evaluate those model pre-release centers which provide intensive services to offenders prior to their full release into the free community. The evaluation goals are to determine the impact of the centers on their clients and communities, to assess the economic utility of the centers to the criminal justice system, and to identify the contributions of major program components to overall outcomes. The project utilizes an experimental design in which all inmates who meet eligibility requirements are pooled and then randomly assigned to either the experimental program, parole, or traditional pre-release programs. An additional comparison group of persons who do not meet eligibility requirements will also be chosen. Data will be collected and analyzed covering offender characteristics and needs, services provided to each offender, in-program achievement of objectives, post-program outcomes both positive and negative, program costs, administrative and organizational factors, and measures of community impact.

**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 201-204, 301-304; 42 U.S.C. 3721-3724, 3731-3735).
**Availability:** Agency
**Geographic Relevance:** Boston; Chicago; San Diego

*Program Objectives:* The objective of the employment services program is to increase employment of ex-offenders and reduce their recidivism. *Abstract:* This project will evaluate a field test of an employment services program for ex-offenders at three sites: Boston, Chicago, and San Diego. The program objectives are to increase the employment of ex-offenders and reduce their recidivism by offering a full array of employment services (pre-release, employment, and follow-up). The evaluation will analyze the impact of employment services on client employment outcomes (such as job tenure) and criminal recidivism (such as re-arrests, convictions). The evaluation will also estimate the relationship between types of services and outcomes as well as between client characteristics and outcomes. An experimental design will be used whereby volunteer offenders awaiting release from jail or prison and having a history of income producing crimes will be assigned randomly to either an experimental group (receive augmented employment services) or a control group (receive standard employment services). The evaluation will also use as comparison groups similar non-volunteer ex-offenders and similar persons with no history of crime. This evaluation will track the experimental and control/comparison groups for a year following the cessation of services. The products of this research include a technical report, executive summary, and evaluation design for employment agencies to evaluate their own projects.

**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 201-204, 301-304; 82 Stat. 198; 42 U.S.C. 3721-3724, 3731-3735).
**Availability:** Agency
**Geographic Relevance:** 3 police departments

*Program Objectives:* The objective is to improve management of the calls for service function in police departments. *Abstract:* This evaluation is designed to test the utility of a comprehensive differential response system for managing the calls for service function in three police departments. Site participants will implement both mobile and non-mobile responses including appointment scheduling, telephone reporting, and other methods for handling citizens' requests for service. The program will be administered under controlled conditions in order to determine the impact of the program on police operations and citizens. The evaluation will include both process and outcome components. The outcome evaluation will examine changes in citizen satisfaction, police workload, complaint taker decisions, and travel times to critical and non-critical calls for service. The process evaluation will document how both the call classification system and alternative response system were designed and implemented.

**Availability:** Agency
**Geographic Relevance:** 4 sites

*Program Objectives:* It is the objective of this Law Enforcement Assistance Administration (LEAA) program to provide a method for integrating and directing police field activities related to crime prevention. *Abstract:* The primary objectives of the evaluation of the Integrated Criminal Apprehension Program (ICAP) are to determine the extent to which the five basic program components have been implemented and integrated and the impact they have had on the improved delivery of police field services, i.e. improved arrest and prosecution practices in the handling of serious habitual offenders. Inasmuch as ICAP represents a substantial investment of LEAA funds and a major part of LEAA police improvement effort, the evaluation results will be important for refunding and information dissemination decisions as well as further model development and demonstration. Four selected sites will be intensively assessed in the terms of the ICAP's operation and effectiveness both qualitatively and quantitatively. Also, 25 additional sites will be assessed from a comprehensive viewpoint.

**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 201-204, 301-304; 82 Stat. 198; 42 U.S.C. 3721-3724, 3731-3735).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The objective is to estimate the impact of pretrial release recommendation/decision systems and the validity of pretrial release criteria. This evaluation is to determine the effectiveness of jail pretrial release recommendation/decision systems, often called Central Intake Systems (CISs), which process offenders prior to trial with the goal of releasing those individuals who will not commit crimes and will appear for trial. The evaluation encompasses two parallel but interrelated efforts. One is directed at estimating the impact of CISs and one will identify the critical CIS variables for making valid release decisions. Denver Research Institute (DRI) will survey existing CISs and recommend up to seven for the evaluation. From this survey, a preliminary model CIS will be developed. It will be modified as the new data are obtained from the experimental sites. This effort will involve analyzing site records, interviewing staff and users of CISs, and observing operations. Analyses will cover process and impact variables. In particular, impact upon jail population levels and costs of implementing/operating CISs will be estimated. Also DRI will analyze criteria used by CISs for making release decisions to assess what variables are important and how those variables are influenced by the specific characteristics of a site such as local laws, population demographics, community resources, etc.

**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 103; 42 U.S.C. 3713).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The major objective of this evaluation is to identify and describe significant factors affecting the operations and success of law enforcement agencies focusing on the detection and prosecution of white collar crime. A white collar crime evaluation design support document will also be generated to assist evaluators in future evaluation of such projects. This evaluation is to determine the operational impact of the Law Enforcment Assistance Administration (LEAA) Criminal Conspiracies, Major White Collar Crime Program, and to the extent possible, causes for variation in that impact across some 10 projects in 7 States funded under that program. The evaluation will examine the background and development of the entire program and its individual projects; analyze the process of project origin, implementation, and operational development; assess cost effectiveness of each project; and determine the impact of individual projects and result in the development of policy recommendations. Using in-depth site visits, the evaluation will employ a comparative case study method in which individual projects are first examined separately and then systematically compared to produce an overall evaluation of the entire program. A set of recommendations for decisionmakers will be produced at the conclusion of the evaluation and will pertain to the operation and design of the LEAA White Collar Crime Program.

*Program Objectives:* This program is structured to provide support for joint operations by participating Federal, State, and local law enforcement agencies to identify and remove the fence and his organized criminal activities. *Abstract:* This project is an evaluation of the business front components of the Law Enforcement Assistance Administration Anti-fencing Program in 24 cities and the components' impact on the apprehension and conviction of thieves, general criminal justice system operation, and the welfare and safety of the communities. The evaluation will also compare the cost effectiveness of the business front component to other methods of apprehending and obtaining convictions of persons selling stolen property and the relationship between size and scope of business front components and impact measures such as crime rate, number of thieves apprehended, conviction rate, characteristics of individuals apprehended, etc. A phase II evaluation of the program is to concentrate on the effectiveness of the Anti-Fencing Program in identifying and convicting fences.

*Program Objectives:* The objective of this discretionary grant program is to demonstrate methods to reduce criminal court case backlog and processing time while maintaining standards of fairness and due process. *Abstract:* This grant evaluated the Law Enforcement Assistance Administration Court Delay Reduction Program through intensive empirical analysis of four courts into which innovations were introduced. It was found that: delay stems from many institutional sources; case processing time can be reduced quickly; and delay-reduction efforts must be responsive to local conditions. In Providence, Rhode Island, case processing time was reduced dramatically. In Detroit, Michigan, and Las Vegas, Nevada, it was reduced substantially among the lowest quartile of cases. In Dayton, Ohio, case processing time for the more typical cases improved significantly. Each court designed delay-reduction programs compatible with its distinctive local socio-legal culture. All programs, though, shared a recognition that some problems worthy of attention did exist, and these problems were somehow caused by inefficient or indifferent management. Each of the programs, too, reflected the need for a critical nucleus of actors to initiate and gain political support for the idea of reducing delay.

*Program Objectives:* The objective is to reduce jail overcrowding in selected jurisdictions which have demonstrated jail overcrowding caused in large part by a sizable pretrial population. *Abstract:* The primary purpose of this project is to evaluate the implementation, operation, and impact of the Law Enforcement Assistance Administration's (LEAA's) jail overcrowding and pretrial detainee program. This program supports small grants to sites for planning and analysis of jail population problems (called Phase I projects) and large grants to sites for implementation activities (called Phase II projects). This 2-year project by the National Institute of Justice concludes the evaluation initiated by LEAA's Office of Criminal Justice Programs in Fiscal Year (FY) 1979. This particular award is for one year. The project will include selected FY 78 and FY 79 Phase II sites, the National Program Coordinator (NPC), selected sites which are implementing jail management information systems, and a few FY 80 Phase II sites. Data will be obtained by on-site interviews, review of records, telephone surveys, and review of data collected by the NPC. The emphasis of this project will be upon short and long term impact data such as changes in jail population levels, duration of stay of pretrial detainees, and percentages of pretrial detainees in jails. The primary audience for this evaluation are project directors of Phase I and II sites, State and local decision-makers facing jail overcrowding problems, and academic and other researchers dealing with jail population problems. The products of this project include an executive summary and final technical report.

*Program Objectives:* The objective is to enhance the capability of police departments to define and achieve patrol performance objectives. *Abstract:* The Managing Patrol Operations (MPO) program is one of several National Institute of Justice sponsored field tests specifically designed to assess the implementation experience and effects of a set of improved law enforcement practices. Prior research findings and successful operational experience form the basis for this program model. The program model requires police personnel to utilize a set of analytic techniques and undergo a series of training sessions to help identify and define performance objectives and strategies to achieve those objectives. This project is intended to complete an evaluation to determine the degree to which the MPO program leads to the achievement of departmental performance objectives and to identify factors which hinder and facilitate successful implementation. The evaluative approach will comprise a before and during comparison at three sites. The analysis will include assessment of: the use of computerized models for resource allocation; call-for-service management techniques; crime analysis and directed patrol activities; and managerial factors affecting the program components. The final report will document the results of this effort and recommend program modification for future MPO efforts.

**Availability:** Agency
**Geographic Relevance:** City; County

*Program Objectives:* There are three primary objectives of the field test: to evaluate the effectiveness of sentencing guidelines as a mechanism for enhancing sentencing consistency both within and across different jurisdictions within the same State; to test the feasibility of developing and implementing a set of sentencing guidelines in such a multijurisdictional setting; and to provide a body of knowledge for applicable jurisdictions. *Abstract:* The Office of Program Evaluation of the National Institute of Justice is funding an evaluation of the multi-jurisdictional sentencing guidelines field test program to test the concept of sentencing guidelines which has been proposed as a means of reducing disparity in sentencing and articulating judicial sentencing policy. A number of single, local court systems of general jurisdiction have experimented with the development and implementation of sentencing guidelines. In order to assess the feasibility of this concept beyond a single jurisdiction, the Institute has devised a multi-jurisdictional test of sentencing guidelines which will involve Florida and Maryland as sites. In each site sentencing guidelines will be developed and implemented in three or four local courts of general jurisdiction. Both the processes of development and implementation as well as their outcomes will be evaluated by the Institute.

**Availability:** Agency
**Geographic Relevance:** County

*Abstract:* The evaluation aims to assess the impact of the supervised pre-trial release program on the criminal justice system, on the failure-to-appear rates of program participants, and on the pre-trial crime rates of program participants. The purpose of this multi-jurisdictional evaluation is to determine the impact of a supervised Pre-Trial Release Program test on defendant behavior while awaiting trial. Three levels of data collection and analysis are proposed. The process component will determine how the programs operated relative to their organizational context and linkages with other criminal justice agencies and operations; how they identified and selected defendants for the program; and what types and levels of intervention strategies were used to reach program objectives. Two aspects of the evaluation will measure the effects of program activities on program participants and criminal justice system policy and practices. An experimental design using randomized treatment groups will test the differential impact of notification and contacts compared to notification contacts, and referral to services on failure to appear rates, pre-trial crime, compliance with court ordered conditions for release, and the costs associated with each release option.

**Availability:** Agency
**Geographic Relevance:** State

*Program Objectives:* The program aims to improve the processing of offenders through the courts, lessen sentencing disparity, and improve the offender's perception of fairness and justice. *Abstract:* This project will assist in laying the methodological groundwork and data requirements for evaluation when a sentencing guidelines program is started and follow this up with an extensive evaulation of the program implementation. Selected counties within a State will be carefully evaluated individually and as a group to determine if the concept improves the processing of offenders through the courts, lessens sentencing disparity, influences the offender's perception of fairness and justice, and affects the length of incarceration. Variation among judges in their sentencing patterns, especially in different counties, will no doubt occur, and consequently it is expected that the study will present a considerable effort to implement a statewide sentencing guidelines model. The National Institute of Justice desired to develop a general design for the evaluation of statewide sentencing guidelines by surveying developmental efforts in appropriate States, conducting an intensive evaluation of at least one (probably New Jersey since it is furthest along), and disseminate the results to interested parties.

*Program Objectives:* This evaluation is expected to produce information that will be potentially useful in the future administration of the Comprehensive Data Systems (CDS) program and for improving the effectiveness of the operations of the Statistical Analysis Centers (SACs). *Abstract:* The evaluation of the SACs, which have represented the nucleus of the National Strategy in Criminal Justice for CDS, is designed to assess their effectiveness, test the validity of their guidelines, and determine their ability to act as the State Statistical Bureau prescribed under the Federal/State/Local Cooperative Statistical Program. The evaluation will involve: (1) construction of an initial model of SAC operations using CDS guidelines and interviews with staff of the National Criminal Justice Information and Statistics Service which administers the SAC program; (2) development of data collection instruments to be sent to the SACs–to be generated based on information from site visits to selected SACs and surveys of users of those SACs which are visited; and (3) analysis and revision of the initial SAC model to be based on data collected from a mail survey of all SACs, supplemented by the site visit and user survey data.

**Availability:** Agency
**Geographic Relevance:** County

*Program Objectives:* The Improved Correctional Field Services (ICFS) Program is intended to accomplish three objectives: to devise and implement a rational screening mechanism that would determine the appropriate form of supervision for any probationer or parolee; to test the effectiveness of different modes of supervision (i.e. punitive vs. rehabilitative); and to determine the differential impact of varying levels of supervision. *Abstract:* Three projects (in Kane County, Illinois; Suffolk County, New York; and Florida) were developed to test the effectiveness of using risk screening procedures to assign probationers to different levels of supervision. The main question was: What level of supervision is effective with what risk classification of probationers with respect to various outcomes? Subsidiary problems included an assessment of the risk screening methods used and the development of measures of offense seriousness, of the social adjustment of probationers, and of probationer needs and concerns. The reports discuss the project development, the evaluation results for the first probationers in the program, and the measurement development work. Recommendations address aspects of planning of such programs and needs for further study.

**Geographic Relevance:** National

*Program Objectives:* The objective of this grant is to persuade citizens to actively engage in cooperative crime prevention behaviors. *Abstract:* The purpose of this project is to provide a research and evaluation component to a media campaign designed to persuade citizens to engage in crime prevention behaviors. This will be accomplished: by conducting both an informal and formal content analysis of past and current media efforts in crime prevention; by conducting a critical review of research literature pertaining to public participation in crime prevention activity as well as allied behaviors; by conducting a Delphi survey of experts to obtain qualitative assessments of effective mass communications strategies for crime prevention and control; by cooperating fully with the advertising agency parties designated to develop and conduct the campaign; and by conducting an evaluation of the campaign including focused group interviews with individuals, reflecting characteristics of targets to whom the Advertising Council Campaign will ultimately be addressed. The final post evaluative research will utilize some combination of the following: three before-after panel studies of specific targets; a national study of the general public to determine overall impact of proposed campaign; and six focused group interviews to lend a psychological "depth" dimension of interpretation to the evaluation data.

**Availability:** Agency
**Geographic Relevance:** 7 cities

*Program Objectives:* The major objective of this program is the reduction of crime and fear of crime. The evaluation will attempt to measure the program's impact on these outcomes. The Evaluation Design Plan was developed, reviewed, and approved with modifications in the first phase. *Abstract:* This is the final phase in the evaluation of the Law Enforcement Assistance Administration (LEAA) Comprehensive Crime Prevention Program (CCPP). The first phase was under number 78-MU-AX-0055, which was terminated at the request of the grantee. This new grantee was the subcontractor on the original grant and was responsible for all technical developments. The LEAA CCPP Program began in Fiscal Year 1977, and funded seven cities to develop planning for crime prevention activities citywide. The focus of the program was on coordination of the planning and implementation of crime prevention activities among public and private organizations. Citizen participation was a major thrust of the program along with these two other goals. The cities funded were: Atlanta, GA; Jackson, MS; Minneapolis, MN; Newark, NJ; Oakland, CA; Portland, OR; and Salt Lake City, UT. The evaluation will be primarily seven case studies of the planning process, community/-city coordination, citizen participation, and impact of activities. Most of the assessment will focus on the process, but some effort will be made to surface effectiveness information.

**Availability:** Agency
**Geographic Relevance:** local communities

*Program Objectives:* The Objective of the program is to support community crime prevention activities undertaken by local community groups. *Abstract:* This grant will complete the National Evaluation of the Legal Enforcement Assistance Administration (LEAA) Community Anti-Crime program (CACP). The initial work was begun by this applicant under a subcontract on Grant No. 77-NI-0084. The LEAA CACP was authorized by Congress in 1976 and began awarding grants in 1977. In the first year, 146 projects were funded at a cost of $30 million. The goal of the CACP is to provide funds directly to local community groups to undertake crime prevention activities. This effort also encourages the development of new groups, and each award generally includes several community groups in the administration. Both crime prevention activities directed at reducing opportunities for crime and for deterring the development of criminal desire are supported by this program. The evaluation collects data, analyzes it, and provides an assessment of this program on three levels. The most general process assessment examines what the projects are doing based on a mail survey of all 146 projects. A more specific focus on 24 projects carries this assessment further by examining the effectiveness of the projects and their activities to determine causal relationships together with the process and effectiveness assessments. Among the specific activities to be examined are: block watch, escort services, police/community relations, and those projects designated as innovative by the CACP office.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This study represents a National Evaluation Program Phase I Assessment of Prosecution Management Information Systems (PROMIS). Reports provide information on the activities, cost benefits, and limitations of these systems. Both PROMIS systems, a packaged approach funded and transferred with Department of Justice "seed" money, and individually-developed systems were investigated. Methods used to provide the final judgmental assessment included: a mail survey of 209 prosecution offices; site visits to 17 operating systems; review and analysis of available literature, research, and evaluations; and the conduct of evaluation feasibility testing at six test sites. The study found the most common and most effective type of system is one supported by a centralized computer facility serving multiple criminal justice agencies sharing the same data base. The study found most existing automated systems to be effective in supporting case processing operations. However, few prosecution agencies, with the exception of PROMIS users, use their systems to support policy development and decisionmaking processes. The primary reason for this exception appears to result from periodic PROMIS Users Group meetings which afford the exchange of information and ideas.

*Program Objectives:* The objective of the program is to determine whether intensive application of community and/or social services probation would improve probation outcomes. *Abstract:* This is a 4-year effort that involves the preparation, refinement, implementation, and evaluation of a detailed program plan to be developed in concert with selected jurisdictions interested in and capable of mounting a highly experimental probation program. In the first year, the contractor identified eligible jurisdictions, prepared and disseminated program information, solicited participant interest, and visited the more promising candidate sites. Milwaukee, Wisconsin, was determined to be the most suitable site for the experiment. The implementation phase consists of determining the effectiveness of a Client Management Classification System and the various levels of high risk and limited probation strategies.

*Program Objectives:* The objectives of the program are to reduce illicit drug use and criminal activity associated with drug use by providing rehabilitative services for offenders with a history of serious drug abuse while they are incarcerated in State correctional institutions and while on subsequent parole status. *Abstract:* The major purpose of this evaluation is to determine if the program results in an improved processing of drug abuse offenders during the later stages of incarceration and immediately following prison release, and whether or not such intervention affects the offender's drug and criminal behavior when he returns to society. The evaluation will determine the extent to which the program objectives have been met by assessing its success in developing voluntary institutional and community based treatment programs for all drug abusing inmates and developing a coordinated approach to treatment of drug abusing inmates which provides that they be properly identified, evaluated, monitored, and treated and which can serve as a model for other States.

*Program Objectives:* The objective of the program is to reduce robbery and burglary in designated target areas through changes in the physical environment, police procedures, and community organization activities. *Abstract:* The proposed research is a followup study to two previous grants during which a comprehensive residential neighborhood crime control program was designed, its implementation supervised and documented, and its initial short-term effects evaluated in detail. The original Hartford crime control program included changes in the physical environment, in police procedures, and in community organization activities which were designed specifically to address the target area's most severe crime problems (burglary and robbery). An initial (short-term) evaluation in 1977 showed a high degree of program success, with burglary decreasing 42% and robbery decreasing 27.5% immediately following program implementation. Residents' fear of both crimes was similarly reduced. The current project proposes to conduct long-term reevaluation in 1979, three years after program implementation, in order to determine if the successful short-term program effects (e.g. increased residential confidence in the neighborhood) have occurred subsequent to the initial 1977 evaluation.

**Availability:** Agency
**Geographic Relevance:** 3 test sites

*Abstract:* The National Institute of Justice proposes to evaluate the commercial security field test that is being implemented by its Office of Development, Testing and Dissemination. The test design was developed by a joint committee of Institute research and action staff along with support from outside experts and practitioners. The test design will select in 3 cities several commercial areas composed of 20 to 40 stores. A set of control areas will also be selected. In each of the test areas, the test projects will implement a uniform crime prevention survey instrument to identify the physical and behavioral corrections which should be made in each store to reduce its vulnerability to burglary, robbery, and larceny (shoplifting and employee theft) to test design's targeted crimes. A team of police and businessmen will perform the survey and make subsequent visits to encourage compliance. The evaluation design will make comparisons between sites, among test areas, and across test units. It will perform data collection of archival data (crime and economic), victimization data (both actual and fear), and observational data (both physical and behavioral). Besides assessments of effectiveness and compliance, the evaluation will measure adoption of the concept by local businesses and its potential for replication. An interim report will be produced along with a summary and final report for publication.

**Authority:** Omnibus Crime Control and Safe Streets Act of 1968, as amended (P.L. 90-351, title I, § 301-305; 42 U.S.C. 3731-3735).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The project has the following functions: (1) User needs–a range of uses exists for administrative data although operational users are not dependent on national data. Most users agree that existing series whould be upgraded and that the Federal government should maintain a leadership role. (2) Adequacy of existing data–duplication of administrative data is slight. Additional data are needed for a variety of categories on prosecution, defense, services, salaries of correctional personnel, State planning and statistical agencies, union activity, pensions, workload, and nonprofit agencies. (3) Need for administrative data–such data were found to guide decisionmaking and will be increasingly valued because of declining resources. (4) Wider use of data resources–increased use of administrative data might occur if users consult with a central librarian, if such data could be linked to other criminal justice data, if additional analysis of data was provided, and/or if user capabilities could be upgraded.

*Program Objectives:* The program places selected nonviolent defendants and offenders in community services assignments in lieu of fines and incarceration. The projects were free to determine specifics of implementation as a field test/demonstration. *Abstract:* Projects of the program were evaluated in an effort to assess the impacts of each and to determine programatic conclusions. Where there was community concurrence in objectives and a full implementation effort, the program was successful in diverting offenders from incarceration and had some positive rehabilitative results. No conclusive findings were reached concerning penalizing offenders. Until a clearer model is established, expectations for each project will be unpredictable.

*Program Objectives:* The program is an attempt to improve industrial activities in prison by adopting to the extent possible operational principles of private industry. Projects are characterized by a full work week for inmate employees, wages based on productivity, economic viability, hire/fire authority, and post-release job placement. *Abstract:* Data were collected from records and through structured interviews in 12 prisons in Colorado, Connecticut, Illinois, Iowa, Minnesota, South Carolina, and Washington. Wide variations in implementation and types of security environment were found. Despite these, Free Venture operations and psychosocial atmosphere are more similar to private sector industry than to traditional prison industry. Program impact upon workers was favorable, as measured by disciplinary records, and upon nonparticipants it ranged from none to favorable. There was a favorable impact upon institutional tranquility. Problems arose mainly from inadequate planning and lack of coordination with other proqrams. The program requires continual technical assistance and evaluation to measure results over a longer period.

**Geographic Relevance:** National

*Program Objectives:* The program seeks to demonstrate the effectiveness of a comprehensive approach to relieving jail overcrowding by proper diversion, pretrail release, trial delay reduction and other known effective programs operated in a planned manner with coordination of all parties. *Abstract:* As jails become more overcrowded, there is pressure to release a higher percentage of pretrial defendants. Recommendations made are: (1) jurisdictions should concentrate on diversion programs that have proved effective for minor offenders who account for substantial percentages of the jail population; (2) process changes should be instituted, such as use of citations in lieu of arrest, and reducing the time between charge and trial; and (3) implementation would be aided by establishing and using criminal justice advisory boards. The projects studied varied in approach, but all made progress in intelligently managing their jail population.

**Availability:** Agency
**Geographic Relevance:** International/Foreign; National

*Abstract:* This study concludes that there are good reasons for a compensation and adjustment program for trade-affected workers. The Trade Adjustment Program (TAA) has reduced protectionist pressures enabling the United States to pursue more liberal foreign trade policies. This has resulted in welfare gains for the United States and its trading partners; a well-designed adjustment assistance program can help overcome market imperfections. Also, because of its direct impact on overseas incomes, TAA can play a useful role in U.S. foreign policy. While the adjustment provisions of the TAA program have not been effectively utilized, alteration of the program to emphasize adjustment would enhance the flexibility and adaptability of the economy. The TAA program could be the basis for a more comprehensive adjustment program for all dislocated workers regardless of the cause of dislocation. The basic policy challenges are to develop a compensation scheme that will not serve as a disincentive for adjustment and to design a delivery system for the adjustment services.

**Availability:** Agency
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The Trade Act of 1974 establishes a system of trade adjustment assistance to help those workers who lose their jobs as a result of imports. Workers who believe that their unemployment is related to increased import competition may file a petition with the Department of Labor for certification of eligibility to apply for benefits, and that agency investigates the petitions. *Abstract:* This paper examins the rationales (equity, economic efficiency, and political efficacy) for a categorical assistance program for trade-displaced workers, attempts to quantify the costs and benefits of the current program, and discusses possible modifications of the program. The authors believe that the political gains are great and claim that, until the auto industry crisis, the annual welfare gains probably greatly exceeded the sum of Trade Adjustment Assistance (TAA) administrative costs and beneficiary payments. In spite of net benefits from the program (at least until 1980), the efficiency and equity deficiencies of the program will make program reform necessary. Potential modifications are: (1) reduction of benefit levels (from the current 70% of the worker's previous wage to regular Uneployment Insurance levels of about 50% of average weekly wages); and (2) tightening TAA eligibility requirements so that imports must constitute "a substantial cause" of worker displacement. These changes are likely to lower TAA expenditures and redress some inequities and inefficiencies but are likely to curtail the program's political effectiveness in reducing protectionism.

**Authority:** Comprehensive Employment and Training Act of 1973, as amended (P.L. 93-203, title I, § 135; 29 U.S.C. 837). Social Security Act, as amended (42 U.S.C. 1104). Trade Act of 1974, as amended (P.L. 93-618, title II, § 231, 232; 19 U.S.C. 2291-2292). Wagner-Peyser National Employment System Act (P.L. 73-30; 29 U.S.C. 49).
**Availability:** Agency
**Geographic Relevance:** National; State

*Program Objectives:* Objectives are to administer a program of unemployment insurance for eligible workers through Federal and State cooperation and to administer payment of Worker Adjustment assistance. *Abstract:* The purpose of this study is to examine the microsimulation model of unemployment insurance currently in use at the Department of Labor. An overview of the model is presented. The separate equations which form the basis for the model and the relations among these equations are considered. Particular attention is paid to the specification employed and to alternative specifications suggested in the relevant economics literature. The uses to which the model have been put are considered and its strengths and weaknesses in these various applications are pointed out. It is concluded that while the present model of the unempolyment insurance system is a useful and important first step toward systematically incorporating the fruits of research into policy analysis, it is characterized by a large number of potential errors which have not been analyzed and the effects of which are poorly understood.

**Authority:** Wagner-Peyser National Employment System Act (P.L. 73-30; 43 Stat. 113; 29 U.S.C. 49).
**Availability:** NTIS
**Geographic Relevance:** National

*Program Objectives:* The program seeks to place persons in employment by providing a variety of placement-related services to job seekers and employers seeking qualified individuals to fill job openings. *Abstract:* This report evaluates the Employment Service (ES) Job Service Improvement Program (JSIP) which establishes employer advisory committees to help improve the ES and increase use of it by area employers. The report highlights the variety of approaches in practice in the use of such employer committees. The evaluators found that many committees met regularly only for a relatively short time after being established to review ES activities but some continued to be active beyond their initial-review functions. Those who maintained activity expanded their scope beyond critique of the local office to become an ongoing advisory group and/or an information network for employers on the services of the ES and related employment issues.

**Availability:** NTIS (PB 81-123 143)

*Program Objectives:* The program seeks to place persons in employment by providing a variety of placement-related services to job seekers and employers seeking qualified individuals to fill job openings. *Abstract:* This is an evaluation of the Employment Service (ES) "self-service" component, the Job Information Service (JIS) run by many local offices of the U.S. Employment Service (now often called Job Service) system. The report provides data on the characteristics of JIS installations from a mail survey of local offices and from case study visits to 15 varied local ES offices. The report indicates that there has been wide diversity in the way local offices put the "self-services" concept into practice and that there is no clear "best" approach suited for all offices. The study identifies factors to be considered by local offices in working out specific details for their JIS activity. Four "models" are laid out along with types of factors local offices should consider in deciding which is the most appropriate for their circumstances.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* The general purpose of this study was to determine the HIRE I program's accomplishments and problems in encouraging employers to hire, train, and seek to maintain in continuing employment unemployed workers from specified target groups, particularly veterans. The study has been abondoned without a formal final report because of severe limitations of the sample data obtainable and of analytic efforts.

*Program Objectives:* The program seeks to place persons in employment by providing a variety of placement-related services to job seekers and employers seeking qualified individuals to fill job openings. *Abstract:* The report suggests several steps which program managers may wish to consider in order to meet Federal and State needs more adequately. Prominent among these is more use of sampling for validation, development of estimates of statewide and national placement reporting errors, and putting statewide outside verification surveys on an annual basis using procedures outlined in the ESARS Handbook with additional followup to reconcile questionable cases. The contractor is skeptical about reliance on use of a cross-match of Employment Service (ES) referrals and Unemployment Insurance (UI) wage records, since the UI records do not indicate the ES role in the Hiring transaction, and 13 States do not have such record systems.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons; and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. The purpose of the Independent Monitoring Units (IMUs), required for each Comprehensive Employment and Training Act (CETA) prime sponsor by the legislation, is to help such sponsors improve their management of the program and to reduce or eliminate fraud and abuse in administration of local CETA-funded programs and services. *Abstract:* The study will assess the current status and strategies of CETA Prime Sponsor IMU activity and will include analyses of costs and outputs from sampled IMUs. The study will focus on sites in three CETA regions with supplementary data to be obtained from other regions. Initial field visits are scheduled for the Philadelphia region.

**Authority:** Comprehensive Employment and Training Act of 1973, as amended (P.L. 93-203, title III, § 301; 87 Stat. 857; 29 U.S.C. 871).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Steel Adjustment Federal Advisor Demonstration was intended to test the usefulness of stationing (short-term) a "Federal Advisor" in communities experiencing mass layoffs due to plant closings (steel mills) in order to act as a community catalyst-coordinator to facilitate reemployment of displaced workers. Four sites were: Youngstown, Ohio; New Haven, Connecticut; Torrance, California; and Joliet, Illinois. *Abstract:* The study found that the local projects were impaired by insufficient prior communication between Federal and State leaders with lack of agreement on primary purpose of demonstration. It also found use of local agency staff as "Federal" intervenors (catalyst/advisors) questionable for a number of reasons including their being viewed by other local principals as "having no clout." Local principals generally endorsed the concept of a catalyst "Federal Advisor" as potentially useful in marshaling community resources but also felt that the magnitude of their unemployment problem called for additional funds for training and relocation services. Some modest gains were made in efforts to aid readjustment of displaced workers but the project did not generate additional broad-based community efforts to aid readjustment.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead tc increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. The objective of the local Comprehensive Employment and Training Act (CETA) eligibility determination screening (and subsequent verification) processes is to insure that only those individuals authorized by the legislation are placed in the CETA program, and those who are inadvertently enrolled are discovered and removed as expeditiously as possible. *Abstract:* The report spells out the types of practical problems faced by CETA sponsors on eligibility determination and why local systems and strategies vary considerably. It points up difficulties which might reasonably be eased (particularly in the area of financial liability), and describes the basic eligibility determination and verification processes. The report concludes that, despite the continuing problems, most sponsors generally are now on top of the complicated task of screening out ineligibles.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* The report is on the effects of the Comprehensive Employment and Training Act (CETA) 1978 amendments. It focuses particularly on experiences with changes in the public service employment (PSE) programs but examines also some aspects of CETA management, service delivery systems, and the role of organized labor. The study is based largely on field reviews of a sample of 28 prime sponsors conducted in October 1980, about 18 months after the CETA amendments became effective. The report's analyses of PSE changes in 1978-80 have limited current significance in light of the new Administration's decision to eliminate the PSE programs in Fiscal Year 1982. Its assessment of other aspects of CETA functioning, however, provide significant background for the current reexamination of issues of how to balance objectives of assuring adequate Federal oversight and developing local capability and allowing local flexibility in planning and conducting the programs.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* This report provides data on long-term (basically two years) postprogram experience of January-June 1975 entrants to decentralized programs under the Comprehensive Employment and Training Act (CETA). It supplements earlier reports on shorter-term experience of this group. The report is significant primarily as a specific illustration of the types of gross data which will be forthcoming from the Continuous Longitudinal Manpower Survey (CLMS) on a more reliable basis for later years' CETA enrollees. While the report is confined to general descriptive presentations, such data's longitudinal features and availability for a new entrant sample each year will enable new types of analyses of CETA target-group populations' labor market problems and performance. Part I presents the descriptive analyses while Part II provides detailed data tables and appendices including brief descriptions of CETA and of CLMS methods and data limitations.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs *Abstract:* This report presents the first formal estimates of the net impact of Comprehensive Employment and Training Act (CETA) decentralized programs on participants' postprogram earnings. The impacts were measured by differences in Social Security covered earnings between the Continuous Longitudinal Manpower Survey (CLMS) sample of CETA participants and a matched comparison group drawn from the Current Population Survey (CPS), after adjustment by regression methods for differences in background factors. The estimates, for the initial postprogram year 1977 for CETA Fiscal Year 1976 entrants, find a positive impact on the order of $300 for the year. There was very considerable variation found within the overall average, however, by type of program, preprogram earnings history, sex, and those placed vs. not placed at termination.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* This study uses the initial two cohorts of the Continuous Longitudinal Mannower Survey (CLMS) to examine the earnings paths of persons who enrolled in adult-oriented Comprehensive Employment and Training Act (CETA) programs during the first six months of 1975. By using a pooled cross-section/time series data structure and multiple regression, earnings patterns from the fourth quarter prior to entry through the eighth quarter after termination are examined. Although it cannot be attributed to program participation, one overall pattern stood out among the several identified: postprogram earnings paths moved upward and there is no "fall back" to preprogram levels. The author cautions that the study findings are "exploratory and suggestive rather than conclusive.".

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. The tax credit is provided as an inducement for employers to hire and retain workers from specified target groups which have severe difficulties in obtaining employeemnt. *Abstract:* This is the third report in a series that evaluates local administration of the Targeted Jobs Tax Credit (TJTC). It is based primarily on field studies of 25 sites through March 1981. The basic finding is that TJTC has not been used as generally expected. Most notably: many Job Service offices and Comprehensive Employment and Training Act sponsors are skeptical of TJTC and reluctant to use it extensively as a placement tool; relatively little use is made by eligible job seekers of a TJTC voucher to help their job search; and most employers who draw on TJTC do so by getting retroactive certifications of employees hired earlier rather than by seeking TJTC new hires. The report also examines reasons for the generally limited employer response to availability of the tax credit.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. The tax credit is provided as an inducement for employers to hire and retain workers from specified target groups which have severe difficulties in obtaining employment. *Abstract:* This is the second report in a series that evaluates local administration of the Trageted Jobs Tax Credit (TJTC). The report, based on field study of 25 sites through October 1980, finds that many Employment Service offices and most Comprehensive Employment and Training Act (CETA) sponsors (the principal administering agencies) continue to be skeptical about TJTC and reluctant to use it extensively as a placement tool. Additionally, the report seeks to learn why employers have responded weakly to the tax credit incentive to hire from the targeted groups. The principal reasons for the lack of employer response appear to be "fear of government" and "hidden costs"–expressed as concern about "red tape," government intrusion into hiring, Internal Revenue Service audits, or being subject to requirements for Federal contractors. Other employer reasons for lack of participation include: (1) the tax savings from TJTC are not large enough to be worth losses from the hiring of workers regarded as less productive; (2) resistance to change in hiring practice because of fear that screening job applicants for TJTC eligibility may bring charges of violation of fair hiring laws; (3) an unwillingness to commit personnel time to screening; and (4) simply a feeling that hiring decisions should be kept separate from tax considerations.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by estabishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* This is the sixth report in a series that evaluates implementation of the Private Sector Initiative Program (PSIP), established by Title VII of the Comprehensive Employment and Training Act (CETA) under which CETA prime sponsors seek to involve private business in local employment and training activities for the disadvantaged. The report, based on field examination of 25 sample CETA sponsor sites through March 1981, undertakes to: (1) identify the principal goals being pursued locally and judge the degree of accomplishment on them thus far; (2) classify the types of activities being conducted, efforts to market PSIP, and the criteria used to choose projects and deliverers; (3) rate progress on specific outcomes – stimulation of business participation, influence on the overall CETA system, and results for PSIP participants; and (4) assess the functioning of the PSIP Private Industry Councils.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* This is the fourth report in a series that evaluates implementation of the Private Sector Initiative Program (PSIP) established by Title VII of the Comprehensive Employment and Training Act (CETA) under which CETA prime sponsors seek to involve private business in local employment and training activities for the disadvantaged. The report is based on observation at 25 sites and covers developments through June 1980. The evaluators found that most sponsors advanced from the necessary "institution-building" stage in 1979 to actual initiation of projects in mid-1980. They found two patterns developing–one of sponsors who have "focused goals" and "rapid implementation" and the other with "broader goals" with "slower implementation"–and caution that it is not yet possible to judge which is better. Another feature found is that a third of the sponsors had developed some "customized" training with a high level of employer involvement geared to the needs of an identified company or group of employers. The report also analyzes the types of factors which influence the pace and nature of PSIP development in different sponsor settings.

*Program Objectives:* The program seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons and to assure that training and other services lead to increased earnings and enhanced self-sufficiency by establishing a flexible decentralized system of Federal, State, and local programs. *Abstract:* This is one of a series of studies of how particular large cities have used Federal aid, with emphasis on the 1977-78 "economic stimulus" expansion of the Federal grants for public service employment, local public works, and antirecession fiscal assistance. The studies use a common analytic framework to enable comparisons across cities with different economic, budgetary, and political circumstances. Each of the studies traces growth and uses of Federal aid in the 1970s and seeks to respond to four types of questions: (1) To what extent have cities become dependent on Federal grants to pay for basic services? (2) Has the Carter Administration's Economic Stimulus Program of 1977-78 helped reduce unemployment? (3) Who benefits from the federally supported programs? (4) Who at the local level decides how the Federal aid money is spent?

**Authority:** Social Security Act, as amended (P.L. 74-271, title III, § 301; 49 Stat. 626; 42 U.S.C. 502-503). Wagner-Peyser National Employment System Act (P.L. 73-30; 48 Stat. 113; 29 U.S.C. 49).

**Availability:** GAO

**Geographic Relevance:** National; State

*Program Objectives:* Objectives are: to administer a program of unemployement insurance for eligible workers through Federal and State cooperation, to administer the payment of unemployment benefits to former Federal personnel as well as trade adjustment assistance to eligible individuals, to administer a nationwide network of local employment offices to provide services to assist workers in obtaining suitable employment, and to assist employers in resolving their employment problems. *Abstract:* Offices in the Department of Labor's Employment and Training Administration (ETA) arranged with the State of Nevada for nine pass-through agreements to obtain services for several Labor activities. A pass-through agreement is a procurement initiated and principally carried out by ETA but entered into by a State and a contractor using Federal funds granted to the State. The work to be performed was to be utilized primarily at the regional or national level, rather than primarily benefiting Nevada's activities. For six of the agreements, Labor used the pass-through arrangement because there were insufficient funds available, which it could obligate directly, to spend for the work. For two projects, Labor used the pass-through arrangement because it lacked the staff and time to go through a formal procurement process. The remaining project used Comprehensive Employement and Training Act funds, which Labor could have used to contract directly for the work. Labor's view was the pass-through contracting method was justified because the work benefited the employment security system rather than merely affecting Federal operations. Although GAO does not question the legal basis for these awards, Labor should procure these services, when needed, directly. Labor's use of pass-through agreements for achieving ETA goals does not ensure that the Federal Government's interests are protected. These agreements effectively circumvent the procurement standards and safeguards set forth to ensure effective use of Federal moneys. The Secretary of Labor should: (1) discontinue using State agencies to enter into agreements that pass through funds to contractors for work having regional or nationwide application; and (2) where Labor has a continuing need to obtain the services for the kinds of activities discussed in this report, request sufficient funds from Congress to allow for procurement directly.

*Congress Should Scale Down Redwood Employee Program Benefits.* (HRD-80-63).
7/8/80; 61 pp. + 4 app. (26 pp.)
**OMB Funding Code/Title:** 16-0326-0-1-603 / Federal Unemployment Benefits and Allowances
**Program:** Unemployment Assistance and Payments under Other Federal Unemployment Programs (Payments on Behalf of Workers Adversely Affected By Expansion of the Redwood National Park)
**CFDA NO.:** 17.225
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee, *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Redwood National Park Expansion Act, as amended (P.L. 95-250; 92 Stat. 163; 16 U.S.C. 79c).
**Availability:** GAO
**Geographic Relevance:** State

*Abstract:* The Redwood Employee Protection Program, established as a result of title II of Public Law 95-250, provides benefits to workers laid off because of expansion of the Redwood National Park. However, workers whose layoffs are not related to the park expansion also qualify for benefits because the law presumes that layoffs within a specified period of time are related to park expansion. GAO assessed the effectiveness of the program and found that the program's exceptional benefits reduce incentives to work, and that the Department of Labor's poor management created problems in program operations. Management deficiencies hindered employee eligibility determiniations and benefit entitlement processes; resulted in errors in benefit entitlements; and delayed employees' receipt of health, welfare, pension coverage, and retraining benefits. Congress should amend the Redwood National Park Expansion Act of 1978 to: delete the conclusive presumption provision in section 203 of the law and require that the Secretary of Labor certify that layoffs are related to a decrease in operations caused by park expansion before program eligibility can be established; require Labor to identify program recipients whose eligibility has been established for reasons other than park expansion and terminiate their eligibility for future benefits; and eliminate differences in eligibility requirements between union and nonunion employees. The Secretary of Labor: should develop criteria to restrict certification of affected employers to operations directly affected by park expansion; clarify the authority and responsibility of the various Labor groups involved with administering the program; provide guidance and direction to the California Employment Development Department of eligibility and benefit determination matters more promptly; evaluate the California Employment Development Department controls and procedures and take necessary action to insure that information supplied by employees and employers is routinely verified and that eligibility and benefit determinations and entitlement calculations are periodically checked.

*CETA Demonstration Provides Lessons on Implementing Youth Programs.* (HRD-81-1).
12/8/80; 61 pp. + 10 app. (23 pp.)
**OMB Funding Code/Title:** 16-0174-0-1-504 / Employment and Training Assistance
**Program:** Special Programs for Youth
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Comprehensive Employment and Training Act of 1973, as amended (P.L. 93-203, title IV, § 416-420, as amended by; P.L. 95-93; 29 U.S.C. 894-898).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program was designed as a national experiment to provide jobs and test the efficiency and impact of guaranteeing jobs for all 16- to 19-year-old disadvantaged youths residing in a designated geographic area and attending school or who are willing to return to school. *Abstract:* The Youth Incentive Entitlement Pilot Projects were designed to test whether guaranteed part-time jobs during the school year and full-time jobs in the summer would induce economically disadvantaged youths to remain in or return to school and provide jobs to reduce the high unemployment rate among these youths. GAO found that most work-sites provided adequate experiences. Others, however, had problems in development of good work habits, in supervision, and in monitoring and counseling. Also, many sponsors experienced operational problems. The Department of Labor and its contractor had to intervene frequently in program operations. This raised the questions of whether the demonstration was a fair test of the guaranteed job concept and whether sponsors are capable of implementing such complex programs. Many private sector jobs were with employers that normally hire young workers, minimizing the job creation impact of the program. Congress should recognize the conditions under which the demonstration was implemented. Certain competitively selected sponsors receiving intensive oversight had significant operational problems. If the entitlement concept is to be extended, or expanded to other sponsors, or a similar program adopted, Congress should make sure it is implemented gradually to allow sponsors time to develop management capacity. The Secretary of Labor should: (1) require sponsors to strictly enforce reasonable attendance and academic standards thereby enhancing the program's credibility and effectiveness for both participants and the general public; (2) increase efforts to promote cooperative relationships among sponsors, schools, and other organizations serving youths; (3) help sponsors upgrade worksite supervision, job development, participant counseling, and monitoring; (4) create, implement, and enforce adequate controls to prevent substitution; and (5) establish and enforce requirements that limit program management costs.

### E00902-030

*Employment Service Needs To Emphasize Equal Opportunity in Job Referrals.* (HRD-80-95).
9/17/80; 31 pp. + 6 app. (9 pp.)
**OMB Funding Code/Title:** 16-0172-0-1-504 / Program Administration
**Program:** U.S. Employment Services
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Wagner-Peyser National Employment System Act (P.L. 73-30; 48 Stat. 113; 29 U.S.C. 49). Social Security Act, as amended (P.L. 74-271, title IX, § 901; 42 U.S.C. 1101).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Employment Service finds jobs for people and people for jobs. *Abstract:* The Employment Service offices which GAO visited generally referred minorities and women to lower-paying jobs traditionally held by minorities and women in proportions greater than their representation among applicants. These were low or semiskilled positions such as maids, porters, domestic workers, retail sales clerks, and clerical workers. Whites and males were referred to better-paying jobs in proportions greater than their representation among applicants. Minority and female applicants were often unskilled or semiskilled and could not qualify for better paying jobs. The Department of Labor was not responsive to Department of Justice recommendations for improving its enforcement activities. The Department of Labor's regional administrators did not emphasize equal opportunity enforcement in providing employment services. The Department of Labor did not require States to use its computerized equal opportunity compliance tool, which presents applicant data in a format designed for equal opportunity analysis. The Secretary of Labor should ensure that local office procedures are revised to consider the possible present effects of past employment practices, local office staffs are given equal opportunity awareness training, and equal opportunity concerns are considered when revising the fund allocation formula. The Secretary of Labor should improve equal opportunity enforcement by: (1) giving the headquarters equal opportunity compliance staff control over regional compliance units, (2) requiring States to use the computerized enforcement tool or a similar system, (3) incorporating compliance with equal opportunity requirements in local office program compliance reviews, and (4) developing procedures for local offices to periodically provide equal employment opportunity information on possible employment discrimination by employers.

**Authority:** Comprehensive Employment and Training Act of 1973, as amended (P.L. 93-203; 86 Stat. 839; 29 U.S.C. 801 et seq.).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Abstract:* The coverage and quality of audits of Comprehensive Employment and Training Act (CETA) grant recipients were evaluated. Between July 1974 and October 1978, over $26 billion in CETA funds was spent by about 460 grantees and thousands of subgrantees. Department of Labor regulations require these grantees to be audited at least once every 2 years. GAO found that some were not yet audited even once as of March 31, 1980. Those audits which have been performed have not always met the quality standards established by the Comptroller General and required by Labor and Office of Management and Budget regulations. Many CETA audit reports, disclosing weaknesses in internal controls, ineligible participants, and improperly spent funds, were not as effective as they could have been because they were not issued until years after the problems were first experienced. Insufficient audit resources to perform all necessary audits and quality control review contributed to the conditions GAO found.

**Program:** Comprehensive Employment and Training Programs
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Comprehensive Employment and Training Act of 1973, as amended (P.L. 93-203; 87 Stat. 839; 29 U.S.C. 801 et seq.).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Abstract:* GAO reviewed activities in the Department of Labor and selected Comprehensive Employment and Training Act (CETA) grantees to determine: (1) whether Labor had a system of internal controls to protect adequately against fraud, waste, and abuse; and (2) how grantees of the CETA Program protect against improper use of Federal funds and assets. Internal controls over disbursements, receipts, and property management at Labor headquarters, four regional offices, and nine CETA grantees are not adequate to protect Federal funds and assets, resulting in intentional abuse and nonintentional misuse of Federal funds. Although Labor has initiated some actions intended to improve internal controls and visibility over grantee activities, further improvements are needed.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The results of this research will assist policymakers in evaluating proposals to stimulate higher pension coverage. It may suggest ways in which pensions can be stimulated without resorting to direct governmental involvement. *Abstract:* The proposed research will analyze and test a comprehensive theory of why business firms offer pensions. It will then independently analyze the separate determinants of pensions. The basic hypothesis of the research is that pensions are potentially beneficial to a firm for three fundamental reasons: (1) tax advantages that make pensions a tax-favored method of employee savings; (2) financial benefits to the firm from underfunding defined benefit pension promises; and (3) incentives for better employee performance when pensions are coupled with certain pension plan characteristics like vesting and service requirements. Appropriate empirical predictions of these theories are developed and tested.

**Authority:** Employee Retirement Income Security Act of 1974 (P.L. 93-406, title I, § 101-111; 88 Stat. 852; 29 U.S.C. 1021-1031).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objectives of the program are to study the role of early retirement provisions in pension plans in inducing early withdrawal from the workforce and to compare public and private plan provisions. *Abstract:* In Part 1 of this study, the financial incentives for early retirement are quantified for typical individual work histories in terms of changes in pension asset values and wage-replacement rates when retirement is deferred from year to year. Refined statistics on the actuarial adjustments plans use for early and for late retirement will be developed. The results will be used to estimate the impact of pension plans' existing financial incentives on the labor supply of older workers and the changes to be expected if plans were redesigned to be more actuarially neutral with respect to retirement age. Part 2 involves analysis of State and local employee pensions using data on over 100 large State and local plans collected under the present study.

*Analyses of the Effects of Pensions on Wage Levels and Saving and Retirement Decisions.*
In process
**Contractor:** Mathematica Policy Research, Inc.; 2101 L Street NW, Washington, DC
**OMB Funding Code/Title:** 16-0104-0-1-505 / Salaries and Expenses
**Program:** Pension and Welfare Benefits Program (Reporting and Disclosure Requirements)
**CFDA NO.:** 17.103
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Employee Retirement Income Security Act of 1974 (P.L. 93-406, title I, § 101-111; 88 Stat. 852; 29 U.S.C. 1021-1031).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The results of this study can be used to answer policy questions that seek to determine the effect of pensions on savings, wage rates, and worker turnover. *Abstract:* Part I of the evaluation estimates a novel model of wage-pension tradeoffs, using a unique microdata set that combines detailed information on the characteristics of employers and the pension plans in which employees participate, if any. As part of the design, the study will consider the hypothesis that employers value pensions as a means of reducing employee turnover. Part 2 extends previous research that uses life-cycle models of savings and retirement decisions. The research proposed here represents an improvement over previous work: the earlier empirical model took the retirement decision as exogenous, whereas in this proposed study it would be considered endogenous, and the empirical specification altered accordingly.

*Program Objectives:* The objectives of the program are to evaluate the role of pensions on the retirement decision and to identify the characteristics of particular pension plan rules that affect age of retirement. *Abstract:* The proposed research will develop a theoretical basis for empirical studies of the determinants of older workers' retirement behavior and will use this framework to formulate and estimate an econometric equation of estimating the effects of pensions, wages, and other economic and noneconomic variables on the age of retirement. The analysis will be guided by economic theories of labor and leisure over the life cycle and by the existing retirement literature.

*Abstract:* This study will examine the implications of Employee Retirement Income Security Act (ERISA) funding requirements on firm behavior and on workers' and stock market's evaluation of these requirements. An empirical study will be performed in which estimates of the pension liabilities of a sample of firms will be made. Aggregate pension liabilities under both implicit and explicit firm-/worker contracts will be estimated.

*Program Objectives:* The objective of the program is to determine better estimates of the determinants of retirement age, particularly with regard to the effects of pensions and social security. Such results can potentially be useful in evaluating proposals to alter either private or public pension rules. *Abstract:* The questions addressed in this research proposal are: (1) What determines the retirement expectations which individuals hold during the preretirement years? (2) Are these retirement plans generally carried out? (3) If not, what are the factors which intervene to alter the expected retirement behavior? A unique data file is used to test the reliability of expectations as a predictor of actual behavior and to determine the degree to which divergence between these two variables is caused by unexpected changes in personal characteristics (i.e., changes in health), unexpected changes in economic conditions (i.e., unexpected inflation), or better information with respect to both (i.e., more accurate estimates of pension or social security benefits).

*Program Objectives:* The model which results will allow for prediction of the effects of proposed policies with regard to private pensions and social security. It will also provide a basis to estimate the bias present in studies that ignore systematic differences in individuals' valuations of leisure at older ages. *Abstract:* The purpose of this research is to design and to estimate a model of a worker's retirement decision using longitudinal microdata. Contrary to past efforts, the model developed in this study accounts for the difference of workers with regard to their "tastes" for leisure. The model, once estimated, will be used to infer likely retirement decisions by workers confronted with alternative pension provisions relating to portability of benefits, early retirement provisions, social security benefit schedules, and earnings tests.

**Availability:** NTIS
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide information used in formulating Labor Department policy or in recommending legislation to Congress. *Abstract:* The primary purpose was to investigate the impact of private pensions and Social Security on retirement and individual private savings decisions in the United States. The study failed to find convincing evidence to support the notion that either the Social Security system or the private pension system leads to lower private savings rates. The study also concluded that pension plans provide strong incentives to retire at the age of eligibility for the pension. Retirement decisions were also found to be sensitive to wage level and age.

*Program Objectives:* The objective of the program is to provide Congress and the Executive Branch with information concerning the economic and other effects of a National Health Insurance (NHI) program. *Abstract:* The purpose of the study is to explore the possible impact of NHI on employers and employees covered by collectively bargained health benefit plans. The analysis of the three generalized NHI programs found that each program will have a significant impact upon some negotiated health plans. Some plans that will receive the greatest improvements in benefits and health eligibility will also experience very large health plan cost increases.

*Program Objectives:* Multiemployer plans cover over one fifth of all private pension plan participants. The major objectives of this study are to provide an understanding of the characteristics of multiemployer plans and the impact of Employee Retirement Income Security Act (ERISA) on these plans. *Abstract:* The study provides comprehensive findings concerning the provisions, benefit formulas, and financial characteristics of multiemployer pension plans; and examines the effects of ERISA on these plans. As of 1975, over 2,375 multiemployer plans covered almost 8.8 million active and inactive participants; the largest of these plans covered over 600,000 participants while the smallest had fewer than 50 participants.

*Program Objectives:* The comparison of pre- and post-Employee Retirement Income Security Act (ERISA) welfare plan data is needed to identify trends in plan benefits, provisions, administrative procedures and structures, and cost elements that may be attributed to ERISA. *Abstract:* Employee benefit plans currently provide a broader range of major medical, dental, eye care, prescription drug, and X-ray benefits to workers than in 1974. Seventy percent of all private U.S. workers were covered by employee welfare plans in 1978-79. These plans were sponsored by an estimated 1.7 million employers, employee organizations, and joint union management boards.

*Program Objectives:* Two major objectives of this study were to: (1) determine the reasons for plan termination by comparing the characteristics of firms, plans, and participants in cases of both active and terminated defined benefit and defined contribution plans; and (2) to provide a model to predict future plan terminations. *Abstract:* The study found that a plan is more likely to remain active and less likely to terminate if it is relatively well funded, if it has relatively large plan assets, if the number of plan participants is increasing, if it is an older plan, and if it complied with the Employee Retirement Income Security Act (ERISA) participation standards pre-ERISA. Conversely, having made no plan amendments in the last 5 years was directly related to plan termination. These relationships were consistent for both defined benefit and defined contribution plans. Other plan characteristics were also related to plan termination but the direction of the relationship differed between the plan types.

**Geographic Relevance:** National

*Program Objectives:* The objective of this study was to investigate the policies and practices of group health, life, and disability insurers to ascertain whether they might have a direct effect upon hiring of new employees who had a history of serious illness. *Abstract:* This report will help determine which insurance policies and practices represent major employment barriers for persons with a history of certain diseases and the extent they exist in the industry. The report concludes that, while there appears to be no direct intervention from insurance carriers in the actual employee selection process, requirements for evidence of insurability may produce employer perceived barriers to hiring job candidates with a previous period of serious illness.

*Black Lung Benefits Act. Annual Report on Administration of the Act during Calendar Year 1979.*
1/16/81; 69 pp.
Walter E. Sellers, Jr.
**OMB Funding Code/Title:** 16-8144-0-7-601 / Black Lung Disability Trust Fund
**Program:** Administrative Expense (Claims and Benefits)
**CFDA NO.:** 17.307
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources; *Senate* Committee on Finance. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Federal Coal Mine Health and Safety Act of 1969, as amended (P.L. 91-173, title IV, § 424; 83 Stat. 798; 30 U.S.C. 934).
**Availability:** Agency; Federal Depository Libraries
**Geographic Relevance:** National; State

*Program Objectives:* The Department of Labor is required to administer the provisions of the Federal Mine Safety and Health Act of 1977, as amended, which provides for monthly income and medical benefit payments to coal miners who are totally disabled due to pneumoconiosis and to the surviving dependents of miners whose death was due to such disease. The Secretary is required to submit an annual report to Congress each year that reviews the activities in connection with the administration of the Act. *Abstract:* As of January 1979, the Department had a backlog of 241,332 undecided cases. During that year, over 194,000 claims were acted on for initial determination with 84,000 claims approved. Of the $1.5 billion paid out in benefits by the Department of Labor since 1973, 93% or $1.44 billion, was paid in 1979 and 1980. During the year over 80,000 medical appointments were scheduled for claimants. Medical benefit expenditures amounted to $13.9 million in 1979 compared with only $1.8 million in 1978. Considerable time and effort were expended handling Congressional inquiries. During the year the Department provided 50,696 written and 23,000 telephone responses to Congressional inquiries. Frequently litigated issues were: whether responsible operators could be held liable for payment of benefits for claims approved by Social Security Administration under section 435(a)(2-)(A) of the Act; whether a responsible operator can have a claimant examined by a physician of its choosing; and the constitutionality of the statutory 25 year presumption of disability.

*Economic Effects Studies–Minimum Wage and Maximum Hours Standards under the Fair Labor Standards Act.*
1/19/81; 48 pp.
Anna Carrera
**OMB Funding Code/Title:** 16-0105-0-1-505 / Salaries and Expenses
**Program:** Improving and Protecting Wages (Enforcement and Administration of Complaints re Wage Hour/Work Standards)
**CFDA NO.:** 17.303
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Fair Labor Standards Act of 1938, as amended (P.L. 75-718, § 9-17; 29 U.S.C. 209-217).
**Availability:** Agency; Federal Depository Libraries
**Geographic Relevance:** National; State

*Program Objectives:* Program objectives are to: submit the annual report required under the statute to the Congress; discuss the Department of Labor activities relevant to minimum wages, overtime, and certification under section 14 of the Fair Labor Standards Act (FLSA); discuss current and future research activities of the Employment Standards Administration; discuss independent research related to the FLSA; and discuss legislative proposals to amend the FLSA. *Abstract:* In September 1980, an estimated 60.2 million nonsupervisory employees covered by the minimum wage provisions of the FLSA accounted for four-fifths of the employed nonsupervisory workforce. On January 1, 1981, the fourth and last minimum wage increase to $3.35 an hour prescribed by the by the 1977 amendments went into effect. This resulted in wage increases for an estimated 5.5 million workers and will increase the total wage bill by $2.2 billion (0.3%) of the estimated annual wage bill of all covered workers and 0.08% of the current $2.9 trillion estimated gross national product. During Fiscal Year 1980, minimum wage and overtime violations disclosed $111 million in unpaid wages, and wages restored totaled $70 million. Investigations included a program discouraging employers from hiring undocumented workers and a new farmworker enforcement program. A compliance survey was conducted in 1979-80 to help the Minimum Wage Study Commission in its independent study of the Act.

**Geographic Relevance:** National; State

*Abstract:* The purpose of the program is to study the consequences of the Age Discrimination in Employment Act Amendments of 1978 (P.L. 95-256) to: (1) examine the effects of raising the mandatory retirement age to 70; (2) determine the feasibility of further extending or eliminating the age 70 limit on coverage for the private sector and non-Federal public employment; and (3) examine the effects of exemptions in the Act for tenured faculty members and certain business executives.

**Authority:** Civil Rights Act of 1964, as amended (P.L. 88-352, title VII, § 701; 78 Stat. 253; 42 U.S.C. 2000e); Executive Order 11246.
**Availability:** Agency
**Geographic Relevance:** National; State; City; County; Standard Metro. Stat. Area (SMSA)

*Program Objectives:* The objective of the program is to develop a practical definition of availability (which plays a central role in affirmative action planning); to establish a standard of comparison against which firms can determine whether they underutilize minorities and women; and to define a potential pool of workers from which employers can hire. *Abstract:* This report has drawn on the knowledge of a panel of experts who reflect the views of employers and civil rights organizations as well as academics on the role of availability in affirmative action planning. The report recommends revising Office of Federal Contract Compliance Programs' (OFCCP's) eight factor approach to determining availability and changing the current definition from a combined approach to a two-tier approach (current and future availability). Current availability would be derived from a straightforward statistical approach while future availability would be determined by an assessment of cost effective measures which a particular firm could undertake to increase employment opportunities of minorities and females, taking into consideration the number of job openings and other factors.

**Availability:** Agency; Federal Depository Libraries
**Geographic Relevance:** National; State

*Program Objectives:* The objectives of the program are: to submit the annual report as required under the statute; to discuss the Department of Labor activities relevant to minimum wages, overtime, and certification under Section 14 of the Fair Labor Standards Act (FLSA); to discuss current and future research activities of the Employment Standards Administration; to discuss independent research related to the FLSA; and to discuss legislative proposals to amend the FLSA. *Abstract:* An estimated 60.1 million nonsupervisory employees covered by the minimum wage provisions of the FLSA in September 1979 accounted for four-fifths of the employed nonsupervisory workforce. On January 1, 1980, the third phase of the 1977 amendments went into effect raising the minimum wage to $3.10 an hour, resulting in wage increases for an estimated 5.3 million workers. This will increase the total wage bill by $1.8 billion (0.3%) of the estimated annual wage bill of all covered workers and 0.08% of the current $2.4 trillion estimated gross national product. Minimum wage and overtime violations disclosed nearly $124 million in unpaid wages in Fiscal Year (FY) 1979; wages restored totaled $73 million, both substantially higher than FY 78 figures. The Minimum Wage Study Commission continued its study of the Act under the provisions of the 1977 amendments.

*Program Objectives:* The object of the program is to insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. *Abstract:* The purpose of this study was to examine how such questions as etiology, diagnosis, or estimates of the extent of impairment in workers' compensation claims are resolved in those Canadian provinces that use medical review panels. In broad terms the experience for the provinces is similar. Panels are thought of as an important element in resolving disputes, though they are used quite infrequently. Most of the parties who have experience with them find that they are valuable and function well. While medical review panels operate well in these Canadian provinces, they function in an environment where workers' compensation claims are resolved in a nonadversary setting. As such, a number of questions exist about their adaptability to agencies in the States where controversy and litigation are commonplace.

*Program Objectives:* The program objective is to assure equal employment opportunity in the performance of Federal contracts and subcontracts. *Abstract:* The purpose of this study is to develop measurable program objectives which incorporate the nondiscrimination and affirmative action aspects of Office of Federal Contract Compliance Programs' enforcement of Executive Orders 11246 and 11375. The objectives will be expressed as the change in the minority and female shares of: employment, earnings, and firm specific training required to achieve significant progress toward "parity" with majority workers in covered firms. To the extent that these changes imply a change in the occupational distribution of minorities and women, relative occupational mobility rates will also be specified.

Farm Labor Contractor Registration Act of 1963, as amended (P.L. 88-582; 78 Stat. 920; 7 U.S.C. 2041-2044). Immigration and Nationality Act, as amended (P.L. 95-412, § 1; 92 Stat. 907; 8 U.S.C. 1151).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Fair Labor Standards Act sets standards for minimum wages, overtime pay, and other worker protection including provisions establishing equal pay, child labor, and employer recordkeeping requirements. The Farm Labor Contractor Registration Act requires farm labor contractors, their full-time or regular employees, and other users of migrant labor to observe certain rules in the employment of migrant workers and to register with Labor before they begin contracting. The act prohibits farm labor contractors from knowingly employing undocumented workers. *Abstract:* In 1977 the Department of Labor began a program of investigations directed at employers of illegal aliens (undocumented workers). Its purpose was to ensure that employers maintain compliance with labor standards thereby removing benefits that, according to Labor officials, would accrue from using undocumented workers at exploitative wage rates. Many undocumented workers employed at wages above established minimum would not be affected by Labor's program. Furthermore, if the program were to operate as Labor intended, it would not greatly deter the employment of nonagricultural undocumented workers because there are no penalties against employers knowingly using undocumented workers. Labor's separate undocumented worker program will not be effective until there are statutory sanctions against establishments knowingly employing these workers. However, legislation to establish such sanctions should be delayed until the Select Commission on Immigration and Refugee Policy has reported its findings to the Congress.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Fair Labor Standard Act provides for the payment of minimum wages to workers in certain enterprises engaged in producing goods for interstate commerce or handling, selling, or otherwise working on goods or materials that have been moved in or produced for commerce. The act covers other specific groups of workers, such as domestics. Criteria, such as minimum annual gross volume of sales or type of business engaged in, are used to determine whether the enterprise is covered by the act. Executives, administrative, and professional employees who meet prescribed duty and salary tests are exempt. *Abstract:* The Fair Labor Standards Act, established to protect the wages of American workers, is not adequately accomplishing its objective. Employers who violate certain provisions of the act are not penalized either because penalties do not exist or because existing ones are not used as often as they should be. The Department of Labor is also lax in recovering maximum back wages permitted by statute. Also, by not seeking interest, Labor does not restore, to the maximum extent, the full value of illegally withheld wages. When some illegally withheld back wages are not restored to employees, employers profit because the statute of limitation relieves them of this obligation. This report contains recommendations to: strengthen Labor's enforcement program to deter employers from violating the Fair Labor Standards Act, and improve Labor's ability to recover the full amount of back wages illegally withheld from employees.

**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Service Contract Act of 1965, as amended (P.L. 89-286; 79 Stat. 1034; 41 U.S.C. 351-358). Walsh-Healey Public Contracts Act, as amended (P.L. 74-846; 49 Stat. 2036; 41 U.S.C. 35 et seq.).

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Service Contract Act of 1965, as amended, provides labor standards protection to employees of contractors and subcontractors furnishing services to Federal agencies when a contract's principal purpose is to provide services in the United States using service employees. Employees receive no less than minimum wages, and on contracts exceeding $2,500, wages and fringe benefits are based on rates determined by the Secretary of Labor. The Walsh-Healey Public Contracts Act, as amended, provides labor standards protection to employees of contractors manufacturing or furnishing materials, supplies, articles, and equipment to the Government costing in excess of $10,000. Employees must be paid wages not lower than the minimum wages determined by the Secretary of Labor. *Abstract:* On June 5, 1979, the Department of Labor ruled that all Federal contracts for the maintenance and repair of Automated Data Processing (ADP), telecommunications, and other high-technology commercial equipment are subject to the wage determination and other requirements of the Service Contract Act. GAO believes the act was not intended to cover maintenance services related to commercial products acquired by the Government. Labor made no feasibility, cost/benefit, or impact studies to support its ruling. The ruling will impose an undue financial and administrative burden on the affected companies. Furthermore, wage protection for these service workers is not needed. In addition, the ruling may cause Federal agencies to eliminate or curtail many crucial programs and services. The Congress should act to exclude Federal contracts for ADP and other high-technology commercial product-support services from Service Contract Act coverage. A supplemental report (HRD-80-102(A), March 25, 1981) provides GAO's evaluation and response to the Department of Labor's comments on GAO's September 16, 1980, report (HRD-80-102). Labor strongly disagreed with the September 1980 report conclusion that maintenance and repair of ADP and other technology commercial equipment. Labor charged that the report contained material errors of the fact and law. However, Labor misread GAO's analysis of the act's congressional intent. Also, Labor did not adequately address the major issues that wage protection for service workers is not needed and that undue financial and administrative burdens result from applying the act to high-technology industries. GAO continues to believe that actions are fully justified and needed to permanently exclude Federal contracts for ADP and other high-technology commercial product-support services from the act's coverage.

**Authority:** Occupational Safety and Health Act of 1970, as amended (P.L. 91-596, § 6; 84 Stat. 1593; 29 U.S.C. 655).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National; State; City; County

*Program Objectives:* The objective of the program is to assure safe and healthful working conditions. *Abstract:* The purpose of this paper is to discuss the data needs for effective evaluation of the Occupational Safety and Health Administration (OSHA). Policy alternatives which would improve the validity and reliability of occupational safety and health data are suggested. In addition, policy recommendations concerning some local level analysis which could be used to augment and validate the national average data being aggregated and reported by the Bureau of Labor Statistics and OSHA's Management Information System are discussed. Local data will concern geographic and nonaggregate, industry-specific evaluation studies. This analysis begins with a summary of legislative proposals which illustrate the limitations of existing data resources and the narrow definition of evaluation criteria. The paper suggests increasing the scope of evaluation protocols to include qualitative factors along with statistical/quantitative factors. Only then will a truly aggregate evaluation of the performance of OSHA begin to emerge.

**Authority:** Occupational Safety and Health Act of 1970, as amended (P.L. 91-596, § 6; 84 Stat. 1593; 29 U.S.C. 655).
**Availability:** NTIS
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to assure safe and healthful working conditions. *Abstract:* This report argues that the best way to evaluate the Occupational Safety and Health Administration's (OSHA's) safety program is to either compare the experience of "early" and "late" inspectees in a given year, or to compare the experience of inspected and uninspected plants who are on OSHA's yearly target list. The latter approach cannot be used for 5 years or so owing to nonrandom inspection site selection procedures prior to 1981. It is also suggested that both strategies should employ autoregressive procedures to control for non-OSHA influences on injury rates. Based on the use of the above evaluation methodologies, the following recommendations concerning data needs should be adopted: OSHA's Management Information System (MIS) files should include the employer's ID code used in the Bureau of Labor Statistics (BLS) injury report, data on injury rates and employment prior to inspection, and consultation data; BLS should collect quarterly injury rates and the percentage of a plant's workforce that is inexperienced; and OSHA shold issue its inspection target list on a calendar year basis and require its inspectors to audit plants' injury records. Steps should be taken to ensure the accuracy of SIC Codes at the four-digit level in the MIS files.

**Authority:** Occupational Safety and Health Act of 1970, as amended (P.L. 91-596, § 2; 84 Stat. 1590; 29 U.S.C. 651 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to provide a safe and healthful work environment to covered workers by establishing safety and health standards and inspecting workplaces. *Abstract:* Industrial hygienists were well qualified; health inspection and consultation procedures were adequate; sampling equipment was generally accurate, reliable, and available in sufficient quantities; health inspections and consultations were generally complete; and hazardous conditions in work places were identified. While inspections and consultations were usually done properly, in some cases inspectors and consultants did not follow correct sampling procedures, classify violations and issue citations correctly, cite all violations found in the citations and reports issued to employers, make required followup inspections, or completely evaluate areas requested by employers. The laboratories visited appeared to be accurately analyzing samples. However, the Occupational Safety and Health Administration (OSHA) evaluation of laboratories was limited, and potential problems were noted. The Secretary of Labor should direct the Assistant Secretary for Occupational Safety and Health to act to ensure that laboratories analyzing industrial hygienists' sample provide accurate results. All laboratories analyzing consultation samples should participate in the Proficiency Analytical Testing program, and the adequacy of all unaccredited laboratories should be evaluated. OSHA should require that samples being analyzed in laboratories that continue to be nonproficient in the Proficiency Analytical Testing program should be analyzed elsewhere. The Secretary should direct the Assistant Secretary to assure that factors for sampling and analytical error used by industrial hygienists appropriately reflect the analytical abilities of the laboratories that analyze their samples and evaluate whether the use of outdated or improperly stored detector tubes for screening samples is appropriate.

## BUREAU OF LABOR STATISTICS

**E00906-001**
*Government Measures of Private Sector Productivity: Users Recommend Changes.* (FGMSD-80-45).
7/8/80; 31 pp.
**OMB Funding Code/Title:** 16-0165-0-1-505 / Salaries and Expenses
**Program:** Administration and Management
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Act of March 4, 1913 (P.L. 62-426; 29 U.S.C. 557). National Productivity and Quality of Working Life Act of 1975 (P.L. 94-136; 89 Stat. 733; 15 U.S.C. 2401).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives are to provide analysis of productivity, and to develop and publish measures of private sector and Federal productivity. *Abstract:* GAO found that improvement in national productivity must start at the lowest level of the economy, the firm. The Federal Government could help improve national productivity by encouraging firms to measure their own productivity and compare themselves to firms in similar industries. The current Bureau of Labor Statistics (BLS) industry measures are based on industry aggregates which are too general to be used by firms in improving productivity. The net contribution of productivity measures to economic analysis is uncertain as the measures are generally used in conjunction with other economic information. Also, only labor measures are published because labor input is the only statistic considered accurate enough for productivity. The Secretary of Labor should direct BLS to: (1) use the improvement priorities expressed by users in the GAO study as one criterion for attaching priorities to the recommendations of the National Academy of Sciences' Panel to Review Productivity Statistics; (2) develop a plan for producing multifactor productivity measures for the major sectors of the economy, establish a feasible target date for publishing these measures, determine the associated resources required, and seek authority to carry out the plan; (3) publish additional public information on the interpretation and use of productivity measures; and (4) confer with the Department of Commerce to determine what technical expertise it needs to develop a firm-level productivity improvement program, and at what costs. Also, the Secretary of Commerce should: (1) determine the costs and other resources needed to establish a firm-level productivity improvement program which would have measurement as an important component; and (2) if the program appears feasible, seek authority to implement it. Further, the Department of Commerce should confer with BLS to explore various approaches to such a program.

**Authority:** Federal Coal Mine Health and Safety Act of 1969, as amended (P.L. 91-173, title I, § 101, 103, as amended by; P.L. 95-164; 83 Stat. 745; 30 U.S.C. 811, 813).
**Availability:** Agency
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to assist States in developing and enforcing effective mine health and safety laws and regulations, to improve State workmens' compensation and occupational disease laws and programs, and to promote Federal-State coordination and cooperation in improving health and safety conditions. *Abstract:* This Study intends to quantify the impacts of Mine Safety and Health Administration (MSHA) safety enforcement on labor and capital productivity and thereby on the cost of producing coal. The impact of MSHA enforcement itself will be distinguished from that of other variables of a technological, geological, economic, or institutional nature. Analysis will be made of data gathered largely from the files of MSHA for the years 1973-75 and updated to 1976-79. If possible, data on the number and duration of wildcat strikes will be updated for the years 1977-79 and used as a surrogate for poor labor management relations.

**Program:** Enforcement: Standards Development
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Federal Coal Mine Health and Safety Act of 1969, as amended (P.L. 91-173, title II, III, § 201-318, as amended by; P.L. 95-164; 83 Stat. 760; 30 U.S.C. 841-878); Executive Order 12044.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Federal Mine Safety and Health Act combined all Federal mine safety and health programs under a single statute which provides for the promulgation of new or revised mandatory safety and health regulations to protect all miners. It also provides specific steps and timeframes for the formal rulemaking process. *Abstract:* Since the effective date of the Act, the Mine Safety and Health Administration (MSHA) has completed 20 mine safety and health regulations development projects. Four of the projects were mandated by the Act which set time limits for their promulgation. While the Coal Office and the Metal/Nonmetal Office worked jointly to develop a few regulations, usually each office developed regulations only for the mines under its jurisdiction. Much of the information concerning health hazards is the same regardless of the type of mine and procedures used to process a regulation after the initial draft is completed. Neither office was developing new or revised health regulations for asbestos, noise, silica, radiation, and welding fumes. When the same or similar hazards are involved in different types of mines, concurrent development of regulations would enable MSHA to use more efficiently the expertise and resource responsible for developing regulations and to ensure equal protection for all miners. The Secretary of Labor should direct the Assistant Secretary for Mine Safety and Health to develop and implement procedures to establish central responsibility for MSHA regulation development projects. Such procedures should provide for establishing priorities for the development of safety and health regulations for all types of mining operations, and a monitoring and reporting system to identify all regulations being developed and measure the progress of development. The Assistant Secretary should also be directed to require concurrrent development of regulations regarding hazards that are common to more than one type of mining.

# DEPARTMENT OF STATE

**E01000-001**

*The 1978 Diplomatic Relations Act's Liability Insurance Provision Is a Requirement Needing Added Attention.* (ID-81-31).
4/28/81; 7 pp.
**OMB Funding Code/Title:** 19-0113-0-1-153 / Salaries and Expenses

**Program:** Administrative and Staff Activities

**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of May 26, 1949 (P.L. 81-73, § 1; 22 U.S.C. 2651-2652). Diplomatic Relations Act (P.L. 95-393; 92 Stat. 808; 22 U.S.C. 254).

**Availability:** GAO

**Geographic Relevance:** National; City

*Program Objectives:* The Diplomatic Relations Act requires all foreign mission members and their families entitled to diplomatic immunity to carry liability insurance against risks arising from their operation of motor vehicles, vessels, or aircraft in the United States. It also creates a substantial right of an injured party to proceed directly against the insurance company where the insured member enjoys immunity from suit. *Abstract:* GAO reviewed the Office of Protocol's administration of the liability insurance requirement. Locally established minimum limits of liability coverage which the Department of State requires the foreign diplomatic representatives to have are inadequate and should be higher. In the District of Columbia, there have been 69 traffic accidents involving foreign diplomatic representatives or their families, and these individuals were at fault in 39 of the accidents. The required liability insurance must provide no less than the minimum limits liability specified by law in the jurisdiction where the car is garaged. It also suggests that every person subject to the Act should have and maintain adequate insurance to afford reasonable compensation to accident victims. Although it recommends higher limits, State Department cannot ensure that they are being obtained. GAO believes the higher limits should be required along with the need to impose separate limits for the foreign missions that are higher than those imposed by State and local jurisdictions, because of the inability of accident victims to sue and successfully collect damages from those enjoying diplomatic immunity. The Secretary of State should establish for those who enjoy diplomatic immunity minimum limits of liability that are in excess of the minimum limits prescribed by State and local governments that will adequately afford reasonable compensation to accident victims.

**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** International Organizations and Immunities Act, as amended (P.L. 79-291, title I, § 1; 59 Stat. 669; 22 U.S.C. 288). Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 301; 75 Stat. 433; 22 U.S.C. 2221).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* A number of actions were taken to improve the external and internal auditing and evaluations of U.N. activities. The creation of the Joint Inspection Unit (JIU) was one such improvement. The aim of JIU was to improve management and coordination in the U.N. system. The Unit had broad investigative powers covering all U.N. operations but had no specific evaluation responsibilities. Congress amended the Foreign Assistance Act in 1973 at the suggestion of GAO. Instead of creating a new U.N. investigative body, the Department of State decided to urge the strengthening of JIU. With the change in the Foreign Assistance Act, JIU increased the number of inspectors and expanded its scope, but more can be done. GAO noted that the General Assembly is not always aware of the qualifications of inspector candidates. There is often a duplication of reviews, and each group is not always aware of what others are working on.

## BUREAU OF CONSULAR AFFAIRS

**E01012-001**

*U.S. Consular Services to Innocents–And Others–Abroad: A Good Job Could Be Better with a Few Changes.* (ID-81-9).
11/6/80; 32 pp.
**OMB Funding Code/Title:** 19-0113-0-1-153 / Salaries and Expenses
**Program:** Conduct of Diplomatic and Consular Relations with Foreign Countries
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.

**Authority:** Immigration and Nationality Act, as amended (P.L. 82-414, title I, § 101; 66 Stat. 166; 8 U.S.C. 1101 et seq.).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* Every year some 1.8 million Americans abroad find themselves unexpectedly in need of help from the U.S. Government. GAO examined U.S. consular services to American citizens abroad to determine the kinds and quality of services American travelers seek, the adequacy of State Department's response, and the need for adjustments in either the citizen's expectations or the Government's ability to meet them, or both. A substantial majority of of American travelers indicated satisfaction with the consular services they had sought. About a fourth indicated dissatisfaction. Many citizens' complaints about consular performance revealed a lack of understanding about what consulates can and cannot do in the prevailing legal or political circumstances. Other complaints appeared reasonable. The Secretary of State should reassess and revise as necessary the present authority and resources available to consular officers to help Americans abroad in personal emergencies; determine and initiate improvements in the Nation's consular treaties to enhance possibilities for protecting the lives and property of U.S. citizens abroad; and clarify State's instructions to the field concerning the Privacy Act. Additionally, the Secretary of State should establish a number of positions for the consular function more clearly commensurate with the workload; establish a firm policy of keeping all authorized consular positions filled at all times; and determine and clarify for the Foreign Service the reasons for the perceived inequities in the classification structure between the consular corps and the others and make such rectifications as may be necessary. The Attorney General, in cooperation with the Secretary of State, should determine what if any monitoring, screening, or control arrangements are necessary to an effective waiver system and so report to Congress.

**E01012-002**
*Management of the Department of State Office of Passport Services Needs To Be Improved.* (ID-81-39).
8/6/81; 53 pp.
**OMB Funding Code/Title:** 19-0113-0-1-153 / Salaries and Expenses
**Program:** Conduct of Diplomatic and Consular Relations with Foreign Countries
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Immigration and Nationality Act, as amended (P.L. 82-412, title I, § 104; 66 Stat. 174; 8 U.S.C. 1104). Executive Order 11295.
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The State Department provides passports for millions of U.S. citizens and materials for other international travel needs. To provide this service, the State Department maintains 14 passport agencies. Passports are also issued by the hundreds of foreign service posts abroad and four passport offices in U.S. insular possessions. Passport applications may be submitted at more than 800 designated U.S. post offices, 2500 Federal and State clerks of court, 790 military and Federal acceptance agents, and in certain instances, by mail. *Abstract:* A review was made to determine the adequacy of policies and procedures governing U.S. Passport Office operations. GAO concluded that recent efforts by the State Department to increase the efficiency of passport services operations have not always been successful. More intensified management is needed to cope with the technical problems of the computerized systems and operating difficulties of passport services functions. GAO made 25 specific recommendations to the Secretary of State to improve the passport issuance system, records management, passport fraud identification and control, and special handling fees. The State Department has not adequately prepared for the implementation of the new passport issuance system. Planning is incomplete, and timely decisions have not been made. Management attention to the passport files miniaturization problem areas has not been adequate, resulting in increased staffing requirements, inferior reproduction and quality, work backlogs, high error rates, data processing restrictions, inaccessible paper records, inadequate design, and added costs. Passport records are being retained too long in storage. To reduce the costly burdens of record storage, the Passport Office should adjust passport records retention schedules. The Department should clarify jurisdictions for investigating passport fraud. The Department's effectiveness in combatting passport fraud would be enhanced by additional training, use of fraud bulletins, and more feedback on suspected fraud cases. Amending passport application instructions to require payment when special mailing services are either requested or required by the applicant would result in savings to the Government. The computerized lookout system is in need of a thorough review in order to evaluate the system's procedures, capabilities, deficiencies, and effectiveness.

## OFFICE OF FOREIGN BUILDINGS

**E01021-001**
*Much More Can Be Done by the State Department To Improve Overseas Real Estate Management.* (ID-81-15).
2/9/81; 38 pp.
**OMB Funding Code/Title:** 19-0535-0-1-153 / Acquisition, Operation, and Maintenance of Buildings Abroad
**Program:** Acquisition, Development and Construction
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Foreign Service Buildings Act of 1926, as amended (P.L. 69-186, title I, § 1; 44 Stat. 404; 22 U.S.C. 295).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* The Department of State's Office of Foreign Buildings Operations (FBO) is responsible for constructing and managing properties around the world. *Abstract:* In a previous report, GAO reviewed FBO's managerial problems as well as improvements, including: setting guidelines in employee housing; issuing handbooks to each post concerning repairs and maintenance; beginning a preventive maintenance program; and increasing staff at FBO headquarters. GAO found problems in post-level property managers lacking technical expertise; FBO having no control over careers or training of the General Services officers and area officers; figuring the full costs of operating and maintaining individual buildings, making it difficult to determine whether and when buildings should be replaced; incomplete and inaccurate real property records; delays in construction; cost overruns; excess overseas property not promptly identified; and State's inconsistent housing policies and standards overseas compared with those at the Washington level. The Secretary of State should: (1) direct all organizations to maintain and identify all costs related to operation and maintenance of properties abroad; (2) limit expansion of the computerized preventive maintenance test program until proven effective; (3) require FBO and the posts to develop accurate, complete, and timely records systems; (4) identify current and projected budgetary funding authority from Congress; (5) establish worldwide funding authority from Congress; (5) establish a worldwide criteria for timely identification and disposal of excess or uneconomical properties; (6) reaffirm State's commitment to the housing standards and instruct the Inspector General to periodically review post compliance with housing policy; (7) improve effectiveness of real property managers through training and rotation, and increase input from the Director of FBO on reassignments and performance rating; (8) consolidate real estate costs within the property manager's appropriation and give FBO complete budgeting and control authority over funds; and (9) accelerate the FBO's program toward an integrated property management information system that will provide accurate data on costs and compare data on costs.

*Fundamental Changes Needed To Achieve Shared Support Services for Federal Agencies Overseas.* (ID-81-37).
4/29/81; 30 pp.
**OMB Funding Code/Title:** 19-0113-0-1-153 / Salaries and Expenses
**Program:** Central Program Services
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of May 26, 1949 (P.L. 81-73, § 1; 22 U.S.C. 2651-2652).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* The State Department offers support services such as security, housing, and motor pools to most Federal agencies overseas on a reimbursable basis. In 1976, the State Department established the Foreign Affairs Administrative Support System charging other agencies only for the incremental support costs incurred because of their presence overseas. *Abstract:* No requirement exists for agencies to consolidate services; therefore, sharing is voluntary and varies in different posts. The State Department, by providing and using these services, gives little independence in administrative support functions to other agencies. Duplication is extensive, especially with motor pools and personnel management systems. GAO found potential consolidation of services, especially at posts located near Defense Department facilities. Other findings include State Department's estimating administrative support costs rather than actual costs; complications in the Foreign Affairs Administrative Support system; and inconsistent allocation principles at the posts. Congress should require mandatory consolidation of most administrative support for agencies under the jurisdiction of an ambassador abroad. Certain services such as vehicle operations and maintenance, building operations, and local procurement should be available only through a consolidated agreement. Administrative activities such as personnel management and budget financial services which are difficult to consolidate should maintain separate capabilities on an exception basis, providing it is justifiable. The Secretaries of State and Defense should identify posts located within proximity of Department of Defense activities and determine which activities should be shared. The Secretary of State should: (1) establish actual administrative support costs rather than estimated costs; (2) submit the accounting system to GAO for formal approval; (3) describe the Foreign Affairs Administrative Support System in the redesign of the accounting system; (4) establish headquarters and post training programs for State Department and other agency personnel to adequately understand the administrative support program, cost accounting, and allocation techniques; and (5) implement a program enhancing the selection of administrative personnel.

**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 481; 22 U.S.C. 2291).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* GAO made a limited examination of the International Narcotics Control Program in Thailand and Burma. The program includes providing U.S. equipment to reduce the amount of narcotics entering the United States and assisting these nations in combating their own narcotics problems. Monitoring requirements for equipment and other goods are established at the time the agreements are reached with recipient countries. The Bureau for International Narcotics Matters should take appropriate action to clarify guidance on use of equipment, continue its efforts to improve project management training, and assure that recipient governments can use and maintain sophisticated equipment to the extent practical.

**Authority:** Migration and Refugee Assistance Act of 1962 (P.L. 87-510, title II, § 2; 76 Stat. 121; 22 U.S.C. 2601).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* To curtail the large number of refugees fleeing Vietnam by boat, Vietnam and the United Nations High Commissioner for Refugees (UNHCR) reached an agreement in May 1979 for a direct orderly departure program (ODP). Difficulties have arisen that are hampering its implementation. By early 1980, only 226 persons had departed Vietnam for the United States under the program. Success of ODP is essential if the inherent risks and hardships experienced by the 1979 boat people are to be avoided in the future. The Secretary of State, in consultation with the Attorney General and Immigration and Naturalization Service, should assess the existing procedures and eliminate the extraneous procedures with a view to expediting resettlement. The Secretary should try to minimize the practice of frequent shifting of monthly quotas between countries of asylum.

*DOT Telecommunications Management.* (TSC GWA 81-OM).
In process
**OMB Funding Code/Title:** 69-0102-0-1-407 / Salaries and Expenses
**Program:** General Administration
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Department of Transportation Act, as amended (P.L. 89-670, § 9; 80 Stat. 944; 49 U.S.C. 1657).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This study provides for surveys, descriptions, and analyses of the present process by which departmental elements utilize telecommunications resources and the policies governing these processes. The Department of Transportation (DOT) is spending about $1 billion per year on telecommunications. Telecommunications investment decisions are currently decentralized. Recent technological advances afford opportunities for cost avoidance of some information transfer demands. The results of the study will provide a base on which to formulate departmental telecommunications policy leading towards a more uniform and cost-effective utilization of DOT-wide systems.

*Abstract:* Findings included: The Urban Mass Transportation Administration (UMTA) has no program for monitoring grantee property management practices. UMTA's requirement for annual certification for use of nonexpendable personal property is unclear, resulting in inconsistent interpretations by regional offices. UMTA's policy regarding destroyed equipment is unclear. The Federal Highway Administration has no records pertaining to the acquisition, maintenance, or disposition of rolling stock acquired by States under the Rural Highway Public Transportation Demonstration program. The Federal Aviation Administration (FAA) has adequate practices to insure that airport sponsors adequately manage property acquired with FAA funds.

**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* Objectives are to: insure departmental compliance with all requirements for the conduct of occupational safety health programs, assist in reducing accident and compensation costs, and reduce the suffering caused by accident and occupational illness.
*Abstract:* Program evaluations are conducted in each operating administration in the Department of Transportation (DOT) on an annual basis. These evaluations are made to insure compliance with statutory and executive requirements for the protection of DOT employees from occupational illness and injury. Each evaluation report is forwarded by the Assistant Secretary for Administration to affected operating administrations for corrective action and reply. These program evaluations are then submitted to the Secretary of Labor for inclusion in the Annual Report to the President on Occupational Safety and Health. Reports have been completed on the Federal Aviation Administration, Coast Guard, and the Saint Lawrence Seaway Development Corporation. They are in process on the Federal Highway Administration and the Federal Railroad Administration. These reports are used to standardize and improve occupational safety and health programs on a departmentwide basis.

**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Program Objectives:* The objective of the research evaluated is to design and demonstrate safety methods relating generally to drivers and pedestrians to help State and local governments increase the effectiveness of their highway safety programs. *Abstract:* The National Highway Transportation Safety Administration's (NHTSA's) budget presentations to Congress are confusing, misleading, or inaccurate. The research and agency lack credibility with the States. Considerable research results can not be or are not accepted by those who might use it. There is little input to NHTSA research. NHTSA's contract management practices have resulted in unmet time schedules, added costs, and a general lack of continuity in many contracts. The agency did not have accurate lists of highway safety contracts and suffered from contract technical manager turnovers. The Federal Highway Administration (FHWA) highway safety research program annual obligations need to be accurately identified and both NHTSA and FHWA needs a formal evaluation process. The Secretary of Transportation should require the Administrator, NHTSA, to: (1) identify highway safety research and other program obligations and expenditures so that detailed and summary information on contract and administrative matters is available to aid the agency in effectively administering its programs; (2) make clear budget presentations to provide Congress with schedules and narration showing specific areas where highway safety funds will be spent, including administration; and (3) use highway safety research funds only for that program's activities unless specifically authorized by Congress to do otherwise.

**Authority:** Act of August 27, 1958, as amended (P.L. 85-767, as amended by: P.L. 89-564, § 101; 23 U.S.C. 402).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Program Objectives:* The purpose of the State and Community Highway Safety Grants Program is to provide Federal grants to States so that they may implement highway safety programs designed to reduce traffic accidents and related deaths, injuries, and property damage. *Abstract:* GAO found that the Highway Safety Grant Program has addressed a multitude of safety activities that may not have been the most effective, because of the changing, and sometimes conflicting, directions from legislation, the Department of Transportation (DOT), and the States. This situation is further complicated because few highway safety projects have yet been shown to have a positive or lasting effect on accident reductions. Conversely, many measures that are believed to contribute significantly to highway safety have not been implemented, or have been implemented incompletely, inefficiently, or only temporarily by the States. The Secretary of Transportation should: (1) establish criteria that describe how much problem identification and data analysis States need in order to address their highway safety problems and evaluate results; (2) work with States to ensure that the criteria are followed; (3) develop a plan that outlines what safety evaluations will be performed to determine the effectiveness of funded activities and establish a method for coordinating that plan among States to avoid duplication; and (4) establish a method for disseminating successful, as well as unsuccessful, evaluation results among all States and require that these results be considered before funding future safety activities. The Congress needs to determine what role the Federal Government is to play in future highway safety activities and then alter the safety grant program to reflect that role. If the Federal role is to continue administering the program, the Congress could decide to increase DOT's involvement to providing States with technical assistance. If State and local governments are to assume responsibility for financing and administering future highway safety activities, the Congress could decide to discontinue the program.

**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Department of Transportation Act, as amended (P.L. 89-670, § 4; 80 Stat. 933; 49 U.S.C. 1653). Natural Gas Pipeline Safety Act of 1968, as amended (P.L. 90-481, title I, § 3, as amended by; P.L. 96-129; 82 Stat. 720; 49 U.S.C. 1672). Hazardous Materials Transportation Act (P.L. 93-633, § 102; 88 Stat. 2156; 49 U.S.C. 1801 et seq.).
**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Program Objectives:* The Department of Transportation (DOT) hazardous materials regulatory program is responsible for ensuring the safety of the public from the inherent risks associated with transporting hazardous materials. *Abstract:* The Department has done much to upgrade the Federal effort to better assure public safety in transporting hazardous materials, but improvements are needed. More knowledge is needed of industry size and the risks associated in transporting hazardous materials in order to effectively plan inspection and emergency response activities. The Department has not developed an overall program to evaluate all risks associated with transporting hazardous materials. Federal and State inspection and enforcement efforts should be strengthened. The Department does not have a program to identify those companies which present the greatest risk to the public. Better coordination and training among Federal, State, and local governments, as well as private industry, could enhance emergency response capabilities. The Department has not established an adequate program to inform or to educate personnel in emergency response organizations. The Secretary of Transportation should require the Director of the Materials Transportation Bureau (MTB) to establish a registration program to identify and develop risk profiles of all hazardous materials carriers, shippers, and container manufacturers; coordinate the program with other Federal agency programs having information on hazardous material transportation; and gain access to that information which would be useful in developing a registration program. The Director of MTB should also be required to improve the completeness and accuracy of the hazardous materials incident reporting system. The Director of MTB should be required to develop a plan to work with State and local officials in highly populated areas to study routes used to transport hazardous materials and to assign specific responsibility within MTB for evaluating risks.

## COAST GUARD

**E01101-001**
*United States Coast Guard Military Personnel Requirements.*
10/80
**OMB Funding Code/Title:** 69-0201-0-1-403 / Operating Expenses
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 4, 1949 (P.L. 81-207; 63 Stat. 496; 14 U.S.C. 1 et seq.).
**Availability:** Agency

*Program Objectives:* Coast Guard objectives are saving lives, facilitating commerce, enforcing laws, protecting the marine environment, etc. *Abstract:* As a result of assuming additional tasks in recent years without comparable additional resources being provided, it appears that the Coast Guard has reached a depletion stage. Adequate maintenance has not been performed, personnel are undertrained for required tasks, people are required to work excessive overtime, and large numbers of experienced personnel are leaving the Coast Guard. As a result, some ships are not able to provide their programed number of days at sea. This study examined Coast Guard military personnel performing today's output (39,026), identified the apparent level of depletion of capital and personnel resources occurring at this output/personnel level, calculated the miltary personnel requirement to indefinitely sustain the present level of output without consumption of capital (53,714), and determined the number of military personnel required for performance at the optimum level of output/workload in each operating program (74,401). These requirements were calculated given the current and projected Coast Guard tasks, methods of accomplishing these tasks, and mix of facilities.

**Agency Contact:** Coast Guard. (202) 426-2430.

**E01101-002**
*Validation of Coast Guard Drug Interdiction Resource Requirements.*
9/1/81; 16 pp.
Lt. Richard E. Lang
**OMB Funding Code/Title:** 69-0201-0-1-403 / Operating Expenses
**Program:** Enforcement of Laws and Treaties
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 4, 1949, P.L. 81-207 (14 U.S.C. 1 et seq.; 14 U.S.C. 89).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** International/Foreign; Seventh Coast Guard District

*Program Objectives:* The objective of the Enforcement of Laws and Treaties (ELT) Program is to enforce all Federal laws in the marine environment except those specifically assigned to other Coast Guard programs. ELT focuses primarily on laws relating to fisheries protection, drug smuggling, and immigration. *Abstract:* The massive workload associated with the Cuban boatlift virtually eliminated drug interdiction patrols in the Seventh Coast Guard District, which was reflected in a dramatic decrease in seizures. After the Cubans closed Mariel harbor, the augmentation forces were employed in drug interdiction, resulting in a record number of seizures for the period October through December 1980. Comparison of the resources devoted to drug interdiction with the results obtained during the periods before, during, and after the refugee operations indicate that the Coast Guard's previous estimate of the resource levels necessary to achieve a 50% interdiction rate were remarkably accurate.

**Agency Contact:** Coast Guard. (202) 426-1894.

**E01101-003**
*Coast Guard Personnel Records Storage Areas Need Fire Protection Systems.* (GGD-81-72).
4/22/81; 3 pp.
**OMB Funding Code/Title:** 69-0201-0-1-403 / Operating Expenses
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 3, 1949 (P.L. 81-207; 63 Stat. 495; 14 U.S.C. 1 et seq.).
**Availability:** GAO
**Geographic Relevance:** City

*Abstract:* The U.S. Coast Guard maintains over 6,000 officer and over 30,000 enlisted personnel records in two rooms at the Transpoint Building in Washington, DC. GAO believes that the Coast Guard should acquire fire protection systems to protect its records. Although the Government leases the Transpoint Building, Government-occupied space is subject to the building fire safety standards established by the Public Buildings Service (PBS). According to PBS criteria, only one of the two rooms used to store the records requires an automatic sprinkler protection system. However, GAO believes that the importance of the records and the expense of replacing them warrant installation of the system in both rooms. The Coast Guard stated that it intends to install a fire protection system during the upcoming renovation of the building. However, GAO believes that the Coast Guard should take action now to protect the records because the renovation has already been delayed once and could be delayed further.

**Agency Contact:** General Accounting Office (202) 275-6531.

**E01101-004**
*Ineffective Management of Ship Maintenance: A Coast Guard Problem.* (LCD-81-12).
11/25/80; 23 pp. + app. (3 pp.)
**OMB Funding Code/Title:** 69-0201-0-1-403 / Operating Expenses
**Program:** Marine Safety
**Congressional Relevance:** *House* Committee on Merchant Marine and Fisheries; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 3, 1949 (P.L. 81-207; 63 Stat. 495; 14 U.S.C. 1 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO found that the Control Point is not yet an effective manager. The district offices have reverted to individual, uneconomical support systems which adversely affect the total system. Some districts maintain inventories contrary to Coast Guard policy, and districts were not sharing parts. Each district hoards its own inventory; Coast Guard has more inventory of some parts than required. Much of the inventory is not in ready-for-issue condition because the districts lack incentives to properly repair parts before returning them, there are no systemwide repair specifications, and quality assurance programs are inadequate. As a result, the Coast Guard incurs additional repair and inspection costs before parts can be used and experiences some delays in getting vessels back in service. Because it has been unable to fill districts' requests, the districts procure many items commercially without going through the Control Point. The Coast Guard could reduce its maintenance costs by making greater use of other agencies' facilities. Government regulations require that, before agencies procure services commercially, they should determine interservice support potential. The Secretary of Transportation should direct the Coast Guard to have the Control Point: (1) act as a wholesaler of repair parts and set up procedures for districts to pay for parts and receive credit for parts returned; (2) make a physical inventory, update its stock records, and implement the management information system needs; and (3) develop repair specifications and improve its quality assurance program. The Coast Guard should develop a catalog of services available to all districts on interservice vessel support, conduct inventory of government maintenance activities, and establish interservice support agreements.

**Agency Contact:** General Accounting Office (919) 755-4029.

## FEDERAL AVIATION ADMINISTRATION

**E01102-001**
*Airport Noise Control and Land Use Comptability Programs under P.L. 91-258 and P.L. 96-193.*
8/81; 96 pp.
John W. Reynolds, Jr.
**OMB Funding Code/Title:** 69-1301-0-1-402 / Operations
**Program:** Facilities and Equipment
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 305, 307, 312; 72 Stat. 749; 49 U.S.C. 1346, 1348, 1353). Airport and Airway Development Act of 1970, as amended (P.L. 91-258, title I, § 2; 84 Stat. 219; 49 U.S.C. 1701). Aviation Safety and Noise Abatement Act of 1979 (P.L. 96-193; 49 U.S.C. 2101).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The study was conducted to determine to what extent the airport noise and land use compatibility program is achieving the goals of reducing existing noncompatible uses of land around airports and preventing the introduction of new noncompatible uses around the airports. Also it evaluates the noise abatement planning program. Legislative recommendations on that program include continuing the program, making noise related items eligible for funding whether or not compatibility program is approved by the Secretary per subsection 104(b) of P.L. 96-193, and amending definitions in P.L. 96-193 to include all public use airports.

**Program:** Operations: Development Direction
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 305, 307, 312; 72 Stat. 749; 49 U.S.C. 1346, 1348, 1353); FAA Directive 8000.44B.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The Federal Aviation Administration (FAA) recently established a "lead regions" program to increase aircraft certification effectiveness, national standardization, and accountability in the application on airworthiness standards for civil aeronautics products. FAA has determined that improvements in these areas can best be realized by positioning nationally recognized engineering and manufacturing expertise in areas where the demands for that expertise is greatest. The purpose of this study was to determine workload concentrations within the engineering and manufacturing field organizations and to identify significant problems within the engineering and manufacturing disciplines.

**Program:** Operations: Operation of Traffic Control System
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 305, 307, 312; 49 U.S.C. 1346, 1348).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Center Weather Service Unit provides meteorological consultations and advice to the air traffic facilities concerning forecast or actual adverse weather conditions which may affect air traffic operations or aircraft safety over any portion of an assigned air route traffic control center area. *Abstract:* The study found that weather products are not viable; dissemination capability is limited; there is a lack of awareness of user/Federal Aviation Administration personnel regarding different weather programs; some programs appear redundant or overlapping; the controller, in addition to providing separation of aircraft, is many time the primary means by which pilots are provided pertinent weather. Fourteen recommendations for improvement are included.

**E01102-004**
*En Route Flight Advisory Service (EFAS) Program Evaluation.*
10/22/80; 6 pp.
Harry McIntyre
**OMB Funding Code/Title:** 69-1301-0-1-402 / Operations
**Program:** Operations: Operation of Traffic Control System
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 307; 72 Stat. 750; 49 U.S.C. 1349).
**Availability:** Not Publicly Available (Internal Use only)
**Geographic Relevance:** National

*Program Objectives:* The objective of En Route Flight Advisory Service (ERAS) is to provide en route aircraft with timely and meaningful weather advisories. These weather advisories are provided in sufficient time so as to prevent unnecessary changes to a flight plan but, when necessary, permit the pilot to make a decision to terminate the flight or alter course before adverse weather conditions are encountered. *Abstract:* The study found that most facilities do not have local directives regarding EFAS; communication and coordination of weather data between the EFAS and the Center Weather Service Unit is inadequate; there is a lack of necessary equipment to adequately provide the service as outlined in the EFAS order; frequency congestion exists in varying degrees; staffing in EFAS facilities varies; and there is no facility training on the EFAS order.

**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 307; 72 Stat. 750; 49 U.S.C. 1349).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The purpose of the study was to conduct a preliminary evaluation of the recently implemented Standard Operating Practices for transfer of radar identification and associated coordination in conjunction with the broadband training evaluation. The study found that a majority of en route controllers were using operating initials while terminal controllers were not. Aircraft identification and position were omitted many times during the exchange of point-out information. Aircraft identification was seldom read back when point-outs were approved. In many instances, prescribed strip marking procedures were inadequate.

**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 307; 72 Stat. 749; 49 U.S.C. 1348).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to establish guidelines to en route air traffic control facilities in developing transitional procedures for broadband to narrowband radar and vice versa, and to implement training requirements. *Abstract:* Recommendations include: (1) regions/facilities should ensure that all FPL's are administered required refresher training; (2) Handbook 7210.3E, paragraph 901.b, should be revised to state: "except at those centers where Airway Facilities personnel are responsible for these adjustments"; (3) regions should ensure that facilities do not use DYSIM as a part of the mandatory broadband radar training requirement for developmental controllers; and (4) Notice 7210.165, paragraph 3.b.(3)c, should be revised to specify a pass/fail requirement, reidentification of aircraft should be a requirement in the problem, and the duration of the problem should be no less than 20 minutes.

**Authority:** Airport and Airway Development Act of 1970, as amended (P.L. 91-258, title I, § 14; 84 Stat. 224; 49 U.S.C. 1714).

**Geographic Relevance:** GAO

*Program Objectives:* The purpose of the Federal Aviation Administration's (FAA's) planning and construcition grants program is to assist public agencies in the development of a nationwide system of public airports adequate to meet the needs of civil aeronautics. *Abstract:* FAA generally followed its procedures in administering the two grants at the Tulsa airport. However, the evaluation of the role FAA field offices played in grantees' selection of an engineer showed that the FAA Southwest Region allowed the grantees to decide what selection process to use. The practice does not support the Office of Management and Budget standards and FAA regulations which, since 1974, have advocated selecting consulting engineers competitively on the basis of competence and qualifications. In addition, FAA had not issued any guidance to its field offices delineating their responsibilities when projects encounter design or construction problems requiring work to be redone. FAA depends on the field to identify the cause of rework and improvements needed in areas such as currency of the design standards by FAA and adequacy of its review of the grantee's project plans and specifications. The Administrator of FAA should develop guidelines for regional directors to follow when a funded project has design or construction problems which require work to be redone. The Administrator should also require the regional directors to closely monitors grantees' actions in these cases and to periodically report their status to headquarters.

*FAA Misses Opportunities To Discontinue or Reduce Operating Hours of Some Airport Traffic Control Towers.* (CED-81-100).
6/1/81; 19 pp. + 3 app. (11 pp.)
**OMB Funding Code/Title:** 69-1301-0-1-402 / Operations
**Program:** Operations: Operation of Traffic Control System
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Federal Aviation Act of 1958, as amended (P.L. 85-726, title III, § 307; 72 Stat. 749; 49 U.S.C. 1349).
**Availability:** GAO
**Geographic Relevance:** National; City; County

*Program Objectives:* The Federal Aviation Administration (FAA) is responsible for operating a national air traffic control system which provides the safe and expeditious movement of air traffic. *Abstract:* FAA des not have uniform discontinuance criteria for the control towers it operates to control traffic in and around airports. FAA operates 444 towers at a cost of over $400 million a year. In 1969 and again in 1975, FAA revised its criteria for use in identifying control towers for discontinuance. With each revision, the criteria became more stringent. Hwever, FAA also established grandfather clauses by making the more stringent 1975 criteria applicable only to towers established or approved for establishment during or after 1977. This lack of uniform criteria has resulted in the continued operation of economically unjustified control towers. FAA could save an average of $287,000 annually for each tower the agency closed. FAA is not surveying air traffic activity levels at some 24-hour control towers to identify possible reductions in hours of operation. Two regional offices had not conducted any surveys since 1977. When surveys were conducted and candidates were identified in the three regions reviewed, FAA seldom completed or documented additional required evaluations. GAO surveyed 17 control towers, 16 of which had traffic levels identifying them as candidates for reduced operating hours according to the FAA criteria. The Secretary of Transportation should require the Administrator of FAA to: (1) identify control towers for discontinuance by adopting uniform criteria which require an economic analysis based on up-to-date benefits and costs and consideration of noneconomic factors; (2) institute procedures to ensure that the criteria be applied periodically and that discontinuance of condidate towers is actively pursued; (3) survey activity levels of 24-hour control towers to identify candidates for reductions in operating hours; (4) establish time limits for completing required staff studies to determine whether candidates can be safely and efficiently part-timed; and (5) document and clearly justify any decisions made as a result of the staff studies.

**Authority:** Airport and Airway Development Act of 1970, as amended (P.L. 91-258, title I, § 14; 84 Stat. 224; 38 U.S.C. 755; 49 U.S.C. 1714).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO's review found that airports were using land acquired with Federal assistance, for other than airport purposes. For example the land was being used for an industrial park complex, private residences, recreation areas, municipal government facilities, and agriculture. The Federal Aviation (FAA) has a use monitoring system, but it has a low priority and little staffing or other resources. To curb the unauthorized use of federally obligated airport land, the Secretary of Transportation should require the Administrator of FAA to: determine the extent of improper uses of land and encourage airport sponsors to take corrective actions as needed. If the sponsors are unwilling to do so, FAA should reclaim land in accordance with the conveyance agreement. Further, FAA should obtain reimbursement or ensure proper reinvestment by an airport sponsor in other airport improvements where land purchased with grant assistance is not being used appropriately. To increase program effectiveness, the Secretary of Transportation should direct FAA to become more actively involved in the control and administration of the program by requiring its regional offices to: follow established program policies and procedures; evaluate program needs and provide appropriate staff resources to carry out an effective monitoring and enforcement program; and establish and maintain accurate, complete, and current records to document airport lands with a Federal interest and the related compliance status of airport sponsors.

**Availability:** GAO

**Geographic Relevance:** National

*Abstract:* GAO reviewed a contract which was awarded to Raytheon Company by the Federal Aviation Administration (FAA) as part of a nationwide review of the pricing of negotiated noncompetitive contracts awarded by civil agencies. The contract provided for the purchase of multiple pieces of contract-related equipment and revisions of test procedures and miscellaneous documentation. The objective of the review was to determine whether Federal Procurement Regulations were followed in negotiating the contract price and whether the contract price negotiated was reasonable in relation to cost or pricing data available to the contractor at the time of contract negotiation. The contract was overpriced and was increased during negotiations by more than 9% to compensate Raytheon for a decrease in the number of pieces of equipment to be purchased. An increase of less than 4% would have been more appropriate. The additional overpricing was due to the use of noncurrent prices and quotes, the inclusion of duplicate parts in the proposal, and questionable judgment in the selection of a power supply vendor. The Secretary of Transportation should emphasize to contracting officials the importance of established regulations in: (1) obtaining, reviewing, and using cost or pricing data in negotiating noncompetitive contract prices; and (2) documenting contract negotiations files. In addition, the Secretary should require the contracting officer to consider this information along with any other pertinent information and determine if the Government is entitled to a contract price reduction.

**OMB Funding Code/Title:** 20-8102-0-7-401 / Federal-Aid Highways
**Program:** Administration and Research
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 27, 1958 (P.L. 85-767; 72 Stat. 889; 23 U.S.C. 104).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The evaluation assesses the effectiveness and efficiency of the Certification Acceptance (CA) process; determines the impact CA has on Federal Highway Administration (FHWA) and State highway agencies; and develops recommendations concerning the CA process. Approximately half of the States now operate under some form of the CA concept. As a result of being certified, States are afforded an opportunity to exercise greater authority and latitude in their operations under the Federal-aid program. FHWA field offices have had a change in their operations in moving from a project-by-project monitoring system to a program/process monitoring system. The view of the FHWA field staff and States indicate CA has had no adverse impact on the quality of the product.

**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 27, 1958 (P.L. 85-767; 72 Stat. 887; 23 U.S.C. 104).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The purpose is to improve the content and quality of accident data required for data systems at the State and National levels. *Abstract:* An assessment was made of the uniformity, quality, accuracy, completeness, and utility of the data in the traffic records system of the 50 States, the District of Columbia, and Puerto Rico. Assessment techniques included documentation review, personal interview, and a comparison of the States' systems with a National traffic records model. Staff of the Federal Highway

Administration (FHWA) and the National Highway Traffic Safety Administration of the Department of Transportation designed and conducted the review. The reviews complement FHWA studies done in 1976. These reviews seek to identify the impediments to the effective use of the traffic records system for problem identification, program evaluation, and the general management of the highway safety program. Review emphasis was placed on the motor vehicle traffic accident file. A final report will be available for each of the 50 States, the District of Columbia, and Puerto Rico.

**Agency Contact:** Federal Highway Administration. (202) 755-9035.

**E01103-005**
*Report to Congress on the Access Control Demonstration Program.*

**E01103-007**
*Deteriorating Highways and Lagging Revenues: A Need To Reassess the Federal Highway Program.* (CED-81-42).
3/5/81; 65 pp. + 8 app. (26 pp.)
**OMB Funding Code/Title:** 20-8102-0-7-401 / Federal-Aid-Highways
**Program:** Interstate 4R (Resurfacing)
**CFDA NO.:** 20.205
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 27, 1958, as amended (P.L. 85-767; 23 U.S.C. 103, 114).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The purposes of the Federal Highway Program are to assist State highway agencies in constructing and rehabilitating the Interstate Highway System and in building or improving primary, secondary, and urban system roads and streets; to provide aid for their repair following disasters; to foster safe highway design; to replace or rehabilitate unsafe bridges; and to provide for the improvement of some highways in Guam, the Virgin Islands, American Samoa, and the Northern Marianna Islands. *Abstract:* The condition of U.S. highways has deteriorated. The Interstate System has seen the most serious decline, with its percentage of miles in poor condition doublinq from 1975 to 1978. Billions of dollars will be needed to preserve these roads and unless timely action is taken, even more money will be needed for reconstruction. Additional billions will be required to complete the Interstate System. Increased costs and lagging State and Federal revenues have compounded the problem. The States have taken various actions to increase highway revenues, but there has been little action to increase Federal highway taxes. Congress should reassess the Federal-aid highway program. The reassessment should specifically address: (1) giving priority to preserving existing highways, with emphasis on the Interstate System; (2) determining whether current preservation policy needs to be modified to ensure that necessary resurfacing, restoration, and rehabilitation work on Federal-aid highways is carried out; (3) eliminating preservation funds from sanctions; (4) assessing the goal of Interstate completion as currently defined, possibly giving priority to funding essential gaps; (5) analyzing State efforts and capabilities to increase highway revenues and to preserve highways; (6) using highway revenues to fund the Federal-aid highway program; and (7) revising the Federal motor fuel tax and other highway revenue sources to be more responsive to highway needs and the inflationary trends in highway costs.

## FEDERAL RAILROAD ADMINISTRATION

**E01104-001**
*Title V Program Evaluation.*
In process
Gary V. Ceccucci
**OMB Funding Code/Title:** 69-4411-0-3-401 / Railroad Rehabilitation and Improvement Financing Funds
**Program:** Redeemable Preference Shares
**CFDA NO.:** 20.309; 20.310
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Railroad Revitalization and Regulatory Reform Act of 1976, as amended (P.L. 94-210, title V, § 505; 90 Stat. 33; 45 U.S.C. 825).

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Title V program provides financial assistance for the rehabilitation and improvement of railroad facilities and equipment, to help overcome the deferred maintenance problems of bankrupt and marginal railroads, and to improve the operations and structure and restore the financial stability of the U.S. railroad system. *Abstract:* The study reviews the ditribution of Title V financial assistance in relation to legislative objectives, program eligibility, and funding priorities and examines changes in program participation and demands resulting from recent legislative amendments. The effectiveness of the program is assessed through an analysis of performance trends of the recipient railroads at both project and systemwide levels. The areas of impacts include financial performance, operational and service efficiencies, safety, return on investment, and other public benefits. The final report will also discuss future directions in Federal financial assistance in light of railroad rate deregulation, railroad restructuring policies, and the need for rehabilitation improvements.

**Agency Contact:** Federal Railroad Administration. (202) 755-9269.

*FRA R&D Program Evaluation: A Report on the Safety Research Program.*
1/81; 34 pp.
Gary V. Ceccucci
**OMB Funding Code/Title:** 69-0745-0-1-401 / Railroad Research and Development
**Program:** Track, Equipment and Personnel Safety
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Department of Transportation Act, as amended (P.L. 89-670, § 4; 49 U.S.C. 1653).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The report reviews and assesses the responsiveness of the Federal Railroad Administration (FRA) safety research activities in supporting the mission and needs of other FRA safety regulation and inspection programs. Research expenditure trends are classified and analyzed by FRA program categories, project objectives, and utility to other program managers. The study found that most safety research has focused on areas of equipment safety, track structures, and safety testing and is oriented towards solving specific technical problems for the FRA Office of Safety and the railroad carriers. The program is found to have been effective in anticipating and satisfying the technical research needs of FRA and in increasing the awareness of safety problems and solutions through its information and cooperative research programs. Recommendations are made for improved coordination in the planning and conduct of safety research within FRA.

**Authority:** Department of Transportation Act, as amended (P.L. 89-670, § 3; 49 U.S.C. 1652(e)). Occupational Safety and Health Act of 1970 (P.L. 91-596, § 19(c); 5 U.S.C. 7902); Executive Order 11807.
**Availability:** Agency

*Abstract:* This study evaluated the Occupational Safety and Health Program of The Alaska Railroad, paying specific attention to toxic substances, the certification program, the industrial hygiene program, and the effectiveness of the safety committee and the training programs. The evaluation was conducted in the headquarters facilities at Anchorage, Alaska, and in the operating facilities at Seward, Whittier, Palmer, Talkeetna, McKinley Park, Healy, Nenana, and Fairbanks. In general, the Alaska Railroad was found to be operating within the provisions and regulations set forth in ARR 3902.1A. However, major unsafe conditions were found in the paint shop facility in Anchorage, in the back shop facility in Anchorage, and in the employee facilities in a passenger car operated between Anchorage and Fairbanks. In addition, a potentially serious hazardous condition was found to exist due to insufficient inspections of equipment by competent personnel. Also, the absences of a coordinated program results in poor fire protection systems. Ten recommendations for improvement were made. Many of these recommendations are being implemented.

**Authority:** Department of Transportation Act, as amended (P.L. 89-670, § 3; 49 U.S.C. 1652(e)). Occupational Safety and Health Act of 1970 (P.L. 91-596, § 19(c); 5 U.S.C. 7902); Executive Order 11807.
**Availability:** Agency

*Abstract:* This study evaluated the implementation of Occupational Safety and Health Administration standards by contractors with the Office of Intercity Programs of the Federal Railroad Administration. Contractor operations at several Amtrak track operations sites were observed. The facilities observed were generally operating within the provisions set forth in 29 CFR 1910 and 29 CFR 1926. However, several unsafe conditions were observed. These were discussed with the foreman in charge at the site and reported to the project safety supervisor responsible for that region for corrective action.

### E01104-006

*Impact of Work Cutbacks on Northeast Corridor Improvement Project.*
(CED-81-23).
10/31/80; 45 pp.
**OMB Funding Code/Title:** 69-0123-0-1-401 / Northeast Corridor Improvement Program
**Program:** All Programs
**CFDA NO.:** 20.309; 29.310
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Railroad Revitalization and Regulatory Reform Act of 1976, as amended (P.L. 94-210, title VII, § 701, 703, as amended by; P.L. 96-254; 90 Stat. 120-122; 45 U.S.C. 851, 853). Highway Safety Act of 1973, as amended (P.L. 93-87; 23 U.S.C. 130 note).
**Availability:** GAO
**Geographic Relevance:** Northeastern United States

*Program Objectives:* The purpose of the Northeast Corridor Improvement Program is to upgrade track and other facilities to permit modern, high-speed rail passenger service between Washington, D.C. and Boston, Massachusetts. *Abstract:* Substantial reductions have been made in the project's planned work scope. Work is being reduced to stay within the project's budget in the face of additional cost overruns, and more reductions are possible. The project's work areas, their budgets as of March 1980, and how the reductions affect these areas were shown. Elimination of work on track structures will increase future maintenance, make it difficult to maintain the high speeds planned for the corridor, decrease operational reliability, and diminish passenger comfort. Elimination of electrical work could result in additional future maintenance and could make high speeds difficult to maintain in hot weather. Elimination of planned fencing could result in additional fatalities. Reductions in planned bridge work would reduce the longevity and increase maintenance costs of bridges. Reductions in grade crossing work could seriously affect the safety of the public, passengers, and train crews and could result in additional future track maintenance. Reductions made in the work on stations may have adverse effects on the longevity of the structures, their maintenance and may reduce passenger comfort and capacity. Elimination of work on route realighment, tunnels, communications, signal and traffic control, and program management and systems engineering were discussed.

**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Urban Mass Transportation Act of 1964, as amended (P.L. 88-365, § 6; 49 U.S.C. 1605).
**Availability:** NTIS
**Geographic Relevance:** National; City; Standard Metro. Stat Area (SMSA)

*Program Objectives:* The purpose of the Morgantown People Mover (MPM) system is to provide safe, economical, and fast transportation service in the Morgantown Corridor. Phase I of the system was implemented as a research project. In Phase II, the system has been expanded in size and made more reliable to better meet the needs of travelers in the corridor. *Abstract:* This study will determine the social and economic impacts of the expanded Phase II MPM system on users, operators, the community, and industry. This analysis will be based on a before-and-after study of conditions at Morgantown and will provide trend line data developed during the life of the system.

**Availability:** Agency
**Geographic Relevance:** National; State

*Abstract:* The purpose of this study was to develop information on State assistance to public transportation as part of an ongoing effort to develop a comprehensive understanding of the role of public transportation in the intergovernmental public finance area. Studies of nine State public transportation programs were conducted over a 2-year period, initially as part of an evaluation of the Urban Mass Transportation Administration's Section 5 operating assistance program. When the need for increases in operating assistance became apparent, these State studies were expanded as a means of exploring State approaches to all aspects of public transportation.

*Evaluation of the Magnetic Levitation and Propulsion Project.*
In process
Yvonne Griffin; Eric Bers
**OMB Funding Code/Title:** 69-1119-0-1-401 / Urban Mass Transportation Fund
**Program:** Research and Training
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Urban Mass Transportation Act of 1964, as amended (P.L. 88-365, § 6; 49 U.S.C. 1605).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The purpose of this evaluation is to provide information to assist and support the Urban Mass Transportation Administration (UMTA) Administrator's decision with respect to continuing or terminating the magnetic levitation and propulsion (MAGLEV) program. The evaluation considers the appropriateness of the research and development in light of current Presidential priorities, UMTA and Department of Transportation policies on funding research and development, and the reduction in available Federal funds. The evaluation of the program will concentrate on determining near-term deployment potential, the economic feasibility of near-term deployment, the potential application of components and subsystems developed in the MAGLEV program to existing systems, the potential contribution of the program to the solution of current transportation problems, and the potential for improving productivity and efficiency of existing transportation systems.

**CFDA NO.:** 20.506
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Urban Mass Transportation Act of 1964, as amended (P.L. 88-365, § 6; 49 U.S.C. 1605).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The object of the Section 6 program is to fund research, development, and demonstration projects in all phases of mass transportation which will assist in the reduction of urban transportation needs, the improvement of mass transportation service, or the contribution of such service toward meeting total urban transportation needs at minimum cost. *Abstract:* The survey of the Section 6 funding process was conducted because the program lacked a consistent analytical framework which the agency can use to determine its funding priorities. The survey found that there was little interoffice communication and coordination between the participants in the funding process. It was found that there was a lack of overall criteria for determining the relevance of proposed projects to agency goals, objectives, and perceived needs. There was a wide variance in the approaches which offices took. It was recommended that the following activities be conducted quarterly: preparation of status reports by office directors; program review and setting of objectives; a two-tier management review process; and revision of program plan procedures.

*Program Objectives:* The objective of the Section 3 Capital Improvement Program is to provide funds to assist State and Local public bodies and agencies in financing the construction of new fixed guideway systems and the acquisition, construction, reconstruction, and improvement of facilities and equipment for use in mass transportation services. *Abstract:* This study analyzed the following issues: (1) Should the responsibility for the Washington Metropolitan Area Transit Authority (WMATA) metrorail be transferred to Region III? (2) Where should Urban Mass Transportation Administration (MTA) oversight be located? and (3) What resources are needed to perform this responsibility? The following recommendations addressing these issues were presented: (1) the authority for the WMATA rail project should be transferred to UMTA Region III; (2) Region III should maintain a small staff or "district office" in Washington for project oversight of the Metro construction; and (3) the Washington-based staff should consist of four positions which should be transferred from UMTA's personnel allocation.

**Authority:** Urban Mass Transportation Act of 1964, as amended (P.L. 88-365, § 12; 80 Stat. 715; 49 U.S.C. 1608).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The Urban Mass Transportation Administration (UMTA) purchased word processing machines in order to improve productivity and thereby make better use of the limited available administrative funds. *Abstract:* The study of UMTA's word processing machines found that the agency does not use the available word processing machines to full capacity. A more comprehensive and extensive study is required to determine the causes. In the interim, the study recommended that all machines be made available to all users; that training on the Optical Character Recognition machine be improved; that a directive for equipment procurement be written; and that no more equipment be added until a further study is completed.

*Program Objectives:* The objective of the Section 3 Capital Improvement Program is to provide funds to assist State and local public bodies and agencies in financing the construction of new fixed guideway systems and the acquisition, construction, reconstruction, and improvement of facilities and equipment for use in mass transportation services. *Abstract:* The Urban Mass Transportation Administration (UMTA) has never previously assumed a stewardship role for the engineering of the large public works program it funds. This study examined the alternatives available to comply with the Office of the Secretary of Transportation insistence on UMTA's defining and assuming a stewardship role in this area by establishing on-site management teams. The study presented various alternatives available to the Administrator for improving UMTA's oversight responsibility for major rail construction projects.

**Availability:** GAO
**Geographic Relevance:** National; Standard Metro. Stat. Area (SMSA)

*Program Objectives:* The Urban Mass Transportation Administration is responsible for assisting in financing the acquisition, construction, and improvement of facilities and equipment for use by operation or lease or otherwise in mass transportation service and for the payment of operating expenses to improve or to continue such by operation, lease, contract, or otherwise. *Abstract:* The Department of Transportation is advocating a combined Federal and local 10-year capital investment in mass transit of about $53 billion to increase transit capacity and ridership by 50% by 1990. Transit capacity expansion can provide benefits in terms of less congestion and pollution, employment opportunities, and urban revitalizaiton. However, GAO is concerned that the decision to support transit expansion is being unduly influenced by the energy situation and the availability of windfall profits tax revenues and that not enough consideration has been given to potential adverse impacts of transit expansion on transit operating costs, deficits, and subsidies. Although the Federal Government has advocated greater use of ridesharing, progress has been slow in getting drive-alone commuters to switch to ridesharing. GAO believes that Congress should support separate Federal funding of ridesharing activities because: (1) ridesharing is the only practical alternative to driving alone for most commuters; (2) if serious gasoline shortages occur, ridesharing would have to become the predominant commuting mode; (3) doubling ridesharing would save at least three times as much energy; (4) separate Federal funding for ridesharing should help overcome State and local governments' reluctance to fund the activities; and (5) widespread availability of ridesharing assistance would help reduce drive-alone commuting.

**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Program Objectives:* The purpose of the transit subsidy program is to assist in financing the acquisition, construction, and improvement of facilities and equipment for use by operation or lease or otherwise in mass transportation service and the payment of operating expenses to improve or to continue such service by operation, lease, contract, or otherwise. *Abstract:* One reason for growing subsidy demands is that rising transit operating costs are not being offset by productivity improvements. Although labor accounts for 70% to 80% of operating costs, transit systems have difficulty in using labor efficiently because demand peaks during commuter rush hours. Transit systems are experiencing serious problems in maintaining their bus and railcar fleets. Many systems: (1) are not properly recruiting, training, and promoting their mechanics; (2) do not have adequate preventive maintenance programs; (3) are not properly controlling spare parts inventories; and (4) have restrictive work rules preventing the efficent use of maintenance personnel. The demand for operating subsidies is also growing because transit systems have adopted and maintained unrealistically low fares, even though operating costs are increasing. Congress should reconsider the 1974 legislative finding that the continued increase in fares is undesirable and adopt a goal for the Federal subsidy program that promotes efficient and equitable transit pricing. The Secretary of Transportaiton should direct the Administrator of the Urban Mass Transportation Administration (UMTA) to: (1) develop and issue policy guidelines defining the UMTA role and responsibility in encouraging transit productivity; and (2) undertake specific actions to improve transit productivity, such as requiring management studies for all systems of a certain size that receive Federal funds. The Secretary should also direct the Administrator to develop and issue policy guidelines encouraging local areas to: (1) establish local goals for the proportion of short- and long-term costs that fare revenue should cover; and (2) assess the efficiency and equity of present fares and examine alternative fare structures that might better reflect equity and costs.

**Authority:** Urban Mass Transportation Act of 1964, as amended (P.L. 88-365, § 3, as amended by; P.L. 95-599; 78 Stat. 302; 49 U.S.C. 1602).
**Availability:** GAO
**Geographic Relevance:** National; City

*Program Objectives:* The Urban Mass Transportation Administration's (UMTA's) Automated People Mover Demonstration Program assists in financing the acquisition, construction, reconstruction, and improvements of facilities and equipment for use, by operation, lease, or otherwise, in mass transportation service in urban areas and in coordinating service with highway and other transportation in such areas. *Abstract:* UMTA had spent about $14.4 million on nine projects through Fiscal Year 1979, and the May 1980 estimated Federal share of the projects was $675 million. UMTA has not adequately shown why each of the presently planned projects is needed to meet program objectives. UMTA officials believe that multiple projects are necessary to: (1) assure that at least one project is implemented; (2) test different technologies; (3) minimize the risk of failure to meet project expectations; and (4) reflect local differences such as climate and economic conditions which might affect project results. GAO did not believe these arguments justified the potential $675 million Federal investment in the demonstration projects. UMTA intends to compare people mover performances and impacts with selected alternatives such as bus and rail. The Secretary of Transportation should direct the Administrator, UMTA, to justify the need for each of the presently planned demonstration projects by specifically stating what program objectives are being addressed by each project and why these objectives cannot be met with fewer projects and to seek guidance from Congress if the congressionally directed projects are affected by this justification process. Further, the Secretary should direct the UMTA Administrator to: compare each people mover project with all potentially competitive transit alternatives; adjust the cost and performance data of transit alternatives for the effects of actions to improve their operating projects; conduct studies of transit alternatives to develop cost and performance information, if it is not readily available; clarify the evaluation plan for determining why changes occur in such factors as ridership and congestion in people mover project areas; and evaluate economic impacts of transit alternatives as well as people movers.

### E01105-015

*Massachusetts Bay Transportation Authority's Termination of Contract for Light Rail Vehicles.* (PSAD-81-11).
11/10/80; 9 pp.
**OMB Funding Code/Title:** 69-1119-0-1-401 / Urban Mass Transportation Fund
**Program:** Urban Discretionary Grants
**CFDA NO.:** 20.500
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Urban Mass Transportation Act of 1964, as amended (P.L. 88-365, § 3, as amended by; P.L. 95-599; 78 Stat. 320; 49 U.S.C. 1602).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* This review was concerned with the adequacy of procurement of light rail vehicles (LRVs) by the Massachusetts Bay Transportation Authority (MBTA) under the Urban Mass Transportation Administration (UMTA) and the subsequent termination of the procurement contract. MBTA has an obligation to achieve the original project objectives within the Federal funds committed at the time of the settlement. Considering the lack of UMTA involvement in monitoring the project, UMTA cannot be assured that MBTA will be able to achieve the project's approved objectives. The Secretary of Transportation should direct the UMTA Administrator, before granting the final approval of the MBTA financial settlement, to require: (1) MBTA to complete the original project objective without additional Federal funding beyond the $48.1 million already approved; and (2) UMTA to work with MBTA to establish a realistic schedule to achieve the 175 LRV project objectives and to monitor and provide any needed assistance and oversight to assure that the schedule is achieved. The Secretary should also direct the Administrator of UMTA to make sure that MBTA substantiates the nature, cause, and extent of damage to inoperable LRV's to assure that UMTA does not pay for damages caused by MBTA negligence or other causes which may be covered by insurance. UMTA should review the adequacy of the MBTA LRV management and operations for assuring that the delivered LRV's achieve their intended design life. UMTA should identify and require MBTA to implement the necessary improvements. UMTA should also perform a detailed analysis which lends credibility to its decision before granting acceptance, conditional or otherwise, to the termination of any third-party contract awarded using Federal funds. The grantee's performance should be monitored and reviewed to determine if the specification adequately achieves its objectives. The Secretary should direct the Administrator of UMTA to make sure that UMTA involvement policy with its grantees is reevaluated. When additional funds are requested, UMTA should be in a knowledgeable position to determine if such funds are actually needed and properly justified.

## NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

### E01107-001

*Analysis of Insurance Claims To Determine Bumper Effect on Crash Damage: 1979 Model Year.* (DOT-HS-805-843).
10/80; 52 pp.
Paul Abramson; Jay Cohen; Howard Stein
**Contractor:** KLD Associates, Inc.; Huntington Station, New York, NY
**OMB Funding Code/Title:** 69-0650-0-1-401 / Operations and Research
**Program:** Rulemaking Programs (Bumper Standards)
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** National Traffic and Motor Vehicle Safety Act of 1966 (P.L. 89-563, title I, § 103, 119; 15 U.S.C. 1392, 1407). Motor Vehicle Information and Cost Savings Act, as amended (P.L. 92-513, title I, § 102; 15 U.S.C. 1912).
**Availability:** Agency; NTIS
**Geographic Relevance:** National

*Program Objectives:* Federal Motor Vehicle Safety Standards are designed to reduce the frequency and severity of highway crashes by governing the characteristics of motor vehicles and equipment which influence the dynamic performance of driver-vehicle systems and to provide levels of protection which will reduce injury frequency and severity and economic loss resulting from accidents involving motor vehicles and equipment. *Abstract:* This report presents an analysis of insurance claim data to determine the effectiveness of bumpers in reducing damage to the front and rear of passenger cars.

**Agency Contact:** National Highway Traffic Safety Administration. (202) 426-1574.

**E01107-002**
*Statistical Evaluation of 7 Federal Motor Vehicle Safety Standards 108, 202, 207, 213, 214, 222, 301.*
10/80
**Contractor:** Center for the Environment and Man; Hartford, CT 06120
**OMB Funding Code/Title:** 69-0650-0-1-401 / Operations and Research
**Program:** Rulemaking Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** National Traffic and Motor Vehicle Safety Act of 1966 (P.L. 89-563, title I, § 103, 119; 15 U.S.C. 1392, 1407).
**Availability:** NTIS
**Geographic Relevance:** National

*Program Objectives:* Federal Motor Vehicle Safety Standards are designed either to prevent crashes or to reduce the risk of death or injury in a crash. *Abstract:* These seven studies examined State and other accident files to determine the effectiveness of each standard (108, 202, 207, 213, 214, 222, and 301) in reducing accident frequency or injury severity. The results from these analyses will be considered along with other data sources during the Agency's inhouse comprehensive evaluation of the Standards.

*An Evaluation of Federal Motor Vehicle Safety Standards 203 and 204: Steering Assemblies for Passenger Cars.*
1/81; 310 pp.
Charles J. Kahane
**OMB Funding Code/Title:** 69-0650-0-1-401 / Operations and Research
**Program:** Rulemaking Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** National Traffic and Motor Vehicle Safety Act of 1966 (P.L. 89-563, title I, § 103, 119; 15 U.S.C. 1392, 1407).
**Availability:** Agency; NTIS
**Geographic Relevance:** National

*Program Objectives:* Federal Motor Vehicle Safety Standard 203 specifies force limits for the steering column in order to reduce the risk of injury to the driver due to hitting the steering assembly in a crash. Standard 204 limits rearward displacement of the steering column in crashes. *Abstract:* The evaluation examines National Highway Traffic Safety Administration data files, existing accident studies, and laboratory and crash test results to measure the effectiveness and costs of Standards 203 and 204. The Standards were found to provide cost-effective protection for drivers in frontal impacts. They cost $10 per car. Benefits are 1,300 fatalities and 23,000 serious injuries prevented annually.

**Agency Contact:** National Highway Traffic Safety Administration. (202) 426-1574.

**E01107-006**
*Highway Safety Demonstration Programs.*
In process
**OMB Funding Code/Title:** 69-0650-0-1-401 / Operations and Research
**Program:** Highway Safety Programs
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of August 27, 1958 (P.L. 85-767; 23 U.S.C. 402, 403).
**Availability:** Agency; NTIS
**Geographic Relevance:** State; City; County

*Program Objectives:* Highway Safety Demonstration programs are designed to individually evaluate the highway safety benefits of specific program counter-measures in the areas of speed compliance, driving while intoxicated, pedestrian safety, driver education, driver licensing, motorcycle licensing, model traffic records, citizen participation in Highway Traffic Safety Programs, and traffic offense and adjudication and to document the most cost-effective strategy in each countermeasure for application at State and local highway safety program. *Abstract:* A series of countermeasure demonstrations in highway safety are currently underway, and results are incomplete. These demonstrations focus on the benefits of a new techniques and approaches to specific highway safety problems. As they are developed and evaluated, this information is passed on to States and communities to assist them in the operation of their countermeasure programs. Each of these demonstrations is scientifically designed to measure impact of a countermeasure in an operational environment over a period of 3 to 5 years. This involves the use of random assignment of participants to control and treatment groups. As a consequence, approximately 30% of program funds are dedicated to the evaluation activity.

## RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

**E01112-001**
*An Analysis of Functions and Workload of the TSC Office of Administration.*
In process
Richard A. Keene
**OMB Funding Code/Title:** 69-4522-0-4-407 / Working Capital Fund, Transportation Systems Center
**Program:** Transportation Research
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of March 4, 1915, as amended (P.L. 63-292, § 1; 31 U.S.C. 686).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This study is being conducted to determine how the organization and personnel of the Transportation Systems Center (TSC) Office of Administration can adapt best to changing program support requirements. After evaluating the size, structure, staffing, and funding levels of the various components of the TSC Office of Administration, a number of options are being developed to improve the effectiveness and efficiency of that Office. Performance of functions by alternate staffing systems is being studied.

*National Transportation Research Division Paperwork Flow Study Report.*
6/17/81; 48 pp.
Mary T. Monan; Maryann C. Foley
**OMB Funding Code/Title:** 69-0104-0-1-407 / Research and Special Programs
**Program:** Operations
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Department of Transportation Act, as amended (P.L. 89-670, § 4; 49 U.S.C. 1653).
**Availability:** Not Publicly Available

*Abstract:* The purpose of this study was to assess the flow or paperwork in the National Transportation Research Division. This analysis encompassed a review of the entire paper flow from the Division to branches and vice versa. During the course of the study an overall need for improvement was found in three general areas: filing, mail handling, and tracking/suspense systems. The implementation of standardized office procedures (which were described in detail in the report) in order to insure maximum efficiency in the common problem areas was recommended. The recommendations were adopted by the Division.

*Enhancing TSC's Capabilities To Respond to Quick Reaction Requests.*
11/18/80; 8 pp.
Linda M. Noonan; Maryann C. Foley
**OMB Funding Code/Title:** 69-4522-0-4-407 / Working Capital Fund, Transportation Systems Center
**Program:** Transportation Research
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of March 4, 1915, as amended (P.L. 63-292, § 1; 31 U.S.C. 686).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* An Examination of the Transportation Systems Center's (TSC's) past and current experiences in dealing with quick reaction requests was conducted for the purpose of developing recommendations for strengthening this capability while minimizing negative impacts on on-going projects. Material documenting Department of Transportation requests for quick reaction assistance from TSC and indicating TSC's response was reviewed and discussions were held with technical staff. Based on this review, quick reaction requests were characterized, and TSC's response was found to be excellent. Recommendations were made for maintaining and even improving upon this record.

*Organizational and Programmatic Alternatives Related to Technology Sharing and Public Information.*
6/81; 4 vols./23 pp.
Linda M. Noonan
**OMB Funding Code/Title:** 69-4522-0-4-407 / Working Capital Fund, Transportation Systems Center
**Program:** Transportation Research
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science, and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of March 4, 1915, as amended (P.L. 63-292, § 1; 31 U.S.C. 686).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This effort consisted of a series of studies to determine options for the Transportation Systems Center (TSC) to expand or reorganize its technology sharing and public information activities in order to meet changing programmatic and legislative requirements. The first two parts of this exercise were related to the Stevenson-Wydler Technology Innovation Act (P.L. 96-480) and included an analysis of key points relevant to the TSC and alternatives for implementing the Act of TSC. Since funding for this program was not forthcoming and the role anticipated for TSC did not eventuate, these questions have since become moot. Subsequent studies were undertaken to assess the organizational structure of public information and technology sharing functions to develop alternatives for improved operations and effectiveness.

**OMB Funding Code/Title:** 69-4522-0-4-407 / Working Capital Fund, Transportation Systems Center
**Program:** Transportation Research
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Act of March 4, 1915, as amended (P.L. 63-292, § 1; 31 U.S.C. 686).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* A committee has been established to identify and implement measures to reduce or avoid the costs and increase the efficiency of Transportation Systems Center (TSC) operations. All TSC activities, regardless of funding source, will be reviewed with a goal of saving approximately $600,000. The committee has been examining a variety of areas, including telephone services, library services, training, computer services, and others to identify and implement cost saving measures. Specific cost reduction and efficiency increasing measures will be proposed and incentives to achieve cost reduction and improved efficiency will be developed.

**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 2, 1789 (64 Stat. 1280; 5 U.S.C. App.); Reorganization Plan 26 of 1950.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Federal Tax Deposit Forms are mailed by the Bureau of Government Financial Operations (BGFO) to taxpayers identified by the Internal Revenue Service (IRS). The study investigated whether the mail-out function should continue to be performed by BGFO or would be more properly resident with IRS. The evaluation recommended that the Federal Tax Deposit mail-out function be transferred from BGFO to the IRS if a Fiscal Year 1982 test of optical character recognition, to be conducted jointly by IRS and BGFO, is successfully completed and that BGFO and IRS jointly prepare a schedule for the transfer. Additional items which have potential for improvement or savings were included with recommendations for followup consideration by BGFO and IRS.

**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 1, 1789 (64 Stat. 1280; 5 U.S.C. App.); Reorganization Plan 26 of 1950.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The report addresses the potential for other methods of Federal Tax Deposit (FTD) payment reporting as a means of reducing paper processing. It also presents the results of a survey of Optical Character Recognition (OCR) users having applications similar to the FTD process. The report finds that the greatest potential for reducing Federal tax deposit paper processing is in the area of electronic message switching. The Bureau of Government Financial Operations (BGFO) intention to continue with plans for a comprehensive study is endorsed by the study group. The study group does not view magnetic media-filing of FTD information as a component of an ultimate FTD system but recommends that IRS consider such arrangements with large volume depositaries and keep BGFO informed of developments.

**Authority:** Act of September 2, 1789 (64 Stat. 1280; 5 U.S.C. App.); Reorganization Plan 26 of 1950.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* A study of the proposed conversion to the zinc-based penny shows that energy savings would equal 2,500 billion BTUs, assuming production of 12.5 billion zinc pennies per year. This represents a savings of more than $10 million to the coinage metal fund, an off-budget account, as well as more than $1 million in interest payments that would be added to the public debt. In 1990, the energy usage for the proposed penny will be less than current energy usage of the existing penny.

*Abstract:* The report documents efforts during Fiscal Year 1980 on the part of the Internal Revenue Service; Customs; the Bureau of Alcohol, Tobacco, and Firearms; the Bureau of Government Financial Operations; and the Bureau of the Public Debt to improve check deposit procedures and to identify additional improvements which can be made to measure interest-saving practices not now measured. Interest savings resulting from initiatives identified in this study were estimated to total $139.5 million for FY 81, computed on the basis of uniform interest rate factors, where applicable. Additional deposit procedures and management procedures were identified for monitoring and/or implementation.

*Abstract:* This report describes the progress and remaining problem areas in cleaning up the backlog in the Division of Check Claims of the Bureau of Government Financial Operations. On balance, the report reflects some progress but a number of previously undiagnosed problems continue to plague Bureau Operations, particularly with respect to interaction with the Federal Reserve Banks.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of the study was to examine the capacity of the U.S. Mint to meet production requirements through 1985 and beyond. The study concluded that, without significant expansion, the U.S. Mint could not meet coinage demand after 1982. The study recommended approval of an in-house expansion/improvement plan, retention of the West Point Bullion Depository as a minting facility, exploratory analysis to obtain property for future expansion, and introduction of a more systematic approach to production workload distribution.

Internal Revenue Code of 1954, as amended (P.L. 83-591; 68 Stat. 901; 26 U.S.C. 7602). Foreign Earned Income Act of 1978 (P.L. 95-615, § 4201; 68 Stat. 289; 26 U.S.C. 911, 913).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* The congressional intent in passing the Foreign Earned Income Act was to create greater equity between people working abroad and at home and to provide benefits for the U.S. economy by encouraging Americans to work in hardship areas. This was to be achieved by providing a series of tax deductions for the excessive costs of living and working abroad and a special tax exclusion or deduction for those working in foreign hardship areas. *Abstract:* U.S. taxes were an important factor in reducing the number of Americans employed overseas. The tax laws do not fully relieve American workers from taxes on income reflecting the excessive costs of living and working abroad. Companies generally reimburse overseas employers for their additional tax burden, making Americans more costly than citizens of competing countries, who are generally not taxed by their home countries. The complexity of the new tax laws makes compliance difficult and expensive. GAO urged that the Congress consider placing Americans working abroad on an income tax basis comparable to that of citizens of competitor countries by providing a complete or generous exclusion of foreign earned income.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* In the late 1960s, Congress enacted legislation which urged the establishment of independent review and evaluation systems in the multilateral development banks: the Inter-American Development Bank, the World Bank, and the Asian Development Bank. Each bank has established independent evaluation systems consistent with standards suggested by GAO. The Inter-American Development Bank has taken a number of steps to improve its review and evaluation program, many of them suggested by prior GAO reports. However, since the Bank's reorganization, only two evaluation reports have been authorized and completed. The World Bank has supported the development and improvement of its independent evaluation system. However, GAO has criticized the Bank's system of not directing evaluations toward the formulation of recommendations. The Asian Development Bank has continued to improve its independent evaluation system through increased interaction with its board of directors. GAO believes, however, that the Bank should take steps to ensure a more comprehensive mixture of operation, sector, and project reviews in its evaluation reports.

*Abstract:* Although the contribution of financial resources is controlled and scrutinized by the United States, human resources support receives relatively little attention. In the World Bank, the Inter-American Development Bank, and the International Monetary Fund, Americans work throughout the institutions with relatively high representation at management levels and represent the largest nationality in each institution. American employment at the Asian Development Bank is relatively low by comparison, and Americans are not worsen unless the United States takes ameliorating actions. The major impediment to hiring and retaining Americans at the institution is that the salaries of American after taxes is too low.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The program seeks to stem the illegal flow of narcotics entering the United States via aircraft. *Abstract:* The Air Program test, which ran from November 3, 1980, to April 1, 1981, was performed to test the validity of a new Air Program interdiction strategy. Preliminary findings indicate that practically all of the test objectives were met and exceeded. It was proven that trained personnel using modern equipment and sound operational tactics, in an area of high smuggling activity, can make numerous narcotic seizures and arrests. The test was responsible for the arrest of 36 smuggling pilots and for 33 seizures of narcotics. The test objective for both of these categories was 23.

**Authority:** Tariff Act of 1930, as amended (P.L. 71-361, title IV, § 401, as amended by; P.L. 95-410; 19 U.S.C. 1401-1403, 1461-1463, 1499).
**Geographic Relevance:** New Orleans Region

*Program Objectives:* The objective of the management inspections process is to assist Customs management in achieving the most efficient and effective administration of the Customs mission. The inspections concentrate on operational effectiveness and prevention and detection of fraud, waste, and abuse. *Abstract:* The mission is adequately managed. The region is not organizationally efficient as the ratio of regional headquarters is 5.3 to 1 versus about 10 to 1 for other regions. A recommendation was either to increase geographic size of region or reduce administrative support provided within the region. Operationally, the regional staff should be actively involved in the analysis procedures and allocation of resources. Enforcement activities are not coordinated nor are there measurable goals and objectives. A newly developed internal control program was not operational. Several areas in logistic management are deficient and included no contracting officer, inadequate facility management, and inaccurate nonexpendable property records. The region should establish an enforcement strategy, analyze operational procedures and allocate resources accordingly, establish responsibility for the internal control program, provide contract training and authority, and prioritize facility projects.

## BUREAU OF GOVERNMENT FINANCIAL OPERATIONS

**E01204-001**
*EEO Analysis: Special Study.* (GF2-03-81).
12/31/81
**OMB Funding Code/Title:** 20-1801-0-1-803 / Salaries and Expenses
**Program:** General Financial Services
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Equal Employment Opportunity Act of 1972 (P.L. 92-261; 86 Stat. 103; 42 U.S.C. 2000e); Executive Order 11478.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** City

*Program Objectives:* The objective of the Equal Employment Opportunity (EEO) program is to acquire a workforce in higher grade positions which is more equitably representative of minorities and women. *Abstract:* This special study, which commenced in January 1979, was designed to discover new areas for intensive Bureau of Government Financial Operations efforts and to alert management of any necessary corrective action. This project entailed conducting a special analysis of available data on the Bureau's past efforts in various minority programs and making recommendations which would rectify the underrepresentation of minorities and women in higher grade positions. As a result of this study, the Bureau established a goal of filling 40% of the available opportunities to hire and promote in grades GS12 and above with minorities and women. The program is achieving excellent results. A final report of accomplishment in rectifying underrepresentation of minorities and women in higher grade positions will be completed at the close of Fiscal Year 1981.

*Status Report: Check Claims Program.* (US1-01-81).
7/81; 47 pp.
Carson Fleetwood
**OMB Funding Code/Title:** 20-1801-0-1-803 / Salaries and Expenses
**Program:** Disbursement and Claims (Adjudication and Settlement of Check Claims)
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of February 2, 1872 (31 U.S.C. 528); Revised Statute 3646.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The report is to update previous information furnished to the Office of Management and Budget on check claims, outline various improvement efforts in progress, and identify areas for future consideration. The primary focus is the need to stress the Direct Deposit Program. The report shows that progress has been made in resolving problems hampering the Administration of the Check Claims Program. Complete solutions lie in reducing or eliminating the source of claims workload because of the heavy demand the system places on the limited resources available. The key program to accomplish this objective is the Direct Deposit Program which eliminates payment to Government beneficiaries by check.

*Audit of Treasury Tax and Loan Investment Program (FY 1979) BGFO 80-59, August 1980.* (GF1-05-81).
8/12/80; 14 pp.
Thomas R. Fisher
**OMB Funding Code/Title:** 20-1801-0-1-803 / Salaries and Expenses
**Program:** Banking and Cash Management (Federal Reserve Bank Operations)
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of June 11, 1942, as amended (P.L. 77-603, § 10; 56 Stat. 356; 12 U.S.C. 265). Act of October 28, 1977 (P.L. 95-147; 91 Stat. 1227; 26 U.S.C. 6302).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Audit Staff, Bureau of Government Financial Operations (BGFO), conducted its first in-house audit of the Treasury Tax and Loan Investment (TT&L) Program during the period of October 22, 1979, to March 21, 1980. The audit was to determine that: (1) Federal Tax Deposit (FTD) fees paid to TT&L depositaries and interest credited to the Treasury are accurately computed and recorded; (2) depositaries' transmission of advices of credit and pledging of collateral are adequately monitored; (3) depositaries are categorized properly in accordance with their flow of TT&L funds; (4) deposits to and withdrawals from TT&L and note accounts are recorded properly; and (5) adequate internal controls and procedures exist. The audit covered TT&L operations in the Bureau for Fiscal Year 1979. It showed some minor problems during the first year of the new program, specifically that (1) TT&L data reported on the Daily Balance Wires by Federal Reserve Banks (FRBs) and branches did not correspond with previously reported TT&L balances; (2) the Funds-in-Transit reports provided by the FRBs were either not accurate or had not been developed by approximately 40% of the FRBs at the time of the audit; (3) Debit Vouchers (SF 5515) relating to FTD fees and analysis credits were not received in the Bureau on a timely basis; and (4) one of the FRBs was not computing analysis credits correctly for the test reporting cycle of July 5 to August 1, 1979.

### E01204-005

*Review of Direct Deposit/EFT System BGFO 80-18, June 1980.* (GF1-06-81).
July 17, 1980; 72 pp.
C. Samuel McGeorge
**OMB Funding Code/Title:** 20-1801-0-1-803 / Salaries and Expenses
**Program:** Disbursement and Claims (Payments)
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** 5 U.S.C. 901 note; Reorganization Plan 3 of 1940; Executive Order 6166; Executive Order 6728.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Assistant Fiscal Assistant Secretary expressed a desire to have the entire cycle of the Direct Deposit/Electronic Funds Transfer (DD/EFT) System reviewed: to determine that the system contains adequate procedures; to assure proper control, security, accountability, and system integrity; to improve service to recipients of Government benefit payments; to provide a vehicle to effectively cope with payment volume increases; and to realize significant cost savings through EFT. The review was a financial and operational examination and evaluation of various Treasury disbursing operations and visits to program agencies, Federal Reserve banks, and a number of financial organizations. The system review included examination on a test basis of transactions, accounts, and reports from financial and operational standpoints to evaluate overall internal controls and compliance with applicable laws and regulations. Overall conclusions are that the System is a viable, effective, and cost-saving method for the U.S. Government. Recommendations were made to help resolve problem areas associated with the aftermath resulting from the DD/EFT payment process and the timeliness with which an initial participant receives the first DD/EFT payment.

**Authority:** Act of June 11, 1942, as amended (P.L. 77-603, § 10; 56 Stat. 356; 12 U.S.C. 265). Act of October 28, 1977 (P.L. 95-147; 91 Stat. 1227; 26 U.S.C. 6302).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The motivations for the Direct Deposit Electronic Funds Transfer System are: improvements in service to recipients of Government payments, ability to effectively handle payment volume increase, and reduction in Government operating costs in the payment mechanism. Determination of the impact of Direct Deposit on a financial organization's bottom line includes a cost comparison of Direct Deposit versus the traditional methods of processing Treasury checks (over-the-counter and mail deposits) and analysis of the daily account balances for direct depositors (prior to and after signing up for Direct Deposit). A cost/benefit model is being developed that can be used by all financial organizations in determining the profitability of Direct Deposit. The model will include only direct costs; however, it is flexible so that overhead costs may be included. The model is developed for various levels of sophistication.

*Abstract:* A risk analysis of the Data Processing Branch, Division of Management and Support Services was conducted to measure the relative vulnerabilities of the installation so that security resources could be effectively distributed to minimize potential loss. The risk analysis included collection and review of existing documentation, interviews with management and key personnel, and observation of vulnerabilities and threats to the automatic data processing (ADP) processing capability. Findings were then documented and checklists developed. Recommendations were made for ways to minimize threats and vulnerabilities to the ADP processing capability. An action plan is being developed to implement recommended actions contained in the report.

**Authority:** Second Liberty Bond Act, as amended (P.L. 65-43, § 1, 5, 18, 22; 40 Stat. 288; 31 U.S.C. 752-754, 757c).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This study reviewed the procedures for calculating the administrative expenses incurred by the Bureau of the Public Debt which were charged to the Social Security Trust Funds. The reasonableness of the charges to the Funds was also examined. The study concluded that since the Accounting Review Branch does not process any issue and redemption transactions for the trust fund accounts, their operating costs do not constitute an element of cost relating to the trust fund expenses. It was recommended that the operating costs of the Accounting Review Branch not be included in the formula for calculating Social Security Trust Fund expenses. This will ensure that only relevant costs are charged as administrative expenses.

*Abstract:* The taking of physical inventory of unissued bearer Treasury securities was witnessed in order to determine if the physical inventory procedures were sufficient to ascertain the number and dollar amount of unissued bearer securities on hand, if adequate accountability records were being maintained, and if proper internal control and security measures were implemented during the inventory. The verification of the inventory totals to the accounting control records and the month-end accountability statement produced no discrepancies. The appropriate internal control procedures and security measures were in effect during the physical inventory.

**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This review was conducted to determine whether or not the Parkersburg Savings Bond Operations Office was complying with prescribed policies and collection procedures related to accounts receivable for Series E, EE, H, and HH U.S. Savings Bonds. Approximately $445,225 in delinquent accounts receivable was found to be outstanding, and interest was not charged on these accounts. The Bureau of the Public Debt has not communicated with credit bureaus, either to report delinquent accounts or to request locator assistance. The report recommended that the Bureau either abide by the regulations established for the collection of accounts receivable or obtain an exemption from these regulations.

**Availability:** Agency

*Program Objectives:* The Bureau of the Public Debt provides all necessary administrative support for the debt management policies of the Secretary of the Treasury pursuant to the authority of the Second Liberty Bond Act. The Bureau's responsibilities include the performance or direction of all operating and accounting functions required in issuing, servicing and retiring Treasury and Agency securities and United States Savings Bonds and Notes. *Abstract:* The Bureau reports to the Internal Revenue Service (IRS), via magnetic tape, interest income on redeemed Series E and EE savings bonds issued since January 1974, when the Bureau converted the basis of its individual holdings master file from alphabetic (alpha) data to social security number (SSN). Initially, at the request of the IRS, the Bureau captured four alpha characters in addition to the SSN. In 1976, however, the alpha data capture was discontinued as part of an effort to reduce costs. Since then, the IRS has maintained the necessity of the alpha characters to insure reporting accuracy. The Bureau recently initiated a study, at the request of the IRS, to determine the accuracy of the alpha characters the IRS system associates with the SSN data reported by the Bureau's system. Approximately 130 staff years could be saved if the results of the study reflect a high degree of reporting accuracy without the alpha data.

**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The Bureau of the Public Debt is responsible for providing all necessary administrative support for the debt management policies of the Secretary of the Treasury pursuant to the authority of the Second Liberty Bond Act. The Bureau's responsibilities include the performance or direction of all operating and accounting functions required in issuing, servicing, and retiring Treasury and Agency securities and United States Savings Bonds and Notes. *Abstract:* To alleviate problems resulting from the ever-increasing volume of savings bond records, the governing regulations were amended to permit destruction of records of securities redeemed more than 10 years ago. In this regard, a study was initiated to determine which records could be destroyed without a significant impact on operations or the level of service provided to the public. Procedures were developed to identify and destroy such records within the guidelines of the appropriate security regulations and to provide for the recovery of precious metals (silver) from negative microfilm records as required by the General Services Administration. Although the physical destruction of such records has not been completed, significant benefits expected include: better space utilization, simplified storage and searching procedures, and a return to the government on the approximately 6,000 troy ounces of silver to be recovered from the discarded negative film.

*Abstract:* This audit of the Series H and HH savings bonds' interest payments was conducted to ascertain the accuracy of semiannual interest payments, to determine whether the payment authorizations were in compliance with Department of the Treasury regulations, to assist Bureau of the Public Debt management in the evaluation of adherence to policies and procedures, and to detect any fraudulent, unauthorized, or erroneous activities. No discrepancies were noted. The semiannual interest payments for March 1, 1981, were computed accurately, in an efficient and timely manner, and in accordance with applicable Federal regulations. Sufficient internal controls were being utilized.

**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This post-award audit of the contract between the Bureau of Public Debt and SAID, Inc. was conducted to determine whether services contracted for were actually received, the propriety of invoice payments, and the degree of user satisfaction and to determine whether Bureau operating personnel were complying with Treasury Fiscal Requirements Manual, Vol. I, part 6-8040.30 and the General Accounting Office Policy and Procedures Manual, Title 7, Sect. 24.8 covering the processing of cash discounts. The audit of this contract for key-encoding services revealed that the contractor was complying with the specifications of the contract and that Bureau personnel were satisfied with the contractor's quality of performance. It was found that invoices from SAID, Inc. were not being processed by Bureau personnel on a timely basis in order to take advantage of cash discounts offered. A recommendation was made that the procedures should be adhered to and that failure to take cash discounts should be fully explained. Also, differences were found between the record count on the contractor's shipping invoices and corresponding entries on the records maintained by the DIA. A recommendation was made that these differences be investigated in order to monitor more effectively the accuracy of charges for services received.

**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The Bureau of the Public Debt is responsible for providing all necessary administrative support for the debt management policies of the Secretary of the Treasury pursuant to the authority of the Second Liberty Bond Act. The Bureau's responsibilities include the performance or direction of all operating and accounting functions required in issuing, servicing, and retiring Treasury and Agency securities and United States Savings Bonds and Notes. *Abstract:* The Savings Bond Operations Office has tentatively scheduled a study to determine the feasibility of automating its activities related to the establishment, tracking, and collection of accounts receivable. The study will involve receivables arising out of overpayments of semiannual interest on Series H/HH bonds, overpayments of principal on all savings bond series, and final interest paid at time of redemption on some series. Significant benefits to be realized through automation include elimination of manually maintained ledgers, timely creation and maintenance of accounts, streamlined postings of debit and credit transactions to accounts, and provision for monthly summary account activity reports in an automated fashion.

*Abstract:* This study was conducted to identify organizational barriers which either hinder or prevent women and minorities from applying for and/or being selected for Management Career Programs or the Executive Selection and Development Program in the Internal Revenue Service (IRS) and to recommend specific methods for improving the representation of women and minorities at managerial and executive levels. The study involved a comprehensive review of the impact of IRS rules, regulations, and procedures affecting the selection, promotion, and development of women and minorities in the service. The first phase report offered a number of recommendations which for the most part have been implemented. The second phase, comprising an analysis of a questionnaire, has also been completed and the analysis submitted to IRS by the contractor.

*Program Objectives:* The Taxpayer Service Assistance Program is designed to provide prompt, courteous, and accurate assistance to all taxpayers who call, write, or visit Internal Revenue Service assistance centers for help in complying with the tax laws and regulations and to provide all taxpayers with equal access to Taxpayer Service Assistance regardless of geographic location, time, or day of week. *Abstract:* The following problems were noted: taxpayer correspondence, meeting program criteria, is not always referred for control; service center responses to taxpayer inquiries are not always clear, complete, and pertinent to the problem; the Service does not always acknowledge or apologize for Service-caused errors; and specific national guidelines on methods to be used in problem analysis have not been established. Actions will be initiated to correct these problem areas.

*Program Objectives:* The Fiscal Management Division provides the liaison with the Department of the Treasury and the Office of Management and Budget for travel budget information and ceilings. The Internal Revenue Service's Financial Plan Managers are responsible for monitoring travel to ensure budget ceilings are not exceeded and for directing official traffic. *Abstract:* This study was designed to determine whether national, regional, and district management personnel are effectively and efficiently planning, controlling, and directing official travel. Specifically, the study will: determine the adequacy of methods and controls over budget formulation; determine the adequacy of the management system to control travel expenses; determine the effectiveness of the Service in implementing the Acting Commissioner's Fiscal Year 1981 Travel Guidelines (12/1/80) to conserve travel funds; and determine the adequacy of controls and procedures to ensure recovery of unearned revenue by air carriers as a result of unused purchased transportation.

*Abstract:* The Internal Revenue Service conducts various studies regarding the effectiveness of ongoing programs and the need for new programs to measure taxpayer noncompliance. This study is being conducted to determine the effectiveness of the Service's efforts to select and prioritize programs for detecting and measuring taxpayer noncompliance; whether studies are coordinated between various Service components; the adequacy of the studies, conclusions and recommendations and the effectiveness of actions taken in response to the studies; and the effectiveness of the Service's system to measure study results and management and corrective actions.

*Program Objectives:* Criminal Investigation Division (CID) programs are directed toward achieving the highest possible degree of voluntary compliance with Internal Revenue laws by enforcement of the criminal statutes within CID jurisdiction. Since compliance with the tax laws cannot be determined solely by reference to information on tax returns and other documents within Internal Revenue Service files, the Service must obtain information from outside sources for the effective administration of tax laws. *Abstract:* This study was designed to determine whether: information gathering activities are justified, properly authorized, and completed timely within the scope of the authorizations; the information being solicited and retained is tax related; the informant activity is properly authorized and monitored, informants are not obtaining information illegally, and payment procedures are adequate; the investigative imprest funds are properly controlled and accounted for; and General Accounting Office recommendations in these areas have been effectively implemented.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* Toll-free telephone site consolidations have been effected by the Internal Revenue Service in an effort to reduce annual recurring operating costs. These actions have been based on the results of two Service studies (1977 and 1979) which showed consolidation to be cost effective. Three consolidated sites have completed 1 to 2 years of operation and the annual recurring costs of these operations have been analyzed. Results to date have shown that some consolidations have saved money and others have increased costs. Because of the time frames evaluated (1 to 2 years of operation), no final conclusions can be made on this program. Also, because of the lack of base year data, the impact of overall telephone program changes (i.e., the Problem Resolution Program) limits the degree of accuracy which can be realized. However, based on performance to date and recent recommendations of an internal audit review, a decision has been made to conduct a complete reevaluation of program expectations.

*Program Objectives:* The purpose of the Criminal Investigation Division (CID) is to encourage and achieve the highest possible degree of voluntary compliance with Internal Revenue laws by: (1) identifying the existence of areas of willful noncompliance by taxpayers; (2) enforcing the statutory sanctions applicable to income, estate, gift, employment, and certain excise taxes through the investigation of instances of possible criminal violation of such laws, and the recommendation of prosecution and/or the assertion of the 50% ad valorem penalty to the tax in order to create the broadest possible impact on public attitudes toward tax compliance; and (3) coordinating criminal tax fraud enforcement with other Federal, State, and local law enforcement. *Abstract:* The Industry Coverage Guidelines are a tool to be used by management in allocating CID's limited resources in the general enforcement area. A pilot study of the Guidelines was conducted in the Midwest and Southwest Regions during Fiscal Year (FY) 1980. During the Executive Conference in October 1979, it was recommended and agreed that the Guidelines should be tested nationwide during FY 1981.

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This is pursued through the measurement of the types and degrees of compliance and through the reduction of noncompliance by maintaining, within resource constraints, optimum levels of examinations for all classes of tax returns and by improving methods of identifying those returns most in need of examination. *Abstract:* The purpose of this continuing study is to review the approximately 90 provisions in the Internal Revenue Code which permit deferral of taxes (with various limitations or with recapture requirements if certain actions occur in the future) to determine the desirability and feasiblity of monitoring each such provision. Data concerning the number of returns involved, compliance levels, potential tax benefits, and costs to monitor the various provisions will be developed to the extent possible. This continuing study does not have a completion date; however, as each phase (i.e., Code provision) is completed, a report with recommendations is prepared. To date, a potential tax shelter partnership identification system has been implemented; 3 monitoring systems have been designed for implementation; and 12 test projects have been undertaken. A final report on one, the State Income Tax Refund Test, is in clearance.

*Abstract:* The current Questionable Form W-4 compliance program was developed because of the increasing concerns of Internal Revenue Service officials over widespread abuse of the income tax system by tax protestors and others who file erroneous Forms W-4 to avoid withholding of income tax from their wages. The overall objective of this study is to determine whether the Service has established an effective program for identifying and correcting questionable Forms W-4. Specific objectives are to: determine if a uniform Service-wide program was established to evaluate the extent and impact of Form W-4 noncompliance; determine the effectiveness of the criteria used for identifying and selecting Form W-4 cases; determine the effectiveness of Service programs for monitoring and evaluating employer compliance with Employment Tax Regulations and Form W-4 filing requirements; and determine if processing procedures were effective in timely identifying and correcting improper Forms W-4.

*Program Objectives:* The purpose of the Collection Division is to enhance compliance with the tax laws by securing returns and payments from businesses and individuals who, according to Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on IRS master files and have not filed the required returns. *Abstract:* The objective of this study is to evaluate the Currently Not Collectible Accounts Program and improve its efficiency and effectiveness.

*Program Objectives:* The purpose of the Collection Division is to enhance compliance with the tax laws by securing returns and Payments from businesses and individuals who, according to Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on IRS master files and have not filed the required returns. *Abstract:* The objective of this study is to determine whether the Federal Tax Deposit Alert Program is effective in preventing TAX Deposit Alerts and/or Tax Deposit Investigations. The study should also answer the question of whether some sort of screening through the Collection Office function would provide a more efficient means for processing alerts, sending only those cases to the field which require revenue officer contact.

*Program Objectives:* The purpose of the Criminal Investigation Division is to encourage and achieve the highest possible degree of voluntary compliance with Internal Revenue laws by: (1) identifying the existence of areas of willful noncompliance by taxpayers; (2) enforcing the statutory sanctions applicable to income, estate, gift, employment, and certain excise taxes through the investigation of instance of possible criminal violation of such laws and the recommendation of prosecution and/or the assertion of the 50% ad valorem penalty to the tax in order to create the broadest possible impact on public attitudes toward tax compliance; and (3) coordinating criminal tax fraud enforcement with other Federal, State, and local law enforcement. *Abstract:* This study will address and accomplish the following objectives with respect to allocation of resources: determination of the definition of the Special Enforcement Program (SEP) and General Enforcement Program (GEP), determination of the balance of SEP and GEP, and determination of the priority within SEP. The study will also determine the basic criteria of SEP cases and the best source of SEP and GEP cases.

*Abstract:* The purpose of this study is to conduct a comprehensive analysis of computer-assisted and conventional ACD sites to determine the optimum work structure and operational techniques for effective work performance in toll-free answering sites. The study will examine the relative efficiencies of current operational techniques for filing and nonfiling seasons, in both conventional and computer-assisted ACD sites, using Fiscal Year 1980 operational data, anticipated benefits of enhanced equipment, and new operational techniques; develop a standard set of evaluative criteria for each portion of the analysis; and use hard data to determine the relative efficiencies of current configurations and to develop assumptions for an optimum site design.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This objective is pursued through the measurement of the types and degrees of compliance and noncompliance, and through the reduction of noncompliance by maintaining, within resource constraints, optimum levels of examinations for all classes of tax returns and by improving methods of identifying and selecting those returns most in need of examination. *Abstract:* The purpose of the study was to determine whether, in recent years, group managers have become overburdened with responsibilities which take them away from the most important functions and expectations of the position–training, evaluation, and development of subordinates and active involvement in program management, including quality development of cases and substantial issues. The objective of the study was to determine what can be done to allow Examination group managers to have the most time possible to devote to management of the program and development of their people. Prime consideration was given to the type of administrative or clerical support needed by group managers.

*Study of Future Exempt Organization Compliance Strategy.* (IR2-01-81).
12/80; 36 pp.
George Marcinko
**OMB Funding Code/Title:** 20-0914-0-1-803 / Investigations and Collections
**Program:** Employee Plans and Exempt Organizations
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Internal Revenue Code of 1954, as amended (P.L. 83-591; 26 U.S.C. 401, 501; 26 U.S.C. 7602).
**Availability:** Agency
**Geographic Relevance:** Southwest and Southeast Regions

*Program Objectives:* The Exempt Organization Division provides prompt approval of deuctibility and qualification for charitable and other exempt organizations; minimizes the need for such organizations to litigate to obtain recognition; provides the public with guidelines, assistance, and interpretation of the Exempt Organization tax law; provides for vigorous enforcement and regulatory activities through the identification and investigation of actual and potential areas of abuse; and continues the independent, impartial oversight of the exempt organization community. *Abstract:* The purpose of this study is to analyze exempt organization compliance strategy from several viewpoints. In this study, a combination of existing data from the EOMF and AIMS files, plus data to be gathered via Delphi questionaires and classification/examination data sheets, will be analyzed. These data sheets will be used in an operational test conducted in the Southwest Region and the results will be compared with those from a control region. The primary areas to be explored are the possible use of correspondence and interview examination techniques, a more meaningful measurement of the benefits achieved as the result of the Exempt Organizations examination program, workload distribution and related staffing, the effectiveness of the current selection system, and the need for legislative proposals to clarify the exempt organizations sections of the Code.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The appeals system provides taxpayers a means of resolving tax controversies without litigation by holding hearings with appeals officers who are independent of the district directors' operations. *Abstract:* This study recommended that the Appeals Division take action to: (1) correct the difference between the Revenue Procedure on docketed cases and the Internal Revenue Manual regarding time allowed for conferences to be offered on circuit ridden cases; (2) establish guidelines for uniform time standards for both docketed and nondocketed cases; and (3) establish uniform procedures for timely forwarding of protested cases to Appeals. Management is correcting the problems identified during the review.

**Program:** Data Processing Operations
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Internal Revenue Code of 1954, as amended (P.L. 83-591; 26 U.S.C. 7802, 7805); Reorganization Plan 1 of 1952.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The objective of the updated study was to establish the feasibility of an alternative solution for a Microfilm Replacement System. The study assumes without qualification that the additional equipment for the Internal Revenue Service (IRS) microfilm Replacement System (MRS) can be procured via the exercise of the Service Center Replacement System (SCRS) contract options clauses. This assumption would not be correct if the winning offeror of the SCRS contract award does not make the most advantageous offer to the Service. Management will request that the delegation of procurement authority cover a separate procurement of the additional SCRS equipment in the event it would be advantageous to do so. Also, the review verified that the cost assumptions and documentation prepared by the IRS support the projected benefits and anticipated costs.

**Geographic Relevance:** National

*Program Objectives:* The purpose of the Collection Division is to protect the Government's interests by using enforcement measures to collect unpaid tax liabilities while also protecting the rights and interests of affected taxpayers. *Abstract:* This study examined the effects of collection enforcement activities on businesses. Collection actions reviewed were not effective for preventing the same taxpayers from incurring additional delinquencies. The special deposit requirement to prevent delinquencies was not often used. Enforced Collection authority is not administered uniformly, either within or among Internal Revenue Service districts. Management plans to take the necessary actions to correct the problems, including revisions to collection procedures related to delinquency prevention and an intensive review to determine how Collection Division procedures can be modified to ensure that enforced collection authority is administered uniformly.

*Abstract:* The purpose of this review is to ensure that the Internal Revenue Service (IRS) properly defines its computer processing needs and selects a vendor who can best satisfy the Service's requirements in the most cost effective manner. The review showed that the IRS complied with all government regulations in processing the needed Service Center Replacement Equipment. Also, the vendor selection process was fair, consistent, and properly documented.

**Geographic Relevance:** National

*Abstract:* The study found that Internal Revenue Service managers had not uniformly implemented the new management followup system procedures and that the system did not include three assistants to the Commissioner. Semiannual reports to the Commissioner were not accurate in all cases and were not prepared consistently with the Internal Revenue Manual (IRM). Overall objective of this review was to assure necessary corrective actions are taken in response to internal audit findings. Management is in the process of preparing IRM revisions necessary to correct the problems.

*Abstract:* The objective of this study is to measure noncompliance by payees in reporting income reflected on Tax Year 1979 Forms 1099 NEC and to estimate the income tax and the social security tax impact of such noncompliance. The study will supplement the Internal Revenue Service's (IRS') 1979 study of employee/independent contractors and is needed to provide current information to the Department of the Treasury and to Congress in connection with the Administration's pending legislative proposal for withholding on payments to independent contractors. Tangentially, the study will also provide information needed by IRS to develop an effective matching program involving the use of these new documents.

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This objective is pursued through the measurement of the types and degrees of compliance and noncompliance, and through the reduction of noncompliance by maintaining, within resource constraints, optimum levels of examinations for all classes of tax returns and by improving methods of identifying and selecting those returns most in need of examination. *Abstract:* The purpose of the study is to determine the effectiveness of Discriminant Function (DIF) screening, whether the returns most in need of examination are selected for examination, and whether most profitable issues are identified for examination. Prior to the comprehensive Taxpayer Compliance Measurement Program (TCMP) III-6 (1976 individual returns filed in 1977) examination, high DIF-scored TCMP returns were screened to determine whether the return would have been selected for examination and, if so, which issues would have been identified. These classification actions will be matched against the results of the TCMP examination to evaluate the effectiveness of DIF screening. The study was initiated in January 1977 and is expected to be completed in January 1982.

*Program Objectives:* The Combined Annual Wage Reporting (CAWR) program was created with the objective of reducing the reporting burden for employees. Beginning with 1978 tax year information, employers were required to send wage and tax statement forms directly to the Social Security Administration (SSA). *Abstract:* The Internal Revenue Service (IRS) encountered problems during the first years of the CAWR Reconciliation involving both IRS and SSA processing procedures and workload demands. Management took corrective actions through program adjustments and guideline refinements throughout the 1980 program. To improve the 1981 CAWR program, the IRS should consider the following: (1) have SSA implement necessary controls to correct the major cause of mismatch cases; (2) Returns Processing should require that comprehensive studies be considered prior to full implementation to improve program planning and implementation; and (3) CAWR program processing procedures should provide for referral of all discrepancy cases to the Collection Division. Management is correcting the problems identified during the review.

*Program Objectives:* Understanding Taxes is an instructional program prepared by the Internal Revenue Service (IRS) and offered free of charge to high schools for incorporation into existing curriculum. *Abstract:* The purpose of this study was to review the entire Understanding Taxes Program in its current form and to identify practical modifications which would improve program utility. Questions addressed included: (1) What should be the long range goals of the Understanding Taxes Program? (2) What is the optimum format for Program materials? and (3) How can the IRS best promote the program and introduce it to the curriculum of most of the Nation's high schools? An implementation plan to execute the recommendations of the study's findings is now being developed.

*Program Objectives:* The purpose of the Collection Division is to enhance compliance with the tax laws by securing returns and payments from businesses and individuals who, according to the Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on IRS master files and have not filed the required returns. *Abstract:* This evaluation was conducted to determine reasons for the increase in filing of balance due returns. The main findings were that 54% of the cases were attributable to insufficient estimated tax, while 46% arose from underwithholding. Most underwithholding cases (68%) involved joint returns where both spouses had taxable wage income.

*Program Objectives:* The Collection Division is responsible for enhancing compliance with the tax laws by securing returns and payments from businesses and individuals who, according to Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on IRS master files and have not filed the required returns. *Abstract:* The purpose of this study is to evaluate the Service Center Collection Branch (SCCB) telephone contact procedures outlined in Internal Revenue Manual 5(18)40. Cases in the telephone call program will be reviewed with the objective of recommending modifications to the procedures. The telephone call program includes balance due cases, return delinquency cases, returns compliance program leads, and miscellaneous investigations (Form 2990). Data gathering will include the number of cases resolved by telephone call without further action, number resolved with additional action and type of action taken, and number of cases not resolved in SCCB.

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This objective is pursued through the measurement of the types and degrees of compliance and noncompliance, and through the reduction of noncompliance by: maintaining, within resource constraints, optimum levels of examinations for all classes of tax returns and improving methods of identifying and selecting those returns most in need of examination. *Abstract:* This study will analyze the characteristics of current and projected workloads for the Office Examination program to determine the skills, knowledges, and abilities (SKAs) needed to effectively perform the work. The conclusions drawn from the data gathered will allow determination as to whether a new occupation is needed or whether some other alternative is appropriate to improve the quality of the Examination workforce. The objectives of this study are to determine the skills, knowleges, and abilities needed to effectively perform current Office Examination work, to determine which candidates in the workforce possess the requisite SKAs, and to determine what changes in the training approach will be necessary as a result of any changes in the tax auditor occupation.

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This objective is pursued through the measurement of the types and degrees of compliance and noncompliance and through the reduction of noncompliance by maintaining, within resource constraints, optimum levels of examinations for all classes of tax returns and by improving methods of identifying and selecting those returns most in need of examination. *Abstract:* A General Accounting Office (GAO) study emphasizing quality examinations and the increased quality review responsibilities resulting from the implementation of one level of appeals resulted in this evaluation of Quality Review Staff Operations. The Region interviewed both technical and clerical personnel to determine all the duties that are performed in a Quality Review Staff. These duties were categorized both as indigenous, foreign, or optional to Quality Review Staff operations and by the person performing the duties. The physical layout of the Quality Review space was analyzed to develop an efficient workflow. The analyses have been completed for Indianapolis (November 1980) and Detroit (May 1981).

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This objective is pursued through the measurement of the types and degrees of compliance and noncompliance, and through the reduction of noncompliance by maintaining, within resource constraints, optimum levels of examinations for all classes of tax returns and by improving methods of identifying and selecting those returns most in need of examination. *Abstract:* Centralized Files and Scheduling was designed by the Southwest Region to physically store approximately 70,000 tax returns and to schedule initial appointments for 120,000 taxpayers utilizing locally developed computer applications for the five districts serviced by the Atlanta Service Center. This test of the system was completed as of March 1981. the test was conducted over a 36 month period, with operations segregated into three phases: Phase I, Centralized Files and Scheduling of Office Nonbusiness Returns; Phase II, Central Files for Office Business and Field Returns; and Phase III, Scheduling of Office Business Returns. Based on the results of the test, plans are being made for implementation of the system in other regions.

*Abstract:* The objectives of this study were to estimate the level of compliance of gambling payers and gambling payees by type of winnings and by whether or not taxes were withheld. The study found that payer compliance was fairly good, but that those payees with withholding were significantly more compliant with the tax laws than those with information documents only. Since the study dealt only with recipients of Forms W-2G, no estimate was made as to the compliance of those winners not receiving the form.

**Geographic Relevance:** National

*Abstract:* The objectives of this study were to estimate the level of compliance and the tax gap in this area of tax administration; determine the benefit/cost of a 100% Combined Annual Wage Reporting (CAWR) Reconciliation Program; and develop a case selection system for use if funding for a 100% program is not available. The study found the CAWR Reconciliation Program to be a cost effective one. If 100% of the cases were worked, an 11.5 to 1 benefit/-cost ratio could be realized. Using a workload selection system based on a formula developed by discriminant analysis techniques, about two-thirds of the benefits could be achieved by working 10% of the cases (about 40 to 1 benefit/cost ratio). Certain types of discrepancy cases were shown not to be cost effective.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Collection Division is responsible for enhancing compliance with the tax laws by securing returns and payments from businesses and individuals who, according to Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on IRS master files and have not filed the required returns. *Abstract:* This project will determine the feasibility of establishing a resource allocation model for Collection. Data will initially be secured for a limited model, using approximately three districts. These results will determine Collection's total available staff-years, to be determined by operational level for resource allocation would be the district, rather than the region. A certain portion of Collection's total available staff-years, to be determined by management (e.g., 70%), would be allocated on the basis of benefit/cost. The potential workload for the coming fiscal year will be assumed to approximate that of the past 12 months, unless circumstances indicate otherwise. A compilation of potential cases (TDA's and TDI's) for the latest 12 month period will be obtained from the master file. Using management-determined priorities by workload classes, the potential workload will be sequenced in priority (benefit/cost) order. An estimate will be made of the resources required for each workload category based on Collection Cost Gathering Test data. Integration of the cost data and the workload category data will provide the basis for determining the staff-years that would be required by a district to work cases at various priority levels. The expected completion date is January 1982.

*Program Objectives:* The purpose of the Collection Division is to enhance compliance with the tax laws by securing returns and payments from businesses and individuals who, according to Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on IRS master files and have not filed the required returns. *Abstract:* Samples drawn from selected first notice cycles for the Austin, Little Rock, and New Orleans Districts, covering the 10 workload leveling periods, will be analyzed to compare the proportion of cases in each sample group for which Taxpayer Delinquent Investigations (TDI's) are issued. The initial sample (control group) was selected during the first workload leveling cycle. Subsequent test groups were selected from cycles where the workload leveling Social Security Number digit was odd (i.e., 3, 5, 7, 9). The procedure enables measurement of the fallout attributable to delayed taxpayer contact. Each sample group was obtained through systematic random sampling and consists of 100 cases from each test district. Complete transcripts were obtained and analyzed. The study indicated that there was no significant adverse impact from workload scheduling.

The test is designed to obtain data and develop models that will predict return filing delinquencies. Several models will be developed based on taxpayer characteristics and different variables. A sample of 6,000 potential delinquents were selected in two service centers. These cases received maximum field processing. The completed cases were forwarded to the National Office for analysis, model development, and testing. The data secured in this study have been used to develop an IMF TDI case selection system.

**Geographic Relevance:** Southeast Region

*Program Objectives:* The objective of the Examination program is to encourage and achieve the highest possible voluntary compliance with the Internal Revenue laws for the correct reporting of income, estate, gift, employment, and certain excise taxes. This objective is pursued through the measurement of the types and degrees of compliance and noncompliance, and through the reduction of noncompliance by maintaining, within resorce constraints, optimum levels of examinations for all classes of tax returns and by improving methods of identifying and selecting those returns most in need of examination. *Abstract:* The Issue Tracking Test has been completed. Issue Tracking Systems are operational in the Southeast and Mid-Atlantic Regions. Recently time tracking by issue was integrated into the system. As opposed to a centralized system (manual or automated) in the National Office, it has been suggested that each region set up systems similar to those in place in the Mid-Atlantic and Southeast Regions. The decision to computerize will depend on the available capacity and closed case activity. The reports produced in the Regions would then be sent to the National Office, where they would be summarized. The existence of other priority programs is preventing the development of a centralized system at this time.

**Geographic Relevance:** National

*Program Objectives:* The purpose of the Data Services Division is to plan, direct, and coordinate the analysis, design, development, maintenance, and operation of data processing applications used in the administration and enforcement of Federal tax laws and regulations. *Abstract:* Data security standards need to be developed for use in evaluating the security of present computer systems and developing security features for future systems. Revisions to the Systems Control Point operating procedures and organizational placement are needed. Access to Internal Revenue Service computer systems through remote terminals could be more effectively controlled. Control over computer operations could be improved by establishing additional procedures and monitoring compliance with existing procedures. Guidelines need to require that emergency backup and recovery procedures and plans be developed. Management has initiated actions to correct all identified problem areas.

*Program Objectives:* The Collection Division is responsible for enhancing compliance with the tax laws by securing returns and payments from businesses and individuals who, according to Internal Revenue Service (IRS) records, had been filing a particular type of tax return and have not complied with the filing requirements for a specific tax period or who are not on the IRS master files and have not filed the required returns. *Abstract:* Since 1970, the IRS has accepted credit card company checks, but not regular credit card payment transactions. Several legal issues are involved, and credit payment transactions might delay the prompt deposit of taxes. On the other hand, accepting credit card payments would be convenient for taxpayers and would shift some collection costs to private firms. The objective of the evaluation is to determine if accepting Federal tax payments by credit card is beneficial. Another evaluation, Accounts Receivable Study, also considered this issue and recommended that credit cards not be used for Federal tax payments.

*Abstract:* The review showed that national and regional guidelines are adequate to implement, control, and monitor both regular and administratively uncontrollable overtime in the Internal Revenue Service. Overtime work should be ordered only in those instances where it is in the best interest of the Government to eliminate backlogs or accomplish work that cannot be deferred. Premium pay type duties should include a compelling reason to continue after normal working hours, for which failure to continue would constitute negligence.
